# PEDLAR'S PERFECT METAL CEILINGS AND WALLS

## You Can Sell More Metal Ceilings

Pedlar's "Perfect" Metal Ceilings will repay aggressive salesmanship, because they are best interior finish for a wide variety of buildings.

Recommend them for houses, stores, churches, lodge rooms, schools, public halls. They are fireproof and more durable than any other interior finish; easily put on, artistic in appearance; will never crack or fall away.

We have a large range of choice patterns and period designs.

## The Pedlar People Limited

*(Established 1861)*

Executive Office and Factories: Oshawa, Ontario

Branches:—Montreal Quebec Ottawa Toronto Winnipeg Vancouver

# TUNGSTEN and NITRO LAMPS

*DISTRIBUTORS:*

MUNDERLOH & CO., LIMITED

MONTREAL - CANADA

# Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

# IS THIS THE SOLUTION?

Another scheme to rectify the distressing prices now prevalent, by other than sound economic measures, was outlined before the Union of Canadian Municipalities which recently convened at Kingston.

## THIS RESOLUTION HITS YOU WHERE YOU LIVE

"We submit the principal root of the evil is the present wasteful, inefficient and antiquated method, or rather lack of method, of distributing the goods from the producer and manufacturer to the consumer—wasteful of time, labor, health, happiness and even human life—inefficient and antiquated in this age and to such an extent that even the huge economies effected by the greatest array of labor-saving machinery the world has ever seen are in a large measure rendered null and void. An ever-increasing army of unregulated distributors and relatively an ever-decreasing army of producers with the leaders of all these practising profiteering and price-manipulation as their fancy may dictate or opportunity may permit.

"Among the minor causes are the various classes of idlers and usurers, who in devious ways levy toll on labor and industry. Waste of time in high schools and colleges teaching dead languages and other unpractical subjects to the partial or total exclusion of vocational training, economics and useful branches of learning which would be of greater value for purposes of mind development and discipline and thereafter more useful to the individual and the country."

## SAYS THE FINANCIAL POST IN REPLY:

"It is, of course, possible that there might be a dissenting voice, heard above this chorus of condemnation. A voice that might suggest, for instance, that the fact that the producer is getting $24.50 per hundred for hogs, where he formerly got $6, might, perhaps, have as much to do with the matter of increased cost as the inefficient handling that gives to the packer 5-16 of a cent per pound on bacon, or to the retailer a bare 5 cents a pound. Or the fact that the farmer is now guaranteed a price of $2.15 a bushel for wheat that formerly he sold with satisfaction for 90 cents, may be as much responsible as the half cent a loaf profit of the baker, or the cent profit of the retailer.

"It is a question, too, whether all the blame for the trying conditions of the present time should be laid at the door of established trade, any more than at any other door. There seems no good evidence for believing that the business morals of the merchant class are worse than any other, and there might be those who might reply to the stricture that our schools and colleges are not devoting their attention strongly enough to the bread and butter needs that "man does not live by bread alone."

The frank object of this resolution was "to attain a substantial reduction in the cost of living generally, but without increase of hours of labor or reduction of wages." It is the possibility of this which THE FINANCIAL POST doubts.

You want to read such discussions as this. They appear weekly in THE FINANCIAL POST.

***We represent two of the largest factories in the world.***

## INCREASE YOUR SELLING CAPACITY

How much of the valuable time is there taken of your limited staff of salesmen by running for the purpose of change making? It is fair to presume that one-sixth of it is necessary during the busy periods, when their services are most valuable, which is equivalent to one salesman's time for this purpose in an establishment where there are six salesmen employed; in other words, five salesmen can perform the duties of six when the running is eliminated.

Our Cash Carriers will do this for you, even in a more rapid and efficient manner, and at a greatly reduced cost. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money would be in the custody of one person.

## AGENCIES WANTED

WANTED—AGENCY FOR HARDWARE AND plumbers' specialties for Montreal city and the Province of Quebec. Reply to Box 363, Hardware and Metal, 128 Bleury St., Montreal.

## TRANSLATIONS

ENGLISH INTO FRENCH. COMMERCIAL, Financial and Technical Literature. Advertising booklets, catalogues, circulars, posters. Private correspondence. Manufacturers and Manufacturers' Agents desiring English to French translations will secure expert service at a moderate rate by addressing Leon A. Archambault, P.O. Box 185, Station B, Montreal.

## PURCHASING AGENT WANTED

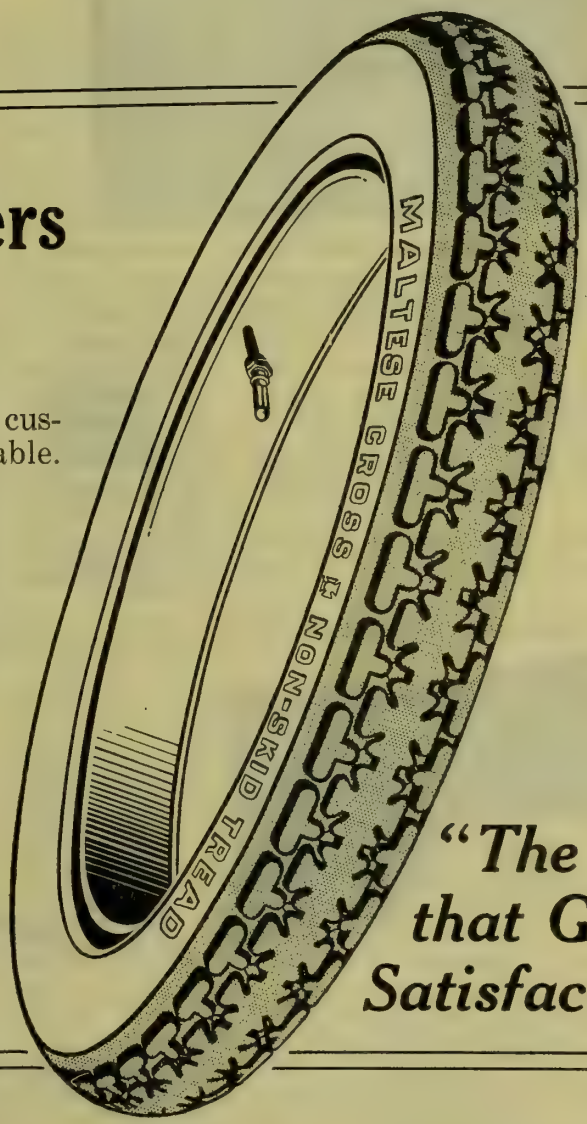
One of the largest purchasing departments in Canada desires to secure the services of a man experienced in the hardware and metal trades; must be familiar with trade conditions; state full particulars in first letter, giving experience and salary expected. Replies treated confidential. Box 509, Hardware and Metal, 143 University Ave., Toronto, Can.

## MISCELLANEOUS

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Acmes, Souvenirs, Crown Hurons, Peninsulars, Jewels, Pandoras, Imperial Oxfords, Climax, Marvels, Colonists, Arklans, Admirals, Crown Princes, Home Comforts, and all kinds of Ranges and Heaters. Write for list and prices. Grundy Bros., Strathroy.

Advertising in Hardware and Metal is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of Hardware and Metal are big buyers because they buy for business as well as for private consumption.

# Maltese Cross Tires



## Do your tire customers come back?

The customers that come back are the customers that make a tire business profitable.

When you put your own best efforts into getting a new customer and making the first sale, you want to know that there is every reason to expect that customer to come back when he wants another tire.

Tires that give full service bring the buyer back. Tires that are good for the user are just as good for the dealer. That is why so many dealers are making a real success with

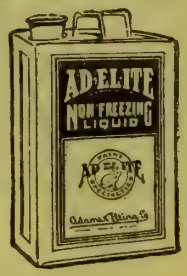
# BE PREPARED FOR
# FALL AND WINTER BUSINESS

**More cars and trucks will be seen on the Canadian roads this Fall and Winter than ever.**

**The storing of cars or trucks during the cold weather is a thing of the past, because motor vehicles have increased their usefulness one thousand fold. However, additional equipment and supplies designed to give warmth, comfort and safety during the Winter months, are essential.**

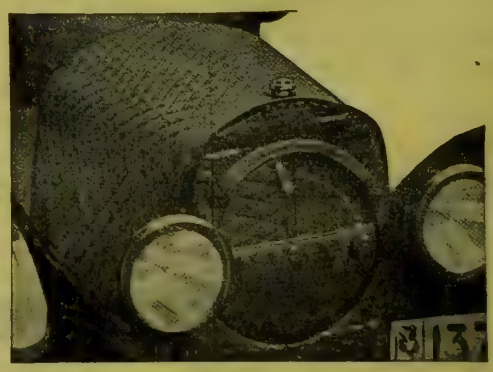


**The enterprising dealer should be fully prepared for this business by keeping well supplied with the Hyslop line of Equipment and necessities as listed in our Fall and Winter Bulletin. This quality line will attract motorists and keep your business at the high-water mark throughout the season.**

### AD-EL-ITE ALCOHOL NON-FREEZING LIQUID, WITH EVAPORATING RETARDANT.

**Saves Money and Eliminates Radiator Worries. Safe and Sure.**

It is harmless to metals or rubber. Prevents freezing and minimizes corrosion or rust. Prevents the freezing of radiators and aids engine starting. Absolutely safe and will not clog the water line.



This is an alcohol preparation with evaporating retardant which is more economical than plain alcohol.

Use AD-EL-ITE Alcohol Non-Freezing Liquid and your radiator can't freeze to death.

No. 4931—1—Price, 1 gal. tin ... $ 3.35
No. 4932—2—Price, 5 gal. tin ... 16.50

### COMBINATION RADIATOR AND ENGINE HOOD COVERS
(Fan Type Front)

No. 4877

This is the highest quality and most handsome outfit for all makes of cars.

The circular front design is very attractive, and at the same time provides a simple method of ventilation. The ventilating shutter is as easy to open and close as a lady's fan. You do not even have to remove your glove; simply pull the handle.

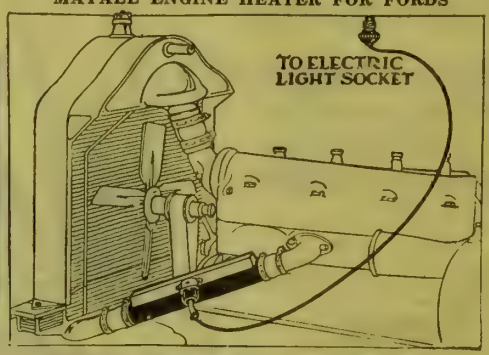
Made of extra heavy felt lining with black waterproof covering, padded and quilted.

| No. | | Price |
|---|---|---|
| 4877—7 | For 1917-18-19-20 Fords | $ 7.50 |
| 4877A—8 | For 1911-16 Fords | 7.50 |
| 4302—9 | Chevrolet "490," "490A" | 8.00 |
| 4303—10 | Gray-Dort | 12.50 |
| 4304—11 | Dodge | 12.50 |
| 4304A—12 | Maxwell | 12.50 |
| 4305—13 | For other 4 cylinder cars | 15.00 |
| 4306—14 | For 6, 8 and 12 cylinder cars | 18.00 |

Always specify make, year and model of car when ordering.

### WOOL LINED GAUNTLETS

No. 4283



Made of tough black horse hide leather, pliable and soft, and lined with pure wool. Sizes 8, 8½, 9 and 9½ inches. Always specify size desired when ordering.

No. 4283—Price, one finger type as illustrated, per pair ..... $5.50

No. 4284—Price, full Mitt Type, with separate thumb only, per pair..... 5.50

No. 4285—Price, full finger type..... 5.50

### MAYALL ENGINE HEATER FOR FORDS

**Showing attachment on Ford Car.**

**What It Does—**

It heats the water in the standing car, making continuous circulation as though car were running. It keeps every part of engine and radiator warm and radiator acts as hot-water coil, heating the garage.

Gives positively easy starting and eliminates all danger from frost.

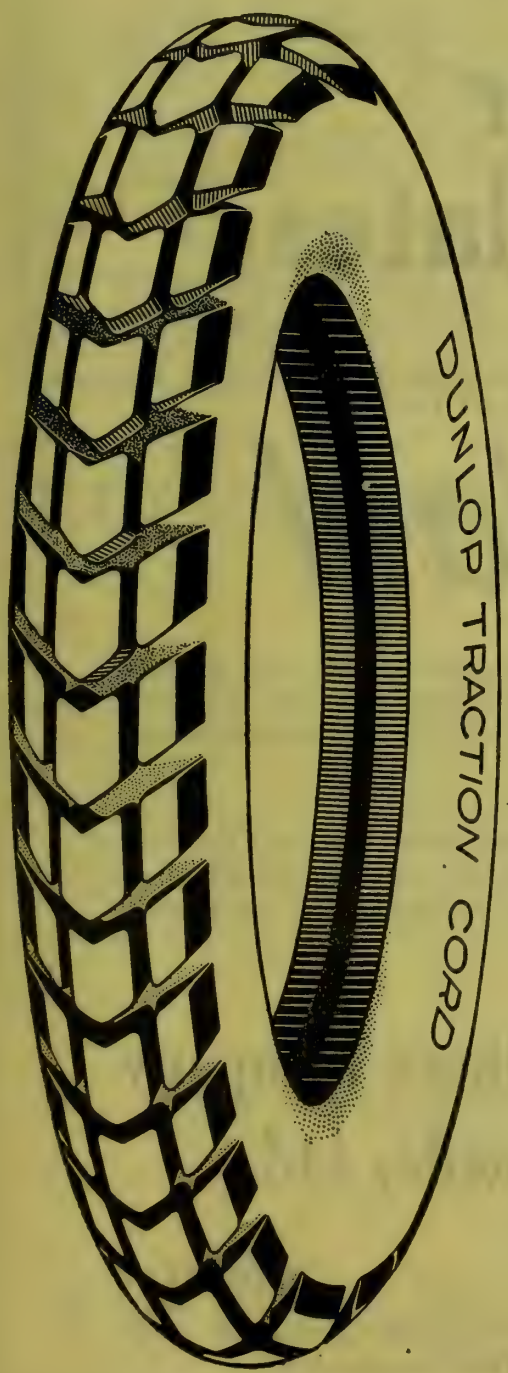
No. 4933—38—Price, complete, including two pull-off plugs and insulated wire of suitable length ..... $10.00

### FUR MOTOR ROBES

No. 4298

| No. | | Price |
|---|---|---|
| 4298 | Gray Goat, 70 x 60 in. | $28.25 |
| 4299 | Brown Dyed Goat, 70 x 60 in... | 37.00 |
| 4300 | Black Dyed Goat, 70 x 60 in... | 37.00 |

**The above items are only a few of the hundreds of seasonable Equipment and Necessities listed in our Fall and Winter Bulletin. Dealers, send for copy together wis discount sheet. It will mean big business and more profits for you. Order by Bulletin number.**



## HYSLOP BROTHERS, LIMITED

**Shuter and Victoria Streets - - - Toronto, Ontario**

DUNLOP TIRES

SEAL OF QUALITY

CORD

# Another Milestone In Greater Tire Mileage

If you could see the painstaking activities necessary to the construction of Dunlop Cord Tires, you would readily believe they could not possibly be better.

True, we were **not the first** to announce a Cord Tire, but we **were the first** to announce a Cord Tire that, we feel, has all the unmistakable signs about it of **being absolutely right.**

More rubber goes into Dunlop Cord. More miles come out of it.

"Extra" thoroughness in the making accounts for "extra" staunchness in the using.

Less gasoline is consumed per mile.

Dunlop Cord Tires have a greater air chamber, as the cross-section is ½" over the listed size. When you purchase, say, a Dunlop 34 x 4, we really give you a 35 x 4½—and so on.

Equipped to your car with Dunlop Extra-Heavy Service Tubes or British Dunlop Red Tubes, Dunlop Cord Tires—"Traction" or "Ribbed"—make a striking appeal to your sense of tire values.

**Mileage—then "Good Measure" Mileage.**

**All sizes—30 x 3½ to 37 x 5.**

# ECONOMICAL MILEAGE PERFORMANCE

To have a car equipped with tires that are guaranteed for 5,000 miles, and yet invariably receive away above that average is a feature that gives lasting satisfaction. The more mileage that can be gotten from a Tire, the cheaper the cost of that Tire, ultimately.

It is on this performance that V.D.L. Tires are building a reputation. Are you availing yourself of this opportunity to link up with a live product, one that gives all round satisfaction?

It will pay you to investigate V.D.L. Tires.

Hand made in all sizes by skilled Canadian workers from the purest material procurable, V.D.L. Tires constitute a product of worth. The following Distributors are strong supporters of V.D.L. Tires. Write the one nearest to you.

Codere et Fils, Sherbrooke
A. Chown & Company, Kingston
Crowell Brothers, Halifax
Eug. Julien, Limited, Quebec
Kloepfer, Limited, Toronto

# RADIATORS CAN'T FREEZE TO DEATH

This is an alcohol Non-Freezing Liquid with evaporating retardant that prevents radiators from freezing.

It is harmless to rubber, minimizes corrosion or rust, and aids engine starting.

It is absolutely safe and sure.

This is a zero weather protector for radiators. Simply mix it in the water usually used and laugh at zero.

Handsome store and window display hangers, circulars and other advertising matter supplied. Quick turn-overs assured.

Send for elaborate, complete catalogue "NEW CARS FOR OLD."

Ask your jobber for Ad-el-ite Alcohol Non-Freezing Liquid.

# INFALLIBLE

## Which Do *You* Sell?

The only question is one of choice, you can sell any one of them loaded with Infallible.

Any one of these fourteen standard brands of shells is the best to the man who is accustomed to use it—when it is loaded with Hercules Smokeless Shotgun Powder.

Let your customer pick his favorite—loaded with Infallible—and he will have a combination that is hard to equal at the traps or in the field.

**HERCULES**
**Smokeless Shotgun**
**POWDERS**

are always the same. They always give the same even patterns and high velocity with light recoil, always burn free and clean and always act the same under any weather conditions.

When you buy loaded shells be sure that they are loaded with a Hercules Smokeless Shotgun Powder.

Have you written to us yet about our special inducements to dealers handling Royal Oak Tires? Suppose you do so to-day while the thought is still fresh in your mind. Just say on a post card, "Please send me particulars of your special proposition to dealers," and we'll do the rest.

# Oak Tire and Rubber Company, Limited

Head Office: 19 Dundas Street East, Toronto
Factory: Oakville, Ontario, Canada
Winnipeg Office: 120 Lombard Street

# The Famous Guarantee of Safety–

32 Caliber
Hammer
Regular Grip

AN absolute guarantee of safety—the Iver Johnson "Hammer the Hammer" trade-mark. The unfailing automatic safety feature has supported this famous guarantee year after year, making the Iver Johnson the most wanted revolver for home protection.

Men, and women too, feel the security of its safety, and in an emergency are confident of its dependability.

And so, while the Iver Johnson is essentially a man's revolver, its absolute safety from accidental discharge makes it the accepted and ever-present assurance of protection to the home, property, and personal safety of the American woman.

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not carry Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

Write for catalog and complete dealer information on firearms; also on bicycles and motorcycles.

**This chart shows the distance in which a car should stop, at any given speed, if brakes are efficient**

# Have your brakes inspected to-day

THIS is the slogan of the Brake Inspection Movement which is bringing big business to Thermoid Brake Lining Dealers.

Police officials and newspapers everywhere are behind the famous Brake Inspection Movement, originated by the makers of Thermoid Brake Lining.

Widespread advertising and educational work, emphasizing the importance of good brakes, has met with a sympathetic response from the motoring public.

Motorists everywhere are taking new interest in their brakes—going to their dealer to have their brakes inspected—insuring their safety.

The Thermoid chart of Stopping Distances has been incorporated into the Police Traffic Regulation Chart, and has been adopted by Police Departments in many cities.

***Standing Behind Thermoid Dealers***

The Brake Inspection Movement has been fostered exclusively by the Thermoid Rubber Company.

The makers of Thermoid Brake Lining have always zealously watched after the interests of the dealers selling Thermoid and have co-operated in every possible way to increase dealers' sales and profits.

The manufacturers of Thermoid sincerely believe they have the best brake lining on the market—a brake lining that has exclusive features that make it as nearly perfect as possible.

In educating the public to an appreciation of this 100% efficient brake lining, special emphasis has always been directed to the Thermoid dealer.

And to-day the public looks upon a man who handles Thermoid Brake Lining as a specialist and an expert who knows his job.

The public has confidence in Thermoid Brake Lining and in Thermoid dealers.

Are you enjoying Thermoid prestige and profits?

Every foot of Thermoid that you sell is backed by our guarantee: *Thermoid will make good—or WE WILL.*

## The Fastest Selling All-Year Accessory a Dealer Can Handle

Small investment — Good profit — Takes up little room — Every motorist needs them — And has no excuse for being without them at this price.

## MERCHANT'S ANTI-SKID CHAIN TIGHTENER

## $1.00 a Pair

**If dealer does not handle, sold direct prepaid on receipt of price.**

Simple and easy to attach. You can slip it on a customer's car in about one minute, and it means a sale **every time.**

The Tightener catches the chain at five points, giving an easy tension all around. It holds the chain in place, prevents dragging or rattling, and yet permits the chain to creep on the tire, and carry out to the full its non-skid action. Keeps chain from pounding the fender, and prevents it from unhooking.

JOBBERS AND DEALERS:—Write at once for full particulars and generous terms, for now is the time to sell these things.

# Display Sells Razors

The cutlery counter in most hardware stores stands near the door, where the customer lingers, looks around, and wonders what he forgot to buy.

Men are always on the lookout for good razors. The GENCO Display Case, sent you with your first order of GENCO Razors, gets their attention.

The handsome case will make them look more closely. Your salesman then simply reaches under its glass top and says: "Just examine the edge on this razor."

In a few minutes your cash register will ring. And your customer will be a satisfied customer. For the GENCO Razor has an edge that we guarantee: "GENCO Razors must make good or we will."

# The Air Test Under Water

One dissatisfied customer means one customer less for the dealer or garage man.

Radiators that are absolutely water-tight will hold and draw customers.

You can prove to them that McKinnon Radiators are water-tight.

When they cannot find the puncture in their tire they put it under water and watch for bubbles.

That is the way every McKinnon Radiator is tested before it leaves the factory.

*Heavy air pressure under water is the test we apply to McKinnon Radiators.*

There is absolutely no possibility of a leak.

## McKinnon Radiators
are
## "Really Cellular"

They are made to meet emergencies.

The unforeseen accident, the punctured radiator, need not leave you stranded.

The remaining cells are as good as ever, just plug up the holes with wooden plugs or any adhesive substance, fill up the radiator and drive on.

Your garage man will replace the broken cells with new ones, and the radiator is as good as new.

All dealers should carry McKinnon Radiators.

They are proof against damage through vibration. They are made to stand hard usage.

# Five Minutes To Eleven has not yet come for those who stayed at home

The gallant Canadian army kept right on fighting until five minutes before the Armistice was signed.

The last lap of the war for those men was indeed a smashing, glorious finish!

While the fighting ended at five minutes to eleven on the morning of the eleventh of November last year, the war has not yet ended for those of us who stayed at home.

Our "Five Minutes to Eleven" has not yet come. There is a great deal more for us to do, before our war job is finished.

There are still heavy demobilization expenses to clean up. In a few short months we have brought home the troops that were transported overseas during four years of war—four years' transportation expenses crowded into a few months.

Many millions are still required to complete payment of demobilization and for other purely military expenditures.

The Victory Loan, 1919, which is necessary to meet these war obligations is the great objective in the last lap for those who stayed at home.

The Canadian Corps, during the war, never lost a gun,—never once retreated and never failed to take an objective.

Keeping that glorious record in our minds, and carrying that "no surrender" fighting spirit into the new Victory Loan campaign, there can be only one result:—Success, overwhelming and triumphant.

When the figures for the Victory Loan, 1919, are totalled up, the result will show the world that those of us who stayed at home have taken another glorious objective on the road to our "Five Minutes to Eleven."

# Victory Loan 1919

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada

HARDWARE AND METAL, October 25, 1919. Volume XXXI., No. 43. Published every Saturday at Toronto. Yearly subscription price, $3.00. # SIMONDS

*"The Saw Makers"*

## CRESCENT GROUND CROSS-CUT SAWS

Are absolutely guaranteed. They are made of high grade steel, produced in our own Steel Mill, which is the only steel we are sure will take a temper to hold a cutting edge longer than the ordinary saw. A Simonds Crescent Ground Cross-Cut Saw will cut 10 per cent. more timber in less time and with less labor than any other make of saw, and still it costs no more than other good saws. Hardware dealers know the value of Simonds Saws as trade promoters, because a Simonds Saw when sold means a satisfied customer.

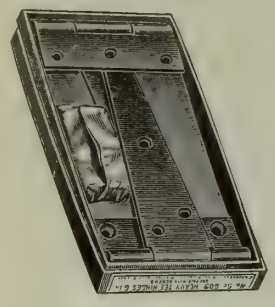
## 805-806
## Garage Sets

## Consistency

THE sales of automobiles are outstripping production. It means garages and sales of garage fittings. Be prepared. Stock National Garage Sets.

The price on this new set is such that it really makes the cheapest combination possible with which to equip garage doors efficiently.



Furnished, regularly, with six-foot, braced rail for eight-foot opening. When used on larger doors, width of opening should be given when ordering.

Set No. 805 includes: No. 29 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair 4 x 4-inch Jap. No. 505 T. P. Butts; 1 only No. 820 Chain Bolt; 1 only No. 830 Foot Bolt; 1 only No. 5 Pull; 1 only 4½-inch No. 30 Safety Hasp. All necessary bolts and screws.

No. 806 set includes the same, except that No. 27 Latch is used instead of No. 29.

Both sets furnished in Japan finish.

## National Manufacturing Company

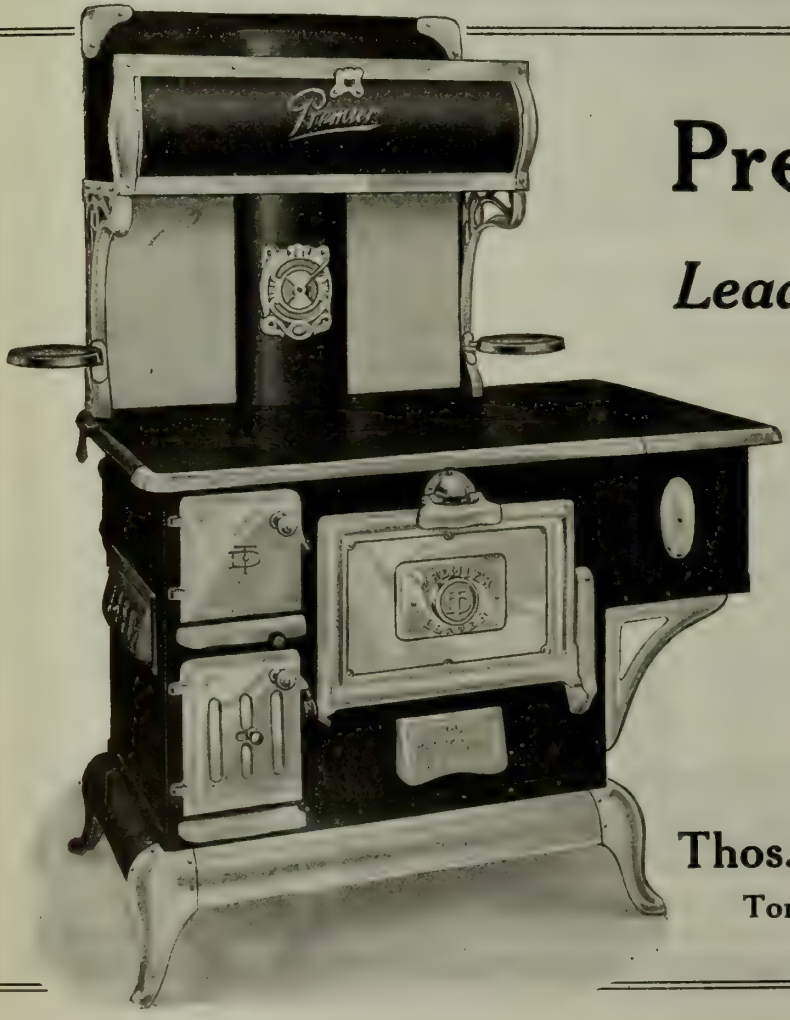
# Everybody Likes Strap and Tee Hinges

***Packed One Pair in a Box with Screws***



No. SC. 209

Before placing your next order for hinges consider the time wasted loosening bundles, selecting and counting out the screws and wrapping in paper.
Consider the additional customers you can wait on when hinges are already packaged, neatly labelled, ready to hand out.
Consider the advantages of having a clean, attractive stock that can be handled without soiling the hands.
Naturally this time and labor-saving method appeals to the trade and consumer as is shown from the ever-increasing demand.
In ordering, prefix the letters SC. to the class number to distinguish from the line of hinges in bulk.

# HACK SAWS AND GUMPTION

Every box of Starrett Hack Saws has everything in it that means economical work, except common sense or gumption. It's up to the man who uses the blades to supply that.

If he'll follow the Starrett Hack Saw Chart he's sure to use the right blade for each material—and that's a big step in the right direction. But to get everything out of a Starrett Blade that we put into it, he's got to use common sense.

Hack Saws won't cut economically without pressure or weight. They won't keep on cutting economically unless the weight is increased as the saw becomes dull. A blade won't keep its temper without the use of plenty of lubricant to cool it and it won't do its best if the work is cornered wrongly in the vise. But any Starrett Hack Saw, used according to the recommendation of the Starrett Hack Saw Chart, plus the common sense that every good machinist has, will prove what most users say of Starrett blades—"They cut quicker and last longer." Ask for Catalog No. 21 "MA" sent free.

# GURNEY-OXFORD WARM AIR FURNACES

*Mr. Dealer—*

We have illustrated here the famous *Gurney-Oxford* warm air furnace. The prospective purchaser of a heating system will look especially for two things, *Comfort* and *Economy* of fuel. In building this furnace these features have been kept in view at all times. Note the *one-way* fire travel. All gases and smoke completely circle the radiator and the greatest possible amount of heat is taken off before the gases and smoke go up the chimney.

The combustion chamber is made of steel and cast iron and so proportioned as to present a large and very effective radiating surface to the air to be heated.

Write for our furnace catalogue or for any information.

## *Every Car at Your Door a Prospect*

# Clark Indestructible Steel Heaters

### *The Duchess No. 8XX*

The Duchess is the handsomest heater made. Covered in rich velvet plush in blue, green or maroon shades, it has a luxurious appearance that, together with its remarkable efficiency, makes it astonishingly popular. It is a general favorite for handsomely appointed limousines and other closed cars. There are several other models—all big heat givers and very reasonable in price.

### *Carbon That Heats All Day*

Clark Carbon is compressed in bricks. This means more heat units in less volume.

When a brick of Clark Carbon is heated in a fire or flame it produces its maximum heat at once and maintains a satisfying, comforting volume all day. Every owner of a Clark Heater is, of course, a purchaser of Clark Carbon. In this way a very profitable system of secondary sales is built up.

### *Are You Ready for the Winter's Demand?*

**Order at once from your jobber.—He has them.**

Every doctor, automobile owner, rural mail carrier, milk driver or delivery man in your locality is a prospect—and a good prospect for Clark Heaters.

Have you ever driven any length of time on a severely cold morning? No chance to put the blood in circulation; the feet numb, and numbness creeping over the body. The appeal is irresistible to those who daily suffer from cold.

You have only to demonstrate it when they stop at your door on a cold day.

## Chicago Flexible Shaft Company

**Roosevelt Road and Central Avenue** **Chicago, Illinois**

GOOD workmanship and low prices count for little when the building owner finds his sheet metal work pitted, pinholed, worthless, within a few months from the time it is installed.

Your alibis ring hollow, and it's hard, almost impossible, to get his next job. He passes the word along, too. That's why Toncan Metal will prove

# A Business Builder for You

Toncan Metal is dense, homogeneous sheet metal. Every part of the sheet is as good as every other part and all of it is just as nearly pure iron as is practicable for general use.

Toncan Metal forms well and holds a tight grip on galvanizing.

There are few builders who will not prefer Toncan Metal when they understand that it will outlast ordinary sheet metal two and three to one. Its durability is a business and reputation builder for you. It will pay you to recommend and use it for Roofing, Siding, Tanks, Flashing, Gutters, Ridge Roll, Conductor Pipe, Culvert Pipe, Refrigeration and every severe sheet metal service.

# Keeps Your Store Free of Dust

HOUSEWIVES, all customers, in fact, buy from those dealers who have the brightest stores.

If you believe in clean hands and shining windows, you will want to keep your goods free from dust—you can, by using—

## STANDARD Floor Dressing

the non-evaporating, sanitary wood preservative which cleans the surface of wood, linoleum and oil cloth, and prevents dust from rising. Dust cannot rise from floors treated with Imperial Standard Floor Dressing.

One gallon of Imperial Standard Floor Dressing, when applied with the Imperial Floor Oiler, will cover between 500 and 700 square feet of floor space with a dressing which will last for several months.

Merchants, public buildings, office buildings, churches and apartment houses should use Imperial Standard Floor Dressing. Display a few cans on your shelf and draw the attention of your customers to its good results on your floors.

Sold in one gallon and four-gallon cans, also half-barrels and barrels.

## IMPERIAL OIL LIMITED

**BRANCHES IN ALL CITIES**

# ARMCO IRON

## Window frames and other galvanized metal building products

When you build, **build for permanence.** Use Armco Iron for all galvanized parts—roofing, coping, cornices, gutters, pent-houses, skylights, water-tanks, ventilators, conductor pipes, window frames and sashes. Armco Iron (galvanized) has been employed extensively in various building operations which have recently been started or completed. For instance, all window frames in the Merchants' National Bank Building, St. Louis, are made of Armco Iron.

Because of its purity, evenness, and freedom from imprisoned gases, Armco (American Ingot) Iron takes and holds a purer and more lasting galvanizing coat than any other metal. So securely is the galvanizing fused with the base metal (Armco Iron), that it will not crack, scale, or peel off. Leading architects specify Armco Iron, builders use it, sheet-metal workers endorse it, and property owners and investors sanction it for every kind of building, new or altered—residential, industrial, school, church, public or office.

Look for the Blue Triangle when purchasing Armco Iron Sheets.

The trademark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merits claimed for it.

# Williams' "Agrippa" Turning-Tool Holders Set Screw Pattern

TO provide increased and abundant variety of selection in Williams' "Agrippa" line of Tool Holders, we offer this Set Screw pattern of Turning-tools primarily for those who use Cutters made of steel which has been hammered or rolled with greater variation in size than is common to usual mill practice. But for the majority of users who purchase Cutters of accurate size, we recommend the original "Agrippa" Turning-tool of Cam Pattern as being stronger, more reliable and more generally satisfactory than any other method of Cutter-fastening. Both patterns are illustrated above.

The Screws, made of a fine grade of Alloy Steel, are accurately machined and carefully heat-treated and hardened. They are unusually tough and strong and give the maximum efficiency obtainable from this extra type of Cutter-fastening.

Right and Left Hand Offset and Straight Shanks in stock at same prices as Cam Pattern of corresponding size.

Our Machinists' Tools Booklet will be sent on request.

## Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

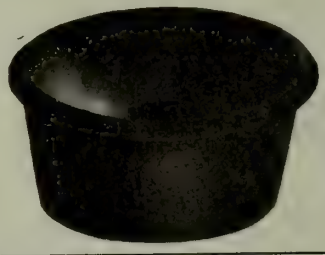
If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

# Are You Featuring These Eddy Sellers?

## EDDY'S
## Silent Five

*SILENT STRIKING NON-POISONOUS NO AFTERGLOW*



Sixty years ago Eddy's were recognized as the standard in Canadian-made Matches.

All the skill and experience of three-score years in match-making combine to make Eddy's Silent Five the most satisfactory household match. It always repeats.

## EDDY'S
## Indurated Fibreware

Washtubs, Washboards, Milk Pails, Butter Tubs, Household Pails, etc. Light, durable household utensils that every woman will appreciate. Made under the same standards of production as the famous EDDY MATCHES.

# 5 YEAR SOUVENIR

### *The Guaranteed Steel Range*

The five-year Souvenir combines all the best known features of the stove maker's art and sells readily on its appearance alone.

The stoves themselves are hard to improve on and you can dispose of them quickly without the slightest fear of a come-back.

The five-year Souvenir is the only range made with the fireback guaranteed for five years.

Reversible front oven flue not contained in any other range. The most economical range on fuel. Has duplex grates, large, roomy fire box, linings corrugated to add life to fire box and heating surface to oven. Plain nickel dress, easy to keep clean. Medium in price.

These many features make these ranges profitable, serviceable and absolutely satisfactory.

## 4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

# Food Choppers and Presses

DOUBLE TINNED

New Standard Food Choppers have two particular features that make instant appeal to housewives. They open wide making them easy to clean, and their cone shaped feeders prevent tearing and squeezing. The food is fed to the knives at a regulated speed, the knives are sheer cutting, self-sharpening and non-clogging—they cut the food as fast as it's fed to them. Fitted with positive clamp that holds firm, is double tinned and guaranteed rust proof, and is made in sizes 1, 1½, 2, 3, and 4, with stuffers for size 3.

New Standard Fruit and Lard Presses are made in 2-quart and 4-quart sizes, have very few parts, are easily cleaned, and sell at about half the price of others of equal quality. We would appreciate your order for samples.

# "Dependable and Accurate"

—it is dependability and accuracy that have built Dominion Ammunition sales for the dealer. From the beginning Dominion Ammunition has been subjected to inspection and tests that have brought it up to the highest of ammunition standards.

# Dominion Ammunition

Above are shown two of the many processes that insure the dependability and accuracy of Dominion Ammunition —the individual inspection and the final machine test as to size.

is recognized by your customers because of its two cardinal points—**dependability and accuracy**—and they insist on having the ammunition that possesses them. Impress on them that the nimble fingers and quick eyes of scores of inspectors detect the slightest visible imperfection in Dominion Cartridges or Shotgun Shells. Intricate machinery tests the quality and quantity of loads and measures to a hair the calibre and size—all a part of the Dominion Service to guarantee ammunition that is "dependable and accurate."

Build your sales of Dominion Ammunition on this and benefit by the profit you make on these sales.

**Order from your jobber to-day.**

# Sees Big Future in Electrical Goods

## A. J. Ross, of Wingham, Keeps Fixtures Displayed in Both Windows and Right Up at Front of Store—Labor-Saving Equipment in Steady Demand Among the Farmers—Window Displays Bring Splendid Results

Based on an interview by C. E. PARSONS, of Hardware and Metal, with A. J. Ross, of Wingham, Ont.

ELECTRICAL fixtures in both windows, electrical fixtures right up at the front of the store, and electrical goods displayed at vantage points all around on the counters.

This is the way A. J. Ross, hardware merchant at Wingham, Ont., is going after electrical business, and he is getting it.

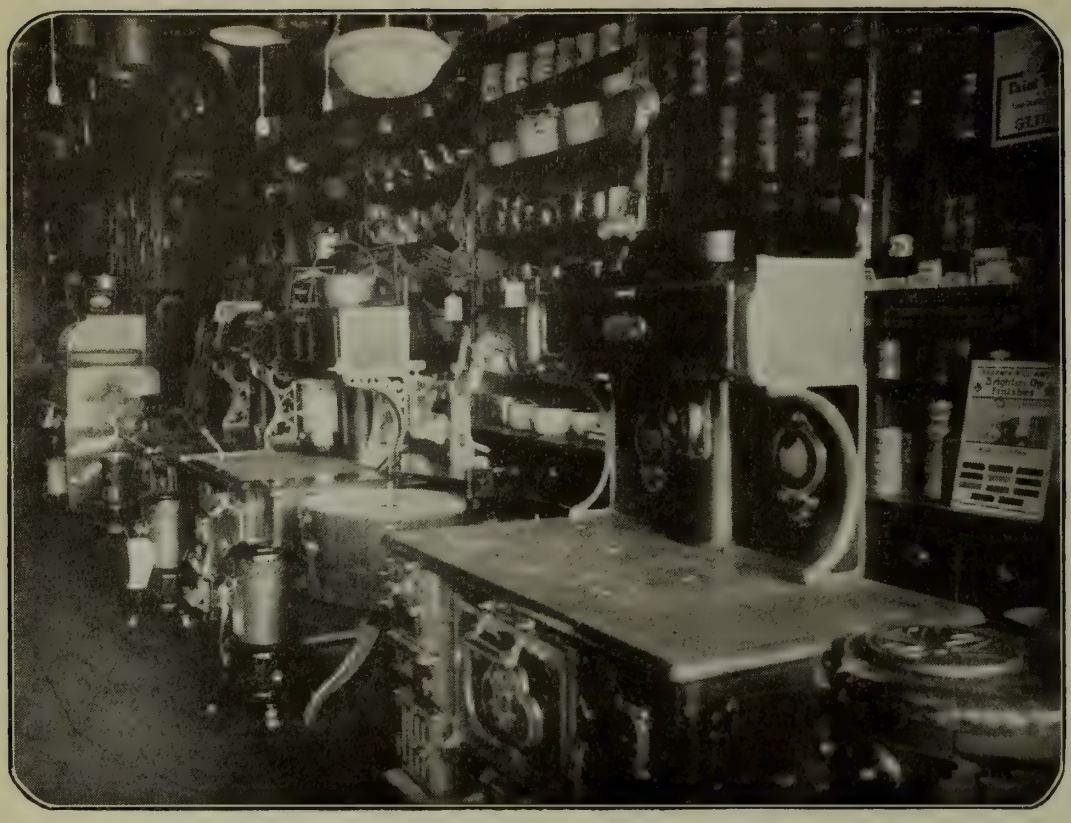
"Electrical goods of all kinds have always moved well with us," said Mr. Ross to HARDWARE AND METAL. "Take batteries, for instance. Our sales in this line alone have steadily increased until now we are handling more than 1,000 every year. We sell them to the farmers for gasoline engines, for telephone and for electric bells, and we sell them to owners of automobiles."

### Keeps Them Displayed

Mr. Ross says that the best way he knows of increasing sales is to keep your stock out where people can see it. As may be seen from the illustration on the following page, he keeps a pyramid pile of batteries, nearly three feet high out on the counter, where everyone who comes in can see them.

"Very often they would forget they wanted a battery until they got home if they didn't see them on the counter," said Mr. Ross. "When they see the batteries they buy right there and save themselves another trip."

As stated above, Mr. Ross keeps electrical fixtures displayed in both windows and right up at the front of the store, where they are the first thing people see when they enter.



### Make a Fine Showing

"We keep our windows and the store lighted up every night until ten o'clock," said Mr. Ross. "The fixtures make a fine showing, and both the window displays and the store display bring the business. In my opinion there is a big future in the electrical trade. People want electrical equipment because it makes good. It does the work they want done and it does it quickly and at reasonable cost. The various devices are easy to operate and do not get out of order. We find that most electrical lines help sell themselves. Not only this, but they bring new customers to our store."

Last week in Wingham the ratepayers

*"Put 'pep' into your windows," says A. J. Ross of Wingham, Ont. "People like to see things and they always are interested in a window in which something is moving." In the window on the right both the electric washer and the sewing machine are constantly in action. The heater in the background is turned on and there is another just back of it on the counter throwing out heat. Just behind the washer is a battery to which is attached part of an electric bell. This taps on the glass and helps draw attention. Note the use of manufacturers' sales helps and the display of fixtures in both windows.*

*Seasonable lines are kept right up at the front in the Ross hardware. Stoves are big sellers from now on. In about six weeks Mr. Ross will have a display table filled with skates, hockey sticks and similar goods up where the stove in the right hand corner of the illustration stands.*

voted on a Hydro by-law and carried it by a big majority.

"We had a privately owned plant here before," said Mr. Ross. "Changing over to Hydro means that every home in town that had the old system in will have to be re-wired. I think we are the only people in town who can do the work, and we certainly are the only firm that has the stock from which people can select what they want."

### Enterprising Merchant

In addition to his usual stock of electrical lines, Mr. Ross, after having sized up public opinion pretty well, and making sure that Hydro was going to carry, got all ready for business by getting in a brand new stock of fixtures and connecting them up so that his display was in full swing when the voting on Hydro was on and after it carried. By means of his window displays, his store display and his newspaper advertising, everyone in Wingham district knew that Ross, the hardware merchant, could supply them with anything they wanted in electrical lines. Not another merchant in the town had anything to compare with the display that Mr. Ross arranged.

### Says It Pays Well

"It pays well," said Mr. Ross. "We get splendid results from our window and store displays, and also from the advertisements with which we back them up. We use the same position every week in the local papers. By doing that people know just where to look to see what we are offering. We know they read our ads. because they not only come in and ask for the things offered, but telephone in for miles around. In arranging our ads. we find it a good plan to use illustrations, and we always feature prices in plain figures. At certain seasons of the year when we want to make a drive on certain seasonable lines we often double or even treble our space."

### People Like Action

In discussing his window displays, Mr. Ross pointed out that people like lots of action in a window display. If there is something in the window moving they are interested at once, and stop to investigate. As will be seen from the illustration Mr. Ross has in one window an electric washer in action and a sewing machine, driven by a little electric motor for which he has the agency. The sewing machine keeps a red, white and blue ribbon going round and round the whole day long. Besides these, Mr. Ross has an electric bell at the bottom of the window attached to a dry cell. The hammer of the bell taps on the glass and this helps draw attention.

### Beats Mail-Order House

"We keep a mail-order catalogue right here," said Mr. Ross, "and if people come in and start talking about what they can get from the Toronto firm or any others, we show them just what we can do and show them also that when quality is concerned and service, the mail-order house is simply not in it with us. Take electrical fixtures, for instance. We can make a far better price on them than the mail-order firms. In addition, I tell prospective buyers that they can come into my store and see what they are getting. If they are dissatisfied at any time I am here to make it right, and they know that I mean what I say. I point out that we instal the fixtures and see that they are working perfectly, while the mail-order firm simply ships the goods and leaves the buyer to get them up as best he can. As far as mail-order business is concerned, we have no trouble at all in beating them, provided the buyer will give us a chance before he orders."

### Uses Show Cards

Mr. Ross says he gets excellent results from a liberal use of show cards. They are read, he says, by the public with interest, and help in emphasizing points he wants to bring to their attention. Show cards are used all the time, not only in the windows, but around the store, and new ones are constantly being written. The colors are not always the same. Some are green, some red, some black and some two colors.

Another stunt Mr. Ross does which brings results is to change every week or so the large electric advertising globe shown on the illustration of the counter display. One week it may feature glassware, another week stoves, another week paints. Mr. Ross tries to keep this little advertising stunt strictly seasonable. It takes only a few minutes, he says, to repaint the globe, and pays well for the work.

### Steadily Growing

"We are selling five times as much auto finish as we did a couple of years ago," said Mr. Ross. "We worked up this trade by keeping our stock on display, by advertising and by getting in touch with local car owners and with a local painter who makes a specialty of this work."

Mr. Ross was one of the hardware men who quit handling gasoline because he says there is not enough profit in it.

"If other merchants want to sell gasoline on such a small margin," he said, "they are welcome to the business."

### Stoves Sell Well

Mr. Ross is well satisfied with his trade in stoves. His sales run from 75 to 100 each year, and he finds it a steady business. From now on, as will be seen from the illustration, stoves are given a prominent place in the store as the most seasonable line. The stock is kept in A1 condition, the stoves being carefully cleaned and kept looking their best. This is an important matter, Mr. Ross says, not only in regard to stoves, but in regard to stock generally. The average customer does not like to buy goods that look as if it were neglected or had been in stock for a long time.

### Getting Business

Stoves are frequently sent twenty miles out into the country. "Very often," said Mr. Ross, "a farmer's wife will come in and ask about a stove. We have our stock out where she can look the stoves over carefully and investigate all she wants to. We try not to do too much talking, but as a rule we are kept busy answering the questions the woman wants to know, and also emphasizing this or that point about the stove, and telling her how it works, that it is economical on fuel and so on. We find that people who are buying stoves want a nice looker, and insist on a good finish, and many of them want stoves that will burn either wood or coal. Price is not the big consideration now. The buyer wants something that is going to look well and give good satisfaction. Generally the woman comes in first and gets all the information and then brings her husband along to get his views before closing the deal. We aim to give good service in our stove department, and all stoves sold are not only delivered, but are shut up and left in operation.

### Will Take Old Ones

"If a woman comes in and says she has an old stove and wants to know if we will take it on a deal for a new one, we tell her, certainly. We get many stoves in this way, and never have any trouble in turning them over. Very often we make as much out of selling the old stove as we did out of the new one. I think it is good business. We also get many repairs to look after."

In connection with his stove department Mr. Ross has arranged a special section on the second floor, where all second-hand stoves are kept on display. They are kept in good shape and looking nice also. Mr. Ross has installed an elevator at the rear of the store for convenience in handling both new and second-hand stoves. They can be brought down or taken up to the second floor without any of the heavy work of lifting in a few seconds.

### Summer Stoves, Too

Summer stoves are also a good line with Mr. Ross. His sales of these, he states, averages 35 to 40 every season. He gets this business by keeping them prominently displayed during the summer months, by advertising and by window displays.

In addition to the trade he is doing in electric washers, Mr. Ross sells every year about forty hand-power washers.

"We find it good business to run advertisements about our washers every three or four weeks," said Mr. Ross. "The washing machine business is a good one. People all over the country are wanting to get away from the drudg-

*These fixtures are right up at the front of the store. When they are turned on at night they make a splendid display. Note the pile of batteries in a pyramid on the second counter, also the display of bulbs and flashlights in the case in the foreground. Also note the "Strictly Cash" sign just behind the proprietor's head. The electric heater on the counter is kept going. Under the show cases in the foreground is a display of stains and small cans of paint for household use.*

ery of washing. In many places where they cannot get electricity, we sell washers that will connect up with a gasoline engine. I am looking for the washing machine trade to grow steadily. We find that every machine that is sold means sooner or later the sale of another. Customers who get them are so well pleased that they advertise our business for us. Women frequently come in and tell up they were over calling on Mrs. So and So, and she showed them the washer she had bought from us and they wanted to find out about one just like it."

**On Cash Basis**

As will be seen from the printed card just behind Mr. Ross' head in the picture, he conducts his business on a cash basis. Cards bearing the words: "Strictly Cash," are placed at various points in the store.

"It is the only way to do business," said Mr. Ross. "There are, of course, occasional instances in which it is advisable to grant a little time. In such cases we arrange for a time for settlement and keep to that. No 'carry' accounts for me. The small ones eat themselves up in no time, and generally speaking, such accounts mean a lot of time and trouble to collect, and are a lot of work to keep track of. The people of Wingham and the farmers in the district are prosperous. They can pay cash and there is no reason why we should not do a cash business."

**Tinware Moves Well**

Mr. Ross says he turns his stock of tinware six times a year. He keeps it neatly and attractively arranged in the store and frequently uses display tables. Window displays and advertising complete the combination that brings results in the shape of steady turnover.

As might be expected in a district where mixed farming is carried on, Mr. Ross finds a good sale for farming tools. Price, he says, does not count with the farmers. What they want is an article they can get results with and keep on getting results.

"It is funny how people will remember a store," said Mr. Ross. "Last summer I was out about fifteen miles in the country, and turned in to a farm where I saw a garden party was being held. While going around I met a man I did not know, and when I told him who I was he said: 'Well, now, I got the best fork at your store that I ever bought anywhere.' The chances are he told fifty or more of the farmers around his section at one time or another about that fork. I do not want any better advertising than I can get from a customer who is satisfied."

**Dollar Day Sale**

The merchants of Wingham hold an annual Dollar Day sale, and Mr. Ross says he has found that it produces good results. He takes an active part in the campaign that is put on.

Another method that he uses to increase his stove sales is to put on a demonstration. This year he will hold a 1-day demonstration on November 9, and is already preparing for it by special advertising.

Flashlight sales, he says, are growing steadily, and he attributes this to the fact that he has regular window displays and that they are constantly on view in the glass show case near the front of the store. Sales for this year will pass the 150 mark, he states.

**150 Pairs of Mitts**

From now on mitts will be in demand and in accordance with his policy, Mr. Ross keeps them out where they can be seen.

"People are demanding a better quality of mitts than they used to," he said. "They are willing to pay a good price for a good article. We sell about 150 pairs every season."

There are many car owners in and around Wingham, in fact, out in the country districts about fifty per cent. of the farmers now own autos.

"It makes a big difference to business," said Mr. Ross, "especially on Saturday nights. They come in here for miles around, and some nights the store is so crowded that it is hard for any more people to get in."

Mr. Ross says that the telephone is also a splendid medium for getting business. By means of it and his advertising, he reaches out into a rich area for ten or fifteen miles around Wingham. One thing he tries to insist on is prompt delivery of all phone orders. People, he says, appreciate this and come back again.

**Paint Sales Good**

The paint department in the Ross hardware store is located right up at the front on the right hand side as one enters. It is supplemented by another section for stains and small stuff right under the show cases at the front on the left, as shown in the illustration.

"We have had perhaps the best paint season in our history," said Mr. Ross. "The farmers in this section are good farmers. They realize the value of protecting their implements and buildings, and they buy paint liberally. I find that the women are buying more paint every season for various little jobs about the home. Every time anyone comes in for paint we always tell them about the brushes they need, and we find that they appreciate our advice. Our brush sales are increased in this way."

**Shows at Fair**

Mr. Ross has had displays at many of the annual fall fairs held in Wingham, and usually has a tent in which are exhibited stoves, washers and other lines. He says he gets in touch with a lot of prospects in this way and frequently closes sales right on the spot. Business, he says, has been excellent, and he is looking for it to be better than ever. The one trouble, he says, is often to get enough goods to sell.

# National Hardware Association Discusses Many Trade Problems

## Electrical Washers So Popular Manufacturers Are Now Six Months Behind With Their Orders—Situation in Regard to German Toys

MANY important matters in connection with the hardware trade were discussed at the annual convention of the National Hardware Association, and the American Hardware Manufacturers' Association, which closed at Atlantic City on Saturday.

Horace Disston, of the Disston Saw Works, Philadelphia, said that lower prices would appear impossible until labor and material conditions become stabilized.

"German toys were nothing but junk and are now off the American market, and will not reappear for some years," was the report of A. K. Trout, member of a toy firm in New York. "American toys are more practical, better made and now almost exclusively command the American markets. Cheap German labor may dump some toys on the market here, but the American public has become educated to the better grade of goods, and in the future can overcome any competition."

**No More German Cutlery**

"German cutlery controlled 75 per cent. of the American trade before the war," said Charles Frockwell, of Meriden, Conn. "It has disappeared and is not a factor, nor will it be for some time. Tariff protection will help hold the American market."

Electrical washers have become extremely popular with housewives and the result has been that the trade is six months behind in delivery, was the report of Raymond Marsh of Chicago.

**Want Cheaper Postage**

Reduction in letter postage from two cents to one cent was discussed. The subject was presented by George T. McInters, head of the National One Cent Postage Association of Cleveland, Ohio. He pointed out that to-day the cost of letter delivery was four-fifths of one cent and that with the increase in volume through reduction this fraction would be further reduced and bring a satisfactory profit to the postal administration.

**Lower Production**

In the convention of the American Hardware Manufacturers' Association, Charles W. Ashbury of Philadelphia, president, rapped labor. "Labor has fallen off to 40 per cent in efficiency and wages have increased 100 per cent. or more," he declared in his annual address.

"It seems to be the slogan of disaffected labor to do as little as possible and collect as much as possible. Labor unions have a place to fill and in their

# How I Increased My Razor Business

## Practical Plans Followed Out Successfully Resulted in Store Manager Deciding to Have at Least One "Shaving" Window Every Month—How About Trying This Out in Your Own Store?

By A. H. ILLSEY

LOCATED in the busiest part of the busiest city in Alberta, I felt that it was worth while to try out the effectiveness of one of our display windows, featuring "Shaving Supplies Only." In a nutshell, the experiments were a success and to such an extent that the manager decided we must have at least one "shaving" window every month.

We had two windows, and for the various classes of goods we endeavored to retain a certain window—for cutlery, silverware and the finer goods, the one to the right of the entrance. This had the advantage of getting passersby to anticipate finding a certain type of goods in that particular window, and I believe that this was good business and a sound policy. Then, too, it gives the window dresser a "more at home" feeling when handling that class of goods. It may, indeed, make the operation of window dressing more speedy.

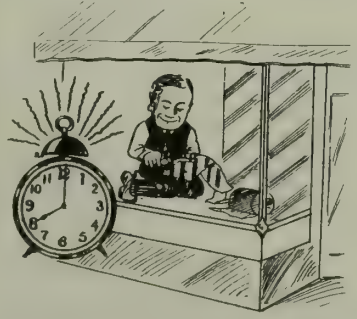
### The Most Important Thing

Without question—and always—my background was the most important element of my windows. Not only so; the longer time spent on them—the backgrounds—generally speaking, the better and surer were the net results—the greater the cash register receipts. And I have yet to learn of a conclusive argument that will discount the value, yet, the absolute necessity of paying close and careful heed to the points of background building.

Results considered—and after all, these are the things the management is looking for—the money spent on materials for making backgrounds is well spent and will generally prove to be an investment, and not an expense. "What shall I get and how much do you want me to spend on material?" I said to the manager one day. His reply was: "Use your own judgment; it's up to you." With this free scope to proceed, I used by best judgment and purchased materials accordingly.

### A Typical Backing

Since I started out to tell how a a "Shaving Supply Window" was dressed, I will outline one of these that "brought the fellows in" and made the cutlery department the envy of the department managers elsewhere in the store.



Proceeding to the wholesale paper warehouse I selected a variety of crepe papers, and among the shades secured were yellows, orange, greens, purples, blues, reds, white and black. For the background of this window I used, as a color scheme, red and white.

Cleaning out the window with the help of my assistant, I took a pair of scissors and cut the rolls of white and red crepe paper into three widths of about five and a half inches each. Beginning at the top—about heigh height, and using small tacks—but quite often pins—(and which had the advantage of being invisible and easily removed for subsequent use)—I worked out a diagonal scheme that eventually made the background an excellent imitation of a huge barber's sign. This had a double advantage. In the first place it attracted curious folk passing the store, and who wondered what a "fool" scheme I was working out. In the second place, when the window was dressed, I had a setting for my shaving materials and tools that was unique and decidedly suitable.

### Placing the Materials

I always removed the previous display from the window the first thing in the morning. The store was opened at 8 a.m. and I started right in, with my assistant, to clear the decks for the new showing. The dismantling did not take very long and my one central idea was to get the background in readiness with as little delay as possible. I, of course, worked this designing out mentally beforehand, and yet I did not spoil the effect desired by rushing matters unduly. In point of fact, between supervising my department when customers were numerous, and proceeding with my window, it was often well along in the afternoon before the goods were actually placed where I wanted them. and my best displays kept me (after I had written the price and other cards) until closing time—6 p.m.

I used a mechanical shaving display in

the centre of the back, and this was worked through a clock mechanism and rewound as required. This was a good feature and commanded attention.

The use of pedestals of wood, of heights ranging from twelve inches to four feet, afforded us the effective employment of plate glass shelves. These were covered with crepe paper of the white and red color scheme, and on the shelves were placed razors—usually one type only on each shelf. Placed here and there on the floor of the window and alternated they were excellent in giving effectiveness to the whole display. Two or three artificial palms here and there also appeared to good advantage.

Other shelves were used for lotions, soaps, stroppers, and extra blades.

### Two Important Helps

It should be remembered that the pulling value of any hardware window display may be greatly enhanced through the use of dealer helps freely supplied by many manufacturers. In this particular type of window I employed litho-

graphs, huge cartons, cut-outs, etc. These were pinned to the background and interspersed to the best advantage. When the window was taken out these were carefully preserved for further use, and it is remarkable how frequently these helps may be employed if care is taken to preserve them, and keeping dirt and light away from them.

Our large stock and extensive assortment of razor strops enabled me to make a splendid background through their use, also. These were suspended usually from the highest line of the solid part of the background, and frequently huge V's of these, for effect. With two or three dozen of these the whole effect was greatly improved. Price tickets were freely used.

What were the results?

Well, the management insisted that we must have a monthly display of shaving supplies. The effects were readily noticeable, and sales of shaving brushes. soaps and powders, safety and regular razors, blades, strops and stroppers, and blade sharpeners and hones were stimulated. One of the helps was that of bringing in grosses of safety blades to be sharpened as well as of regular

(Continued on page 43)

# How to Arrange Your Advertising

## Always Consider the Point of View of the Customer — Many Firms Always Feature the Price in Plain Figures—Use of Proper Illustrations is Important

SOME merchants have a gift in the matter of laying out advertisements, and in saying exactly the right thing to catch the public attention. There are others, and undoubtedly this is by far the larger class, who find the make-up of an advertisement one of the difficult tasks, a task that for that reason is often relegated to some spare minute that is hoped for, before the actual need for the writing of the advertisement arrives.

As a matter of assistance to those who find it difficult to get anything to say to introduce themselves, or their store or their goods to the public, the following may prove useful, and a perusal of the advertisements reproduced offer suggestions that are practical, and may be adopted with profit in arranging your own copy.

### Start A "Drive"

Advertise one thing at a time if your space is limited. You will leave a definite impression that way. People know you sell other things, and if you do that you will stand as good a chance as the biggest store in your community.

Your strongest line of display should be at the top of your advertisement—or a little above the centre. And your headline should be strong enough to give an appearance of strength to the top of your advertisement.

### Use A Good Margin

Use a good margin every time. It is not a waste of space. Margin is breathing space for type. It sets out your message. It makes your advertisement stand out from the page. It makes your message easier to read when it is noticed. It forms a frame for your type picture.

Some of the most notable advertising successes in the country have been built up on small space. A small advertisement intelligently planned is worth two large ones constructed on the principle of the dominance of big space.

But simply a promiscuous use of white space is worse than none at all; scattering it all around without any consistency will retard rather than aid the readability of your message.

### Keep Them Short

Keep your headlines short, or they won't be headlines. Six words is the golden length. And always make sure that you get some gray into your advertisements by writing a bit of matter between your headline and your ite

Making an advertisement attractive is important; but what is advertised is much more important than how it is advertised. That's why so many good looking "ads" fall down—and why so great a number of apparently inartistic advertisements bring results.

*Note the way the salestalk is introduced in this ad. and the prominence given to prices. The illustration is half the size of the original ad.*

### Get Customer's View

Desirability and seasonableness are half the battle. Take the customer's side when selecting merchandise to be advertised. Many stores work themselves into a frenzy trying to force unseasonable or undesirable merchandise—its only claim for publicity lying in the store's desire to be rid of it.

Don't spend money telling about the unattractive side of your store. A bargain once in a while isn't a bad thing for a store, but you can go on doing it day after day—legitimately—and make money. And you can't get people to think you are in business for your health.

Some one once said: "Advertising is used too much as a cathartic and too little as a food." There's a lot in that. Use advertising to tell of the finest things in your store—not of its least desirable.

### Must Use Judgment

The man who has the proper merchandising perspective of a store is the most valuable factor in that business, and if that store's publicity is successful he is the man to whom most of the credit for increased business should be given. The difference between merchants is the difference between their merchandising perspective. The real advertising man—and often he is the proprietor himself—knows what to play up, and which department ought to take a back seat for the moment.

### What People Wanted

If you have seen a "homely" advertisement, and found out later that the store than ran it had a big day's business, you can bet your life that there was something in that advertisement that supplied a human want. The designer of that advertisement might have gotten his types mixed—but he evidently had the big thing right; he advertised what people wanted—and his message carried conviction through its earnestness, even if it broke the laws of artistic display.

### Tell Them Something

Before displaying an advertisement effectively make sure that your message is right; that you are telling about something that people want—rather than what you want to get rid of. Making an advertisement good-looking won't add pulling power to a message that lacks incentive to move the readers to action. The reader wants to know "What is in it for me?"—and you'll have to write from his side of the fence.

### Consider This

Too many advertisements are planned by artistic standards alone. That is not to be construed as an attack on perfectly displayed advertisements. It is meant to point out that little things are often allowed to outweigh the big considerations in advertising. The most beautiful advertisement in the world

*Everybody just now is interested in keeping warm. In case electricity is not available this ad. suggests the oil heater. Note featuring of prices in larger type.*

will fail if the wrong merchandise is featured.

### Has An Advantage

Did you ever stop to think that the bigger a business gets the harder it is to maintain the personality that attracted its first following? Smaller merchants have a much simpler advertising problem than the big store. When the proprietor of a smaller store signs his name to his advertisement his public can see his very person loom up in front of them as they read his message. They know him personally and if he stands for something in his town his word is powerful and his waste circulation, due to folks who are skeptical of advertisements, amounts to virtually nothing.

### Don't Try Frills

Above all be yourself in your advertising. Don't pose, be natural; talk about your merchandise instead of about yourself.

The use of "boxes" can be overdone, too. A box here and there in an advertisement will emphasize and direct attention to those items which you want brought out. But all boxing is no boxing.

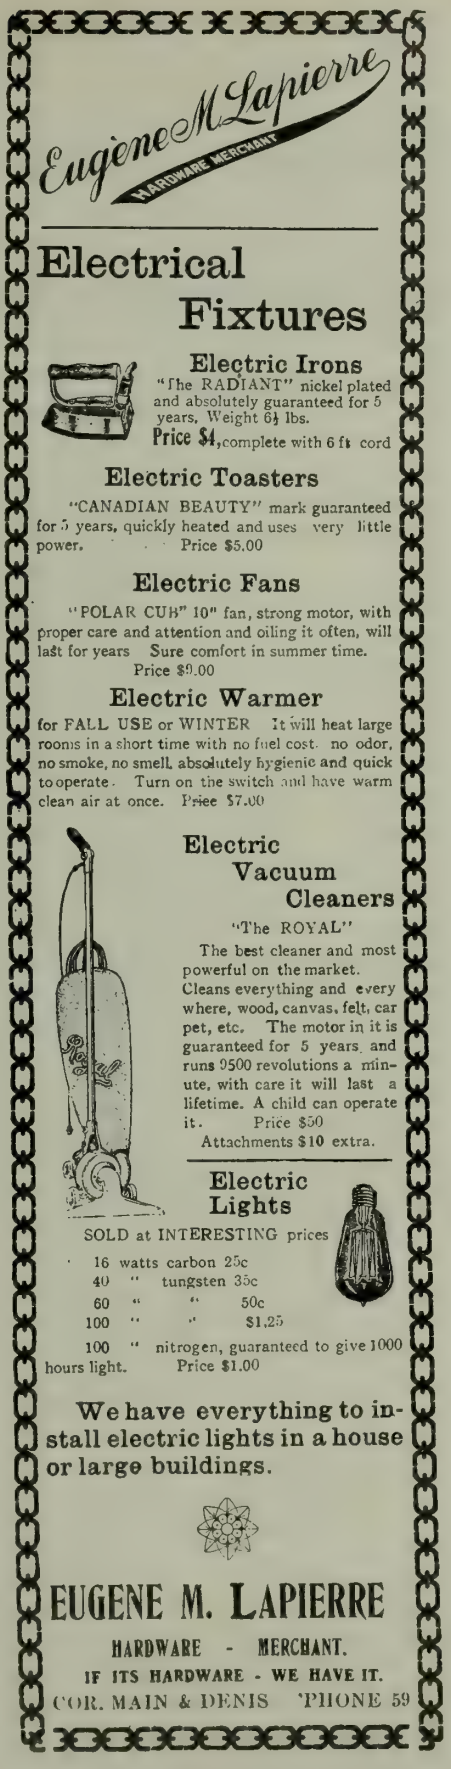
### Use of Borders

The principal function of the border is to unify the various elements of your advertisement—to hold it together. It should not attract atention to itself. The border is to an advertisement what a frame is to a picture. You want folks to look at the picture—not at the frame.

The border must blend with the type picture. It must be in keeping with the thing advertised, and in "tone" with the rest of the store. If the border is the the first thing you notice in an advertisement it was not chosen with discrimination, and it is detracting from the message. You are not selling border: attention should be concentrated on what you are saying.

Don't be afraid to study the ads. of other merchants and of the department stores, as you can often get many excellent ideas that you may adopt.

### Illustrations Are Always Useful



Especially if the cuts are good. They brighten up an ad and people always like to see a picture of what is offered. They also like to know the price, and many of the best firms in the country invariably feature the price in larger type than the body matter.

## HOW I INCREASED MY RAZOR BUSINESS

(Continued from page 41)

razors to be honed and repaired. Indirectly it helped sales of pocket cutlery.

"And to boost the sales all around a large space was taken in the daily papers for the following day, calling attention to the lines we sold, giving prices and inviting an inspection of the window display. It should prove a winner, this regular monthly display, everywhere."

*Each week Eugene LaPierre of Buckingham, Quebec, uses the two right hand columns of the front page of the local paper. He is getting splendid results from advertising of this kind. The illustration is about half the size of the original.*

## NATIONAL HARDWARE ASSOCIATION

Continued from Page 40

places are an advantage, but when radicals gain control they are a menace."

A resolution adopted at the closing session of the convention commended the refusal of the Steel Corporation to deal with "labor agitators" and also endorsed the "twelve points" of the Industrial Conference in Washington. The following declaration was forwarded to Judge Elbert H. Gary:

"Whereas, groups of irresponsible, professional agitators, having no present productive vocation, and without the approval of many of the employees concerned, are forcing their uneconomic propaganda into factories in which said agitators have never been employed, demanding of the employers that their employees shall be represnted by said agitators in any negotiations between said employers and their employees.

"Whereas, a controversy between the United States Steel Corporation and the representatives of certain labor organiztions has culminated in a labor strike, seriously affecting the steel industry, and

"Whereas, the reasons underlying the positions assumed by the respective parties have been made public by current comment in the newspapers. Congressional investigations and otherwise, and the issues appear to be of special interest in general and to this association in particular; now, therefore, be it

"Resolved, that it is the sense of this association that the employers in this instance appear to be not only justified in, but should be commended on account of the position assumed against the demands made by professional labor agitators and so-called representatives of labor, to the end that what we believe to be a great majority of its honest, loyal and capable employees (whom we understand are not in sympathy with the agitation which has forced this issue) may be permitted to continue unmolested the present mutually satisfactory working conditions and relations with the industry in which so many of them enjoy a financial or stock owning interest."

Frank H. Payne, of Greenfield, Mass., was elected president of the Manufacturers' Association. In his speech of acceptance Mr. Payne said that one of the first duties of all employers was to see that al the employees were American citizens, either by birth or naturalization.

Robert H. Tremain, of Ithaca, N.Y., was re-elected president of the National Hardware Association, comprising the jobbers, and T. James Fernley, of Philadelphia, was re-elected secretary-treasurer of this association for his twenty-sixth term.

## Would Restrain Govt. From Selling Razors

Interesting developments are occurring in the suit brought by the Auto Strop Safety Razor Co. for an injunction restraining agents of the Government from reselling their product.

The history of the case commenced with the purchase by the Dominion Government of 7,000 razors for distribution among the troops. Some were not distributed and were later placed in the hands of Kelly & McKenzie for resale. These agents have already disposed of $4,500 of the stock to druggists and other, and have been met by an action by the Auto Strop Company, which claims damages and an injunction on the allegation that the purchaser of a patented article has no right to resell it.

As a counter action, the defendants moved before Chief Justice Mulock for an injunction restraining the company from circularizing the trade to the effect that they have no right to resell. The motion was adjourned.

# EDITORIAL COMMENT

"SIX days shalt thou labor," says the Bible. "Five" is the plan of the miners. By the way, have you got your coal supply in?

* * *

YOU have got to climb if you want the view. The man who sticks too close to small details gets in a rut and loses sight of what is going on around him.

* * *

HARDWARE merchants are looking for a record Christmas trade this year. Are you busy with your plans for window displays, holiday advertising, stock arrangement and so on?

## *ONTARIO ELECTION RESULTS*

THE people of Ontario have spoken and the result has occasioned a good deal of surprise. Not for a long time have the prophets been so much at sea regarding what would happen. The result may well be the handwriting on the wall in regard to what is coming when a Federal election is held and a good many of the members at Ottawa are sitting up and taking notice. Of particular interest perhaps to the greatest number of people in the Province, aside from the liquor question, is the Hydro-Electric situation. The defeat of Sir Adam Beck, who for twenty years now has been one of the most prominent figures in provincial affairs, came as a shock and a surprise to many. Sir Adam, in one of his closing election addresses, stated, that in the event of defeat, he would at once tender his resignation and take it as a mandate from the people that his usefulness was at an end and that they did not wish him to carry on any longer. In view of the fact that he has Hydro development projects under way in various parts of the Province that will cost $35,000,000, much hangs on his decision as to whether he will continue or not. His successor, Dr. Hugh Stevenson, does not come to office untrained. For many years he has been in public life as a member of the Water Commission, the Public Utilities Commission, and as Chief Magistrate of London. He has been especially interested in electrical matters and during his election campaign declared emphatically, that if elected, a progressive Hydro policy could be carried out. He held that Hydro was big enough to carry on without Sir Adam Beck and that Sir Adam was not essential. There is no doubt, whatever, regarding the demand for more and more electricity. All over the Province people are demanding the extension of power lines. Hardware merchants are keenly interested in this as it means a large amount of business. Another old standby to fall at the polls was Hon. Finlay Macdiarmid, the Provincial Minister of Public Works. The question of highways had a lot to do with his defeat. He stood for the provincial highways scheme. The average farmer took the attitude that good roads in the country districts are of far more importance than highways connecting the large centres. It was more important, the farmer believed, that he should be able to reach his nearest market town over a good highway than that millions should be expended on a road which would connect the large cities and which would be largely used by "sports," meaning generally auto tourists. To make matters worse from Mr. Macdiarmid's standpoint, he failed to secure the provincial highway for the only city in his district, St. Thomas. Instead, it was to pass through London en route to Windsor and his constituents did not like this. Another aspects of the general situation is the strength of the United Farmers. They are not strong enough to do anything themselves, but whichever side they support holds the balance of power. It looks generally as if Ontario was in for some radical changes in policy and just how these will affect the business situation remains to be seen.

## *PROTECTING THE PEOPLE*

THE jury which investigated the recent tragedy at Ottawa, in which seven people lost their lives by being asphyxiated by illuminating gas, returned a verdict recommending that the building permit by-laws be amended so as to cover gas inspection. It seems a pity that seven lives had to pay the penalty before the authorities discovered that their by-laws were lacking and yet all over Canada the same laxity exists. There are scores of municipalities in which laws aimed to protect the lives and health of the people are not enforced. There are possibly hundreds of places in which either antiquated laws or no laws at all exist. Hardware men are vitally interested in the homes of the community in which they live and in making these homes better, and in securing better by-laws which will make for more comfortable and safe homes they are doing an excellent work. Those in touch with the situation in many districts, state, that there is urgent need for better by-laws. Hardware men may well lend their

efforts towards securing the enactment of these laws and then seeing that they are enforced. In the Ottawa case, seven lives were lost because a faulty building by-law did not cover the inspection of gas pipes and the settling of the house cracked a pipe. In many other communities there may be no law to cover this very point and other lives are in jeopardy. There is little question that in many places buildings that are a menace to the whole community because their poor construction makes them a danger from fire exist. If this problem and the dangers that exist from insanitary buildings or dangerous buildings continues to be nobody's business nothing will be done. If business men and citizens work together they can quickly remove these menaces and build communities that will be better in every way.

### *THE INDUSTRIAL PROBLEM*

THE vital point about the industrial problem is not the rate per day or week, but the rate per unit of production. Efficient labor is worth high wages. But the man who demands high wages without giving efficient production in return not only injures himself but numerous other people. Suppose for instance, he is making a hardware line. If he gets high wages for poor work he increases the cost of hardware. That means that the man who lives in Halifax or Winnipeg or Vancouver or any other place in the Dominion has to pay more for his stoves, or his nails, or his tin pans, or whatever the line may be. He will be forced to demand more for his own labor and then up goes the cost of whatever he is making to the man who is making hardware. This thing has been working out all along the line until everyone has been hit and it has not been good for business. Business has been good but it would have been better if this condition had not prevailed. There is little question that hundreds of thousands of dollars' worth of building is held up. Any number of individuals have been holding back buying in the hope that things would be cheaper. The average employer knows that it is to his interest that his employees shall be well paid. The higher the wages the higher the purchasing power of the people, but the employee has an obligation to be efficient. Unless he realizes this, he is going to injure business and himself eventually.

### *HELP STOP THIS*

"SEPTEMBER, 1918, $917,286; September, 1919, $1,940,272." This is not a comparison of high cost of living figures, although it looks like it at first glance. It is simply a comparison of the fire losses of Canada last month and in the same period a year ago. The loss has more than doubled in spite of the efforts being made to check them. when, as is the case just now, Canada's fire loss per capita is the highest in the world. What is the answer? Careful investigation shows that practically all of the fires are directly traceable to carelessness, and that the big losses are almost always in the factories and stores. Fires in homes are obviously not the cause of the huge figures. It is in the stores and manufacturing plants where stocks of goods running into thousands and hundreds of thousands are stored that the losses fall. The problem, then, is up to the merchants and manufacturers, and if they can stop careless employees from throwing away lighted cigars and cigarettes, and from looking into gasoline tanks with lighted matches, and dropping matches into piles of rubbish they will have taken a long step towards eliminating the fire danger. One of the most prolific sources of bad fires seems to be rubbish piles in cellars and back yards. Watch these and do not allow old paper, excelsior, packing cases, etc., to accumulate. Remember, they make a fine bonfire and it takes very little to start them. Keep your premises cleaned up. It sounds easy, but the figures show that it is not. Every hardware man and every merchant in Canada can do his share to stop the fire ravages and it is a duty to do it.

### *THE RETAILER CRITICIZED*

THE Montreal *Star,* in a recent editorial, slates the Retail Merchants' Association for its opposition to the methods of investigation adopted by the Board of Commerce.

"It has seemed to the *Star* for some time that the Association is inclined to labor under the delusion of persecution. If the retail merchants of Canada have been more closely quizzed than has any other class of Canadian business men in the Government's endeavor to throw some light on the cost of living puzzle, it is only because their business gives them special information the Board requires. As a class they have not been the victims of more loose accusations of profiteering than others.

"As a matter of fact, the Association has been badly advised from the start in its attitude of opposition to the Government's inquisitorial methods. Because it did not approve of the constitution of the Board it objected to giving evidence before it; it still protests against being examined by the Board, and, at the same time, it wonders why this refusal is misunderstood by the public."

While the *Star* is ready to admit that "the retail merchant is no more guilty of profiteering than any other member of the community," it sees in its attitude to the Board of Commerce an excuse for the contrary belief.

Granting a judicious attitude of mind on the part of the public, this contention might be correct. Unfortunately it is impossible to believe in such an attitude, and the public takes the Board of Commerce investigation as an accusation of guilt and certainly there is little in the methods that the Board has adopted to date that would tend to disabuse their minds of such an impression.

# EVENTS IN THE TRADE

## Business Changes

Dundalk, Ont.—Russell and Simmons have purchased the hardware business of Russell Bros.

Fusilier, Alberta.—S. Sundvaal has purchased the hardware business of Nelson Bros.

Rockhaven, Alberta.—K. Robertson has purchased the hardware of R. J. Nelson.

## Obituary

The death occurred at St. Gabriel de Brandon, Quebec, of Ulric Rock, hardware merchant.

The death occurred at Hamilton, Ont., of Adam Clark.

The death occurred at Lindsay, Ont., of Richard Sylvester, of the Sylvester Mfg. Co. He was 74 years old.

Raoul Lavasseur, formerly manager of the old L. J. Surveyor retail hardware at the corner of Craig and St. Lawrence Streets, died at his home in Montreal. The late Mr. Lavasseur was a young man and his demise was unexpected by many of his friends.

## New Firms

Collingwood, Ont.—R. H. Breeze, who formerly conducted a hardware business at Collingwood, Ont., has opened a hardware store at 816 Danforth Ave., Toronto, Ont. D. B. Ritchie purchased the Collingwood business.

## Personals

Peter Gordon, manager of the Imperial Oil Company's branch at Saskatoon, has been transferred to the West Toronto branch as manager. He will be succeeded by C. S. Griffith.

George W. Ecclestone, hardware merchant at Bracebridge, Ont., was returned as member for Muskoka electoral district in the Provincial elections, held on Monday. His majority was over 200.

## Trade Notes

Wm. Strachan, hardware, Ottawa, Ont., is discontinuing business.

The Universal Batteries Co. has started work on a new factory at Brampton, Ont.

The Art Lamp and Shade Mfg. Co. has been registered at Montreal by Morris Bernstein.

The Northern Aluminum Company of Toronto will commence work shortly on a new factory to cost $350,000.

E. W. Taylor & Sons have purchased the wholesale and retail oil business of Walter W. Scane at Chatham, Ont.

A by-law submitted to the ratepayers at Wingham, Ont., in connection with the Aero Cushion Inner Tire and Rubber Co., of Ontario, Ltd., was carried and the firm will commence operations about November 15.

## Montreal News

A. W. Pole, of McArthur, Irwin, Ltd., was a recent visitor in Toronto.

John Irwin, of McArthur, Irwin, Ltd., was in New York during the week.

Bedard Freres have taken over the hardware store formerly conducted by A. Goyette at 22-26 St. Denis Street.

H. J. Balmer, representing the American Pad and Textile Co., Chatham, was this week a visitor to Montreal.

Mr. Bliss, advertising manager of Oneida Community, was in Montreal recently.

J. L. Huston, of the Miller Lock Co., Philadelphia, is expected to visit Montreal next week.

F. E. Harris, of F. E. Meyers & Co., Ashland, Ohio, was in Montreal during the past week.

C. D. McDowell, of H. D. Smith & Co., Plantsville, Conn., is expected in Montreal next week.

The East-End Hardware has disposed of its business on 1919 Masson Street to Lauzon and Trudeau.

A. Tanguay, formerly with Lewis Bros., Ltd., has joined the sales force of A. Ramsay & Son Co., Ltd.

Mr. Isaacs, of Hornsells, Ltd., Bridport, England, called on the Montreal trade in the interest of his firm.

Arthur Telfer and Fred Hanson, of the J. H. Hanson Company, journeyed to Atlantic City to take in the sights and the big hardware convention.

Chas. Crawford, of Crawford & Co., Warsal, England, is in Canada at present with a line of chains made by his firm.

Fabien Ltee., Wellington Street, are at present making extensions to their store which will afford them increased space for showing accessories and wallpaper.

Alfred Goyette, retail hardware merchant, Mount Royal Avenue, is making an extension to his store. This will afford Mr. Goyette greater accommodation for his wallpaper and paint stock.

## Western News

David Miller of the Costing Department of Wood, Vallance, Ltd., Winnipeg, has received his Military Medal and Ribbon from the British War Office.

Wood, Vallance bowling team is going strong, having won all three games in the last competition. The team is now at the top of the list in the Commercial Bowling League. Some very valuable prizes are offered in the competitions, including an electric vacuum cleaner and a cabinet of silver.

Edward Goodwill, vice-president of Thos. Davidson Mfg. Co., Montreal, spent a few days in Winnipeg recently, and declared that business has been active. He was in conference with R. W. Robinson, Winnipeg, manager of the company.

According to recent reports "Don" Ferguson, manager of Wood, Vallance Auto Accessory Department, who is away on a shooting expedition, will require a number of flat cars to bring home his bag of ducks.

## Incorporations

The Canadian John Wood Manufacturing Company, Limited, head office Toronto, capital $200,000, plans to manufacture and deal in range boilers, galvanized goods, barrels, containers, etc.

Prest-O-Service, Limited, head office Montreal, capital $50,000, plans to manufacture and deal in auto supplies.

The Economical Refrigerator Manufacturing Company, Limited, head office Montreal, capital $100,000, plans to manufacture and deal in refrigerators and furniture.

Thermos Heating Systems, Limited, capital $600,000, head office Montreal, plans to manufacture and deal in hot water systems, steam boilers and heating equipment.

National Iron & Steel, Limited, capital $100,000, head office Montreal, plans to manufacture and deal in iron and steel goods.

Dolomite Products Company, Limited, capital $100,000, head office Toronto, plans to manufacture and deal in goods and wares and also carry on a general smelting and refining business.

The McLagan Furniture Company, Limited, capital $600,000, head office Stratford, Ont., plans to manufacture and deal in furniture, phonographs and wood products.

Walter Fields Auto Service, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in auto accessories and autos.

### CORNWALL HARDWARE MAN CELEBRATES GOLDEN WEDDING

CORNWALL.—Alex. and Mrs. Jarvo, of Cornwall, celebrated their golden wedding anniversary here, and the function was made very enjoyable by the attendance of a large number of direct descendants.

Mr. and Mrs. Jarvo entered the matrimonial ship in October, 1869. To join with them in the happy event of celebrating their fifty years of wedded life were three sons, John, Austin and Alex. Four daughters also were present, Mrs. Browne, Mrs. Mallett, Mrs. McAlear, and Mrs. Ross. Adding to this number twenty-four grandchildren and eight great-grandchildren, the happy company had reason to make merry in no uncertain manner.

Mr. Jarvo has been actively engaged in the hardware business in Cornwall for the past twenty years. Previous to this he was connected with Henry Turner. The assembled descendants presented their happy parents with a loving-cup, suitably engraved with the family name.

### WILL PLAY FOR CUPS DURING WINTER

The Montreal Wholesale Hardware Hockey Association is now in process of undertaking reorganization. It will be recalled by some that there has been no activity since the beginning of the war, and as the boys desire to "supple up," the trophies which they hold will not be played for this season, but will be contested for the year following.

At a meeting held recently the above decision was agreed to and the trophies donated by the Gillette Safety Razor Co., Ltd., the Fuller Cup by the Canadian-Fairbanks-Morse Co., Ltd., and one by the St. Marys Wood Specialty Co. (now held by the James Walker Hardware Co.), will then be open for competition. This delay will afford the huskies an opportunity to "polish up."

### TRADE COMMISSION CITES SPONGE DEALERS

"Loading" sponges with such weight-increasing substances as glucose, molasses, epsom salts, sand, or lead, to deceive and defraud the public by falsifying their weight is charged against twenty-five sponge concerns in complaints of unfair competition which have been served on them by the Federal Trade Commission.

The concerns are charged with purchasing "raw" sponges in Florida and other places, transporting them to their places of business and there "loading, doping and saturating them" with the intent of selling them by the pound at fictitious weights. They are also charged with "knowingly and deceptively" purchasing and reselling "loaded" sponges.

Consumers, the complaints point out, cannot readily distinguish between unadulterated and doped sponges.

The concerns were directed to file answers with the commission at Washington, November 15.

## Stewart & Wood, Limited Purchased by Montrealer

A. W. Poole, of McArthur, Irwin, Ltd., has purchased the stock of the Wood interests in Stewart & Wood, Ltd., giving him majority stock holdings in the company. It is announced that Mr. Poole has also purchased from the Wood estate the office, store, and warehouse buildings at 82-84 York Street, occupied by Stewart & Wood, Ltd.

It is understood that there are to be practically no changes in the executive officers of Stewart & Wood, Ltd., under the new control, but that Mr. Poole will shortly sever his connection with McArthur, Irwin, Ltd., and move to Toronto to take an active interest in the management of the company.

E. T. Dean, managing director of

*A. W. POOLE*
*Of McArthur Irwin Ltd., Montreal. Who is moving to Toronto.*

Stewart & Wood, Ltd., who has been associated with the business for years, and is largely responsible for its development, will continue to be closely identified with the management of the company's affairs.

Stewart & Wood, Ltd., is one of the old established paint jobbing houses in Canada, and has held for years a strong position with the trade in the distribution of paint products. It was established in 1884 as a partnership by the late Robert E. Wood, and the late Jas. Stewart. Following the death of Mr. Stewart and Mr. Wood the partnership was suceeded by the present company, incorporated under Ontario laws in 1917 with a capital of $100,000.

### REPORT A ROYAL TIME

The Montrealers who journeyed to Atlantic City last week, report that the treatment accorded them by the National Hardware Association of the United States was of a royal character. Those attending from here were Colonel Robert Starke, H. P. Seybold, J. W. Richardson, R. Terrill, Arthur Telfer and Fred Hanson.

It was one of the best conventions on record, it is stated, in point of attendance, the delegates numbering three hundred more than those of a year ago.

### NO PROSPECT OF PLATE DELIVERY IMPROVEMENT

At the present time the prospects are not bright for an early easing of the plate situation. All sheets are very firm and in many cases HARDWARE AND METAL understands that premiums are being paid for supplies. It is stated that there are fair stocks of plate in Canada at the present time, but that the failure to maintain shipments from U. S. mills to the trade here has caused a sharp upturn in the undertone. It is more than probable that there will be no redress of consequence this fall, and one large Montreal importer stated that it would in all probability be January or February before shipments would be resumed.

### CONDITIONS AT SHEFFIELD

Firms at Sheffield, England, are, owing to general conditions, getting farther than ever behind with orders. Discussing the situation a recent report from Sheffield says:

Trade development in this district is being checked by the strike of moulders, as the engineering firms are indisposed to order in view of the probability of having to close their works. Overseas inquiries and orders, however, are being received in increasing number, and the tone in this department is distinctly healthy. Unfortunately, the turnover of nearly all the firms is being kept within limits by the inability of the mills to keep pace with requirements. In numerous cases the operatives are working better than formerly, and a considerably greater volume of business might be done if materials could be obtained more freely. Prior to the war Germany was a considerable purchaser of the best brands of Sheffield tool steel and steel for making high-quality razors and knives. Former users in Germany have sent inquiries to makers respecting a resumption of business, but it is impossible to trade while the mark remains at its present value. Sheffield steel is more than double its pre-war price, but it would cost the Germans to-day four times the current quotation. The unsatisfactory conditions of rail and sea transport are a serious hindrance to the expansion of trade.

### A PECULIAR ACCIDENT

William Weber was electrocuted at Neustadt, Ont., when a piece of eavestroughing which he was handling came in contact with a hydro-electric wire.

Weber was helping William Meyer, tinsmith, on a job at the Neustadt Creamery. Weber was on the ground and the full charge passed through him. He was handing the troughing to Meyer who was on the ladder. The latter was unhurt.

## Many New Devices At Electrical Show

Visitors to the electrical show, which closed last week in New York, were impressed by the multitude of new devices all aimed to make life easier, or make work easier. The efficiency and wide range of application of electricity as a servant was never more fully demonstrated. The show served to give an idea of the size and scope which the electrical industry has assumed. It is growing larger every day and any number of sanitary and heating engineers who have been handling various electrical lines, fixtures, irons, washers, vacuum cleaners, etc., may be interested in some of the devices shown. There were machines for milking cows, making ice, hatching chickens, stimulating the growth of plants, reducing weight, growing hair, removing hair, pulling teeth, washing clothes, counting money, operating typewriters, and almost everything one could imagine.

Among the brand new electrical innovations shown were a machine which both washes and dries clothes in the same tub, an attachment which provides steaming hot water from the cold water faucet, and a carpet washer which cleans, restores color, and kills germs at one operation.

Among the feature exhibits were the electrical dairy with six thoroughbred Guernseys and Holsteins which were milked at half-hourly intervals, the milk passing from the cow's udder and through the cooling process to the bottle without once coming in contact with the air; the electrical hospital and therapeutic display, the modern electrical apartment, the electrical bakery, the motion picture theatre, and others, all in actual operation.

### CONDITIONS IN THE GERMAN TOY INDUSTRY

According to a report in the Berliner Boersen Zeitung, the Nuremberg toy industry is suffering from the effects of labor disputes.

During the war, and even up to the present, the industry had to use many substitute materials which have been entirely unsuitable for toy manufacturing. Now that trade has been resumed with most of the world, Germany finds that the market for toys, especially in Canada, is not what it used to be.

From reports coming from Germany, it appears that American buyers of German toys have thus far confined their efforts to the completion of shipments of toys purchased before the United States entered the war, but the shipment of which to America was prevented as a result of blockade regulations. American toy houses appear to have been making practically no effort to resume their import trade from Germany. However, two of the largest toy houses in New York have just sent American representatives into Germany.

## Manufacturers Were Welcomed at St. John

Following a meeting of the Canadian Manufacturers' Association held in St. John, N.B., to discuss various business matters, the members were tendered a banquet at the Union Club. W. S. Fisher, of the hardware firm of Emerson & Fisher, was chairman and proposed the toast to "Our Guests." In discussing the work of the Canadian Manufacturers' Association, he pointed out that it was the intention of each member to increase his own business and at the same time promote the interests of his fellow manufacturers and of Canada generally. The manufacturers, he said, can promote Canadian business in a very vital way and the more that members did in the way of placing "Canada first," the better it would serve their own interests.

*W. S. FISHER*

*Of the hardware firm of Emerson & Fisher who presided at banquet to Canadian Manufacturers held in St. John, N.B.*

Mr. Fisher is second vice-president of the Canadian Manufacturers' Association, having been honored by being elected to that office at the annual meeting.

### MONOPOLY FOR ELECTRIC LAMPS

By a royal decree recently issued, the Italian Government has established a monopoly in the electric lamp trade. This may have serious effects as far as a Canadian firm, who were going after business in this line, is concerned.

In the opening words of the decree a monopoly tax is instituted, fixed at 25 per cent. of the selling value. Practically, this is a consumption tax to be paid by the users of electric lamps. The administration of this tax is placed under the General Direction of Monopolies for lamps manufactured in Italy. The tax on imported lamps will be collected by the customs authorities.

Factories in Italy turning out 10,000 or more lamps annually will pay the tax on actual production and sales. A manufacturer producing less than 10,000 lamps in a year will pay a fix sum based on his assumed output as that may be estimated by the monopoly administration. All manufacturers must make detailed and frequent reports on their production.

Importers of lamps will pay the tax at the time their goods pass through the customs. A declaration of value made by the shipper must accompany each consignment of imported lamps, in addition to a copy of the full set of selling documents.

The work of American producers to secure the imposition of a protective tariff on graphite may have important effects on the development of the industry in Canada. Canada has a splendid supply of graphite that is said to be as good for general commercial use as that imported from Ceylon, the chief source of supply of many countries.

## Flashlight Sales Increasing Steadily

### Nice Line For Hardware Merchants to Handle—Numerous Accidents With Gasoline, Showing People the Danger of Using Matches Carelessly

MONTREAL.—Lucien Payette, of 228 City Hall avenue, went to look for a gas leak in his cellar with a lighted match this morning. When he came back to earth he was lying beneath a pile of bricks and debris which had once been his home. Constable William Viens, of No. 4 station, pulled him out of the wreckage, and also recovered Mrs. Payette from what remained of her bedroom. The pair were then taken in an ambulance to the General Hospital, where the man was found to be suffering from severe burns and bruises, and was detained, while the woman, after being treated for minor injuries in the outside department, was able to return to her ruined home.

The explosion which resulted from the contact of Payette's lighted match with the gas which filled the cellar from a leaking pipe, demolished the south wall of the house from the basement up to the second floor and hurled the bricks through the windows of neighboring houses.

ACCIDENTS like the above, and fires caused by people looking into gasoline barrels or automobile tanks with matches to see if they were full, have been occurring almost every day or two. Some of them have result-

# Hardware Clerks of St. John, N.B., Hold Banquet and Dance

## President Morris Declares This is Only the Beginning of a Series of Get-Together Affairs That Will be Held During the Coming Months

The members of the St. John Hardware Clerks' Association celebrated their growing strength Tuesday evening with a fine banquet and dance in the big dining hall of Bond's Cafe. About 150 members attended, and the affair proved a distinct success. The organization was instituted last April, but has steadily increased and gives promise of a most healthy future. An excellent menu was provided at Tuesday night's banquet to which ample justice was done by those present.

Charles O. Morris, president of the association, occupied the chair and gave a brief but interesting address in which he referred to the start of the organization, its growth, and its objects. He predicted that the banquet was but the beginning of a series of social functions which would provide pleasure for all the members and be a means of bringing them together happily and enjoyably throughout the winter. He proposed the toast, "The King," which was honored in music. In reply to the toast to "Our Guests," Miles E. Agar and H. Horton were heard in neat addresses. "The Ladies" was proposed by R. M. Bartsch and in behalf of the forty or so who were present, as well as the general body of their sex, replies were made by Miss Fitzmaurice, of W. H. Thorne & Co., Ltd.; Miss Rogers, of T. McAvity & Co.; Miss Hazlett, of S. Hayward & Co., and others.

There were several bright and pleasing musical and vocal numbers, including a solo by Cyril Moore; bell solo, Walter Bagnell; reading, Arthur McCloskey; solo, A. C. Smith; duet, R. J. Carson and F. J. Punter; solo, John Stenhouse; musical selection, P. C. Johnson, and piano solo, H. C. Dunlop. Victor Lee was accompanist for the evening.

Under the direction of Hedley T. Sheraton, as floor manager, an entertaining programme of dances was carried out, bringing to a close a most enjoyable and successful gathering. The officials of the organization are C. O. Morris, president; H. D. Sullivan, vice-president, and R. A. Willett, secretary-treasurer.

# New Tariff Rulings Will Affect Several Hardware Lines

TARIFF changes which become effective immediately, and which affect several hardware lines, have been made by the department at Ottawa. Rulings are as follows:

File No. 78579.

Tariff status of clothes wringers when imported attached to washing machines. Declared that washing machines operated by mechanical power, with which wringers are combined, forming a permanent part thereof, are dutiable under tariff item 453.

The duty on these under item 453 is: British preferential, 15 per cent.; intermediate, 25 per cent.; and general, 27½ per cent.

File No. 97711.

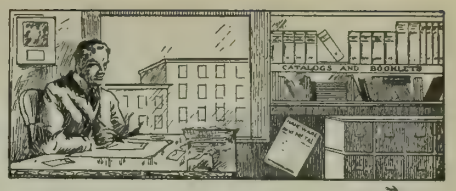
Flexible conduit, consisting of cotton core, round which is wound paper twine, the whole covered with braided fabric and saturated with tar or asphalt, and used to protect insulated wire, dutiable according to material, as a manufacture of cotton under tariff item 537.

Tariff under item 537 provides: 25 per cent. British preferential, 30 per cent. intermediate and 35 per cent. general.

File No. 99000.

Castings, iron or steel, in the rough as taken from the mould, item 453; castings, iron or steel, machined in any manner, not being integral parts of machinery or otherwise provided for, tariff item 454; whiffletrees and neck yokes dutiable according to material; clevises, iron or steel, dutiable under tariff item 454.

Tariff under item 454 is: British preferential, 20 per cent.; intermediate, 27½ per cent.; general, 30 per cent.



### FLASHLIGHT SALES INCREASING STEADILY

Continued from Page 48

ed seriously, causing loss of life and property.

All these troubles are unnecessary. A flashlight eliminates all possibility of danger, and the hardware merchant has some real talking points in pushing sales.

The flashlight trade is increasing very rapidly, because hardware merchants are keeping them in their windows and well displayed in the stores and are talking about them. A flashlight is indeed in most homes because of its convenience and practical utility. They are easy to sell and lend themselves readily to window, show case or store displays.

### THE GLIDDEN COMPANY

The Glidden Company of Cleveland, Ohio, Canadian branch, Toronto, has just issued a color card in which are shown the shades of prepared paints they manufacture, with full directions regarding their use. Copies will be sent to readers of HARDWARE AND METAL upon request.

### DOWSWELL, LEES & CO., LTD.

A twenty-page booklet just issued by Dowswell, Lees & Co., Ltd., of Hamilton, Ont., is designed for distribution to prospective buyers of washers and wringers. It is well illustrated and lists the various lines of washers manufactured by the firm, also the wringers. Copies will be sent to readers of HARDWARE & METAL upon request.

### CHRISTMAS SALES HELPS

Northern Electric Company, Montreal, have prepared a special Christmas folder printed in four colors—attractively made up and will be sent to their dealers and arrangements will be made to imprint their name and address. With this, they are arranging to forward to their dealers photographs of window displays. New show cards with the company's vacuum cleaners and electric sewing machines have been designed for this Christmas campaign.

### BISSELL'S PEERLESS DISPLAY

Bissell Carpet Sweeper Company of Canada, Limited, Niagara Falls, Ont., have produced an unusually attractive feature in the form of their Peerless Co-operative display for show windows. It is a nine-color lightograph reproduction of a $300 painting, made of heavy cardboard "cutout," which when set up is about 7½ ft. wide by 4½ ft. high, making an imposing background. The centrepiece, a girl's figure, is a separate piece, and is used with a real carpet sweeper. The Bissell Company are furnishing these gratis with one dozen or more sweepers.

### J. H. WILLIAMS & CO.

J. H. Williams & Co., makers of superior drop-forgings and drop-forged tools, with works at Brooklyn and Buffalo, N.Y., have just issued a catalog—4 x 6—160 pages—fully illustrating and describing their standard stock specialties. These include several lines of new goods, viz.: "Agrippa" Turning-Tool holders, set screw pattern; "Agrippa" Boring-Tool Posts, "Vulcan" Forged-Cutter Tool Holders, and several new assortments or sets of Drop-Forged Wrenches.

The book contains, also, a description of the drop-forging process in very simple, non-technical style for the benefit of those not conversant with its details.

# THE CLERKS DEPARTMENT

## Houston Lowe Tells About Importance of Selecting Proper Assistants

### President of Lowe Brothers Company Says That During the Fifty Years He Has Been in Business He Has Learned Three Very Important Things That Make for Success

FOR fifty years Houston Lowe has been one of the heads of Lowe Brothers Company, of Dayton, Ohio. For ten years he has been president of the company. His story of three important things he has learned, as told by Mary B. Mullett in the "American Magazine," is as follows:

To have been fifty years in one business and never actively engaged in any other, to have been from the beginning a proprietor, to have started with a local concern, not in a great city, and to have built it up to be a nation-wide business, to have lost money at first—a good deal of money for those days—and to have achieved unusual prosperity, this is the record made by Mr. Houston Lowe, president of the Lowe Brothers Company, of Dayton, Ohio.

**Three Reasons**

Out of that experience Mr. Lowe has learned three great lessons about business. And, by the way, he has very decided ideas not only about learning, but also about teaching, in business.

The organization of which he is the head holds an annual convention of its salesmen, which is conducted somewhat like a school, with daily lectures and talks. The men are there to learn from others what they know. But a man is expected, also, to teach others what he knows.

Mr. Lowe takes his turn at talking. And in these informal talks, most of the things he says—aside from the technical aspect of his business of making paints and varnishes—come under the head of one or more of those three lessons.

**Strong Convictions**

For example, at the most recent of these conventions, he spoke on two of these favorite subjects, in the course of a single brief talk to his men. You understand, he does not "harp on" these themes insistently and narrowly. It is merely that they are such strong convictions with him that they inevitably come to the surface of his thoughts. In this case, he said:

"I do not look upon this paint business as altogether a money-making business. It is more than that. It should be a man-making business. And not a one-man business, either.

**Must Have Head**

"Every organization must have a head; this organization has a head—whether a good one or a bad one is for you to judge. But at least I feel that I have had head enough to select a wonderful lot of lieutenants, or colleagues, or assistants—call them what you may—and I am proud of the men who work with me."

That is the first of the three great lessons he has learned—the importance, not only to the business but to him personally of the men in it.

"Some years ago," he said to me, "I read a book, Horace Fletcher's 'Menticulture,' which helped me a great deal. In it he discussed the necessity of getting rid of worry and anger. I was telling someone about it a long time afterward and casually announced that I followed the book's injunction and 'got rid of worry.' Not unnaturally, my friend demanded with some impatience:

**How to Do It**

"'But how?'"

"'Well,' I said, 'I got rid of worry by getting rid of the men who were causing the worry. I had some associates at that time who did not inspire me with either confidence or liking. On the contrary, I distrusted them and was irritated by them. Yet I had felt that in certain ways they were necessary to the business and that I could not risk letting them go.

"'But when I got to thinking about worry and realized that those men were at the bottom of nine-tenths of my worry, I decided that my peace of mind was as necessary to the business as they possibly could be—and it was vastly more necessary to me. So I got rid of the men who were a thorn in my side, filled their places with those I could trust and like, and it proved to be as good a thing for the business as it was for me.'"

**A Serious Matter**

This question of choosing men is a serious one with every employer; for not only should it be the aim of a business to "make men," but the men of an organization, from the one who is the head of it to the ones who may seem the least important, do make the business! Therefore, the matter of choosing them is a vital one.

"The quality I look for most keenly from my very first encounter with a man—or with a boy or girl either—is sincerity," says Mr. Lowe. "I like a man who looks me in the eye, and who does it because it is the natural expression of a direct and honest personality, not a trick he has tried to acquire because he thought it was a good one.

"You can tell the difference. The eyes themselves may be held steady; but there is something in them that wavers and shifts if the act is not natural to the man.

**Look for Character**

"One must always look for character in choosing men, for there are two things which count in a healthy man's work: character and knowledge. He can, to a certain extent, acquire both, but knowledge is gained more easily than character.

"One of my old classmates in New Haven, Professor A. J. Dubois, once defined character as 'right action become habitual through the voluntary exercise of the will.' In that sense, character, good or bad, is formed by everyone. And I like a man who seems to be forming his character by making 'right action habitual.'

"Another thing about choosing men is this: Pick at least some men who are the complements of your own temperament. For instance, I am inclined at times to be over-enthusiastic. My wife has been a wonderful help to me in that respect. Her calm judgment has often served as a necessary brake on my impetuosity. I am sure that many men will say they owe much to the fact that their wives have supplied the quality they themselves lacked—calmness, if they were too hot-headed; optimism, if they were pessimistic; humanism, if they were too much taken up with hard materialistic aims.

**Many-sided**

"For the same reason, a business organization should be a many-sided one. If an executive is very conservative, and chooses only conservative men to work with him, the business will suffer, because it will lack the eager enthusiasm which a few alert and progressive men would supply.

"If an executive who is impulsive and very optimistic surrounds himself with other men who are as impulsive as he is, there is danger of their pace becoming too rapid, their decisions too hasty. They need a few cautious conservatives, men who weigh things carefully and who even instinctly look for trouble. An organization, to be efficient, should be well rounded and well balanced.

**Different Training**

"Different kinds of training fit a man for different kinds of work. For example, college men are valuable in certain positions; but I have found in my own experience that they seldom make good salesmen.

"It seems to me the reason they do not succeed in that line is that they have what may be described, for want of a better word, as too much 'humility.' That sounds startling, but what I mean is this: Their training has made them too much inclined to feel that there are several sides to any proposition; probably because of this they are inclined to hold back when it comes to selling anything.

**Has One Idea**

"The good salesman does not walk all around a proposition and hesitate and give way. He has one idea, an enthusiastic belief in what he is selling and, based on that belief, a conviction that his customer ought to buy it! But the college man has been trained to allow other men to decide their affairs for themselves. That is part of the 'ethics' of college life. So when he comes to selling goods he is likely to go on letting the other man—in this case his customer—decide for himself. And as it is the instinct of most customers to begin by saying they don't want a thing, the student accepts that refusal as final.

**Mutual Goodwill**

"Here is another thing about this man-making phase of a business: There must be not only mutual confidence but mutual goodwill. There is something fundamentally wrong with an organization if any considerable number of the men in it are disloyal to one another, self-seekers, jealous of the credit another man wins.

"For forty years, my brother and I were partners in our business, until his death ten years ago. The application of the principle 'in honor preferring one another' kept us clear of friction in all those years, some of

them very trying ones. We never had a single serious difference.

### Co-operation is Basis

"It cannot be too often repeated that business is done now, and should always be done, on the co-operative principle. 'No man liveth to himself alone.' We must serve others if we expect to be served.

"As employers, our first aim was to secure workmen of character and ability. Then we tried to keep their interest in their work, first, by giving them steady employment, even when it would have been to our immediate advantage to let them go temporarily; second, by giving them an equitable wage; third, by calling for reasonable hours of labor; and, fourth, by trying to provide comfortable and attractive surroundings.

"I consider those four things essential to the success of any business concern. And in addition, we tried to interest our workers in the basic principles involved in treating our men as intelligent human beings, tried to make them think.

### Chance to Think

"I might better say that we gave them the opportunity to think; for I believe most men are glad to be something more than mere machines. Certainly 'workmen of character and ability,' the kind we wanted, are glad of such a chance. We have given prizes for ideas. The quality of any product is largely dependent on the spirit of those who make it. The very best way to improve a product is to improve the organization behind it.

"The proof that our people like to be treated as human beings is in the permanence of their stay with us. A list of those who have been with us more than ten years would comprise a very large portion of all our employees. Several have been with us thirty to thirty-five years."

This is the first of the three lessons Mr. Lowe's half-century of experience has taught him—that the aim of a business should be to make men and not merely to make money.

In the talk above quoted he put also the principles of the second lesson when he said to his salesmen:

### The Big Thought

"The big thought I should like you to carry away from here is this: First, it is your business to sell. That is understood. But what is it you are to sell? Why, you are to sell paints, varnishes, and so on. Yes, of course. But these things are merely instruments. The fundamental thing is that you are to sell ideas; ideas of beauty, of health, of economy, of prosperity, of service.

"Other men, in other businesses, should sell the same ideas. They may be handling shoes, or china, or motor cars, or furniture, or anything else. No matter what it is, they ought to be selling ideas, just the same as you should. The only difference between them and you is that you sell those ideas through the medium of paint. They sell through the medium of their own products. A man's selling methods should be based on this idea of the satisfaction that his commodity can produce.

### Must Have Ideals

"Here is another important thing: A business is always built around certain ideals. They may be good ones or bad ones; but they they are always there. And every idea in that business must bow to those ideals.

"If the ideal around which a business is being built up is one of mere selfish money-grabbing, the ideas used in manufacturing and selling will surely bow to this ideal. You will find that business honeycombed with ideas of cheap labor, cheap production, swollen profits—all of them ideas for furthering selfish gain.

"On the other hand, if the central ideals are faith, happiness, and service, the ideas permeating that business must and inevitably will be those of honesty, integrity, confidence, quality, a contented and loyal organization, and customers who are well served and satisfied."

### Proprietors' Choice

In his talk to me, Mr. Lowe emphasized this point. "The conviction that every business is built around certain ideals, good or bad," he said, "is one of the strongest beliefs I possess. Every proprietor chooses, consciously or unconsciously, the ones to which his business ideas, and therefore his business methods, will bow.

"If I were an employee, I should ask myself what were the ideals of the firm for which I was working, and whether I wanted to make them my ideals, too.

"An employee perceives very shrewdly what are the guiding principles in the organization of which he is a part. Sometimes the employees recognize these principles more clearly, or at least more openly, than the proprietor does.

"The head of a business may try to deceive himself about his principles; but the employees have no such temptation. They are not responsible for those ideals. They did not formulate the principles on which the business is being conducted—but they see the practice, and they have no illusions about it.

### Should Be Basis

"As I said before, this belief that every business is built around certain ideals should be a fundamental principle of a man's business creed. This is what I mean when I talk to our salesmen about 'selling ideas through the medium of paint.'

"I tell them they must not think merely of selling so many cases of paint or of varnish. They must think what this paint or varnish is to accomplish! Because it improves the appearance of a home, or an office, or a building, they must sell their prospective customer the idea that paint means Beauty. Because cleanliness is sanitary, they must sell the idea that paint means Health; because it preserves the surfaces, they must sell the idea that paint means Economy. Cheerfulness, brightness, color—these make a pleasing environment; therefore, paint may actually mean added Happiness. People are attracted to a store, or a theatre, or even to a church, if it is well painted and artistically decorated; and for that reason paint means Prosperity.

### Must Give Service

"If the central ideals of a business are not those of service to the customer, but are those of getting the most and giving the least in return, it would be difficult for its salesmen to use such selling points as I have outlined above. And the same thing would be true in the producing end. If the idea is not one of service, the whole process of manufacturing would be governed by ideas of cheapening the product unwarrantably in order to swell the profits. That is why the ideas of a business always bow to its ideals."

*The Price of Clothes*

*First Rustic—"It looks like Bill was going to marry that there widder."*

*Second Rustic—"Well 'e might do worse. Her first 'usband left an uncommon good overcoat."—The Bystander, London.*

### Study Your Business

The third lesson which Mr. Lowe has learned is the importance of studying one's business. "When I was graduated from the Sheffield Scientific School of Yale, fifty years ago," he said, "I had received certain benefits from my college experience; but a knowledge of the value of study was not the greatest of them. I had learned decidedly more from men than from books. Those years at the university had formed my character more than it had formed my mind. I think that is true of most college men.

"This forming of characters is, of course, a vitally important thing. But it was not until ten years after leaving college that I realized that character is the foundation for a building—not the building itself. At least, that is true in business.

"A man may be upright and honorable, fair to his employees, honest in all his dealings, lofty in his ideals of service, and yet fail to succeed in his work or his business. Character alone will not keep the sheriff from his door.

### Knowledge Essential

"When it comes to building an enduring edifice on that foundation of character the thing a man needs in addition is—knowledge. He must know his work, whatever it is. By just so much as he increases his knowledge of it, that which he builds becomes broader and bigger and more substantial.

"I was thirty-five years old before I learned this lesson. When I did, I began to study. By this time we were making progress in our business. We have already settled on our ideals, had determined that they should be ideals of service. That automatically required that we should consider quality first.

"We passed through periods of doubt and uncertainty, periods when we were tempted to lower our standard because we were losing money. It was then that I realized that something besides the best of intentions was necessary to success in business. In our case, expert technical knowledge was the essential thing—and I set to work to acquire it by devoting my leisure hours for years to study and to the conducting or directing of laboratory experiments.

### Investigated Closely

"I made scientific investigation of the raw materials which are used in the making of paints and varnishes. I studied the surfaces to which they are applied: the effect on them of different climates, the influence of different weather conditions at the time the painting or varnishing was done, the relative importance of the different 'coats,' from the priming one to the finishing one, the comparative results of various methods of mixing.

"For example, one of the subjects I found I had to consider was the use of paint on steel. Any exposed steel surface must be painted in order to prevent rust. In the case of railway bridges, to cite only one instance, the question of painting is a vital one. In order to know my subject, I made a study of the processes of steel manufacture. In that investigation I traveled extensively.

### An Important Gain

"The important gain from this research was the knowledge I could bring to the problems of my own business. The study of how to preserve steel began with the steel itself—but it ended in paint. That was where I 'came in.'

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### UNIVERSAL AMMETER

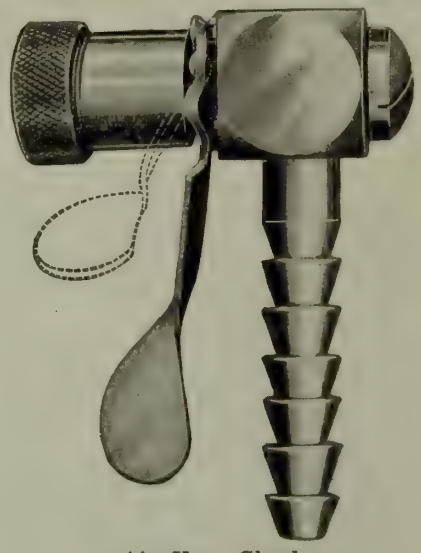
The Universal P. V. Ammeter, manufactured by the Roller Smith Company, 233 Broadway, New York, is furnished with a full supply of mounting screws, nuts and washers. The manufacturers

*Ammeter*

claim that the outstanding feature of this instrument is the universal application to all makes of cars, all types of lighting and starting systems and all voltage systems. It is said that this instrument will operate under any conditions, it having been particularly designed for cranking circuit use. It is flush type, black finish with a range of 30-0-30 amperes. The diameter of the body is two inches, and the diameter of the hole required in the dash is 2 1-16 inches.

### TIRE TOOL

The Case tire tool, manufactured by the Motor Necessities Company of Winnipeg, for use on clincher tires, does away with the heavy labor involved in the removal of tires. It removes the tire an inch at a time, it is stated, without stretching or tearing the fabric, and

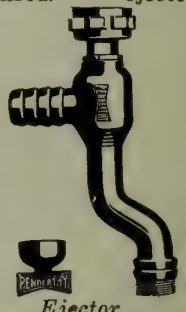


*Tire Tool*

works from the hub with a lever on the ground doing all the hard work through scientific principles. One of the features of the tool is the forcing away of the bead from the rim when stuck on. This is easily done with either of three different methods. The Case tire tool, the manufacturers claim, is ideal for quick work in cold weather, and insures proper tire care without labor, as no force is required.

### AIR HOSE CHUCK

The "Lox-On" air hose chuck, manufactured by the Automatic Safety Tire Valve Corporation, 1765 Broadway, New York, is a decided advance, it is stated, in construction of heavy duty air hose chucks for air stations and garage purposes, especially designed where air tanks are used. The rubber washer does not come in contact with the tire valve stem until compressed by drawing the lever. This prevents wasting of air, which is so common with various makes of air chucks. The check valve inside of the "Lox-On" chuck cannot be jam-



*Air Hose Chuck*

med and made inoperative, as this is prevented through the construction of the nose of the chuck. The "Lux-On" chuck will not go down over the tire valve beyond the shoulder of the valve. The "Lox-On" chuck is guaranteed not to leak. It is claimed it will materially reduce the cost of current now used in replenishing air which is actually wasted and does not go into the tires.

### WASHING MACHINE EJECTOR

A washing machine ejector for household use is being manufactured by the Penberthy Injector Co., Ltd., Windsor, Ont. The manufacturers state that the device is designed to transfer water or other liquids from pumps, washing machines, wash tubs, cellar pits, or any place where there is an accumulation by means of ordinary water pressure. No electrical, steam, or other operative power is required. The ejector takes the

*Ejector*

maximum amount of water from the tub or pump with the minimum amount of water operating the ejector. It is stated that it is a very handy device to have around the house, saving much back straining and lifting. The ejector is made of aluminum, has no loose parts and nothing to get out of order, does its work quickly and efficiently, and will last a lifetime.

Diamond and Hyde, Belleville, Ont., successors to Wm. McGie, plumbing. Will you inform us who manufactures Marine Hotel Ranges, or where we could secure repairs for same?

You would require the number or trade name in order to get repairs. The Wrought Iron Range Co., 149 King St. West. The Gurney Foundry Co., Ltd., 500 King Street West; the McClary Mfg. Co., 177 King Street West, all of Toronto, and many others, manufacture marine hotel ranges.—Editor.

Galt, Ont.—Fraser Hardware Co., Galt Ont.—Will you give us the address of Black Bros., manufacturers of cabinet clamps?

This firm's address is, Black Bros. Machine Co., Mandota, Illinois, U. S. A. —Editor.

Cronk & Buchanan Hardware Co., Guelph, Ont.—Will you in form us where we can procure Syrup Gravity Testers?

The Taylor Instrument Co's., 110 Chuch Street, Toronto, Ont., supply these.—Editor.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

PRICE changes are numerous again this week and almost without exception are upward. Carborundum products show one of the heaviest advances, the new quotations being 25 per cent. higher than former figures. Clothes pins move up ten per cent., screen doors about seven per cent. and screen windows the same.

Advances are also shown in the prices of roller skates, crumb sweepers, apple picker baskets, round shank jobbers' drills, auto coaster waggons, japanned hitching rings and Jellstone.

Ingot metals are reported firm.

Spot linseed continues very scarce. Prices are firm, but within a week or two easier markets are looked for. Turpentine prices are holding unchanged. Deliveries are only fair and advices from the South are to the effect that factors are holding back looking for higher prices as supplies generally were never known to be so scarce.

# MONTREAL MARKETS

MONTREAL, Oct. 23—Advances for the week are recorded for toilet clippers and there also has been an increase in the price of Trimo wrenches. Carborundum sharpening stones are also marked up. The undertone of the stove and ware market is decidedly strong, plates being hard to get delivery of and making it necessary to cut in on spot supplies extensively. Pig lead is also higher and this may affect the price of solder—which has strengthened already this week—and also manufactured lead products. Cotton rope is very firm and may be marked up. Pig iron prices have moved up about $2 per ton. Plates and sheets, particularly tinplate and Canada plate, are much firmer, with increased prices made effective for galvanized sheets which are now getting scarce. Spelter and antimony are marked higher. The only declines of the week are those for low-priced locks made by Canadian manufacturers and an easier market for ingot copper. Trade is manifestly active.

## *An Increase Made For Toilet Clippers*

**Montreal.**

CLIPPERS.—An advanced basis has been made effective for "Columbian" toilet clippers. The No. 0 are advanced from $30 to $36 per doz., and the No. 1 from $28 to $33.

## *Sharpening Stones; Hose Couplings Up*

**Montreal.**

STONES, COUPLINGS.— Advanced prices are in effect for carborundum sharpening stones. Some of the important changes are as follows and indicate an increase of about 12½ per cent.: No. 115, doz., $18.20; 117, $18.20; 121, $13; 142, $7.80; 180, $10.40, and No. 78, $10.40.

Cast brass hose couplings are also marked higher, the increase being about 15 per cent. Half inch size are now selling at $2.25 per doz.; ¾ at $2.30, and 1 in. at $4.40.

## *Some Locks Lower; One Line Wrenches Up*

**Montreal.**

LOCKS, WRENCHES.—A decline approximating 5 per cent. is announced for various makes of Canadian low-priced inside lock sets.

Advanced prices are in effect for Trimo wrenches, the following net prices now prevailing: 6 in., doz., $14.40; 8 in., $17.20; 10 in., $20; 12 in., $26.50; 15 in., $34.50, and 18 in., $46.

## *Much Stronger Tone Marks Stoves and Wares*

**Montreal.**

STOVES AND WARES.—The present situation regarding stoves and ranges, heaters, etc., is decidedly strong as far as prices are concerned. Labor has much to do with a firm price undertone, but, of course, the steel plate outlook has more just now. It is not improbable that prices will go higher ere long.

In the various wares made of plate, tendencies are strong. If the makers are confronted with the necessity of paying a premium on supplies required, it is also possible that increases will be registered on some of these lines ere long.

## *Coal Oil and Lubs.; Gasoline Unchanged*

**Montreal.**

COAL OIL, GASOLINE.—With no actual price change for either coal oil or gasoline, or for lubricating grades, the market conditions are continuing quite satisfactory. Movement is fairly active, and supplies are fully adequate to take care of the trade needs.

Motor grade gasoline is selling still at 33c and coal oil, as to grade, at 22-25c per gallon.

## *May be Higher Prices For Various Cotton Rope*

**Montreal.**

ROPE AND CORDAGE.—The tendencies are very firm on all lines of cotton rope and the market may advance at an early date. One of the firming factors is that of excessive rains in the producing centres, this making the sellers rather apprehensive. In the meantime the undertone is very, very strong.

Manila and sisal rope are steady. The market on raw material is such as to have justified a continuance of the former base prices, it is pointed out, but competition has been keener of late, resulting in more or less price cutting. Base prices are: Pure manila, per lb., 31c; British or Beaver manila, 27c, and sisal, 23½c.

## *Pig Iron is Firmer; Iron and Steel Steady*

**Montreal.**

IRON AND STEEL.—No declines are likely for iron and steel bars. The pig iron basis has been stronger in the South and prices increased about $2 per ton. The outlook is for a maintained price basis just now and mills are quite busy with orders required immediately. The iron and steel outlook is encouraging for an active fall selling.

IRON AND STEEL

| | |
|---|---|
| Star finish machinery steel | 3 30 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |
| Sleigh shoe steel | 3 75 |
| Tire steel | 3 95 |
| Toe calk steel, per 100 lbs. | 4 65 |
| Band steel | 3 75 |
| Harrow tooth steel | 3 90 |
| Mining tool steel, per lb. | 0 22 |
| Black Diamond toe steel, per lb. | 0 22 |
| Black Diamond cast steel, lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *Soaring Are Prices On Plates and Sheets*

**Montreal.**

SHEETS AND PLATES.—"It may be that higher prices still will prevail," said HARDWARE AND METAL last week, and this forecast has now been realized in that decidedly higher prices are effective for galvanized sheets. The basis is becoming distinctly a nominal one, in that supplies are scarce and in some instances a premium is being paid to obtain stock. Little improvement is looked for and markets will perhaps continue to strengthen.

The same conditions are true regarding Canada plates and tinplate.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 65 | 6 40 |
| 12 gauge | 5 70 | 6 35 |

| 18 and 20 gauge | .... | 7 75 |

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *With Pig Lead Higher May Soon be Mark-ups*

**Montreal.**

LEAD PRODUCTS—Bar solder prices have advanced one cent per lb. with a steadily firming and higher market for pig lead, and with some reporting more or less difficulty in obtaining their needs, it is expected that there will be an advance in the price of manufactured lead products. It may even be that solder will be marked up higher still. In the meantime the trade is quite satisfactory, although this could be greater.

| | | |
|---|---|---|
| Lead pipe | .... | 0 12½ |
| Lead waste | .... | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | | |

| Zinc sheets, casks | .... | 0 17 |
| Do., broken lots | .... | 0 18 |

## *Metals Are Ruling On Steadied Basis*

**Montreal.**

OLD MATERIAL.—The market is really featureless this week. Sales of small lots of old scrap are being made, but beyond the moderate movement entailed in this selling few round lots are disposed of. The tendencies are rather steady, but manufacturers do not appear to be in the market just now for a great lot of stuff. Old copper, brass, rubbers, etc., are unchanged.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | .... | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |

| Pipe scrap, ton | .... | 8 00 |
| Stove plate, ton | 14 00 | 15 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | .... | 21 00 |

## *Copper is Weaker, But Lead, Antimony Higher*

**Montreal.**

INGOT METALS.—Lead markets are firming steadily and the trade is quite concerned. There also has been a firming of the basis for antimony and spelter, while copper is weaker. Tin is unsettled.

COPPER.—Weakness has developed in this and prices are marked down, 24½c per lb. being quoted this week.

TIN.—The market is more difficult to define, the quotations being somewhat erratic. Local prices are a bit lower at 58c.

LEAD.—Jobbers and importers are anticipating more difficulty in getting requirements. The undertone is not only firmer, but prices are marked up to 7¾c per lb.

SPELTER.—A stronger feeling is manifest in this and the local price basis, while unchanged, is firm at 10c per lb.

ANTIMONY.—One-quarter of a cent per lb. is added to the price this week, making the quotation 10¼c.

ALUMINUM.—A steady but limited demand obtains for this and prices are unchanged at 34c.

PIG IRON.—Firmer, with a nominal basis of $50 per ton still quoted.

# TORONTO MARKETS

TORONTO, October 23—Advances have been made in a number of lines and the general tendency is for firm markets. Scarcity of goods continues to be one of the troubles of hardware merchants.

New and higher prices have been named on carborundum products, which are up 25 per cent.; clothes pins, which advance ten per cent., screen doors and some makes of hand saws.

Advances in ingot metals and in agricultural wrenches, and brooms would occasion no surprise.

There is a seasonable demand for glass and putty. Prices are unchanged.

Linseed oil continues to be scarce, but prices are holding steady. Turpentine is in good demand at former quotations.

## *Clothes Pins Advance 10%*

**Toronto.**

CLOTHES PINS.—These have advanced and are one of the woodenware lines previously predicted by HARDWARE AND METAL to reach a higher level. The reason is given that there is a smaller quantity of lumber cut compared with normal times. Labor is offered so many other opportunities at higher wages that in order to produce manufacturers are required to meet the higher wages, with the inevitable result. The present quotations are $1.20 per gross f.o.b. Newmarket.

## *Kasement Dore Prices Announced*

**Toronto.**

KASEMENT DORES.—New prices for 1920 have been announced for Kasement Skrene Dores, complete with hardware, Skrene Dores, with hardware, as follows: Black wire, No. 1, 2 ft. 6 in x 6 ft. 6 in., $2.75; 2 ft. 8 in. x 6 ft. 8 in., $2.80; 2 ft. 10 in. x 6 ft. 10 in., $2.85; 3 ft. x 7 ft., $2.95. No. 2, 2 ft. 6 in. x 6 ft. 6 in., $2.85; 2 ft. 8 in. x 6 ft. 8 in., $2.90; 2 ft. 10 in. x 6 ft. 10 in,, $2.95; 3 ft. x 7 ft., $3.05. No. 4, 2 ft. 8 in. x 6 ft. 8 in., $3; 2 ft. 10 in. x 6 ft. 10 in., $3.05; 3 ft. x 7 ft., $3.15 each.

Complete with hardware sets: If galvanized wire is desired on above the extras are as follows: 2 ft. 8 in. x 6 ft. 8 in., 30 cents each; 2 ft. 10 in. x 6 ft. 10 in., 35 cents; 3 ft. x 7 ft., 4 0cents. Extension bottoms, 45 cents each. Doors are packed six in a crate.

## *Carborundum Products Advance 25 Per Cent.*

**Toronto**

CARBORUNDUM.—Prices have taken a jump of approximately 25 per cent. and are recorded in the form of a higher list rather than a change of discount. The advanced price of raw material and higher price of labor is said to be the main factor in bringing about the new price.

## *Hand Saws and Saw Vises Advance*

**Toronto.**

HAND SAWS.—Some makers have advanced their prices on hand saws and saw vises, due, it is said, to the scarcity of steel, also to the high cost of skilled labor. Prices vary considerably. The present price represents an advance of from 5 to 10 per cent.

## *Agricultural Wrenches May Advance*

**Toronto.**

AGRICULTURAL WRENCHES. — These are very firm and jobbers would not be surprised to see a higher price go into effect. The demand for this line is very heavy and some find them hard to procure.

## *Brooms Unchanged; May Advance*

**Toronto.**

BROOM CORN VERY FIRM.—There does not seem to be a possible chance of a decline, in fact it is expected that prices are more liable to advance. The corn crop is in condition to market and corn in the field is selling at $300 to $320 per ton in some localities. It is claimed that the length is too long and therefore too much is cut to waste. This with the scarcity and higher prices paid for labor, it is said, is the cause for the firming of the market and the possibility of an advance in the near future.

## *Stoves and Wares Still Hold Very Brisk*

**Toronto.**

STOVES AND WARES.—This line is remarkably brisk and jobbers are puzzled just how to handle the business which is pouring in from all over the country. It is stated that merchants held back their orders this year to a large extent, thinking, no doubt, that the price would decline, but it has been remarked that the decline will not come this season, in fact some look for a higher market. Some manufacturers state they would not be surprised if the situation turned, cut very badly, and think when the first cold snap comes the rush will be excessive, and merchants and jobbers alike are not nearly prepared to meet it. Capacity business is being handled now, said one manufacturer, and predicts a probable famine when the cold snap reminds the private individual and consumer who needs the goods but has put off buying till the eleventh hour. Most manufacturers have refrained from taking advantage of the situation and have not advanced their prices although it is impossible to predict what the near future will bring.

## *Sheathing, Dry and Tarred, Very Unsettled*

**Toronto.**

SHEATHING, DRY AND TARRED. —This is very unsettled, and in some instances very scarce. It seems the shortage in this line is causing great inconvenience from the manufacturer down to the consumer. One of the causes given is that scrap paper in sufficient quantities is almost off the market, in fact HARDWARE AND METAL was informed that several paper box manufacturers were closed down, being unable to secure sufficient scrap paper. Although prices are firm there is no change at present.

## *Whiting Reported Very Scarce*

**Toronto.**

WHITING.—The better grades are reported very scarce, some manufacturers having difficulty procuring sufficient for their own use.

## *Lead and Zinc Products Firm*

**Toronto.**

LEAD AND ZINC PRODUCTS.—These are firm, owing, no doubt, to the advance in lead and the general scarcity of other goods. Trade is good with the market showing a stronger tendency. Prices are quoted as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 6 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Sheets, Black and Galvanized, Scarce*

**Toronto.**

SHEETS, BLACK AND GALVANIZED.—With the steel and iron strike well in hand producers are giving serious consideration to the effect of a possible suspension in the coal fields. Auto manufacturers of cars and parts are constantly in the market for bars and sheets and other rolled products for early shipment, for which premiums are paid. Some sheets and wire are being shipped overseas at a premium of three to five dollars per ton. Jobbers state their stocks are very low, in fact some are exhausted, and claim there is an urgent demand. It is expected a large volume of this year's business will be carried into the first half of next year. The following lists are more or less general owing to so many firms quoting different prices according to their situation. One jobber stated to HARDWARE AND METAL that he had received a shipment of English galvanized sheets and believes it to be one of the first shipments of English sheets since English shipping has been resumed. Quotations are as follows:

**BLACK SHEETS—**

| | |
|---|---|
| 14 gauge | $5 40 to $5 45 |
| 16 gauge | 5 50 5 60 |
| 18-20 gauge | 6 05 6 15 |
| 22-24 gauge | 6 10 6 20 |
| 26 gauge | 6 15 6 30 |
| 28 gauge | 6 25 6 45 |
| 3-16 inch plate | 4 90 6 25 |
| ¼-inch boiler plate | 4 40 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS.**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | $8 05 | $8 90 | $8 00 | $9 25 |
| U.S. 28 | 7 75 | 8 30 | 7 60 | 8 55 |
| U.S. 26 | 7 45 | 7 90 | 7 30 | 8 20 |
| 22 and 24 | 7 30 | 7 70 | 7 15 | 8 00 |
| 18 and 20 | 7 15 | 7 50 | 7 00 | 7 80 |
| 16 | 7 00 | 7 25 | 6 85 | 7 60 |
| 12 and 14 | 6 90 | 7 05 | 6 70 | 7 35 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Steel and Iron Bars Show a Stronger Tendency*

**Toronto.**

STEEL AND IRON BARS.—More progress has generally been made in restoring former activities in the steel and iron industry. Strike interruptions have practically ceased to be regarded as a major factor in the iron and steel production in certain localities. Prices on steel and iron bars remain very firm, with a tendency to advance. Mills are securing very large orders for iron and steel at present. Ship work is calling for large tonnages, and European buyers are coming into the market for large quantities. Following are the present quotations:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 60 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Boiler Tubes Are Firmer*

**Toronto.**

BOILER TUBES.—These are very firm owing no doubt to the great scarcity of skelp. Producers cannot procure these strips, it is said, and a higher price may be the outcome. Following are the present quotations:

| | Per 100 feet | |
|---|---|---|
| **BOILER TUBES—** | Seamless | Lapweld |
| 1 inch | $27 00 | ..... |

| | | |
|---|---|---|
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Scrap Materials Still Unchanged*

**Toronto.**

SCRAP MATERIALS. — Are much firmer. The industrial disturbance and innumerable strikes, lockouts and embargoes have acted depressingly in all directions and choked off the expansion that should be in full play by this time. It is expected scrap metals will remain until further advances in new metals are scored. No large orders are placed, dealers claim, consumers apparently living from hand to mouth, showing the conservatism of caution caused by the prevailing unrest. Following are the present quotations:

| Dealers' Buying Prices— | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 12 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red Brass | .... | 0 15¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 18 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 07 |
| Overseas, lumbermen's rubber boots | .... | 0 05 |
| Bicycle tires | .... | 0 1½ |
| Automobile tires | .... | 0 03 |

## *Lead Prices Higher; Other Ingots Firmer*

**Toronto.**

INGOT METALS.—Are very firm with a strong tendency to advance. The car shortage continues to be a factor, while the production appears to be restricted. The producers generally find it hard to meet the wants of regular customers. Considerable warehouse business is being contracted. All eyes are turned on the coal situation, and if the miners actually call a strike it will not be hard to predict what will happen to the present prices.

COPPER.—This is in good demand although the European situation is very disappointing. It was the general belief in the trade that European manufacturers would buy immense quantities of copper immediately after the armistice was signed. Labor troubles and unfavorable credit developments seemed to have co-operated to defer such buying. It is said copper-producing interests view the future outlook with great confidence and are preparing to supply the biggest demand of all time. The present quotations are from a basis of 26 to 27 cents.

TIN.—Tin is much firmer, although most industries have been retarded by the strike and buyers have not been so anxious to contract for futures. The opinion prevails in the trade most future requirements have only been very lightly covered and a return to normal operations should cause more active buying with the natural result of higher prices. Present quotations are 59 to 60 cents per pound.

SPELTER.—This still remains unchanged although higher prices are looked for. Business is showing more improvement.

LEAD.—The lead market is strong and selling at a slightly higher figure. Consumers are showing a disposition to lay in supplies of lead, and dealers also are taking more interest in the market, it is said, giving more strength to the situation than it has had for some time past. The quotation at present is 8 cents per pound.

ALUMINUM.—The demand is not heavy although a fair quantity is being handled. The price is firm at 34 cents

ANTIMONY.—Continues firm, and an advanced price is looked for. The present selling is 10 cents per pound.

# LONDON MARKETS

LONDON, October 23—Numerous advances in prices are shown this week and among the lines which have moved to higher levels are: screen doors and windows for spring booking, auto coaster waggons up 12½%, corn brooms up 50 cents a dozen, crumb sweepers, apple picker baskets, japanned hitching rings, roller skates, round shank jobber drills and 20th century Jellstone. There is a general tendency for prices to be firm and shortage of goods in many lines continues.

There is an active demand for builders' hardware, roofing, roofing shingles, nails, oil and electric heaters, stoves and stove accessories. Plans for more new houses and for other structures are being prepared all over the district and indicate continued activity in the building trades. Business is reported excellent throughout the district and collections good.

## *Screen Doors, Windows Advance 7 Per Cent.*

**London, Ont.**

SCREEN DOORS, WINDOWS.—Screen doors and windows for spring booking show an advance of seven per cent. The quotations are as follows:

Doors—No. 1, $18.62 per dozen; No. 2, $23.00; No. 21, $27.82; No. 3, $30.40; No. 6, $31.70; No. 8, $32.80; No. 9, $39.50.

Screen Windows—No. 12, $3.64 per dozen; No. 12½, $4.12; No. 1, $3.53; No. 13, $4.02; No. 14, $4.28; No. 14½, $4.55; No. 15, $4.92; No. 16, $6.80; No. 2, $4.71; No. 3, $5.14; No. 4, $5.51; No. 5, $6.05; No. 6, $6.53; No. 7, $7.01; No. 8, $7.55; No. 9, $8.30; No. 10, $10.17.

## *New Price Named On Crumb Sweepers*

**London, Ont.**

CRUMB SWEEPERS.—New and higher quotations have gone into effect on Onward crumb sweepers, the new price being $2.75 each.

## *Auto Coaster Waggons Up 12¼ Per Cent.*

**London, Ont.**

AUTO COASTER WAGGONS.—A big advance has been made in auto coaster waggons, the new list prices being up 12½ per cent. Quotations are as follows: No. 00, $50.60; No. 01, $89.65; No. 1, $108.15; No. 2, $119.55; No. 3, $132.35; No. 4, $150.85 dozen, less 35 per cent.

## *Corn Brooms Are Up 50 Cents a Dozen*

**London, Ont.**

CORN BROOMS.—Prices on corn brooms show an advance of fifty cents a dozen, the new quotations being: No. 8, $11.50; No. 7, $10.00; Parlor, $8.75; XQ, $6.75; Factory, $9.00 per dozen.

## *Apple Picker Baskets Are Revised Upwards*

**London, Ont.**

APPLE PICKER BASKETS.—A new and higher price has been named on this line, and quotations are now $6.00 per dozen.

## *Reduction is Shown in Lath Yarn Prices*

**London, Ont.**

LATH YARN.—A reduction is shown in the quotations on lath yarn, the new price being 23½ cents a pound.

## *Higher Quotations on Hitching Rings*

**London, Ont.**

JAPANNED HITCHING RINGS.—A new and higher price has been named on these goods, and quotations are now $1.15 per dozen.

## *Advance is Shown in Roller Skates*

**London, Ont.**

ROLLER SKATES.—Higher prices have been named on roller skates, the new quotations being: No. 3 Union, $1.35 per pair; No. 5 Union, $2.75 per pair.

## *20th Century Jellstone is Up a Cent a Pound*

**London, Ont.**

20TH CENTURY JELLSTONE.—An advance of a cent a pound has been made in this line, the new prices being:

white, 14 cents a pound; tints, 15 cents a pound, less 40 per cent.

## *Round Shank Drills Have Been Advanced*

**London, Ont.**

ROUND SHANK JOBBERS' DRILLS—A new price of 35 per cent. off list has been named on these goods.

## *Active Demand For Wire Nails*

**London, Ont.**

WIRE NAILS.—No change is shown in the prices of wire nails. There is an active demand and indication that business will continue brisk. Quotations are on the basis of $4.70 base for wire, and $4.75 base for cut nails.

## *White Lead in Oil Remains Unchanged*

**London, Ont.**

WHITE LEAD IN OIL.—There is a good sale for white lead in oil. Quotations are unchanged, the figures being: Pure, tons, $16.35 per 100 lbs.; less tons, $16.70; Elephant, $16.95 per 100 lbs.; less tons, $17.30.

## *No Changes Shown in Glass or Putty*

**London, Ont.**

GLASS, PUTTY.—Both glass and putty are selling well. No change is shown in the quotations, which are as follows:

Glass—Single Diamond, 30%; Double Diamond, 30%; Cut Lights, 10%.

Putty—Standard, 100-lb. drums, $6.80 per 100 lbs.; 25-lb. drums, $7.05. Pure, 100-lb. drums, $9.30; 25-lb. drums, $9.55.

## *Linseed Oil Prices Are Ruling Steady*

**London, Ont.**

LINSEED OIL.—Seasonable sales of linseed oil are being made. Prices show no change, and are as follows:

| | Raw. | Boiled. |
|---|---|---|
| 1 to 2 barrels, gal. | $3.15 | $3.18 |
| 3 to 5 barrels, gal. | 3.14 | 3.17 |
| 6 to 9 barrels, gal. | 3.12 | 3.15 |

Less barrels, add 10 cents gallon.

## *Demand is Brisk For Turpentine*

**London, Ont.**

TURPENTINE.—Good sales of turpentine are reported. Prices are holding unchanged at the following quotations: $2.45 imperial gallon; $2.44 imperial gallon; $2.55 imperial gallon.

# WINNIPEG MARKETS

WINNIPEG, October 23—Price changes during the past week again show a general advance on all lines affected which include oil stones, oil cups, valves, galvanized sheets, black sheets and tinned copper, and many important advances in other steel lines will no doubt be reported shortly, due to the prolonged strike of the steel workers which will seriously deplete stocks, despite the fact that many of the mills report that they are running with their full staff, in fact deliveries are already showing up in lines of heavy goods, especially galvanized sheets, which are bringing premiums for delivery.

Business in general is reported to be very good and orders for Christmas trade are now moving forward, while such lines as lanterns, stoves, etc., are in good demand.

## *Prices of Drills Due to Advance*

**Winnipeg.**

DRILLS.—Prices on drills of all kinds which have held firm for some time past are due to advance in the near future, as manufacturers have stated that owing to increased cost they will have to advance selling prices. No mention is made as to how much the increase will be, but it is expected to be at least 10 per cent.

## *Pike Oil Stones Up 10 to 15 Per Cent.*

**Winnipeg.**

PIKE OIL STONES.—Following the recent advance made by the manufacturers new prices are now effective on Pike oil stones, and show an increase of from 10 to 15 per cent. above previous quotations. The following are to-day's ruling prices on a few of the more familiar lines:

Washeta Oil Stones—No. 1 x 6 in., 42c; 7 in., 48c; 8 in., 60c each.

Lily White Oil Stones—No. 1 x 6 in., 78c; 7 in., 90c; 8 in., $1.20.

Washeta Mounted Oil Stones—No. 1, 6 in. x 2 in., 65c; 7 in. x 2 in., 75c; 8 in. x 2 in., 90c each.

Quick Cut Oil Stones—4 in., 18c; 6 in., 30c; 7 in., 36c.

Queer Creek Oil Stones—7 in., 30c.

India Combination Oil Stones—No. 1½, 7 x 2 in., $1.50; No. 29, 6 x 2 in., $1.25 each.

Medium Combinaton Oil Stones—No. 1½, 7 x 2 in., $1.25; No. 29, 6 x 2, $1.00 each.

India Axe Stones—No. 60, 60c each.

## *Penberthy Valves and Oil Cups Are Higher*

**Winnipeg.**

PENBERTHY VALVES, OIL CUPS. Based on factory quotations new prices are now ruling on Penberthy valves, oil cups, etc., showing advances of from 5 to 10 per cent., due to the increase in wages and raw materials. To-day's prices are as follows:

Oil Cups, Safety—No 400, $1.50; 401, $1.75; 402, $2.00; 403, $2.50; 404, $3.00 each. Salute—No. 551, $1.30; 552, $1.40; 553, $1.50; 557, $3.70.

Sancho Oil Cups—No. 601, $1.20; 602, $1.40; 603, $1.55 each.

Sultan Oil Cups—No. 652, $1.90; 653, $2.65; 654, $2.65; 655, $3.00; 656, $4.05; 657, $5.25.

Penberthy Regrinding Angle Valves—¼ in., $1.21; ⅜ in., $1.38; ½ in., $1.76; ¾ in., $2.42; 1 in., $3.08; 1¼ in., $4.40; 1½ in., $6.05; 2 in., $9.65 each.

Compodisk Angle Valves—¼ in., $1.10; ⅜ in., $1.25; ½ in., $1.60; ¾ in., $2.20; 1 in., $2.80; 1¼ in., $4.00; 1½ in., $5.50; 2 in., $8.75.

Penberthy Regrinding Globe—¼ in., $1.21; ⅜ in., $1.38; ½ in., $1.76; ¾ in., $2.42; 1 in., $3.08; 1¼ in., $4.40; 1½ in., $6.05; 2 in., $9.65.

Compodisk Regrinding Globe—¼ in., $1.10; ⅜ in., $1.25; ½ in., $1.60; ¾ in., $2.20; 1 in., $2.80; 1¼ in., $4.00; 1½ in., $5.50; 2 in., $8.75.

Penberthy Regrinding Hor. Check Valves—¼ in., $1.21; ⅜ in., $1.32; ½ in., $1.43; ¾ in., $2.09; 1 in., $2.86; 1¼ in., $3.96; 1½ in., $5.50; 2 in., $8.25.

Compodisk Hor. Check Valves—¼ in., $1.10; ⅜ in., $1.20; ½ in., $1.30; ¾ in., $1.90; 1 in., $2.60; 1¼ in., $3.60; 1½ in., $5.00.

## *Galvanized Sheets Up 30 Cents Per 100 lbs.*

**Winnipeg.**

GALVANIZED SHEETS.—Prices on galvanized sheets, which have held very firm for some time past, show an advance during the week of 30c per 100 lbs. While stocks are reported very low and very little prospect of geting further deliveries till after the 1st of the year, and should the steel strike continue for a lengthy period deliveries will naturally be further delayed. To-day's ruling prices are given herewith on both black and galvanized sheets.

Galvanized sheets—10¾ oz., $9.70; 28 ga., $9.30; 26, $9.00; 24, $8.85; 22, $8.85; 20, $8.70; 18, $8.70; 16, $8.55 100 lbs.

Black sheets—28 ga., $7.80; 26, $7.70; 24, $7.65; 22, $7.65; 20, $7.60; 18, $7.60; 16, $7.00; 14, $6.90; 12, $6.85; 10, $6.80 100 lbs.

## *Plain Tinned Copper Up 10 Cents a Pound*

**Winnipeg.**

PLAIN TINNED COPPER.—Plain tinned copper also shows an advance during the week of 10c per lb., due to market fluctuations, and is selling to-day at 65c a lb.

## *Turpentine Prices Are Holding Firmly*

**Winnipeg.**

TURPENTINE.—Turpentine prices still hold firm at the reduced prices established last week, which showed a reduction of 20c per gallon, and from present indications no further decline is expected. To-day's market prices are given as follows: Barrel lots, $2.50 gal.; ½ barrel lots, $2.53 gal.; 5 gallon lots, $2.55 gal.; 1 gal. lots, $2.55 gal. Plus the usual extras for containers.

## *Linseed Oil Holds at Former Figures*

**Winnipeg.**

LINSEED OIL.—Linseed oil prices show no change during the week, holding firm at former quotations, which are given as follows: Raw linseed oil, $2.75 gal.; boiled linseed oil, $2.78 gal.

# PITTSBURGH MARKETS

PITTSBURGH, PA., Oct. 23.—The iron and steel strike continues to wane and employment and production at the blast furnaces and steel mills continue to increase, but the rate of change continues to be a very slow one. Production even now is only about 60 per cent. of normal, taking the iron and steel industry as a whole.

When the manufacturers as well as all, or nearly all, outside observers have felt since the first few days that the strike could not possibly win, it seems strange that after four weeks of strike men should be returning to employment so slowly. The common if not universal theory is that the strike leaders have been bolstering up the strike by promising their representatives in the field, and the strikers themselves, that something favorable to the cause of the strike is going to come from the labor conference at Washington, which assembled when the strike had been in progress for two weeks.

It is altogether improbable, however, that there will be any action of that sort at Washington. The resolution introduced by the labor representatives, for an investigation of the steel strike by a committee of six, is probably buried. The resolution recognizing collective bargaining has had an irregular course, but if adopted it would not help the steel strike particularly.

Just how the strike leaders themselves view the strike is not known. Their claims from day to day are usually that they "are holding their own," which is not a strong claim to make, since holding their own would be quite insufficient to enable them to win the strike when they have considerably less than half the industry tied up. If they believe the reports sent them from the field they consider the strike stronger than it is, for some of the reports that the manufacturers have seen are absurd exaggerations, but it is not probable that the leaders really believe these reports. The leaders seem to be concentrating their energy in efforts to hold meetings in the Pittsburgh district. They approached Pittsburgh city council to investigate the Mayor's refusal to sanction meetings in the strike districts, but council would not take the matter up. The city administration allows meetings in certain portions of the city, where there are no strikes, but refuses to permit meetings near mills that are affected by strikes, on the ground that disorder would likely result. Through their attorney, Rubin, they approached the Sheriff of Allegheny County, who made a very vigorous reply, charging the strike leaders with preaching revolution and with being outsiders who came into the country to make trouble, and whose departure will prove very welcome.

### Employment and Production

In the general Pittsburgh district in the past week each day has seen a little more employment, on the whole, at mills affected by the strike. Of men employed the great majority now are new men, there being only a few strikers. The result will be that of the mills being fully manned with some of the former employees left out. It is thought that many of the new men taking employment in the Pittsburgh district are from Youngstown and other points that are closed, or nearly closed, by the strike.

Donora and Monessen, at the head of the Monongahela Valley, the most important part of the Pittsburgh district, were closed entirely in the early part of the strike. For two weeks the mills have been open and men have been returning to work, but at a very slow rate. The large mills near the foot of the valley ran fairly well even at the height of the strike, and are doing better from week to week, but of the four largest steel mills only one is fully manned even now. The others are short by perhaps 15 per cent. on an average. Nearly all the blast furnaces attached are operating, but are not producing full tonnages. Nine Edgar Thomson blast furnaces are operating, against eight just before the strike, and three on the third day of the strike.

A fortnight ago this report gave a summary of the strike from the geographic standpoint. The strike was strong at certain detached points, including Buffalo, N.Y.; Johnstown, Pa., and Pueblo, Colo., and then there was a sharply defined strike belt dividing Western Pennsylvania, which has been running moderately well from, the west, which has been running at various rates. This belt comprised the Wheeling district, the Mahoning valley and Cleveland, making almost a continuous line north and south. There was speculation as to where in this strike belt the first marked break would occur, as everything in it was closed, blast furnaces, steel works and finishing mills. That question has been answered in the past ten days, the break occurring at Youngstown, the centre of the Mahoning Valley. The break, however, has not proved to be a sharp one by any means. There is nothing like a stampede. After the first blast furnace resumed it was fully a week before there were five operating, although there are 27 in the Mahoning Valley, and 22 of them were operating just before the strike. These furnaces operating are two of the Youngstown Sheet and Tube Company, and one each of the Republic Iron and Steel Company, Carnegie Steel Company and Brier Hill Steel Company. Each of these concerns is operating a few open-hearth furnaces in a more or less limping way, while one has a Bessemer converter in operation, and all the mills are doing a little rolling. Altogether, the production is too small to make it worth while to attempt a guess at the percentage of normal represented, but at any rate, there is a start, and the start has not been accompanied by any disorder to speak of. If there had been stronger forces available to the civic authorities for protection the return of the men would doubtless have been more rapid. As the principal works of the Carnegie Steel Company are located elsewhere, that company has trailed behind in the matter of attempting to resume, feeling that the local interests should take the lead.

Production of steel in the industry as a whole is between 55 and 60 per cent. of normal, representing a gain of only a few per cent. from the low point, probably not more than about 5 per cent. gain. Employment is somewhat greater, in point of percentage, than production, as the working forces are not well organized or balanced in the mills that are subject to strike.

## Unveil Bronze Tablet To Honor Fallen Heroes

A most impressive unveiling of a solid bronze tablet, erected to the memory of the employees of the Sherwin-Williams Company who fell in the Great War, was consummated on Wednesday morning at the head office in Montreal.

In most appropriate terms the managing director, Mr. W. S. Fallis, referred to the boys who had paid the supreme price, and in particular, mentioned those with whom, as their employer, he had been particularly brought into contact with. It had been his to bid them farewell when they left and to wish them safe return, but this was the first occasion, he said, when he was called upon to preside at an unveiling of this nature. Referring to the sacrifices made by ancient patriots, Mr. Fallis thought it but fitting that a worthy generation to follow should emulate the example of those who had shed their life's blood unflinchingly. In the earlier days, when to join the forces suggested adventure, it was probably not so serious a matter to sign up, but as the war continued and the risks were magnified, it required great sacrifice to go "over there" and fight, that liberty might be secured to the rest of us. We should be ready to make sacrifices, as we can, too.

With bared heads, a large aggregation of salesmen, in the city for their annual convention, as well as the sales and office staffs, stood at attention as the tablet was unveiled by Mr. Fallis, and the Last Post sounded by two buglers. The following names appear on the tablet: Alexander Anderson, George Clark, Amie Corbeil, F. Harold Denovan, Charles H. Goodyear, Bannard Greaves, Lewis Luck, Gilmour G. Lydiard, Richard McCall, William Ore, Tom Pritchard, James Rowse, Henry Short, John G. Taylor.

### WILL BRING STOVES UNDER THE PROFITEERING ACT

An additional schedule of articles to be brought within the scope of the Profiteering Act is being prepared by the British Board of Trade, and is expected to include gas meters, stoves, toilet articles and fountain pens.

# Plan To Stop Alleged "Cut Rate" Practice of Canadian Railways

IMPORTANT action to offset alleged "cut-rate" practices by Canadian railways was taken at Washington this week in amendments submitted to the Cummins Bill in the Senate Committee on Interstate Commerce. It is aimed to remedy the situation existing in regard to through rates on traffic passing over railroad lines partly in the United States and partly in Canada. The difficulty is one of long standing and over which the Interstate Commerce Commission has been able to exercise no power of regulation under existing law.

By the proposed change in the law, roads in the United States are to be prohibited from participating in the continuous or interrupted transportation of passengers or freight with Canadian rail or water carriers unless the latter abandon "cut-rate" practices in unfair competition.

### To Control Rates

These amendments are designed to control the foreign rate through control of the carrier operating within the jurisdiction of the United States, thus effecting that which Congress has long attempted as the basis of insuring equal rates for Canadian and American carriers coming into competition for the carriage of domestic merchandise of the United States in bond or otherwise through Canada. The Interstate Commerce Commission has been wholly unable to control that part of a rate which attaches to the carriage in the foreign country, even though the merchandise may be moved under carrier's bond which would certify it to be a through shipment.

### To Prevent Lower Charges

The amendments are planned to insure that in moving passengers or property involving extra territorial transportation the carriage rates of the foreign carrier shall not be lower than those prescribed for American carriers by rail or by water, and for the purpose of preventing unfair "cut rates" by foreign uncontrollable carriers in competition with the control in the rates of American carriers.

In testimony given recently before the House Interstate and Foreign Commerce Committee, William L. Clark of Seattle, Wash., representing the Pacific Steamship Company, stated that "the Grand Trunk Pacific Railway Company, in which over $170,000,000 of Canadian Government funds are invested, had declared its policy in competition with United States interests to make rates from Prince Rupert to Alaskan ports one-third less than when carried by American steamship lines from United States Pacific ports."

### Maintained Unprofitable Rate

"This differential made by the Grand Trunk Pacific from Prince Rupert," explained Mr. Clark, "had not long been in effect when the Canadian Pacific Railway Co., without the publication of tariffs, applied a similar rate to all shipments originating at points east of Medicine Hat, Manitoba, or principally to the United States-Alaska business. There is no local freight business between Prince Rupert and Alaska, and necessarily any water rate named from Prince Rupert is a rate to be used in connection with the rail rates. We may assume, therefore, that an unprofitable water rate was for the apparent purpose of reducing the cost of through transportation below that point where American steamer lines, dependent upon earnings for continued operations, could compete for the business, a course which would result, as would the practice of the Canadian Pacific, in eliminating the American competition.

### Alleged Discrimination

"The inability of the I. C. C. to exercise control of or to influence extra territorial rates such as these opens the way to discriminations between shippers of American merchandise between two points in American territory through Canada and permits Canadian lines to proffer to the larger shippers combination rates which would give them a very decided advantage over their less favored competitors. The I. C. C. tried in 1916 to make a complete inquiry into the Alaska steamship rate situation, but the Canadian lines failed to appear at the hearings in response to the summons of the commission, nor did they submit their steamship or other tariff. In their rate making they hold themselves immune from United States legal interference on the ground that their cut rates are extra-territorial and not within the jurisdiction of the United States."

# Thinks Tin Container Supply Will Meet the Demands

FRED R. Whittall, managing director of the A. R. Whittall Can Co., Limited, Montreal, states that the tin container outlook, while serious, is such as to give promise of the present season's needs being met. Naturally, under the existing difficulties in procuring tin plate, the outlook is not rosy, and stocks are being heavily depleted as a result of slow and curtailed deliveries.

It was pointed out in these columns some time ago that tinplate might be procured from the British mills this fall but difficulties have arisen to at least curtail the allotments coming forward. Mr. Whittall, asked as to the amount of plate received from this source, stated that there was practically none. This has thrown the demand entirely, as far as they are concerned, upon the United States mills and with the recent labor strike in the producing centres, matters have been involved and deliveries held up.

### No Increased Prices

"We have made no advance in prices, and have been taking care of our customers well," said Mr. Whittall. "We have also been supplying outside customers with their requirements. The demand this year for tomato containers has been very heavy, and this has taken a great portion of the supplies. Now that this demand is over, the call will be for apple cans. There is the biggest crop on record in Nova Scotia and we expect a large demand for cans from there."

Speaking of the effects of the steel strike, Mr. Whittall said that recent advices to them had been more encouraging. The men were gradually losing out, and improvement was becoming manifest right along. The wages paid the workers in the plate mills were very large, some of them drawing as much as $20 and even $30 per day. It was not a matter of wages that they were wanting adjustment on as much as recognition of the unions. Mr. Whittall believed that they would not get their wish.

## SEES HIGH PRICES FOR A LONG TIME YET

The world must expect a higher level of prices for a considerable time as a result of currency inflation, and the immediate problem to be attacked is the financing of exports from the United States, said A. C. Bedford, chairman of the executive committee of the Chamber of Commerce of the United States and chairman of the Board of Directors of the Standard Oil Company, in an address Saturday night welcoming the delegates to the International Trade Conference at a banquet at Atlantic City.

The delicate machinery of international commerce, which had been growing slowly through centuries, has been disrupted by the war, Mr. Bedford said, and now, nearly a year after the end of the war, the nations are still far from a free interchange of commodities.

The speaker said further inflation of currency must be accepted as a fact for the present, and will yield only to gradual remedies.

# Bombing Firms Who Don't Advertise

## The Merchant Who is so Indifferent to Sales Possibilities as to Neglect Telling the People About the Paints He Has to Offer is Missing Chances to Make Some Real Profits

LAST week we referred, in this column, to the necessity of sledge hammer advertising for the man who does not realize the value of painting his property and who neglects doing so.

Scarcely was the ink dry on the last copy off the press, when it was proposed that a few bombs be prepared for the paint man who does not advertise, to the man who does not use paint.

Which provides a target for the other barrel of our gun.

There are such an infinite number of chances for advancing paint sales in every community and no excuses why every paint man should not advertise his line that it is difficult to know what presentation of the case should be made to arouse interest and action on the part of an indifferent dealer.

In fact, if the writer were to lift the limit on the language that might be used to characterize some forms of merchandising seen throughout the country, the editor would say that it was scarcely fit for print.

But perhaps we can illustrate the point by telling the story of the general store merchant and the coal scuttle.

### Hard To Get Action

He was one of those general store men in the back country where matters move along when necessity actually pushes them into action. He was lying full length on the counter with his head resting on a pile of horse blankets. A customer strayed into the store and disturbed his reverie with a request for a coal scuttle. Raising his foot, he pointed with his toe to one dangling from the rafter. "Help yourself," he commanded. Then after a short reflection he added, "Perhaps you'd better not take it; it's the last one I've got and I'd have to order some more."

The extent of some merchants' advertising almost makes one feel that they are afraid their stock would move from their shelves and they would have to order more. Turnover, profits, time and everything else are apparently no object.

### Other Lines Also

This does not apply alone to paint and varnish advertising, it characterizes the moving of all other lines.

Is it any wonder that the mail order houses have made inroads upon the trade of our rural communities? You can bet your bottom cent that they took into account this indifference of merchants in smaller communities and acted accordingly. This does not refer to the larger variety of stock which these houses are better able to carry. It refers to the business in everyday, staple necessities which have been and are now the stock-in-trade of every small town dealer. The mail order house one, two or five hundred miles away sought out the names of the people in rural communities, and not only told those people, through their catalogues, what they had to sell, but also gave them ideas which created demand for their goods.

### How They Got By

In many instances it was because the small town merchant was asleep at the switch. It was his arrangement of stock, window displays and other forms of advertising that enabled them to get away with it.

I am not speaking from hearsay, but from actual fact when I say that they sent representatives throughout the country and into the homes of the people to study what the rural population needed and wanted. How many country merchants ever went amongst the people of their own community for the express purpose of finding out what was wanted, and then bought their stocks accordingly? I venture to say there have been mighty few. Very few have ever attempted to get out a single handbill to pass amongst their customers.

### It Has Been Done

Somebody in the audience says it can't be done. I'll say it has been done. Three brothers in the southern part of Ohio had a general store situated in a town of less than one thousand population, and in close connection by trolley with a large city of several hundred thousand. By means of a small printing press, which they operated under their own supervision, they were not only able to vastly increase their business in their own community but are actually drawing people from the large city to trade with them. They are now operating a departmental store in their own little town with a rest and lunch room to provide accommodation for their out-of-town customers.

Somebody else says this is an exception. It might be if it were not for the fact that here and there we find merchants in smaller towns who realize their opportunities and go after their own local trade with definite, purposeful advertising. Quite true; such men are in the

**Toronto and Winnipeg**

minority, but there is not one of them but knows the power of advertising to put them in the exceptional, profitable and enviable class.

We have wandered away from the subject of paints and varnishes, but that does not matter. There are certain broad principles of merchandising and advertising exercised by such men that make them successful whether they sell paints and varnishes, dry goods, groceries, pins, needles, tin whistles or automobiles.

**Heavy Depreciation**

However, coming home to paints and varnishes, we have pointed out time and time again on this page that Canada's property depreciation on account of lack of paint is at least 2% per annum. That in itself provides a trade opportunity sufficient for every paint man to justify the expenditure of a few dollars in advertising the necessity of paint. Further, we have pointed out that that 2% depreciation annually totals up greater than our actual losses by fire. And it is a depreciation that can be very much lessened by the greater use of paint. A little advertising could be of assistance to not only reduce this loss to our property owners but also to develop and create business.

**Up to the Paint Men**

No one can put the blame for this laxness in our small store merchandising on the Government or on the war, or any other ephemeral cause. It's right up to the men who have undertaken to supply the needs of the rural communities. Not only is it up to them to let their communities know that they carry a certain line of paints and varnishes, but to shape their advertising in such a manner that they will carry conviction as to the real economic reason for painting. Any merchant who follows the manufacturers' advertising even casually will note that the keynote of advertising is to convince the public of the benefits they will derive through the use of paints and varnishes.

**Have Other Lines**

The writer is quite aware that few hardware merchants have the inclination or would be even justified in devoting their whole efforts in advertising to paints and varnishes. They have other lines to move out of stock and into cash. Each line must receive the attention that their relative value requires and demands. But in view of the vastly increased business that can be created in paints and varnishes, and also the fact that this line has already become an important department wherever handled, it can be said there is no excuse in entirely neglecting it in some part of the advertising that every merchant should do.

**Make Liberal Offers**

Here is one of the most surprising forms of indifference that characterize the majority of paint and varnish dealers. Every paint manufacturer offers liberal means of co-operation in which he is willing to bear the largest percentage, and sometimes the total expense, of advertising. It is not exaggeration to say that not 15% to 20% of the merchants on his list will make any response to any offer that he makes. Very often the manufacturer's offer involves only an hour or so of the merchant's time to compile a list of names or tack up a few roadside signs. The experience of the manufacturer's advertising department, not counting the expense of the material used, is placed at the disposal of the merchant to increase his paint and varnish business. Yet how many take advantage of it?

**Would Almost Die**

There is scarcely an advertising man who would not almost succumb to heart failure if he received anything like a 50% response to his appeal.

The man who wilfully neglects the use of paint on his property is not the only fellow that needs to be clubbed with sledge hammer facts about painting. Any paint manufacturer will confirm this contention that the majority of paint and varnish dealers need some action-arousing bombs about the opportunities that actually exist all about them for increasing and developing the business of their paint departments.

## WILL BUILD ADDITION

Plans are being prepared and work will commence in a few weeks on a three storey addition, brick and mill construction, to cost $25,000, to the factory of Benjamin Moore & Co., Ltd., Toronto, manufacturers of paints. The new factory will be 50 x 60 feet and three storeys high.

## PAINT UP THE PAINT FACTORIES

Said an official of a city prominent as a paint and varnish manufacturing centre, according to the "American Paint Journal": "Well, I must say that some of our paint and varnish concerns are not conspicuous examples of thrift and cleanliness and civic pride. We find it hard to make them keep their premises clean enough to keep down the fire risk, and as for the appearance of their plants, they evidently don't care a whoop."

So much has been printed about the paint dealer, and the appearance of his store, that it seems the manufacturers themselves should come in for their share of the attention that the public is giving to the trade, which the public expects to practise what it is preaching.

Manufacturers of paint and varnish products whose plants and premises advertise their own refusal to believe that it is necessary to "clean up and paint up" and to "save the surface," can hardly expect their communities to take these messages very seriously.

In some industries there are concerns whose plants are pointed to with pride by the citizens because they really are ornaments and aesthetic as well as industrial assets to the community. Why shouldn't a paint manufacturing plant represent and reflect in its buildings and their appearance the spirit that is urged to prompt the public's use of its products?

## DECREASE IN PAINT EXPORTS TO CANADA

Statistics for 12-months ending July 1919, as compared with the year ending July, 1918, show a decrease in imports from the United States on all commodities from $752,810,282, in 1918, to $695,268,163 in 1919. Although paint, colors and varnish showed a decrease, it was very light as compared with other staples. U. S. exports to Canada in 1918 on these lines were $3,341,986, and in 1919, $3,262,580, a decrease of .023 per cent.

## WOODBRIDGE HEADS LITHOPONE DEPARTMENTS OF DU PONTS

Mr. S. B. Woodbridge has been made director of sales of the lithopone, dry colors and pigment division of the sales department of the E. I. du Pont de Nemours & Co.

Mr. Woodbridge was prominently identified with Harrison Bros. & Co., Philadelphia, for ten years prior to the taking over of that concern by the Du Pont concern, having joined the Harrison forces in 1907 as assistant to the general sales manager, later becoming railroad and industrial salesman. In 1916 he became sales manager for the Beckton Chemical Co., manufacturers of lithopone, and he was with that concern, which was allied with the Harrisons, when both were taken over by the du Pont Co., with whom he has been assistant director of sales in the acids, heavy chemicals, lithopone, dry colors and pigment division until promoted to his present office.

## BRIDE TO BE IS HONORED BY ASSOCIATES

Miss B. Bole, of the sales department of Benjamin Moore & Co., Ltd., Toronto, was very pleasantly surprised on Friday evening, when she was invited by her associates to be the guest of honor at a banquet held in the King Edward Hotel. Twenty-four covers were laid, and after the dinner, Mr. Fred Moore, who presided, on behalf of the firm, presented Miss Bole with a cabinet of silver. On behalf of the staff, Miss L. King made the presentation of a silver tea service. Both Mr. Moore and Miss King, in making the presentations, wished the recipient every happiness in view of her approaching marriage. The whole affair was arranged as a surprise for the bride to be, and was carried out exactly as intended. Miss Bole expressed her thanks suitably.

## MAY BE ADVANCE FOR LEAD PRODUCTS

The scarcity of adequate supplies of pig lead and the firming that has taken place in producing points of late, has very materially firmed the market for manufactured lines. It is not improbable that increased prices may be made effective at any time.

# Steel Output May Not Get Back To Normal in Six Months

DISCUSSING the outlook in regard to steel production and prices as a result of the strike, the "American Metal Market and Daily Iron and Steel Report" says:

"While the entire steel trade, in its broadest sense, and including consumers and distributors as well as producers, is concerned chiefly with the strike and its eventual ending with the producers in full control of their properties, in other words with open shop intact, consideration of the future of steel prices cannot be avoided entirely, for that is a very interesting subject.

"Steel ingot production in August was at the rate of about 39,100,000 gross tons a year, which means that finished steel, in merchantable form, was being produced at the rate of about 2,500,000 gross tons a month.

### Production Lowered

"Since the strike began production has been curtailed by not less than 40 per cent., probably by somewhat more, and thus there is a deficiency in production of at least a million gross tons a month. The strike is playing out slowly, and even if the return to employment becomes much more rapid in the next week or two than it is just at present, the restoration of full outputs will be postponed to a later time. Working forces will be more or less disorganized and full production may not come until three months or more after the strike is ended by the return to employment of all those now idle.

### Million a Month

"With the loss of tonnage at fully a million tons a month, the gradual decrease in the loss, even the most rapid decrease that can be expected, would mean a loss altogether of more than two million tons, quite possibly as much as three million tons. Considering the relations of supply and demand that existed before the strike this will prove a very serious loss in tonnage.

"If the market were to be made purely by the law of supply and demand steel prices would advance, and by very considerable amounts, and they would easily stay up, in all probability, for a long time. The question really is to what extent, if at all, the producers will yield to the law of supply and demand. Undoubtedly there are conservative elements in the trade opposed to large advances if not to all advances.

### A Large Setback

"With normal operating conditions present prices are satisfactory and promise to yield reasonably large profits, but at best there is a large setback by reason of the strike. Production costs, per ton in the industry as a whole, are running now much higher than in August, and they were unreasonably high then for labor was not efficient. After the strike, outputs per man will be below normal, and normal conditions in the matter of output in proportion to employment will not be attained for some time. One observer sets the time at no less than six months.

"The steel producers regret the double loss, both that of the tonnage deficiency and the increased cost per ton of output, but regard the whole loss as almost inconsequential compared with the alternative the strike leaders endeavored to produce, of the men taking charge of the mills, for then all efficiency would have been lost and the cost of production would have mounted to figures it is very uncomfortable even to attempt to imagine."

## HOUSTON LOWE TELLS ABOUT SELECTING PROPER ASSISTANTS

Continued from page 51

"After fifty years in this one business, forty of which have been filled with investigation, I am still studying it and encouraging the younger men of the organization to do so.

"When I say study your work, I don't mean that this applies only to the men 'at the top.' I believe in stimulating every member of your force to think about what he is doing, no matter what it may be. It is a good thing for him and a good thing for the business. Responsibility educates and develops a man. A good many executives realize this, so far as their immediate subordinates are concerned. But if it is true of one man it is true of another.

### Get the Results

"I have often gone into the factory and said to one of the paint mixers: 'Bill, we want this to be a paint which will do this or that.' I go on and explain the particular qualities we want that special lot to have. Then I say: 'Now, I don't care how you get the results, just so you do get them.'

"I can do this because Bill himself has been encouraged to study, to think, to know the essentials of his work. He knows, too, the standards, the ideals, of the business. As I said before, your employees have no doubts on that point. And equipped as he is with his understanding of your ideals and with the knowledge which is the result of your study and his own, I contend that Bill will give you a better product, when he is encouraged to put his best thought into it and knows that he is responsible for its quality, than he would if you did not let him think about it, and took away from him any obligation of responsibility.

### Learning All the Time

"In studying the problems of my business I have talked with all kinds of men and I have learned much from some who might seem the least promising sources. I stop to gossip with a painter at work, and learn from him something that he has learned from actual experience. I find that he has some way of thinning the paint, or a trick of applying it, something that he has worked out for himself; and from it I get a hint I can make use of.

"We have heard the statement often enough that 'no one man has a monopoly of ideas,' but we don't act on that theory as we should. We do not systematictlly search for the ideas other men may have. And in the case of employees, we do not always encourage them to have ideas.

"In our organization, we try to do this by giving prizes for ideas. And the emphasis we put on teaching, as part of a man's duty, is an effort along the same line.

"If you cannot teach, you cannot succeed. The more you try to teach others, the more you will teach yourselves.

"I believe this is sound advice. A man who thinks he is expected to teach others will try to get hold of something worth passing on to them.

"I believe, too, in the value of study outside the apparent scope of your business. It is a mistake to think there is a sort of wall around your business, and that the things beyond that boundary have no connection with your work. Any man who reads widely realizes that this limitation does not exist. Out of what is called 'general reading' there very often come unexpected ideas and suggestions of definite practical value to him.

"But even more important is the effect which such reading and study have on his mind and character. The man who cannot learn from history, from biography, from the best thought of the best minds, things that will help him in his daily life, must be—but then, there can be no such man! So why try to describe him? Men have only to make the experiment to be convinced that it is worth while.

### Strong Influence

"In my own experience certain books have had a particularly strong influence on me. They are: Jevons' work on the 'Principles of Science,' and Karl Pearson's 'Grammar of Science.'

"One reason why Jevons and Pearson helped me was because they showed me that certain of the problems I had been trying to solve were insoluble. I had been working and studying over them, and was vexed and discouraged over my failure to find a way of mastering them. When I found that there was no such way, that better men than I was in that line had proved them incapable of solution, a mental burden was got rid of.

"These two books, of course, were helpful to me technically. But books in general have not only interested me, but helped me to humanize my business. Why should a man make his work a mere routine affair of materialistic facts and figures? I am constantly finding things in my general reading that give flavor and color to my thoughts about business.

### Are Missing Pleasure

"If it seems absurd to you to link up philosophy and even poetry with your 'sordid' business affairs, you are missing a great deal of pleasure and of profit. For if you are content to have your work a sordid thing, your returns from it will be only sordid; and even those will be less, I believe, than they might be if another spirit went into the making of them.

"I have spoken of the three great lessons learned in fifty years of business. Of course there have been many minor ones. For instance, it was not until we had been working for twenty years that we realized that the best success is accomplished by concentration.

"In our own case, we concentrated on certain products and adopted a definite policy with regard to them. Instead of making and handling a wide range of things we determined 'to know only the paint business and that thoroughly.' We did not branch out into other lines, and we did not try to grow too rapidly.

### Way to Progress

"The way to progress is not to measure ourselves with what we have been in the past, but with what we might have been now, and with what we may become. Only the man who is constantly looking and hoping and working for greater things can expect to see his business—or himself,—grow.

"The early years of a business may seem to show small results; but that is the natural order of things. A superstructure always goes faster, more easily, and with a more spectacular effect, than a foundation does. For with the latter you must go down—and dig! While with the former, you may go up—and attract attention."

# The Luxeberry Painter Says:

"WHEN Dad made me his business partner thirty years ago he had already been using Berry Brothers' Varnishes, Stains and Enamels for more than thirty years. Dad laid down the brush long ago, but I still continue to use Berry Finishes. They are one of the real foundation stones of my success."

It is the earned confidence in Berry Brothers' products that maintains and increases the demand for them. The smallest buyers have learned that the label of Berry Brothers is a guaranty of quality and a sure protection against inferior finishes.

*Any dealer can make his varnish trade grow by featuring Berry Brothers' brands.*

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Oct. 23.—Not the least improvement is to be noticed in the linseed oil situation here and it is expected that November will arrive before there is much relief. Supplies of seed are held back and by the time the crushers receive shipments and crush them it will be somewhat later before new oil is available in quantity. In the meantime, some English oil is to be had and the trade needs are being met with small lots of single barrels and less.

No change of price has been made for turpentine, and this is still moving slowly, with little surplus stocks in hand.

The varnish market is a very strong one, and prices are likely to be fully maintained. The trade movement of all lines is seasonably satisfactory.

### *No Oil Improvement But Demand Limited*

**Montreal.**

LINSEED OIL.—It will be the beginning of November, at least, many of the jobbers and at least one crusher estimate, before there will be any improvement in the delivery of flaxseed to the mills. This means, briefly, that there has been no improvement to speak of in the market situation since last week. Prices for spot oil are still maintained on their high level and there is not likely to be a lower price for a little while. In view of the fact that demand is rather light, the situation is not as acute as it would otherwise be.

| Raw— | Imp. Gal. |
|---|---|
| Single barrels | $2 90 $3 02 |
| 5 to 9 barrels | .... .... |
| 10 to 25 barrels | .... .... |
| **Boiled—** | **Imp. Gal.** |
| Single barrels | $2 92½ $3 04½ |
| 5 to 9 barrels | .... .... |
| 10 to 25 barrels | .... .... |

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *To Get Turpentine Is Still Difficult*

**Montreal.**

TURPENTINE.—There is no turpentine excess stock here, as far as can be ascertained and the jobbers are having more or less difficulty in procuring what they need. No one is pressed to buy and some are supplying but limited quantities. Prices are steadily held without change.

| Turpentine— | Imp. Gal. |
|---|---|
| Single barrels | $2 45 $2 65 |
| Small lots | .... 2 66 |

(Packages extra.)

### *Will Be No Change Just Now On Putty*

**Montreal.**

PUTTY.—No immediate change is forecast for putty, and the trade requirements are being met promptly by the jobbers. The undertone is steadily firm, particularly with linseed oil putty. The active season is immediately ahead and movement will be greatly accelerated with the arrival of snappy, cold weather.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *Pig Lead is Higher; Lead in Oil Unchanged*

**Montreal.**

WHITE LEAD IN OIL—The market is marked higher on pig lead and some anticipate that it will go higher still. In the meantime there is a fair sale for the product and supplies are going forward quite freely, particularly to export sources. The basis is firm, but without change, the five ton quantities still selling at $15.50 per cwt; ton lots at $16, and smaller lots at $16.35 per cwt.

### *Paint and Varnish Firm; Unchanged*

**Montreal.**

PAINTS AND VARNISHES. — The undertone of the varnish market is a decidedly firm one and lower prices need not be anticipated this year. At the present time there is more or less difficulty in procuring containers and the manufacturer who may have deferred buying his requirements will now experience trouble in securing supplies, for tinplate is scarce and likely to be scarce. All raw materials are also firm and high in price.

The paint markets are steadily maintained without actual price revision. Movement is seasonably satisfactory.

## TORONTO

TORONTO, Oct. 23.—The fact that turpentine dropped a small fraction in the Southern market is no indication of the actual turpentine situation. Some importers state that the Southern stocks were hardly ever lower than at the present time. Holders are very indifferent and are inclined to hold any stocks they have as there seems to no doubt that turpentine will jump to a very high figure per gallon wine measure on the Southern market. The German requirements are said to be enormous, but, owing to the high rate of exchange on the German mark being for them so prohibitive, and also the delay of the United States Government to sign the Peace Treaty, it is said the Germans are not receiving the supplies of this commodity they will eventually acquire. To-day's quotation is $2.45 per Imperial gallon.

Linseed oil is very firm considering this year's crop being so close to its seasonable milling. Producers claim a large business is being handled, and prices are firm, although some look for an easier market shortly. Raw oil is quoted at $2.95 to $3.15, and boiled oil at $2 98 to $3.18.

Putty is going out in large volume and producers find it hard to keep up with the demand.

### *Linseed Oil Prices Are Holding Firm*

**Toronto.**

LINSEED OIL.—Linseed oil is firm, although the present crop will soon be ready to market. Producers are kept very busy trying to suply the demand. The price below is a fair price according to conditions, although a few have found occasion to quote various other prices to further their own ends. Quotations are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | $2 95 | $3 15 |
| 3 to 5 barrels, gal. | 2 94 | 6 14 |
| 10 barrels and over | 2 92 | 3 12 |
| | **Boiled** | |
| 1 to 2 barrels, gal. | 2 97½ | 3 18 |
| 3 to 5 barrels, gal. | 2 96½ | 3 17 |
| 10 barrels and over | 2 94½ | 3 15 |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

### *Turpentine Market Remains Very Firm*

**Toronto.**

TURPENTINE.—The market is expected to develop very strong, in fact some expect a considerable advance very soon. Germany has as yet not been able

This agent's experience is not an unusual one—we can tell you of many B-H agents who have "made their business over" by putting up the B-H Agency sign.

May we tell you more about it? A post card will place you under no obligation.

Save the surface and you save all *Paint & Varnish*

**BRANDRAM-HENDERSON** LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

to come in to the market on account of their high rate of exchange against her. The United States not having settled the Peace Treaty also has a bearing on the situation. Quotations are as follows:

| Turpentine— | Imp. gal. |
|---|---|
| 1 barrel (barrel included) ..... .... | $2 45 |
| 2 to 5 barrels (barrel inclued) .... | 2 44 |
| 5 gallon lots ..... .... | 2 55 |

## *Mixed Paints Are Still Moving Well*

**Toronto.**

MIXED PAINTS.—Mixed paints are moving fairly well and manufacturers are generally satisfied with the volume of business being handled although some claim that a number of merchants are holding back orders in hope of a probable decline, which, they state, would be very unexpected.

## *White Lead in Oil Shows No Change*

**Toronto.**

WHITE LEAD IN OIL.—A fair volume of business is being handled. Quotations show no change and are as follows: Five-ton lots, $15.85 per hundred pounds; 1-ton lots, $16.35, and in smaller quantities, $16.70.

## *Glass Very Scarce; Putty Holding Firm*

**Toronto.**

GLASS, PUTTY.—The glass situation has not been relieved as yet and glass sheets of all kinds are very scarce, more particularly plate glass. The scarcity in some respects has been an advantage and will, no doubt, prove beneficial in future years, in as much as numerous merchants, who would not be induced to purchase anything but foreign glass, out of necessity were forced to buy the home product, and to their surprise and benefit found it to be a better product for less money, with better delivery. Jobbers report a very brisk demand and are often puzzled how to supply it, but manage fairly well. There is no immediate change looked for and it would be very difficult to predict which way the market will turn, as there are so many factors that have a direct bearing on the situation. London and Toronto are quoting less 30 per cent. on box glass and from 5 to 10 per cent. on cut size sheet glass. Montreal shows a discount of 20 per cent. on box glass and 5 per cent. on cut sizes sheet glass. All less 2 per cent. cash.

Putty prices are as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels ..... | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron ... | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron .... | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons.. | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels ... | 7 10 | 7 35 | 7 70 |

### NO CHANGE LIKELY FOR VARNISHES

Asked by HARDWARE AND METAL as to the tendencies of the varnish market, W. W. Ingersoll, of the Dougall Varnish Company, Montreal, stated that the undertone was decidedly firm. There is, in his opinion, little likelihood of any change in the nature of a reduction, and in fact there might be an advance in prices, although Mr. Ingersoll did not forecast that this will happen.

Among the difficulties at present is that of getting tinplate for containers, although some manufacturers have provided for their needs of the near future. All raw materials hold very high and are not likely to be procurable on a reduced basis just now. The outlook suggests that the market will be maintained on a steadily high, if not on a higher price basis.

### WILL HOLD CONVENTION NEXT WEEK

The Martin-Senour Company, Ltd., will convene on Monday morning, October 27, at the headquarters in Montreal, and throughout the week their annual convention of sales representatives, managers, and divisional heads. General Manager A. T. Black reports a full programme in prospect.

### PAINT PUSHERS ENJOY THEATRE PARTY

Tuesday night of this week was "Theatre Night" for the salesmen and employees of the Sherwin-Williams Co., of Canada, Ltd., and who have been in convention at headquarters in Montreal this week. Reports suggest that the function was very successful, and the introduction of little surprises by the vaudeville performers created much amusement when names of their associates were humorously used.

Through the courtesy of Mr. Wright, manager of the Princess, a series of slides were introduced depicting the various administrative heads and divisional managers. Slides were also used in throwing upon the screen the group photos taken on Monday.

The Glidden Varnish Co., Ltd., has opened a branch store at 327 Craig Street West, Montreal. This will be under the supervision of Leonard Mould as district manager.

# Will Ask Dominion Railway Board to Disallow Applications Made by the Carriers

## Railways Have Not Carried Out Orders in Reference to Joint Rates—Asking New Schedule of Switching Charges in Eastern Canada—All Shippers Affected by the Proposals

UP to the present the railways of Canada have failed to carry out the directions of the Dominion Railway Board in regard to joint rates. According to the ruling of the board as explained in a previous issue of HARDWAR AND METAL, the joint rates were to become effective on October 1.

The railways, instead of carrying out the orders of the board, have made application against it on the following grounds: (1) They claim that they would receive less under the joint rates ordered by the board for the same distance than they would in a single line haul; (2) They claim that the minimum charge as ordered by the board would be less than they would receive for the same distance in a minimum haul; (3) They claim that the increase in cartage and transfer charges makes the cost of transfer higher than is provided for by the board's order.

The Canadian Manufacturers' Association is opposing the application of the railways on the ground that the carriers have not carried out the board's order and also on the ground that their protest was sent too late.

The Canadian Manufacturers' Association is also taking up the question of local switching charges in Eastern Canada, ad is askig that the Railway Board disallow the tariff asked by the railways. This question was considered by the Railway Board at many hearings, and the carriers were directed to file proofs with the board naming rates on specific commodities which had been agreed to t a coference between shippers and carriers. In addition, they were to name the scale of rates to cover commodities not specified and provided for on a basis which exists at the present time at a certain rate per 100 pounds, regardless of the commodity.

The carriers filed proofs with the board as directed, but failed to carry out that part of the direction of the Chief Commissioner calling upon them to provide the special schedule of rates not enumerated in the tariff. Instead of that they continued under these proofs a basis of rates which are the same as the rates for the line haul movements from station to station.

Recently the carriers filed with the board, to become effective on November 1 a schedule slightly modifying the proposal contained in the proofs mentioned. The modification, however, was merely a reduction, as the basis is the same as that used for line haul movements.

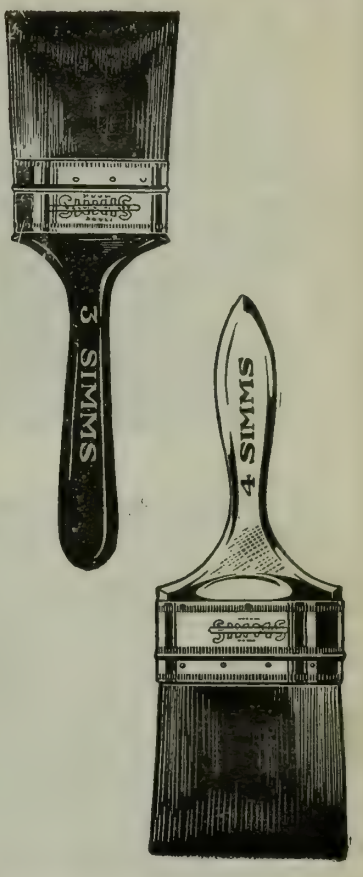
The Canadian Manufacturers have received a number of protests regarding this and are making an official objection, asking the Board to disallow the tariff on the ground that the board had made no ruling on the matter.

The situation in both the above matters is a somewhat interesting one, and in some quarters it is thought that the railways are acting in a decidedly high-handed manner. Also there is some comment as to why the Railway Board is not taking any action in the matter.

TRADE SIMMS SET IN RUBBER MARK

# Simms Paint Brushes

## *Sold All Over The World*



The demand for Simms' Set-in-Rubber Paint and Varnish Brushes extends all over the world. There are none like them anywhere.

Your customers know this. See to it that you have a full stock on hand.

The worst treatment cannot hurt Simms' Set-in-Rubber Brushes. The bristles are set in vulcanized rubber, and are guaranteed to hold firmly **forever.**

People don't cover their houses with loose bristles when they use Simms' Brushes. Push the sale of this line and your reputation won't suffer.

Send for price list. Look over your stocks without delay. Insure big profits and satisfied customers by having all Simms' Better Brushes on your shelves. Order to-day.

## Every Hardware Dealer Should Know

that Canada Cycle & Motor Co., Ltd., are putting extra care and extra quality into their skates.

**If you are handling**

*Automobile* SKATES
The Skate with Aluminum Tops

you can be doubly sure of the quality of the skates you sell.

We use the same special high-grade steel as is used in points of greatest strain in high-grade motor cars (from which the skates take their name—"Automobile Skates"). Our special carbonizing process renders the blades hard as glass on the outside and enables them to take and hold a very keen edge, while they have a tough core which prevents brittleness. This places Automobile Skates in a class by themselves in regard to quality.

"Automobile Skates" will boost your business and mean money for you. Write for illustrated folder and prices.

# Let this *Worthy Brand* Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination*. To the workman, however, Jamieson quality is determined only by *service*.

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want *you* to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will *pay* you to sell Jamieson Paints and Varnishes exclusively to your customers.

# Alabastine

## Instead of Paint, Kalsomine or Wall Paper

Every wall is in need of some sort of finish to make it sanitary, clean and agreeable in appearance, and to do this economically, neither Paint, Kalsomine nor Wall Paper has perfectly fulfilled these requirements.

In Alabastine the consumer receives results that build permanent and profitable trade for the dealer. Just as Alabastine fulfills all the requirements of the consumer so it fulfills all the requirements of the dealer; for it is good quality, satisfactory, easily sold, profitable, protected in price and has been advertised nationally for 38 years—this year showing greater advertising than ever.

35c for half size pkg. } Maritime Prov. British Columbia

70c for full size pkg. } Manitoba
40c for half size pkg. } Saskatchewan Alberta

**Nationally Advertised 38 Years**

Beside the natural qualities and trade policy that benefits the dealer, a tremendous and steadily growing demand has been cultivated by simply making the consumer aware of Alabastine and its usefulness to him.

Barrett

# Roofing Specialties

The Standard Brand of prepared roofing from Sydney to Vancouver. Popular priced and a ready seller everywhere.

**EVERLASTIC ROOFING CEMENT**
has no equal for the resurfacing of worn out roofs.

**ELASTIGUM**
is the plastic cement for a thousand uses. Known by the painstaking workman.

**EVERJET ELASTIC CARBON PAINT.**
The best form of black carbon paint on the Canadian market.

BARRETT'S ROOFING SPECIALTIES ARE ALL PUT UP IN ATTRACTIVE LITHOGRAPHED CANS WHICH WILL LEND DISTINCTION TO ANY DEPARTMENT OF YOUR STORE. Every building in your vicinity is a possible prospect for the sale of some of Barrett's Roofing Specialties.

**EVERLASTIC RUBBER ROOFING** is our first grade "Rubber" roofing; its years of successful use throughout Canada have made it so well known that the name "Everlastic" has practically become standard.

**EVERLASTIC ROOFING CEMENT** is a black bituminous compound manufactured expressly for use on roofs. It is about the consistency of thick molasses and is liquid under ordinary temperature conditions.

**ELASTIGUM** is an elastic, tenacious cement, of pitch-like consistency, compounded on a heavy, bituminous base with non-drying weatherproof oils, pitches and fibre. It will expand and contract in conformity with the surface on which it is applied, whether the latter be metal, wood, glass or masonry.

**EVERJET ELASTIC CARBON PAINT** is a lustrous, black carbon paint that combines the qualities of low cost and extreme durability. It is a bituminous product and is elastic and adhesive; will not rub, peel or scale; will not become brittle and crack, is impervious to moisture, and can be used in any climate.

**Full details of all the BARRETT real business-getters will be sent you for a request.**

# They See The Can—
# Recall The Brand—
# *And You Record a Sale*

Stephens REGISTERED TRADE MARK has already impressed many minds favorably. An average display is all that's necessary to start a train of thought in the customer's mind that leads from your store to an unpainted home. Your cash register becomes the closing link in the series of events suggested by your display of Stephens' Paints. This doesn't happen once—it happens many times. Are you making the most of such opportunities? Have you the right brand of paint? If not, your paint turnover is not all it might be.

*Suppose you write us about an agency. There's money in it.*

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

The Eden

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

The Eden IS THE MACHINE FOR THE LIVE DEALER

# THE VICTOR MANGLE

***is substantially made and a ready seller***

Progressive dealers will do well to show one of these mangles prominently on their floor. The modern housewife is ever alert in matters of household equipment and in all respects the Victor Mangle is a very desirable acquisition. You can rely on quality workmanship throughout — all castings are smooth and highly enamelled. The rolls run remarkably free and with little exertion and there is a stability about the "Victor" that makes it operate in a most satisfactory manner. Other features include the drop leaf extension table, adjustable rollers, castors on feet, and especially selected hardwood rollers. Write us to-day for prices. The Victor Mangle will surely find a ready buyer—we can quote you attractive prices.

# Public Finance Disaster of Early Canadian Days

The almost forgotten experience of our forefathers, of which, to quote Sir Oliver Mowatt, "The effect was to diminish the value of municipal securities generally, and to corrupt the moral sense of the people with reference to moral obligations," makes a fascinating and thought-stimulating article as presented by Dr. J. Murray Clark in recent issues of THE FINANCIAL POST.

Dr. Clark, dealing with this Municipal Loan Fund of the fifties, says of its author, Sir Francis Hincks:

> He had in some respects genuine ability and, in matters which he understood, rendered considerable useful public service, but he was an idealist and a theorist without any practical grasp of the rigorous laws and unyielding facts of finance. He was patriotic and well-meaning, but his patriotism and good intentions did not save the country from the inevitable consequences of his scheme which those able to think clearly on matters of finance perceived from the beginning. He possessed in an eminent degree that fatal fluency of persuasive speech with which so many of our politicians are endowed, and swayed the people, for whom he expressed and probably felt sincere devotion, with superficial catchwords and glittering generalities not founded on the stern realities of economic laws. The confidence he inspired only enabled him to do infinitely more mischief than would otherwise have been caused by his scheme, and did not protect the people from the losses and distress resulting from disregard of sound business principles.

There is more here than an interesting story of early days. Here is a marking on the map of Canada's history by which all interested in the country should make their reckonings, should chart their course of action.

THE FINANCIAL POST is continually presenting such articles. Consider some which appeared in the early issues of August:

**Grain Growers Condemned by a Retailer.**
**Bolshevism and Public Morals.**
**Some Alberta Oil Wells Are Showing Profit.**
**Bright Outlook for Canadian Pulp & Paper.**
**Why Henders Fell Out With Grain Growers.**
**Sawyer-Massey on the Road to Better Times.**
**Sir Adam Gets in Some Fine Work at Guelph.**
**Dominion Loan Campaign to Start Oct. 27.**
**Frank A. Vanderlip Continues His Vivid Survey of War-ridden Europe.**
**Make Maturities of Loans as Short as Possible.**
**Tariff Action by Liberals Step in Dark.**
**Canners' Head Gives Answer to Prof. Jackson.**
**Small Retailer Renders Service to the Community.**
**Reorganization of the Standard Reliance Corporation.**
**British Will Not Unload Their Canadian Bonds**

You will find enlightenment in the balanced viewpoint of THE FINANCIAL POST'S articles and editorials. You will find its "Answers to Enquiry" department of value. THE POST is the paper for the thinker—be he rich or poor; the paper for the man who is eager to study not only what is best for his business, but what is best for Canada. This is the paper which you may receive weekly for one year at a cost of $3.00. Fill in the attached coupon:

# Is the Alien a Menace?

IN the October issue of MACLEAN'S MAGAZINE a strong presentation is made of the reason why the people of the West are against further foreign immigration.

"The Menace of the Alien" depicts the foreign problem in the Canadian West as it exists to-day, and shows every one of us why we must Canadianize our Ruthenians, Austrians, Slovaks, and our fifty-seven other varieties before we allow any further "unrestricted" immigration.

This article is written by a member of MACLEAN'S MAGAZINE staff who has just returned from a careful, personal investigation of the situation. Shall we have a "White West?" Many Westerners are demanding it. Are the aliens to swing labor into the bosom of the O.B.U.? It is being done—and what must we do to stop it?

The "inside" story of the routing of the Drumheller miner aliens by returned Canadian war veterans is here told by MACLEAN'S for the first time. What leadership must be substituted for the O.B.U. leadership of these foreigners?

*The October issue of MACLEAN'S is a Western number in the sense that it contains many articles and stories of distinctly Western interest. For instance:*

### X "Those Pesky Farmers Out West"

*By Hopkins Moorhouse, Author of "Deep Furrows"*

They have completely upset the old order of things. No longer will politics consist of the comfortable fight between the Ins and Outs with the old party lines maintained. The grain growers on the Prairies have upset the calculations of the professional politicians and completely changed the face of Dominion politics.

### X "Fifty Years in the West"

*By Professor W. T. Allison*

A breezy and readable sketch of the business career of Winnipeg's veteran business man, James H. Ashdown.

### "Further Discoveries of New Land"

*By Vilhjalmur Stefansson*

The final and most interesting instalment of Mr. Stefansson's story of his wonderful trip of five years' duration in the Canadian north in which he tells for the first time of finding new continents in the Arctic and hoisting there the Canadian flag.

### X "The Banshee Bell"

*By Edith G. Bayne*

A bright love story laid in the mountains of British Columbia.

## *Other Splendid Features of October MacLean's*

### X "The Turmoil at Ottawa"

*By J. K. Munro*

A comprehensive survey of Dominion politics, written with complete impartiality and absolute candor. It is bright and breezy, with a knock in every line for the politicial opportunists. It plucks many tail feathers from our party leaders.

### "Spanish Doubloons"

*By Camilla Kenyon*

The start of a bright and fascinating serial story by a brilliant young writer. It is the Spanish Main brought up-to-date, treasure hunting with a background of fun and romance.

### "The Airy Prince"

*By Arthur Beverley Baxter*

A complete novelette in which is presented a bird's-eye view of England in time of war. It is one of the most brilliant stories that has been written of recent years.

### "His Majesty's Well-Beloved"

*By Baroness Orczy*

The latest novel by this popular authoress appearing exclusively in MACLEAN'S.

### "Ebb and Flow"

*By C. W. Stephens*

A strong business story laid in the province of Quebec.

*Over 70,000 Canadian Families Buy*

# MACLEAN'S

"CANADA'S NATIONAL MAGAZINE"

## *OCTOBER ISSUE* *Now On Sale At All News Dealers* *20c*

**If there are no newsdealers in your town, or if your newsdealers cannot supply you, send 20 cents for a sample copy or $2.00 for a whole year's subscription to MACLEAN'S MAGAZINE, 143-153 University Avenue, Toronto, Canada.**

***A Right Quality Product for every Purpose.***

FOR any and every purpose in painting, varnishing, etc., there is a S-W product which is, beyond all others, the best of its kind. When you stock the S-W line you can secure everything you require for your paint department. You know (and your customers know) that for quality and price it is the best value procurable.

Sherwin-Williams is the best advertised paint line in the world. For years we have been untiring in our efforts to tell the public through billboards, painted signs, newspapers, magazines, farm papers, etc., of the merits of the S-W line. The public know the truth of our statements for they have proved them.

---

**Write for details of the S.-W. Proposition it means growth in your paint department.**

---

# "NORCROSS" Cultivator Hoes

***Have "Built-in" Selling Points***

It is very simple to demonstrate the superiority of NORCROSS Tools. In fact, it's self-evident to skilled gardeners. That's why world famed gardeners use and endorse them.

NORCROSS work close up to plants safely; they come in sizes to suit anyone; the 5-prong size may be easily attached to a wheel plow. Handsome, durable and profitable.

**C. S. Norcross & Sons**

**Bushnell, Ill., U.S.A.**

## GREB RIM TOOL

Operates all types of cross-split rims. "Wallop" your rim with a hammer to force it in or out of place and you are bound to have greater trouble next time. Do the sensible thing: Provide yourself with the best rim tool on the market and save time, trouble and rims. TEN DAYS' TRIAL.—If your jobber does not have them, we will send you one. Try it ten days. If not satisfactory, return it to us and we will refund your money. We also make the Greb Automatic Grip Puller.

**B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.**

**THE PROGRESSIVE MANUFACTURING CO.**
Torrington, Conn., U.S.A.

# FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

# TRADE MARKS

VIKO
ALUMINUM

Mighty as the mountains of his native Northland, the Viking is a fitting symbol for Viko, the Popular Aluminum Ware.

It, too, is renowned for its strength.

The aluminum of which Viko is made is rolled repeatedly under enormous pressure, thus insuring sheets of even thickness, free from bubbles and other defects.

It will pay you to handle Viko.

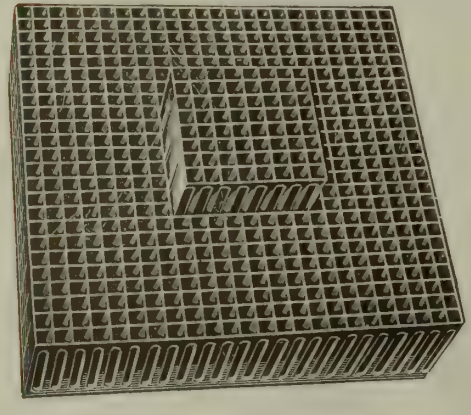
## The Popular ALUMINUM

# McKINNON RADIATORS

## *Really Cellular*



It is easy to break an ordinary radiator beyond repair, a condition that entails wholesale waste, because scraping an ordinary radiator entails scraping the expensive tanks and other accessory parts.

The McKinnon Radiator solves this big waste problem—Its core is made up of individual cells, which can be fitted into any radiator frame work—

This is very valuable information for the auto owners and garage men—We supply new cores that will fit ANY RADIATOR SHELL.

Corrosion is also one of the evil influences of water on the radiator—We overcome this by careful tinning of the inside and outside of McKinnon Radiators. The sides are straight downward, and corrugated so that the water is constantly in agitated action carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water pockets are also constructed to permit of an outward strain many times before a burst will take place—

Vibration has no terrors for the McKinnon Radiator—because it is a solid unit not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry.

## Garage Door Latch

This No. 27 latch has the appearance, utility and simplicity—that's why it's a prime favorite with garage owners. It is extremely popular and it is sought for whenever a new garage door is hung—that's pretty often these days.

A dealer that has in stock articles which are popular and sought for, is naturally going to make a great many sales. With a good profit on each sale, and a good many sales per year, he will have a nice annual turnover, won't he? How about you?

No. 27 Latch is reversible for right or left hand door; adjustable for thickness from 1⅛ to 2¼ inches. Packed the **Unusual National Way,** one latch complete with screws, in a neat, strong box. Finished in Japan, Dead Black Japan, Sherardized and Dead Black Japan, Sherardized and Plated, any finish. Weight per dozen 26 lbs.

**NATIONAL MANUFACTURING COMPANY**
**STERLING, ILL.**

# You Can Have Brighter, Cleaner Stocks

RID your store of dust—customers both men and women dislike dusty goods. Bright, clean merchandise creates a desire to purchase. Banish dust from your store and maintain your reputation for clean merchandise.

Dust cannot rise if your floors and shelving are treated with Imperial Standard Floor Dressing—the modern dust preventer.

## STANDARD Floor Dressing

prevents dust by its action. Floors treated with it retain their first clean smoothness. To keep the floor clean, sweep regularly with a stiff broom.

Imperial Standard Floor Dressing is a high quality non-evaporating *preservative* for the surface of wood, linoleum and oil cloth. One application every three or four months will keep dust off your merchandise and your floors bright and clean.

A gallon is sufficient to treat 500 to 700 square feet of floor surface.

Apply with the Imperial Floor Oiler or an ordinary sprayer.

Sold in one gallon and four-gallon cans, also half-barrels and barrels.

*Ask the Imperial Oil Man*

# The needs of merchants have guided National Cash Register improvements

"WHAT the merchant needs" always has been—and always will be—our basic idea in making cash registers.

This business, as it stands today, is the result of constant study of merchants' needs.

Every suggestion that we receive is investigated. The practical ones are adopted and given very exacting mechanical tests before they are manufactured.

During the past 10 years we have made 6,508 improvements in our product.

These improvements were added so that National Cash Register users could be supplied with machines that would give them the utmost possible service.

Modern National Cash Registers are practical, useful, accurate, and durable—the best we can make.

## Nationals are now used in 296 lines of business

# Buy and Induce Others To Buy

The Merchants of Canada would be the first to feel any slackening in the buying power of the people.

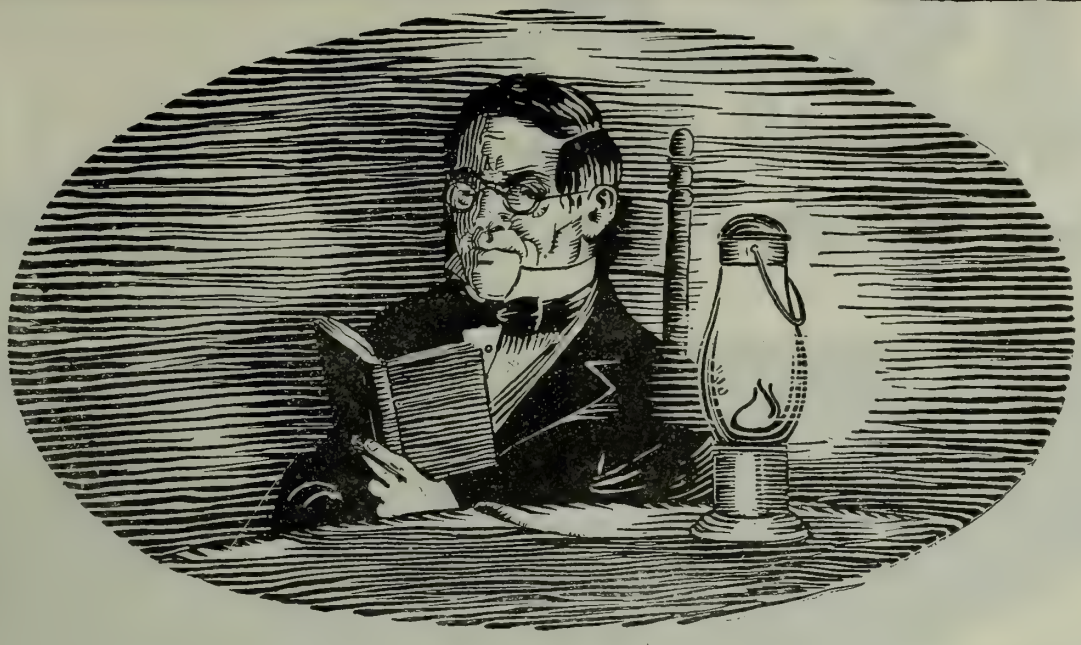
You have a lot at stake.

Until the Victory Loan 1919 is over—and a success—strain every effort to help.

Support the Victory Loan 1919 with all the energy you give to your own business.

Your customers are your friends.

Don't lose a single opportunity to impress them with the importance of putting the Victory Loan 1919 across. This is a case where National prosperity, and your own personal interest, are one.



And you can't successfully induce others to buy Victory Bonds unless you yourself own a big block.

Canada has a big block of Victory Bonds on hand.

And they must be sold!

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada.

52-P

# WHEN GRANDFATHER FIRST READ BY THE KEROSENE LAMP

ONE evening in 1826, Grandfather removed the candlestick and waxed taper from the table and lighted a new "contraption" which he called a kerosene lamp. But it was not until nearly thirty years later that mineral oil lamps, improved and perfected, began generally to displace the wax tapers and the lamps which produced light from animal oils.

Two years before the first kerosene lamp was lighted, nearly forty years before the discovery of petroleum in America, the workers at Plymouth began making rope — rope so good that when the demand came for drilling cables to open up the vast stores of petroleum beneath the earth's surface, Plymouth was ready, and for sixty years Plymouth Drilling Cables have played a very important part in the production of petroleum.

For every rope and cable use Plymouth delivers full value and more.

# Sterling Spark Plugs

## Where Sterlings Were Developed

It was for marine engine use that Sterling Spark Plugs were originally built.

The Lockwood-Ash Motor Company, manufacturers of Sterling Spark Plugs, is one of the oldest American manufacturers of marine engines, and Sterling Spark Plugs were developed to meet the trying conditions of marine engine service.

The fact that Sterling Plugs have measured up to the severest demands of marine engine use is ample assurance that they will meet the severest conditions in **all** internal combustion engines.

In automobiles, trucks, tractors, motorcycles, aeroplanes—wherever constant service is needed—Sterlings will perform that service best.

**Kept in stock by progressive garages and supply dealers.**

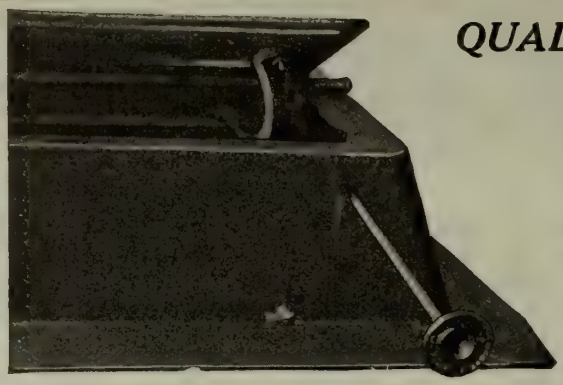
# THE ONLY FAIR TEST

The only fair test of Hack Saw Blades is the test of continuous use under local conditions.

Testing on high speed steel, blades that you will use to cut machine steel gives a misleading result. Testing only one or a dozen blades gives little indication of what a brand will average. Testing in hand frames of blades to be used in machines will teach you nothing.



Goodell-Pratt Hack Saw Blades are not made with the idea of excelling in freak tests but are made to stand the test of continuous use day in and day out under average shop conditions.

Try them for a reasonable length of time and we know that you will find them satisfactory.

# Announcing—

WILLIAMS' "Vulcan" Forged-Cutter Tool Holders give unequaled service to those who prefer the solid, forged-type of cutting tool. Each Holder, by the mere insertion of small High Speed Forged-Cutters, is adapted to the heaviest service on Lathe, Planer, etc.

The economy and convenience of this line, when installed as standard shop equipment, is at once apparent, as all blacksmith work, to say nothing of the very considerable investment necessitated by heavy, solid forged-tools of costly High Speed Steel, is eliminated.

Absolutely simple in construction, yet possessing all the advantages of the solid tool without its expense.

Cutters, drop-forged from the finest grade of High Speed Steel, in stock in a great variety of sizes and types, finished and hardened ready for use.

# Helping You Sell MORE

Your sales of Stanley Storm Sash Hardware will be increased by our advertising this fall in the leading national magazines and farm papers.

If, when you show customers the storm sash hardware you carry, you are able to say it is Stanley's, they will remember having read about it somewhere. They will accept it with the feeling that you are giving them the best of its kind. No matter what it is you sell a customer the important thing is that they leave your store with this feeling about the goods you carry.

This is why our advertising will not only help you sell more Stanley Storm Sash Hardware, but it will also help your sales in other lines, and this is the reason why you should stock up at once in anticipation of this advertising.

# Says Auto Accessories Easy Sellers

## "I Would Like to Devote My Whole Time to Them," Says George Mathewson, of Toronto—Ideas on Window Display That "Pull" Business—Builders' Hardware and Tool Departments Big Business-Getters

Based on an interview by J. H. COLE, of Hardware and Metal, with George Mathewson, of Toronto, Ont.

GEORGE MATHEWSON, hardware merchant, of 734 Queen St. E., Toronto, is enthusiastic over the results he has obtained in the sale of auto accessories. He frankly admits that he is surprised at the results he has obtained.

It might be well to mention here that Mr. Mathewson and his two sons made numerous enquiries regarding the advisability of hardware merchants handling automobile accessories profitably, and after assuring themselves that this was a coming hardware line, put in a small stock last winter in order to be ready for spring business. What was their surprise when accessories immediately started selling in proportion to any staple line in the store, with the result that they now have a prominent department to themselves, as illustrated.

### The Display Board

The display board in the accessory department is worthy of special notice. It is portable and consists of a panel held erect by two cross pieces attached to the legs. It is made of soft wood, and samples are readily changed from time to time. Note how all goods sampled are plainly marked with prominent price tags showing name of article, number and price.

"I always try to keep a stock of the goods that an ordinary person who has not studied engineering can adjust or

*While there is a fine showing of goods in this window and a great number of lines there is no suggestion of overcrowding. Overcrowding is a thing to avoid in window dressing George Wathewson says. Note the attractive grouping in the centre, the price cards prominently and attractively placed, the simple yet effective background and the use made of the space at the side, also the effective use made of helps supplied by manufacturers.*

attach themselves," said Mr. Mathewson. "When a new article is asked for more than once within a reasonable time I try it out in small quantities at first, and if it turns out to be a good seller, buy it in quantities, and in this way avoid a lot of dead stock.

"I do not find tires such an especially good line to handle as I expected, probably on account of not having the proper facilities for handling. For instance, vulcanizing plants are able to give better service and can often save a tire that would otherwise be discarded, where if we had sold that same customer a tire and he found out afterwards that he could have had the old one repaired he would always think that we took an advantage of his ignorance of tires. So you see we are not going after the business so strong, although we stock a few in order to keep our lines complete.

### Is Most Satisfactory

"But the rest of the accessory lines pay. I would just like to devote my whole time to selling accessories. I think it one of the most satisfactory lines a hardware man can handle. For one thing it is an easy seller. A car owner comes in for a small article and it is the simplest matter to sell him other things such as mirrors, tire gauges, wrenches, polishes, in fact he is a prospect for anything that will improve his car. It is also a good cash business as very few car owners ever ask for credit. We always give the garage man a discount to enable him to make a small profit, and it is surprising how our business in increasing in this line."

### A "Selling" Window

The window pictured is a sample of the "selling" kind. A few of the features pointed out to HARDWARE AND METAL were automobile owners. Drivers and truck drivers continually passing the store are drawn by the splendid background, which may easily be distinguished from their cars, or even from the opposite side of the street. People riding past in the street cars may also distinctly see this. Numerous garage men in the district, noting perhaps just the tool they need, come in and purchase, and are so pleased to find that they can purchase supplies so near their own place of business. They might still be going elsewhere but for the fact that they were drawn by the display.

### Don't Overcrowd Windows

Speaking of window displays, Mr. Mathewson certainly knows how to put the "pull" into window dressing. His idea of a good display is a full window, not overcrowded, with every article showing out distinctively if possible and always a price tag on everything. He has a splendid automobile accessory window running at present which carries out this plan, as may be seen by the accompanying illustration. Notice the background which is in panels, each panel showing a different line. Note also the automobile tires and also the tire chains, then the floor of the window with the higher articles at the back and then one of the most important features, the price tags, which clearly give the price of every thing. This, from the consumer's standpoint, is really the part of any transaction that most concerns him or her, as the case may be.

### Some Are Too Neat

It has been remarked by professionals in the art of window dressing that it is possible to make a window display too neat, especially if the color scheme is too much in harmony with the general surroundings, and the goods themselves are placed with too much thought for neatness, rather than to stand out boldly and command attention of passersby, in other words, to answer the purpose for which they are intended. They must have what is commonly called "pull," originality, or drawing power. On the other hand some windows only attract atttention, and often draw such remarks from observers as: "Isn't it nice? etc.,' but do not suggest or create any desire for the beholder to come in and buy any of the articles shown.

### Went After Business

Some years ago Mr. Mathewson decided he should get more of the builders hardware trade than he was then getting, and realizing the carpenters and builders had not the time to come to him, he went out to them. He secured their business, with the final outcome that he has two salesmen outside permanently, and they are kept busy all the time. The fact that it takes two large delivery trucks to follow up their orders with prompt delivery is significant of the business done.

"Builders are buying a much better quality of hardware this year and price does not seem as much of a feature as the procuring of the goods from the factory," said Mr. Mathewson. "I have found it very difficult to buy sufficient of the better class hardware, and in some cases have had to dismantle some of the display blocks. I might mention here that no matter what line we carry, or add to our stock in this department, we always attach it to a display board, and have proven so often that it more than pays, that it has now become a hard and fact rule of the store. To show how much we appreciate the value of displaying goods, both from the outside and in, just step in to our new builders' hardware sample room." The representative of HARDWARE AND METAL was shown one of the brightest and most up-to-date sample rooms to be found perhaps in the province. It was a one-storey addition to the rear of the store. The roof reminded one of a photographer's studio on account of the windows being all glass. This roof answered a dual purpose. First, on account of adjoining the office, which is situated at the back of the store it is necessary to have plenty of light, and secondly, as previously mentioned, the firm manufactures skylights. Here was the ideal opportunity to show a sample of the actual kind of work done by the firm as well as showing several of the styles and effects.

### Attractive Arrangement

There are also numerous double hung and casement windows opening in and out to show the special kind of hardware required for each. The glass in each window varies from plain window glass to the very finest of art leaded glass, which not only gives the room a very pleasing effect but also is used as a sample and allows the customer an opportunity of seeing the effect he would actually get by using any of the designs shown.

A show case has been built across the west end, which has a projecting ledge, allowing samples to be shown to customers, while underneath are drawers and doors giving access to samples. On the north side is a counter running from end to end. It also has drawers and doors containing samples. This counter is different to the regulation store counter, owing to the fact that it is built in close to the wall. It is also made of choice hardwood and very highly polished to match the show cases. At the east end is neatly displayed a complete furnace showing how it will actually look ready for action. There are also register faces, etc., in all making a very attractive as well as profitable way of showing builders' hardware.

### Like to Look Around

Mr. Mathewson remarked on the number of builders who go in and pick out their own hardware, often enough for four or five houses, with very little assistance from the clerks. In fact, he said, they seem to prefer to go in by themselves and handle the samples which are all marked, and form their own opinions of what to use. As there is no stock kept in this sample room there is no chance of it being mixed or disturbed.

The firm does a very large glass business, and has a separate glass house where two men are steadily employed. The firm often has as many as 1,000 sash at one time. Of course, the outside builders' hardware salesmen account for the majority of this business, with the aid of the firm's reputation, the firm having made a rule of keeping the sash at least three days after completed in order to give the putty a chance to stiffen. They state there is less loss and breakage if handled systematically, so they try to avoid rush orders as much as possible, and are thus able to keep their men all the year round.

### Shingle Trade Good

Asked by HARDWARE & METAL if he sold many asphalt shingles, Mr. Mathewson remarked that he already had sold three cars and the season is not over yet. He thinks the shingle business only in its infancy.

"We believe we have reason to be proud of our tool department also," he said. "We find it always an active source of revenue. Our outside builders' hardware salesmen solicit and are always procuring orders from the work-

*Note the display board in the centre of the picture and the attractive arrangement of articles and price cards, also the display table of accessories and the silent salesman filled with them. All these have been a big factor in helping George Mathewson increase his turnover. Note at the left of the picture the paint department, the display of brushes and the drawers in which electric light bulbs are kept, and how each drawer is plainly marked.*

men while they are on the job, perhaps waiting to interview the builder, and are often asked to deliver tools as they are not always able to get down to the store when they require them. Our displays of silverware and cutlery at this season of the year also create considerable comment. The goods have a fascination for most people, and we find this line excellent for drawing other trade, especially at this time of year.

### Cash Trade Over Counter

"Our counter trade is generally cash, but on account of having so many factory and builders' accounts, we find our charge business the larger. Of course, this class of business is practically cash as the buyers invariably pay every thirty days. In every letter we mail we insert an advertisement with our name on it, and when we mail our monthly accounts a blotter, which is a monthly series we had printed, is inserted. It is made just the right size for our envelopes, and every month the blotter has a different picture which runs in a series with the season of the year. We think this a good class of advertising as it is inexpensive and reaches personally the party for whom it is intended. We have reason to believe the majority of them are kept if for nothing else than the calendar which is printed on the face."

### Large Stock of Paint

Another feature of the store is the large stock of paint which is neatly arranged up at the very front. Mr. Mathewson thinks on account of this being such a well-advertised line by the makers that it should have a very prominent place in the store and finds the demand very good. He has especially noticed that customers were often reminded to purchase paint owing to its prominent display. Beneath the paint ledge is a mass of drawers filled with dry colors, all marked with big letters, and also the price.

A very handy arrangement is a battery of five oil pumps just at the end of the paint shelves. Mr. Mathewson stated an up-to-date hardware merchant can not afford to be without them nowadays, when oil is so expensive, as they cut down the waste, which is a big item, and are a great saving of the clerk's time, besides saving space and the trouble of handling barrels, measures, funnels, etc.

"In fact," he said, "I don't see how we could get along without them now."

### Display of Brushes

On the counter in front of the paint is a brush display—a sample of all brushes carried in stock attached to a board covered with green baize. This is tilted at an angle so that every brush may be seen. In the centre is a sign reading: "A brush for every use."

We always try to find out exactly what our customer requires to paint," said Mr. Mathewson. "In selling brushes we have studied this line, so as to be able to intelligently direct the proper brush for the work required. Our customers appreciate this service, and come to us for advice, in fact, we have quite a paint and brush information bureau.

"A great many people cannot distinguish between the different kinds of paint and often ask for the wrong kind for the work they are planning. They are showing their appreciation of our advice by their continued patronage in this as well as other lines. As to handling putty, we have practically eliminated selling putty in bulk, as we found we wasted about twenty-five per cent. and lost considerable time. Besides, we found it disagreeable stuff to handle, during a rush especially.

We still buy in bulk, but put it up in tins ourselves and have a label advertising glass, paints, oils and turps., etc., with our own name appearing conspicuously. We think the advertising alone worth the whole expense of putting it

# Good Showcard Writing Takes Time

## To Get Theory and Practice Student Must Go Over Each Step Thoroughly

By R. T. D. EDWARDS

IN THE daily papers there appear at times advertisements soliciting show-card students. Great possibilities are pictured as to the incomes to be derived by show-card writers, and it is also pointed out that big money can be made while learning, absurd sums being mentioned—absurdly high even for the best in the business. Of course such advertisements are but bait held out to attract correspondence which gives even more glowing accounts of the possibilities of show-card writing. These results, though, it must regretfully be stated, are only obtainable through their "teach 'em quick methods." At least this is what they claim.

The absurdity of these advertisements is so apparent that it is to be wondered at that so many are taken in by them. In the first place these courses are supposed to put the student through from start to finish in a few weeks. But who

ever heard of a man being taught in a few weeks what it has taken others years to accomplish?

### Where are the Positions?

In the second place, where are the positions for exclusive card-writers to fill? They are not to be had. If all the students taken on were to become card-writers the market would soon be so deluged with "free lancers" that few would make even an existence at it. These remarks, be it remembered, are aimed only at those who have these "get-rich-quick" ideas, not at the correspondence schools that are running straightforward business propositions.

It is true that some people learn things more quickly than do others, but generally speaking, one must take a reasonable length of time to learn each step in card-writing to get the theory and the practice, the latter being the main essential to give the writer speed and fluency in the work.

So, rather than take those so-called quick courses, let the student find out the proper kind of brushes and get a set of three red sable writers, Nos. 5, 6 and 7, and if he cannot get some good man to give him a few pointers, let him observe the work of an accomplished man. He can learn a great deal by this observation. Then it remains for him to practise and keep on practising. He can get all the show-card colors he needs at stationery or art supply stores.

**SEASONABLE PHRASES**

**Chase the Chills With One of Our Heaters.**

**Good Cutlery is Difficult to Obtain But We Have an Exceptionally Fine Assortment.**

**Our Auto Finish Will Make Your Car Look Like a New One.**

**One of Our Electric Washers Will Pay For Itself in a Short Time.**

**Buy Your Christmas Presents Early—Our Cut Glass Display Will Help You Make a Selection.**

**Electrical Gifts Are Always Appreciated.**

The person who can put his work into actual use is the one who will advance the quickest in the work. For instance, if the student is a salesman he can obtain practice by doing the small price cards of the store, gradually working into the larger work. If he is a window-trimmer or an advertiser, the opportunities are right with him. Stick to plain work at first and employ the use of bright colors very sparingly, Mr. Student.

A word here as to brushes might be quite timely. All during the war good brushes were more or less scarce owing to the unsettled conditions of the European market, but now the question is even more difficult. France makes the best cardwriters' red sable writers, and only a fraction of the former shipments are coming through, so when the student is able to get good brushes it is advisable to keep them in good shape. Well-cared-for brushes will last the card-writer who has not a great amount of work to do, for years. There are three points which should be observed in the care of brushes.

First, don't allow the color to dry in the brush while still on the pallet. If this ever does occur, make sure that it is thoroughly softened before trying to remove it.

Second, always wash the brushes thoroughly in plenty of clean water, making sure to remove all the color.

Third, never allow brushes to stand in a pot of color or vessel of water for any length of time. This ruins the points quicker than anything else.

### Get Ready for Christmas

We are now well into the Fall season and the Christmas trade is not far off, so you who have Christmas cards to prepare should be getting out decorative designs for the show cards.

Many things can be done. Get the various Xmas ideas together, work up various suitable designs for the different sizes of cards to be used, and make lay-out stencils in advance. Prepare various Xmas colors, too, such as greens, reds, gold, etc. Gold plays an important part in the decorating and should be ready and mixed at all times. It can be bought ready mixed, but can be mixed if desired in the following way:

Get the finest ground powder possible. Mix in a small open dish such as a sponge glass. To a teaspoonful of dry gold put about three or four teaspoonfuls of wood alcohol. Mix thoroughly, then add plenty of size and mix thoroughly again. Add water to the right consistency. Gold will never stay mixed, and more size will have to be added as the gold is used.

Use plenty of water with it and mix just before using.

### HERE'S A CHANCE FOR BUSINESS

A correspondent writing to HARDWARE AND METAL from Turtleford, Saskatchewan, says:

"There is no proper hardware store in Turtleford, but all the four general stores carry hardware lines and do large and important business. Carloads of wire, nails, and tools of all sorts are sold to dwellers in the far and fertile North, while the wives of farmers and ranchers find always a good assortment of wares to meet their ever-increasing demand. Builders' hardware is demanded quite briskly in this busy and growing town, and especially at times like the present when large and important public buildings are erected. The Canadian Bank of Commerce is erecting a building in Turtleford estimated to cost from $14,000 to $15,000. Galvanized water tanks are one of the hardware items in great demand here as water is hauled to each family from a spring out of town. The well water is alkaline.

*The arrow points to the razor display case that is referred to in the story. It will be noticed that as a general principle of good business, Mr. Heaman believes in keeping his stock out where people can see it. Although the photograph does not show it, the stock is kept in spotless condition and seasonable lines are always to the fore.*

# Razors Sell Soap, Brushes, Strops

## Display Case Up at the Front of Store Increases Turnover Many Times, Says W. J. Heaman, of Exeter, Ont.—Finds Sales of Auto and Tractor Accessories and Supplies Steadily Growing

Based on an interview by C. E. PARSONS, of Hardware and Metal, with W. J. Heaman of Exeter, Ont.

MAKING razors sell soaps, shaving brushes, strops, hones and blades is the plan that W. J. Heaman of Exeter, Ont., is working with much success. A medium sized show case, kept right up near the front of the store, and filled with an attractive array of shaving necessities has built up the business Mr. Heaman now enjoys in these lines, and has multiplied sales many times over.

"The idea is simple enough," said Mr. Heaman to HARDWARE AND METAL, "and it produces big results. We keep a good stock of good razors right up where all the men can see them. We aim not only to sell razors, but everything else that the man will need with it. Every time a razor is sold we ask about a shaving brush, soap, strop, hone, and in case of safety razors, about blades. The men are interested, and we have found that they would just as soon, in fact sooner, buy their soap from us than from a drug-store. It brings them back too, not only for more soap and blades or brushes, but for other lines of goods. Our experience is that the war has helped the razor business immensely. There was a fine representation of boys overseas from this town and the country around and they got into the habit of shaving themselves while in the army and will keep it up."

### Keep Goods Displayed

As may be seen from the accompanying illustration, Mr. Heaman does not believe in keeping his stock hidden away down cellar, or in drawers or under the counter.

The first thing that strikes you when you enter the store is that he has a good stock and that you would be likely to get anything there you might want in the hardware or plumbing goods line.

"We try to keep our stock out where it can be seen," said Mr. Heaman. "That is the best plan I know of to keep it moving. We keep it changed around a good deal, and always aim to keep seasonable lines up to the front. We use display stands and display tables and find that they are a great help in increasing turnovers."

### Windows Good Ads

Mr. Heaman says his two windows are perhaps the best ad. he has, and he believes thoroughly in advertising. The windows are changed regularly every week and are backed up by timely advertising in the local paper. Mr. Heaman always uses a double column space on the front page in the lower left hand corner.

"We think it is good business to keep the same position each week the year round," said Mr. Heaman. "People learn to look right in that spot for our announcements. We do not always use the same space. At special seasons we use two or three times as much space as at others, but we aim always to have a seasonable message that will tell about our stock and our store to the people of the whole district."

### Brings in Business

The town of Exeter has a population of 1,600 and is in one of the very finest mixed farming sections in Ontario. Mr. Heaman does an excellent business with the farmers, not only in hardware goods, but in plumbing also.

"There are no better customers than the farmers," he said. "They are good buyers. They have the money and they do not mind paying fair prices for good goods. That is one thing they insist on. They want something for their money. It is never a question of price, but of quality."

Mr. Heaman says he gets good results from his newspaper ads. They are no sooner in circulation than business starts to come. Some of it comes in

from the town direct. More comes in from the country over the rural telephone lines, and the general total is swelled by the visits of farmers who motor into town.

### 50 Per Cent. Own Cars

"The advent of the auto has made a wonderful change in the rural business," said Mr. Heaman. "Fifty per cent. of the farmers in this county own their own autos now and think nothing of coming in twenty or twenty-five miles. It would surprise you to see the automobiles ere on Saturday nights. In the two short blocks in the vicinity of the store I have counted no less than ninety cars. There were many more in other parts of the town. That means a lot of business of course."

Mr. Heaman has two Bowser pumps to supply gasoline to auto owners. He also sells spark plugs, automobile oils, accessories and oil for tractors.

"There are at least twenty tractors in this section now," he said. "No doubt the number will greatly increase. We find our sales of oils and accessories for both autos and tractors mounting steadily."

### Paint Sales Good

Paint business this season, he says, has been perhaps the best on record. As may be seen from the illustration, the paint department is right up at the front of the store on the left, and makes an attractive showing.

"Our paint sales indicate perhaps better than anything else just how good a class of farmers are in this territory," said Mr. Heaman. "They take good care not only of their buildings and their homes, both interior and exterior, but of their implements, their automobiles and everything that needs painting. We find that they appreciate all the tips we can give them as to how they can get the best results, and we always try to find out what is to be done, and then tell them the best way to prepare the work, the best brushes to use and so on. When they find out that they can rely on us for service of this kind they keep coming back every time they have a painting job. We find that the women are doing a great deal more painting than they used to and are interested in all sorts of small jobs about the house, fixing up furniture, etc."

### Go Well Together

In his district Mr. Heaman finds that hardware and plumbing go well together. The farmers, he says, are continually improving their homes and there is a steady call for water systems, bathroom equipment, bathroom fixtures and other lines. As may be seen, Mr. Heaman keeps one of his windows filled with plumbing goods. The outfit in the illustration had been sold to a farmer many miles out in the country, and was put in the window. It was a good ad. for the firm as it not only made a nice display, but it started all the farmers in the district talking about what a lot of improvements ———— was making at his home.

The plumbing department in the Heaman store is kept busy all the year round, as in addition to installations, there is a lot of repair work.

### Puts in New Goods

"If we find that a part which we are called on to repair is so far gone that it will need fixing in a short time," said Mr. Heaman, "we always recommend a new one. People appreciate this when they understand that it is perhaps impossible to make a permanent repair and they can get a new part for little more than the repair would cost, and years of satisfaction."

In addition to improving their homes, Mr. Heaman says, the farmers are keen for labor-saving devices. In connection with this he points out that his sales of washing machines run from 35 to 40 each year. Some of these machines are hand-power, others water-power, and many are driven by gasoline engines or electricity.

### Stove Trade Active

Stove business has been good. In handling this business, Mr. Heaman says, a window display and a nice store display are a big help in boosting sales. His stock is kept in perfect condition and at all times is available for close inspection. Women, he says, like to come in and investigate the various stoves and find out how they work, and whether they are economical on fuel or not. One thing the majority insist on is a nice-looking stove with plenty of nickelling. As in other lines, price is not the consideration. Mr. Heaman says that most people realize fully that they are not buying a stove every day and that a dollar or two is neither here nor there if they are going to get years of satisfaction and service. Very often a trade is arranged by which he takes an old stove and so much money for a new one.

"This is good business," said Mr. Heaman, "as we can fix the old one up and often make just as much profit on it as on a new one, and we never have any trouble selling them."

Continued from page 54

*"Our windows are one of the very best advertisements our store has," says Mr. Heaman. As may be seen from the illustration, he keeps them attractively dressed and the displays are changed regularly. Note the little shelf displays of aluminumware and tinware at the left. These make a great hit with the farmers' wives.*

# Buying in Home Town is Economy

By E. M. TROWERN, Secretary, Dominion Executive Council, the Retail Merchants' Association of Canada, Ottawa

IF a city or town is good enough to live in, and good enough to take a salary from, it should be good enough to buy in. If the teachers, the preachers, the professors, the firemen, the policemen and the civic servants want increased salaries, the most direct route to bring about that desired end is to keep the money circulating in the home town. If all the money in Canada ever got into the hands of one or two men, business in general would stagnate. The proper and healthy condition is to have money circulated so that everyone will, through his or her industry, get some of it.

The first expectation of a producer is to be able to sell his crop after it has been grown. To sell it he must have customers, with money, who are able to buy it. The further the producer is away from the consumer the more the transportation costs. Farms near thriving towns and cities are more valuable than those which are isolated in the backwoods. The best way to make backwoods farms valuable is to buy in the cities and towns near them.

### Co-operation Counts

Prosperous cities and towns are built up through proper co-operation between retail merchants and their customers. They must work together. The customer requires the retail merchant, and the retail merchant requires the customer. If customers send all their money away to mail order houses for staple goods and expect the corner store to live on the sale of lamp chimneys, eggs and coal oil they will awaken some day to find the little store closed. Goods when you want them and where you want them are worth more than goods thousands of miles away. Ten cents' worth of toothache gum in the corner drug store in the home town is worth more to a suffering child with an aching tooth than ten tons of the same article in Hong Kong, China.

### A Double Mission

Retail merchants endeavor to locate in places where they are required. They have a double mission to perform; they buy goods to suit their customers and they expect to make a living by selling and caring for them. The better service a retail merchant gives his customers the better business he should receive in return. The service should be mutual and the customer should be equally anxious to see that the retail stores in his city or town succeed.

The statement that by buying through mail order houses you are saving the middleman's profit on all you buy is only a glaring deception, to say nothing whatever about the question of lack of loyalty to your home town. Let us follow the process and see if less labor is required. A person living in a town, and whose position depends upon the prosperity of the town, receives a catalogue. In order that the said catalogue should reach the person the following process must take place:—

1. The catalogue is designed.
2. Printed.
3. Cuts made.
4. Delivered to the mail order house office.
5. Addresses secured.
6. Catalogue wrapped up and addressed.
7. Stamped.
8. Placed in the mail bag.
9. Mail bag taken to the station.
10. Carried on the train.
11. Taken off the train.
12. Taken to the Post Office.
13. Delivered to the customer in the town.
14. The customer spends time reading it over and selects an article.
15. Writes a letter.
16. Secures Post Office Order, or encloses the cash and takes the risk.
17. The postmaster enters it up and puts it in the mail bag.
18. The mail driver takes it to the station.
19. Mail clerk in charge of the train delivers it at the other end.
20. Post Office delivery wagon clerk delivers it to the Post Office.
21. Postal clerk checks it and sorts it ready for the postman.
22. Postman delivers it to the mail order house.
23. Mail order house clerk opens the letter.
24. The bookkeeper credits the cash.
25. The order clerk selects the order.
26. Stenographer acknowledges the receipt.
27. The shipping clerk mails away the order.
28. The postal clerk sorts it out for the mail delivery.
29. Places it on the train.
30. Mail clerk takes it off the train.
31. Delivers it to the local Post Office.
32. The underpaid postmaster delivers it either direct to the customer or gives it to the rural mail delivery service that is costing Canada a large sum of money to mostly benefit mail order houses.
33. The customer receives the article, and after a careful examination, finds that he or she could have bought a better article in the home town and have had the good will of the retail merchant, and helped to build up the home town by keeping the cash in local circulation.

### No Economy

No sane person could say that there is any economy in that system of doing business, especially when fourteen transactions out of the thirty-three are made by the Government mail order service at less than cost price, thus benefiting the mail order house proprietors at the expense of the whole people of Canada.

True economy and sound patriotism, therefore, call upon every loyal citizen of Canada to patronize his home town and keep the wheels of commerce moving in the direction in which most persons can be mutually benefited.

# Canadian Supplies of Soft Coal Sufficient for Immediate Needs

## Those Who Have no Stocks on Hand Are Likely to Find Considerable Difficulty in Getting Supplies—Many Manufacturers Have Enough to Last for Some Time

TIMELY warning to all users of bituminous coal to secure their winter supplies as soon as possible is given by S. B. Brown, assistant manager of the Transportation Department of the Canadian Manufacturers' Association. Information, or the lack of it, reaching this department of the C.M.A. leads Mr. Brown to the conclusion that manufacturers throughout Ontario are either well supplied with the necessary coal for the winter, or they have such supply on the way to their bins. No requests are reaching him for assistance in getting coal with which to keep the wheels of industry revolving during the winter months.

### Two Reasons For This

The reason for this is, according to Mr. Brown, two-fold. Up until November 11, Armistice Day, of last year munition plants were running at full blast. Manufacturers had secured sufficient supplies to last them through the winter and well on into the summer. With the signing of the armistice, munition contracts ceased and plants were closed down, with the result that large quantities of coal were still on hand. Added to this is the second cause—frequent strikes. The mild winter was also a contributory factor in the conservation of coal.

### Manufacturers Warned

A warning was issued to manufacturers by the C.M.A. recently to look after their coal supplies; and Mr. Brown believes that this warning was heeded because no representations have been made to the C.M.A. of any shortage that might paralyze industry. To confirm this view, the Gas Company has issued a statement that it is not worrying over the situation so far as this winter is concerned.

Mr. Brown states, however, that it is difficult because of lack of information in their offices to say just what the situation is: and he advises that users of coal should waste no time in assuring themselves of a winter supply. The strike in the United States, despite the action taken by President Wilson and Secretary Baker to insure the necessary output, may also adversely affect the situation in Canada, particularly in the Eastern part of the Dominion, which is almost entirely dependent upon United States coal fields for its supply.

### Comparative Figures

Comparative figures giving the importations of bituminous coal in Ontario, excepting at Fort William and Port Arthur, seem to confirm the view that users of this coal are as well supplied as they were in the last comparatively normal years since the outbreak of the war. Between April 1st and August 31st, 1916, customs returns show that the importations were, in round figures, 3,500,000 tons. In the same period of 1919, there were 3,300,000 tons. In the similar period of 1917, there were 4,850,000 tons; and in 1918, 5,350,000 tons. The large importations of 1918, with the sudden termination of the war and the closing up of many industrial plants, would lead to the conclusion that large quantities were on hand early this fall. The statement issued by the Deputy Fuel Administrator for Ontario, Mr. H. A. Harrington, showing a decrease in importations during a certain period of this year as compared with last year goes to prove the difference between a normal and an abnormal year, due to war requirements.

"Warning should be given to everybody to see that they have enough coal for the winter," said Mr. Brown to HARDWARE AND METAL, "and if they have not, they should get it, for with the strike in the United States, it will be difficult to get; and if there is a hard winter and the railways are tied up, it will be still more difficult."

# Says Canadian Firms Are Taking Active Interest in Export Trade

DURING my official visits to various parts of Ontario, I have found an active interest in export trade on the part of Canadian manufacturers. Among the markets to which attention is being given by them, are Australia, New Zealand, South Africa, and the United Kingdom. The visits to this country of the Canadian Trade Commissioners from some of these and other markets at the present time appears to be very opportune."

This statement was made in an interview with a representative of HARDWARE AND METAL by Fred W. Field, British Trade Commissioner, Toronto.

### Exports Expanding

Asked as to business conditions in the United Kingdom, Mr. Field said they were improving and the volume of exports expanding. "In the course of our work in Canada," he added, "it is found that in many lines, United Kingdom manufacturers are able to quote prices which compare favorably with their foreign competitors. In many instances, also, they are in a position to quote satisfactory delivery. In other cases, deliveries are slower, and in further instances, somewhat remote, sometimes on account of the heavy demand for certain lines, from all parts of the world.

### Many Difficulties

"The United Kingdom manufacturer has had to contend with a great many difficulties which have not faced other countries. This is largely because of the tremendous war burden carried for over four years. It is not an easy task to transform the war machine into the industrial machine for peace time markets. British manufacturers, however, propose to make a strong bid for their pre-war markets and with their reputation for splendid quality of goods and honest dealing, a substantial share of the business offering undoubtedly will be obtained by them.

### All Over the World

"There is sometimes a tendency here to state that the products of the United Kingdom are at present quoted at high prices, but upon examination we find that prices have risen all over the world, partly due to the diversion of capital and labor to non-productive ends, to an increase in currency and a decrease in the rate at which money has been turned over, to increased wages and reduction of hours, to a lack of improvements in processes, etc., because of the war effort, and to increased taxation. I find that in many lines the prices asked in the United States are as high as in the United Kingdom.

### Strongly in Evidence

"The faith of the Canadian buyer in the products of his own country and in those of Great Britain and of the British Empire is strongly in evidence. The buyers for the large stores, the purchasing agents of various plants, and others are resuming their purchasing trips to the Old Country, being anxious again to obtain the British lines which are famous the world over, such as Sheffield cutlery, for example.

"The growing tendency in Canada is to purchase requirements whenever possible in the British Empire. Under this policy the Empire's commercial strength and prosperity will increase materially. As each section of the Empire learns of what the other sections have to offer in raw materials, semi-manufactured and manufactured goods, this inter-Empire trade will grow to large proportions. The Trade Commissioner Service of the Department of Overseas Trade (Development and Intelligence) of the British Government is one of many practical steps being taken to obtain for the units of the British Empire the primary benefits of that empire's vast natural resources and trade intercourse. There are three British Trade Commissioners in Canada. The reception given to our work has been splendid and every possible assistance has been received."

# Prices of Sheets May Not be Lower for Two Years

## This Opinion is Held by Men in the Trade in the United States, Says A. T. Enlow, After Attending Meeting in New York

A. T. ENLOW, president of the Dominion Sheet Metal Company, Hamilton, Ont., who has just returned after attending the annual meeting of the American Iron and Steel Institute in New York, stated to HARDWARE AND METAL that the general belief among the men in the trade is that prices of sheets will not be lower for at least two years.

"We have lost through this strike," said Mr. Enlow, in referring to the steel strike in the United States., "at least 2,000 tons of material which would have been shipped had it not been for the strike. Notwithstanding all, our idea has been to keep prices down, except to that point where cost overtakes the selling price. We are opposed to higher prices for sheets. Rather help the consumer than the Government, because, in the end, the consumer is the Government and we avoid the loss of handling."

### Increasing Capacity

"We are preparing to add to our equipment sufficiently to enable us to produce 50 per cent. more than we have in the past. In other words, our capacity will be about 20,000 tons of galvanized sheets per year from the first of January. We are also building a new warehouse, which, when completed, will enable us to carry in stock not less than 2,000 tons for immediate shipment," said Mr. Enlow.

While temporarily inconvenienced by the steel strike in the United States to the extent that their plant is only running at about one-half its normal capacity, the Dominion Sheet Metal Company is planning for bigger business for the future.

He says that this country is not producing enough galvanized sheets for the trade, the result being that large quantities have to be imported. The present situation is aggravated by the strike in the United States; supplies of raw material are cut off, and they are picking over their stock for black sheets and even getting some from the jobbers.

### At Old Prices

"We have, naturally, and the jobbers naturally, have a lot of stuff contracted for at old prices, but most of this is sold so that on any old business, no matter how long delayed, the price will be the old price. This will have a tendency to keep the prices down; but to anyone who must have quick delivery and where it is possible to accommodate them, the higher prices must prevail," said Mr. Enlow.

It is not the intention of the Dominion Sheet Metal Company, however, to launch higher prices for their manufactured article. Mr. Enlow shies clear of the word "profiteering" at a time when it is in everybody's mouth. While conditions may more or less warrant an increase in price, the aim of this company is to keep the prices normal and reasonable.

### A Reasonable Basis

"Our tendency is to hold prices down to a reasonable basis," said Mr. Enlow, "for if sheet metal is to continue to hold its place on the market, it must be able to compete with similar articles." Though Mr. Enlow does not anticipate any immediate increase in prices, he does not see any reduction for some time, at all events.

## RAZORS SELL SOAP, ETC.

Continued on page 57

### Cutlery Sales Good

The illustration shows the location of the cutlery department right up at the front of the store. Sales in this line are good, Mr. Heaman says, and one of the big troubles for some time past has been to get the goods he wants.

"It makes a nice display," he said. "By keeping it where we do, people see it and ask for it."

In connection with his business policy Mr. Heaman says he is working as nearly as possible toward a cash basis.

He believes in allying himself with public affairs and is closely connected with local activities. During the war he recruited "C" company of the 161st Huron Battalion, and took it overseas. Major Heaman is still suffering from the effects of injuries he sustained when his billet was blown down.

### Sees Good Business

He is optimistic regarding the future of the hardware business in his district and says he is looking for a splendid trade. One of his fast selling lines is tinware and enamelware. These are kept displayed well up to the front and the stock is turned from three to five times a year. Proper display, he says, keeps these goods moving all the time, and he has to order new stock of one or another every month.

## CARGOES FOR NORWAY AND DENMARK

Circular No. 219 issued by the Canadian Manufacturers' Association regarding steamship service from Canadian Atlantic ports to Scandinavian ports, says:

"The Canadian Pacific Ocean Services, Limited, announce that the steamship "Drammensfjord" will dock at Montreal between the 8th and 10th of November, to load shipments for Bergen, Stavanger and Christiania, Norway, and will also call at Copenhagen if sufficient cargo offers.

"Members having any cargo for these ports should get in touch either with Mr. J. R. Clancy, General Agent, Freight Department, C.P.R. Building, Toronto, or Mr. A. W. Snell, acting European Freight Agent, Board of Trade Building, Montreal.

"Both these gentlemen are connected with the Canadian Pacific Ocean Services, Limited."

# Gasoline Pumps to Be Permitted on Sidewalks

An interesting point in connection with the sale of gasoline in Toronto was decided when the Works Committee of the City Council declared itself in favor of permitting the sale of gasoline from approved pumps located on the public streets.

A recent order of the committee demanded the removal of all overhead and unauthorized supply pipes.

A delegation composed of garage owners objected strongly to the order. The committee decided that the policy of permitting the sale of gasoline from pumps located on the streets or boulevards be approved subject to the applicant's installing pumps of an approved type on locations satisfactory to the Works Commissioner, and entering into an agreement indemnifying the city from all liability arising from loss or damage claims, and to pay a rental for the privilege granted.

"We must realize," was Controller Maguire's contention, "that the motor and the motorist have come to stay, and that to force cars to go into garages for their gasoline and then back out again across the sidewalk creates a greater nuisance than the pump or standard on the curb."

## MUST NET FAIR RETURN

Allowing the companies four months in which to make new contracts in harmony with its order, the United States Federal Trade Commission has ordered three gasoline distributing concerns to cease and desist from leasing gasoline pumps and tanks to retail dealers at rentals which will not yield them a reasonable return on their investment, or to enter into agreements with dealers providing that they shall not dispense from tanks and pumps so leased gasoline of competing companies. The concerns are: Iowa Oil Company, Dubuque, Ia.; C. L. Smith Oil & Gasoline Co., St. Louis, and Sinclair Refining Company, Chicago.

Each company also was directed to file with the commission, twenty days after expiration of the four months' period, a statement explaining the changes in contract it had effected with its dealers.

# EDITORIAL COMMENT

THE trouble these days seems not so much with labor as with idleness.

* * *

THE indemnityites at Ottawa, regardless of party, now have something to think about.

* * *

ONLY seven weeks until Christmas. Are you ready for the big trade that is going to offer this year?

* * *

IT IS some satisfaction though that one doesn't have to dodge much just now to escape being hit by falling prices.

* * *

THE average citizen is beginning to feel as if it does not make much difference whether capital or labor is on top, as he is in between anyhow.

* * *

ANYTHING that is desirable is advertisable and the way to sell more is to tell the people about it and that they can get it at your store.

* * *

SLOW moving lines will often eat into the profits of half a dozen fast sellers and a dead department in what is otherwise a live store means waste in distribution and increased costs.

* * *

NEWSPAPER advertising for the retailer brings greater returns because you can talk to more people in less time and at a more resonable cost through the newspaper than in any other way.

---

### *CANADA'S EXPORT TRADE*

CANADA has taken her place as one of the world's trading nations and a rich source of supply for those in need of commodities. Inquiries in thousands are being brought to this country from all quarters of the globe by every incoming ocean liner and the outgoing boats are laden with Canadian products. The export trade figures are very gratifying. It might have reasonably been expected that when the demand for munitions ceased that business in general would quiet, for a time at least. Exactly the opposite happened. Canadian firms, which a year ago at this time, were working night and day on war orders, hardly had time to make the necessary changes in their plants before the orders began to pour in. They have been coming in steadily increasing volume ever since, and the great trouble of many firms has been to get enough workers to keep pace with their business. Canada is fortunate in having immense natural resources and the development of these is proceeding at a very rapid rate. The output of minerals this year will make new records and the output of manufactured products will be a banner one. A gratifying feature of the export business is the number of repeat orders being received, showing that Canadian goods are fully living up to the reputation they have won. This is as it should be and is a sound foundation upon which to build for the future. In spite of rapid trade expansion, home development is not being neglected in any way and the general trade of the whole Dominion is keeping pace with the export business. Canada is doing things in a big way and no country in the world has brighter prospects for the future.

---

### *THE AUTOMOBILE BUSINESS*

ON another page of this issue of HARDWARE & METAL will be found the statement of a hardware merchant in a town of 1,500, who states, that on Saturday nights he has counted as many as ninety farmers' automobiles standing in the block in which his store is located. This is merely a common occurrence now in many country towns, but it shows the remarkable development that has occurred in the past ten years. What will the situation be in another ten years? Perhaps one of the surest ways of looking into the future in this matter is through the glasses of the automobile manufacturers. At conservative estimate, more than $50,000,000 is being expended at the present time in new plants for the manufacturing of autos and in additions to existing plants. This money is not being expended by men who are not thoroughly experienced in business and in trade conditions. It is being spent by men who are among the very keenest and far-sighted men in their respective lines of business in the world. They have not gone at the thing haphazard, but only after careful investigation and thought. The fact that many of them for some time past have been running from six months to a year behind with their orders, showed them that something had to be done. If they were not going to handle the business someone else would. The business was there and was there to stay and instead of going back is going to grow. These manufacturers, being shrewd business men, have gone ahead. There is a lesson in this for the hardware merchants. Many of them have been handling auto accessories and making handsome profits out of them. Others are just

feeling their way in the business. Still others are not yet in the trade at all. In many districts, fifty per cent. of the farmers own cars. It is a safe bet that the other fifty per cent. will own them just as quickly as they get the money and at the rate they are making money now it won't be very long. The automobile has proved its value and its right to a permanent place. That is why manufacturers cannot turn the cars out fast enough. Every car that is sold means the sale of accessories and this is a perfectly legitimate line for the hardware merchant. Someone is going to sell these things to the car owners in your community. Why not you?

## *THE COAL STRIKE*

ALL Canada is intimately concerned with the walkout of 500,000 miners of bituminous coal, which has been ordered for to-day. The miners have chosen this time for a walk-out well as there is a world-wide shortage of coal. Their demands involve a sixty per cent. wage increase and a reduction of working hours to thirty per week, that is a five-day week of six hours per day. On the face of it the demand seems most unreasonable and looks like a barefaced attempt at extortion. It remains to be seen whether the American Government will allow the nation to be held up by the miners or not, and the developments will be watched with the keenest interest all over Canada, as we are dependent upon American mines for the great part of our supplies. The coal strike will be far more of a menace to the country than the steel strike, because it not only affects industrial life, but the health and comfort of the people. If the demands should be granted, and there seems to be little possibility of this, prices of fuel will be so advanced that big increases will have to be made in a great number of products and public suffering from high cost of living will be further added to. This is inadvisable, especially at a time when business men the country over are doing their best in the interests of trade to get prices stabilized. Should the strike be a prolonged one, trouble is looked for in operating railways and steamship lines, and the entire world trade would be seriously interfered with.

## *JUDGE GARY'S STRONG POINT*

THE position taken by Judge Gary, head of the United States Steel Corporation, in favor of what is termed the "open shop," is based upon equality of rights and freedom of action without any class distinction and it seems unfortunate if the American Federation of Labor, particularly after the experiences it has been having with foreigners, is not prepared to accept it. Judge Gary expresses a "fixed opinion" that there should be no arbitration or compromise for settling the American steel strike, because he believes in the open shop principle, that every man, whether a member of the union or not, should have the opportunity to engage in any line of legitimate employment on terms and conditions agreed upon between employee and employer. He states that he has no objection to labor unions for a common interest and believes in the means of consultation and reaching satisfactory terms between employers and those employed. He will not, however, he says, have a powerful outside organization, with more of a centralized autocratic power than one of individual rights, exerting dictation or control over employers in various lines of industry. This stand, he claims, is the very basis of democratic government, of government for the people by the people. Admitting fully that laws that may have been framed in the past, either for national government or for bodies of men in various trades, may have become obsolete owing to changing conditions, he holds that the remedy lies not in violation of the existing laws, but in their revision, always keeping in view the principle of equal rights. Constitution and laws are necessary to such a system, he holds, and without them any country will drift into the chaos that has demoralized Russia. Judge Gary intimates that he is fully prepared to stand firm in his attitude indefinitely, because he believes it is the only basis on which permanent relations between capital and labor can be worked out.

## *FINANCE MINISTER'S WARNING*

THE new Minister of Finance, Sir Henry Drayton, speaking recently on the subject of the 1919 Victory Loan, emphasized the very important fact that the late war had not only been a fighter's war but a producer's war. The soldier had been indispensable to the producer; but the producer had also been indispensable to the soldier. "The fighters have finished their work, and written the name of Canada most high," he said, "but the work of the rest of the community is not finished; they are the last of the participants to be discharged. The war will not be won until we all make good the pledge to clean up the war mess, honestly, fully and fairly."

Everyone should understand that if these pledges are to be fulfilled, the 1919 Victory Loan must be pressed through to success. The Finance Minister also dwelt on the absolute necessity of a heavy subscription if Canada's markets are to be maintained and built up abroad. The importance to the Canadian producer of the overseas credits, which depend wholly on the success of the Loan, cannot be too frequently insisted on, for the matter is one of vital concern to everyone. Canada can only seize her present trade opportunities in Europe, and face the future with confidence, if these credits are continued; and the only way to assure that result is to pile up big subscriptions for the Victory Loan.

# EVENTS IN THE TRADE

## Business Changes

Central Butte, Sask.—A. Bell & Co. succeed Thomas Mair, hardware.

Markdale, Ont.—J. J. Richardson and Balmer Brady have purchased the hardware and furniture business of W. J. Bowes.

## New Business

E. Belanger, paints, hardware, etc., has been registered at Montreal.

Lieut. Joe Dutton, who recently returned to his home in Govan, Sask., after serving in France, has gone into business with John Dutton, under the firm name of the Dutton Hardware.

## Obituary

The death occurred at St. Marys, Ont., after a brief illness with pleuro-pneumonia, of Solon L. Doolittle, proprietor of the St. Marys Wood Specialty Co., manufacturers of hockey sticks, handles, etc., He was 65 years old, and came from near Aylmer, Ont.

## Fire Losses

The Chestnut Canoe Co., Ltd., Fredericton, New Brunswick, sustained a loss by fire.

A. H. Cummings & Son, Ltd., Coaticook, Quebec, manufacturers of sashes and doors, sustained a fire loss.

Paquet & Godbout, St. Hyacinthe, Quebec, manufacturers of sashes and doors, sustained a loss by fire.

## Trade Notes

Montreal Art Glass Works has been registered at Montreal.

J. M. Coleman has purchased the tinsmithing business of T. Rasmusson.

The Canadian Allis-Chalmers Company, Toronto, is erecting a pipe galvanizing plant to cost $35,000.

The British-American Oil Co., of Toronto, contemplates the erection of a refinery in Hamilton, Ont., to cost $100,000.

The Canadian General Electric Company, of Toronto, will commence work at once on a new six-storey warehouse to cost $135,000.

Brandram-Henderson Ltd. are having a brick extension for office apartments, added to their factory buildings on Kempt Road at Halifax, N.S.

The Britannia Wire Rope Co., amalgamated with Gibsons, Ltd., of Vancouver, plan the erection of a wire rope plant on Industrial Island.

James Wright & Co., wholesale hardware, London, Ont., have purchased from the Thompson Estate the premises they occupy at the corner of King and Clarence streets for $50,000.

## Montreal News

W. S. McLennan, general sales manager Brandram-Henderson Ltd., was in Ottawa this week.

W. H. Nickerson, formerly with Lewis Bros., Ltd., is resuming his connection with the firm again next week.

J. Ernest Millen, of John Millen & Son, Ltd., and Mr. Hopkins, of the Canadian Fairbanks-Morse Co., Ltd., are attending the Automobile Accessories' Show in Chicago.

J. S. Drew, of the Utica Drop Forge Co., Utica, N.Y., was in town on Thursday.

Alf. Blackburn, of the H. & D. Folsom Arms Co., 314 Broadway, N.Y., was in Montreal.

R. M. Dunton was in Montreal on Wednesday, representing the Conron-McNeal Co., Kokoma, Ind.

J. N. McIntyre, of McIntyre and Taylor, Toronto, was in Montreal this week.

W. F. Duffield, of the Reading Hardware Co., Ltd., was in Montreal this week.

A. Birmingham, of John Graham & Co., New York, was in Montreal during the week.

The Nicholson File Co., Port Hope, were represented in Montreal this week by W. Anderson.

J. L. Huston was in town this week in the interests of The Miller Lock Co., Philadelphia.

George A. Marshall, president of Kerr File and Tool Co., Ltd., Toronto, Ont., visited Montreal this week.

E. A. Runions, Ottawa sales manager for Lewis Bros., Ltd., was this week a visitor to the head office at Montreal.

John Richardson, of Richardson and Bureau, manufacturers' representatives, was in the Eastern Townships this week.

W. S. Leslie, president A. C. Leslie & Co., Ltd., Montreal, returned from a ten days' trip to Western points, including Winnipeg.

Wm. L. Ivison, with the Wallworth Mfg. Co., Boston, was in Montreal this connections for the company throughout week.

D. M. Walker, for some years connected with Frothingham and Workman, wholesale hardware, has accepted an appointment as joint purchasing agent of the Canadian Light, Heat & Power Co., and of the Montreal Public Service Corporation, succeeding J. J. Fleet.

George Henderson, president Brandram-Henderson, Ltd., leaves this Saturday for England, where he will spend several weeks.

T. S. McKay has accepted an appointment on the sales staff of the Canada Paint Co., and will cover Cape Breton, P.E.I. and Newfoundland.

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., returned from a several weeks' trip to Winnipeg and Western Canada points.

John A. Frazer, sales manager Lewis Bros., Ltd., Montreal, left on Saturday for Chicago, where he will attend the Automobile Accessories Show being held in the Medina Temple November 3 to 8.

J. O. Paul has accepted a position with the Canada Paint Co., Ltd., and will cover the Lake St. John district, a portion of Quebec Province, and Chicoutimi.

## Western News

Wood Vallance bowling team met their first defeat in the Commercial Bowling League in the last match.

The following members of Wood, Vallance traveling staff spent last week-end in Winnipeg: F. S. Stott, F. J. O'Neill, J. P. Wing, J. A. Jack, Geo. M. Watson, F. J. Perry.

S. E. Campbell, until recently with Satinette Products Manufacturing Company, of Toronto, is coming to Winnipeg to be associated with H. L. Perry Co., Ltd., who will have the agency for the West for Satinette Products.

Offices have been opened in the Galt Building, Winnipeg, Man., by the Solex Company of Montreal, manufacturers of "Solex" electric lamps. G. W. Draper, formerly of the head office staff, has been appointed manager of the Western Canada territory, and is arranging trade the West.

### ADAM TAYLOR SERIOUSLY INJURED

Adam Taylor, secretary-treasurer of the Taylor, Forbes Co., Ltd., Guelph, Ont., was very seriously injured by falling from a second storey window at his home. He was removed to the General Hospital and lapsed into unconsciousness, and for a time was in a very critical condition. On Monday he underwent an operation, and latest reports state that his condition is very favorable.

## Incorporations

The Dodge Manufacturing Co., of Canada, Ltd., with head offices at Toronto, capital $300,000, plans to manufacture machinery, mechanical appliances, etc.

The Seagrave-Loughead Co., Ltd., head offices at Sarnia, capital $300,000, plans to manufacture and deal in auto-supplies.

The Bull Dog Lacer Co., of Canada, Ltd., head offices at Hamilton, capital $50,000, plans to manufacture and deal in iron, steel and other metals.

Save-U- Gas Co., Ltd., head offices at Montreal, capital $100,000, plans to deal in automobile supplies.

Peacock Bros., Ltd., head offices at Montreal, capital $300,000, plan to carry on the business of Peacock Bros. in manufacturing and dealing in metals and articles manufactured therefrom.

Riverdale Tire Corporation, head office Toronto, capital $400,000, plans to manufacture and deal in tires and auto accessories.

K. & S. Tire and Rubber Goods, Limited, head office Toronto, capital $3,500,000, plans to deal in rubber goods, automobiles, bicycles and motor cycles.

McLennans, Limited, head office Lindsay, Ont., capital $40,000, plans to carry on a general business in hardware, electric lighting fixtures, plumbing and tinsmithing.

The Uxbridge Hardware Company, Limited, capital $40,000, head office Uxbridge, Ont., plans to carry on a general hardware business and to deal also in cement, coal and lumber.

The E. A. Lowry Power Equipment Company, Limited, head office Guelph, capital $50,000, plans to manufacture and deal in tools and machinery.

The Central Electric Supply Company, Limited, capital $150,000, head office Toronto, plans to manufacture and deal in electric fixtures and supplies.

## Becomes Vice-President of F. E. Smith Limited

W. A. McCallum, until recently assistant to the vice-president of the Canadian Tube and Iron Co., Ltd., Montreal, has resigned to become vice-president of F. E. Smith, Limited, Montreal, and

*W. A. McCALLUM*

*Of Montreal who has been appointed vice-president of F. E. Smith Limited, Montreal and Toronto.*

Toronto. Mr. McCullum was also assistant to the president of the Canadian Rolling Mills Company and the Colonial Wire Mfg. Company, prior to accepting his present appointment. The F. E. Smith Company is at present conducting a considerable export business in iron, steel and refractories.

# Boosts Sales of Phonographs and Records by Public Concert

## Hardware Firm at St. John, N.B., Packed the Largest Theatre in Town—Novel and Attractive Means of Advertising

"WE aspire to become a musical centre for St. John, and will welcome music lovers regardless of whether they wish to purchase. We shall be glad to arrange a programme selected by you and to render it for you and your friends at your home."

These are extracts from a neatly printed folder issued by W. H. Thorne & Co., Ltd., St. John, N.B., this week upon the occasion of an enjoyable concert given in the Imperial Theatre by the Belgian songstress, Mlle. Verlet, assisted by Victor Young, pianist.

The hardware firm was responsible for bringing the famous soprano to St. John, and the event aroused much interest. Invitations were issued and admission was by tickets issued by the firm, who engaged the largest theatre in St. John for the occasion, an afternoon affair which attracted a very large crowd. The concert was given in conjunction with the Edison recreation of voice plan, and the programme offorded much pleasure. The event aroused interest in the new musical art.

In the programmes printed in the form of folders, W. H. Thorne & Co. drew attention to their "library of recreations consisting of thousands of selections—vocal and instrumental solos, concert pieces and performances by military bands, dance orchestras and concert orchestras," and issued a special invitation to music lovers to visit their show rooms and inspect what was offered. It was a novel and attractive means of advertising, and proved as well a distinctly enjoyable concert treat, which filled the big theatre.

### TO MANUFACTURE CEMENT

The Federal Cement Co. has been incorporated under the laws of the State of Delaware for the purpose of carrying on the business of cement manufacturers in Owen Sound. The new company has contracted to acquire the plants of the Grey and Bruce and the Sun Cement Co. and will put in equipment that will be capable of manufacturing 2,000 barrels of best quality Portland cement per day.

The officers of the Federal Company are: J. G. Lind, vice-president of the St. Marys Cement Co., president; J. E. Murphy, vice-president of the Vancouver Portland Cement Co., vice-president; J. E. Campbell, secretary-treasurer of the Hepworth Mfg. Co., Hepworth, treasurer; A. D. Creasor, of Owen Sound, secretary, with whom L. N. Rosenbaum, president of the Knickerbocker-Wyoming Oil Co. of New York, will constitute the board of directors.

### BIG DEMAND LIKELY FOR CRUDE OIL

Extensive developments in the petroleum fields and the increasing activities of operators portend expansion of the industry. A feature which is at present attracting particular interest at the moment is fuel oil. Attention is focused upon this branch of the oil trade in view of the pending labor troubles in the coal fields. Manufacturers and interests dependent upon power are fearful of the future and are preparing for emergencies in event of a serious curtailment of the coal supply. This applies not only to America but to Europe where fuel conditions are even worse than on this side. It is hoped to ward off possible disaster which would follow a shortage of coal by substituting oil so far as practicable.

### HAD TO PAY $600 FINES

WINNIPEG.—William Bell, F. L. Argue, A. Bauslaugh, H. Rabinovitch and L. Clingman, were each fined $600 and costs in the Police Court for breach of the Income War Tax Act, and H. J. Clare was remanded till Monday. The men were found guilty of having failed to make a report of their incomes for 1917 and the fine is the minimum.

### CATALOGUES AND BOOKLETS

**Laidlaw Bale Tie Co., Limited**

The Laidlaw Bale Tie Co., Limited of Hamilton, Ont., has issued a fifty-two page catalogue in which are listed the various wire products which they manufacture. The catalogue is attractively printed and profusely illustrated, and in addition to the matter about the wire products, contains valuable tables and data regarding weights, etc. Readers of HARDWARE AND METAL who desire copies may obtain them upon request.

*Managers and salesmen of the Central and Ontario Division of Brandram-Henderson Limited, who were in annual conference at Montreal.*

# Managers and Salesmen of Brandram-Henderson, Limited, Meet

## Many Matters in Connection With Plans for 1920 Gone Into at Montreal and Winnipeg Conferences

A MOST successful annual conference of the managers and salesmen of the Central and Ontario divisions of Brandram-Henderson, Limited, was held in Montreal and lasted for two days. A warm message of greeting was extended at the opening of the conference by Mr. George Henderson, president and general manager of the firm.

The first day's programme included a discussion on "The 1920 Advertising Campaign," by Frank H. Smith, a general discussion of the campaign by conference members, luncheon at the clubhouse, a discussion of salesmen's road problems, salesmen's suggestions and requests, dinner at the Windsor Hotel and then a theatre party.

The second day was commenced by a visit to the factory. The morning was devoted to discussions of the 1920 sales campaign, by W. S. McLennan, and "The Ideal B-H Agency," by S. W. Smith. Following luncheon at the clubhouse there was a general discussion by conference members of sales campaigns and of the Ideal agency. This was followed by a discussion concerning the uses for which B-H products are designed and the proper methods to be employed for satisfactory results. At the close Mr. George Henderson again spoke.

The managers and salesmen west of the Great Lakes held their annual conference at the Royal Alexandria Hotel in Winnipeg. This also lasted for two days. The first day's programme included a visit to the Grain Exchange pit, luncheon at the Carleton Club, the opening of the business session by Chairman W. S. McLennan, a discussion on the advertising campaign for 1920, by the chairman; an informal discussion of the campaign by the conference members; a dinner at the Royal Alexandra and a theatre party.

On the second day an auto tour was made of the city of Winnipeg, after which a business session was held. Agency talks were given as follows: "What Constitutes An Agency?" W. S. McLennan; "What Is Hoped For In An Agency?" George E. Smith; "Regulating Agent's Cost," by J. Leonard Paul. The members present then discussed agency matters and then had luncheon. In the afternoon W. S. McLennan discussed sales campaigns for 1920, and a general discussion of this followed. A B-H product discussion was conducted also by Mr. McLennan.

The conference of the Maritime managers and salesmen will be held in Halifax at a later date.

*Managers and Salesmen, west of the Great Lakes, of Brandram-Henderson Limited, who attended the Western Conference, held at Winnipeg*

# C.P. Company's Ninth Convention

## Salesmen Meet in Montreal for Annual Gathering—Attendance and Interest Were Very Marked

THERE is one thing that must lend interest to the salesmen attending a paint convention, and that is the wealth of "color" that is everywhere apparent. And wherever it might be lacking there is always plenty of "coloring" to be had on immediate notice.

The ninth annual convention of the Canada Paint Co., held at the head office in Montreal from October 20-23, inclusive, had all its historic coloring, and if anything, more than on former occasions. From Vancouver, and Western territories between that far-away distributing point and Montreal, representatives came, and the representation was larger than for a long time past. As was stated to HARDWARE AND METAL, "the salesmen present expressed their feeling that this convention was the most successful that we have ever held." Filled with enthusiasm, the sales representatives evinced a great interest in all sessions, from Monday morning until the closing on Thursday night. It is not all recreation—attending sales conventions—if a salesman is to get that which will assist him it is hard work, rather. There are demonstrations to witness, lectures to listen to, addresses to follow, and inspections to make. There is little time left for "sleeping in," the sessions opening at 9 a.m., daily. And so the four convention days were crowded full.

### Practical Discussions

One of the interesting days was the last—Thursday being devoted to Selling, Promotion, and Inspection. It is but natural that men out on the "battle field" want to improve the opportunity of seeing how the products they are selling are made, and every advantage was improved, on this occasion, of seeking the many operations that are required to prepare "C-P" for the can in which it is whisked away to the dealer, everywhere.

*The four "top notchers" among the salesmen of the Canada Paint Company.*

Under the direction of Sales Manager S. M. Ward, an informative and exhaustive session on "Advertising and Publicity" was held on Thursday morning. This elicited real interest, for it was the occasion on which the salesmen were made aware of what assistance was to be afforded them in their selling efforts during 1920. The interest with which they followed the explanation of dealer helps and outdoor, as well as newspaper, trade paper, and magazine advertising proposals, was marked, and continued to the very close of this session.

### The Other Speakers

Other speakers on this occasion were the manager, Royal Cluxton; H. E. J. Taylor, sales promotion manager, and Harold Reid. Altogether this was a most interesting and a profitable session. To HARDWARE AND METAL Mr. Cluxton said that the company had experienced one of the most prosperous years in its history, and that prospects for the coming year were promising.

### Well Entertained

The salesmen were royally entertained, and on Wednesday evening "C-P" night was enjoyed through the generosity of the management in affording the men a pleasant theatre entertainment at the "Princess." Here the performers were generous in their allusions to the company's executives and managers, and to the product itself, humorous references being cleverly "sprung" from time to time. Altogether, "Theatre Night" was a continual round of enjoyment.

(Continued on page 65)

*Salesmen of the Canada Paint Company, Limited, who attended the annual convention held at Montreal.*

# Convention of Sherwin-Williams Co.

## Sales Managers and Salesmen From All Over Canada Meet at Montreal—Enjoy Varied Entertainment, Too

IF the true measurement of success attendant upon a sales convention is that of the zest with which its delegates enter upon their work, as well as their "play," then the ninth annual convention of the Sherwin-Williams of Canada, Ltd., which occupied all of last week at the head office in Montreal, must be ascribed a success. From Monday until Saturday, there was a continual change of programme which enabled the salesmen to renew their interest with each succeeding session, even though such functions mean work, and sometimes close application. With the interspersal of various entertainments, the salesmen found each returning day filled with so much interest that all sessions, right to the last, secured their undivided attention. And with "Merit Begets Confidence: Confidence Begets Enthusiasm: Enthusiasm Conquers the World," as its keynote, the guiding sentence thus appropriately chosen, served to instil this spirit throughout.

### From All Parts

The absence of serious illness, such as that obtaining a year ago when the "flu" was everywhere prevalent, made it possible for salesmen to attend from all parts of the territory served by the firm. Representatives came in from all the provinces, from Nova Scotia on the East to B. C. on the West.

### Programme For 1920

After inspection of the various manufacturing plants, their equipment, products, methods of manufacture of the many products, etc., and sales talks and conferences on fixed subjects, the salesmen met in the convention hall on Thursday afternoon and listened to a variety of addresses upon the programme to be followed in 1920. Under the general supervision of Mr. W. S. Fallis, the managing director, assisted by R. C. Misson and D. A. Whittaker, the heads of departments outlined some of the difficulties that had been encountered in the somewhat trying year, 1919, when materials and their uncertain cost kept the manufacturer in a continual uncertainty as to what might happen next. Far from the home office and fountain head from which supplies were drawn, the men on the "firing line" were thus acquainted with the intricacies that confront the producer.

### Many Fine Addresses

Among the speakers who brought direct messages to the men of timely interest were J. H. Gordon, the sec.-treasurer of the company, who, on his chosen topic, "Discoveries," outlined some of the important things that had been learned, and referred to some of the "finds" of the company in the past fifty years, in connection with executives that had been chosen, from time to time. D. A. Whittaker, assistant to the managing director, Mr. Fallis, made an effective address on "Efficiency," stressing his speech upon the necessity of watching closely the smallest details. G. C. Fletcher, followed in a comprehensive address of the difficulties of the "Purchasing Agent," whose troubles have not all been "little ones" in 1919. Mr. Radford, referring to "stockkeeping," explained how the department of which he was the head had to plan forward in order to take care of accumulating orders, necessitating the carrying of a large percentage of one year's annual outturn always ready for immediate shipment.

### Use 530 Materials

An interesting point was brought out, showing that 530 different materials enter into the manufacture of the various paint and varnish products prepared for sale by the company. To contain these products 185 different packages are required, while no fewer than 64 packing cases have to be arranged for to contain them. To procure the various raw materials it is necessary to line up purchases from no fewer than 410 firms.

### Tells of Manufacture

F. A. Scott, superintendent of manufacturing, gave a comprehensive address on manufacturing, and was assisted by L. Vallee. "Service" was emphasized as an important part of the 1920 objective of Mr. Scott's department, and in attaining this he was sure that the purchasing and research departments would be of material assistance.

Messrs. Gardiner, Mowl, and others made brief addresses regarding the work being undertaken in their various fields.

### Profitably Spent

Summing up, Mr. Fallis was sure that the time spent in conference had been profitable, and referred to the importance of co-operation from all the various departments, which must work toward one end. It was only through co-operative effort that real growth was possible. "Success depends upon fairness," said Mr. Fallis in referring to the treatment which it was endeavored to always extend in dealing with employees. This had accounted, perhaps,

*The Managers and Salesmen who attended the annual*

for the fact that the company had had no labor strikes in all its history. Unfairness impairs efficiency. A discontented man will spread Bolshevik discontent. "Do the right thing at the right time, in the right way," concluded Mr. Fallis.

### The Merry-Making

The company provided private tramway transportation service for the salesmen, and the car was suitably decorated with large convention banners. Luncheon was partaken of each noonday at the Windsor, where the men made right merry, putting on some "hair-raisers" that will go down into history as unique, to say the least. The mock trial of some old stalwarts on Thursday resulted in their conviction, but through the good offices of friends they were not "shot at dawn" as decreed by the court.

On Tuesday night at the Princess Theatre, the entertainment proved to be most pleasant, as was outlined elsewhere last week.

The "Get-Together" concert and dance at Victoria Hall on Thursday night was the real "sociable" gathering, and this proved to be of great interest for the "light steppers," of whom there was a very large attendance. The varied program was provided wholly by the firm's own talent, as was also the orchestral music enjoyed at the various luncheons. A buffet supper assisted towards making this evening a continual round of enjoyment.

Among the delegates at the convention were:

W. S. Fallis, managing director; R. C. Misson, manager; F. A. Mann, trade sales manager, Montreal; C. A. Thomas, sales manager, Toronto; H. H. Eager, sales manager, Winnipeg; J. H. Hawkins, sales manager, Vancouver; J. F. Ryan, sales manager, Halifax; W. J. Chambers, manager mfg. sales; G. C. Fletcher, general purchasing agent; F. A. Scott, manager of manufacturing; J. H. Gordon, sec'y-treas.; D. W. Whittaker, asst. to managing director; S. C. R. Ross, chief accountant; W. A. Paton, superintendent, Calgary; J. L. Vallee, superintendent, Montreal; J. C. Cox, superintendent of printing and stationery; W. A. Farmer, superintendent paint mixing and grinding; S. D. George, superintendent varnish making; G. E. Radford, general stock-keeper; W. L. Massiah, advertising manager; W. J. Delaney, asst. advertising manager; B. E. Newmark, sales promotion manager; P. W. Hollingworth, cashier; A. W. Mowl, asst. to sales manager, Winnipeg; and traveling representatives, Eastern division, as follows: G. E. Boomer, Robt. Johnson, J. N. Themens, Hy. Hill, J. A. Derouin, J. W. Benson, A. E. Cowley, D. Crevier, W. P. Downing, O. L. Christman, J. E. Auger, R. Vincent, R. J. Spalding, R. E. Stinson, W. G. Fallis, W. G. McIntyre, R. J. Hunter, L. B. Moore, W. F. Prescott, F. R. Allison, R. C. Holder, W. J. McGowan, R. Crevier. Western division: H. S. Duncan, J. J. Whalen, W. J. Miller, J. M. Linwood, L. Hannay, J. B. Buckham, P. D. McCallum, A. J. Boyd, J. M. Little, H. H. Eager, Jr.

## MAKING BIG PURCHASE

According to information given HARDWARE AND METAL, negotiations have been completed by which the James Robertson Co., Ltd., of Toronto, are to take over a large firm manufacturing enamelware. Mr. Charles Robertson, of Montreal, president of the James Robertson Co., Ltd., was in Toronto on Thursday, but efforts made by HARDWARE AND METAL to see him at the company's office were unsuccessful.

## C. P. COMPANY'S NINTH CONVENTION

(Continued from page 63)

### Were Much Enjoyed

The noon luncheons were social hours of enjoyment. Advantage was improved of making the most of pent-up energy, and the appearance of a full-grown "Elephant" in the Oak Room of the Windsor on Wednesday p.m. was the signal for no small outburst of enthusiasm. This clever stunt was planned and carried out by a few of the "boys," and was truly typical of the company's well-known trade mark.

There were nearly fifty in attendance, among them being the following:

Royal Cluxton, general manager; W. J. Bland, sales manager, Winnipeg; S. M. Ward, trade sales manager; W. H. Newton, manufacturing sales manager; H. E. J. Taylor, manager sales promoting department; S. P. Newton, chief chemist; Ernest Marlow, superintendent; E. A. Crawford, chief clerk; Geo. J. Browne, cashier; and salesmen: R. E. Carscallen, J. J. Minion, R. Traversy, F. C. Empringham, F. H. Butcher, R. M. Smith, F. L. Clarke, W. G. Sippi, Geo. W. Goodbody, C. H. Keys, W. E. Thompson, J. H. Breadner, N. A. Milne, R. S. Grant, C. A. Gillerlain, R. Gardiner, W. H. Allison, Robert Bremner, A. L. Hellems, A. R. Cawdron, A. Beauchesne, E. A. Sentenne, J. O. Paul, I. S Mackay, Chas. Porlier, G. H. Perras, W. H. Lennox, J. W. Duncan, J. W. McIntosh, W. C. Boyd, D. Corbett.

The Emo Hardware Company, Limited, capital $20,000, head office Emo, Ont., plans to carry on a general wholesale and retail hardware, implement, furniture and supply business.

*conference of the Sherwin-Williams Company, Limited, of Canada, held at Montreal.*

# THE CLERKS DEPARTMENT

## He Was Selected From 35,000 Employees to Manage World's Greatest Chain of Stores

### Hubert T. Parsons is a Canadian and Began His Career as a Bookkeeper at $12 a Week—Read What He Says

HUBERT T. Parson is forty-seven years old and a Canadian. When he was 20 years old he was hired by the late F. W. Woolworth at $12 a week as a bookkeeper. The story of his rise in business is told by B. C. Forbes in the American Magazine as follows:

ENERGETIC YOUNG MAN WANTS SITUAtion as bookkeeper. Can do general clerical work. Willing to start at $12 a week.

That advertisement appeared in the New York "Tribune" in the days when a "Want Ad." cost only five cents.

To-day the "energetic young man," still comparatively young, occupies the finest business office in the world, in the highest building in the world, president of the largest retail business in the world, serving the greatest number of customers of any concern in the world, and employing more salespeople than any other merchant in the world. At this moment people are swarming into the stores at the rate of over one thousand million a year, or ten times the total number of men, women and children in America. They are making purchases at the rate of two thousand million a year. Their average purchase is thirteen cents.

**Controls 1,060 Stores**

The number of stores controlled and watched over by the ex-bookkeeper is 1,060, a total never approached by any other concern. You cannot visit any sizable town in any state of the Union without finding one of these stores; there is at least one in every town of eight thousand or more population. Nor can you travel any distance in Great Britain without running across one.

Their sales? Last year the three million individuals who daily patronized these stores bought 90,000,000 pounds of candy, enough to fill a freight train twenty-four miles long; 20,000,000 pieces of enamelware, a full load for a train seven and a half miles long; 50,000,000 pairs of hosiery, equal to two and a half pairs for every family in the United States; 42,000,000 boxes of safety matches, enough to build a monument 1,325 miles high if placed on top of each other, or, if laid end to end, almost enough to span the Atlantic; 20,000,000 sheets of music, sufficient to give a goodly supply to every piano in America; 54,000,000 handkerchiefs, equivalent to almost three for every household in the whole country; 1,714,000 nursing bottles, or about one for every baby born last year in America; 5,000,000 phonograph records, enough, it would seem, to keep every phonograph in the land going merrily every night of the year; 12,000,000 pounds of salted peanuts, more than any freight train ever attempted to move—the train would be three miles in length; 24,000,000 sticks of chewing gum, enough, surely, to keep every devotee of the habit busily employed from January to December; 6,250,000 neckties for men, 5,000,000 papers of hairpins for women, 9,000,000 toys for children, and 15,000,000 cakes of soap for families; 5,000,000 papers of pins, enough to sink a ship; 9,000,000 yards of curtain material, sufficient to girdle Mother Earth four and a half times.

**Carry 7,000 Articles**

These are the sales of only a few of the seven thousand articles carried by each store.

The profits? Last year they exceeded seven million dollars, and this year will be much larger. In former years they were big enough to enable the founder of the stores to erect the highest building in the world at a cost, out of his own pocket, of $14,000,000.

Yet no article (except in certain Western territory and Canada) is sold for more than ten cents, and most of them are sold for five cents.

The man at the head of this mammoth merchandising enterprise, the ex-bookkeeper, is Hubert T. Parson. Last June he was selected, from all the thirty-five thousand employees, to succeed the late Frank W. Woolworth as president of the F. W. Woolworth Company, pioneers in the "five and ten cent store" business.

**Why Was He Chosen**

Why was this ex-bookkeeper chosen as head of the most colossal retail business in the world?

Because he was unanimously adjudged, both by Mr. Woolworth and the hard-headed board of directors, the one man in all America best fitted for the job.

I asked a high-up Woolworth executive to define in a sentence or two Mr. Parson's most conspicuous qualifications and characteristics. He reflected for a little and then replied:

"Parson knows more about the five and ten cent business than any other man living. He is probably without a peer as an organizer. He is a master of system. He has devised systems of bookkeeping and record-keeping that enable him to see at a glance what every store in every locality is doing. His forms and schedules show him where there are undue leakages or waste or losses or poor management. He has an uncanny memory; he carries in his mind a complete picture of what is going on every day in our thousand stores, and can quote almost any figure or fact pertaining to the business without consulting the records.

**Grasp of Detail**

"Yet, combined with this mastery of detail, he has as much foresight as Mr. Woolworth had. It was his amazing grasp of detail, his wonderful memory, and his rare foresight that led Mr. Woolworth to make him his right-hand man as vice-president and general manager. He is now one of the administrators of the Woolworth estate.

"No man in the organization works harder than Parson. Mr. Woolworth used to say that in the early days of the business Parson worked so late that on his way home he met himself coming back to work in the morning. Also, and perhaps most important of all, Parson has in an extraordinary degree what, for want of a better term, we call judgment—a combination of common sense, vision and insight born of this enthusiastic devotion to the business, his mature experience."

Then he added: "The only thing I might say by way of criticism is that he has been too busy attending to business to learn how to be a good mixer. He's not strong on superficial personality. But he can deliver the goods every time."

**Has Learned Much**

The man who guides the destinies of a concern which caters to the wants and the whims of a thousand million customers a year naturally has learned something about the make-up of the human species. And let it be here said that Mr. Parson has been the active head of Woolworth's for the last three years, during its period of most rapid growth and success, as Mr. Woolworth's health during that time had been such that he elected to leave most of the daily burden to his ablest aid, in whose ability he had unlimited confidence.

Yet a long talk with Mr. Parson made it clear that the serving of a billion customers is not much more ticklish than serving a hundred or a thousand, once you grasp a few fundamental principles common to all human nature.

**Same the World Over**

"Mr. Woolworth," said Mr. Parson, "once gave the keynote of merchandising success in these two sentences: 'Human nature is the same the world over. Liking to buy something for a small sum that you must pay more for elsewhere is not a matter of climate or language.' For instance, forty-five thousand people visited our Fifth Avenue store in New York on the opening day; and it is already the most successful of all our thousand stores."

**Had the Same Idea**

Long before Henry Ford appeared on the horizon Frank W. Woolworth began applying the idea which made them both the foremost figures in their respective lines. Woolworth was to retail merchandising what Ford later became to automobile making and selling. Woolworth saw that a fortune could be made out of nickel and dime sales if enough sales could be made; he realized that the way to make enough sales was to cut down the unit of profit to a fraction of a cent per sale; and he also recognized that the way to do this profitably was to create a colossal machine which would function with a maximum of efficiency and economy. Woolworth's average profit per sale is half a cent.

Mr. Woolworth once told me that the turning-point in his career did not come until he learned, at the expense of a breakdown that almost cost him his life, that there were things other people could do as well as he could himself. He added:

"I then learned to entrust duties to other people. So long as I was obsessed with the idea that I must attend personally to everything, large-scale success was impossible. A man must select able lieutenants or associates, and give them power and responsibility."

It was just before this that young Parson became associated with Woolworth. The association came about in a funny way.

### Born in Toronto

Among those who replied to the Parson Want Ad. was "F. W. Woolworth, 280 Broadway, New York City." With Parson, salary was secondary to opportunity. Born in Toronto, Canada, in 1872, his father, Henry E. Parson, was at one time called "The Oil King of Canada," but fires twice destroyed his properties at Petrolia, and oil was struck at Oil City, Pennsylvania, causing a collapse in the price of oil to twenty-five cents a barrel, which shattered his fortune, causing him to move to Watertown, New York, where Hubert lived until he was seven. The family then moved to Brooklyn. On graduating from high school in 1889 the lad immediately took the first job he found, as office boy in the Atlantic Chemical Works, at four dollars a week. When only nineteen, he was invited, although he was without capital, to become partner in a chicory importing business, and everything was progressing smoothly until the McKinley tariff put raw chicory on the free list and thus killed the enterprise.

### Was Ambitious

"I was now about twenty and felt that it was time to get into something really worth while, something with a promising future," said Mr. Parson. "I started an advertising campaign, naming only twelve dollars as the salary I wanted, though I had been making much more than that. When I called on F. W. Woolworth he asked me brusquely, 'How much do you want?' 'Twelve dollars.' I told him. 'I'll give you eight dollars; no more,' he said. 'I'm worth twelve dollars and can earn more than that for you,' I replied. 'I can't pay it,' he said, and I then left. Before I had a chance to close an offer, I got a letter from Mr. Woolworth asking me to call again. He said he had decided to try me out.

### Plenty of Work

"I soon found that there was a tremendous amount of work to do. Mr. Woolworth then had fourteen stores and all the office force he had was two young men and two girls. He was working like a galley-slave. Before the end of the first wee[illegible] discouraged. So much bookkeeping and general office work was thrown on me that I went to see the other concern that had made me an offer. The man was not in. That night I fought it out with myself. I finally concluded that I would tackle anything and everything heaped on me, that I would not be a quitter, and that, having cast my lot with Woolworth, I would stick to him through thick and thin. And I have."

### Has Made History

Mr. Parson since then—that was twenty-seven years ago—has made mercantile history. It was he, more than any other individual, who taught Woolworth that there are many duties which could be delegated to assistants. It was Parson who plodded and planned to give correct, businesslike form to Woolworth's ambitious dreams. It was Parson's installation of systematic compiling of records, of cost-analyses, of uniform merchandising forms—it was his wizardlike ability to develop order and organization that prevented his chief from having another breakdown, and freed him to go into the field and expand with unprecedented rapidity. How invaluable Parson became in upbuilding Woolworth's may be gathered from this reply Woolworth once gave me when I asked him for some figures:

"Ask Parson. He knows more than I do. He knows everything about the business."

### Knows Everything

He knows everything about the business. In that one short sentence does there not lie the explanation of Parson's phenomenal rise?

Parson, please understand, was not pitchforked into high place. He had to earn each step. He had to win every new office and honor. After several years of hard, grinding office work, toiling often until dawn, Parson suggested that practical training in store management would broaden him; but Woolworth replied that Parson was already too big and too broad to be confined to one store; he had a mind capable of mastering the business as a whole and of aiding invaluably in its expansion along methodical, scientific lines. From accountant in the head office, the young man branches out as traveling accountant and auditor, with supreme supervision over the accounts of all stores. He developed a genius for collecting masses of figures and facts from all the scattered stores, and then marshaling them, correlating and condensing them into one brief, simple exhibit which told the whole story so plainly that anyone could grasp its full meaning.

### The Only One

When the business was incorporated, in 1905, as F. W. Woolworth & Company, with $10,000,000 capital, there was only one man considered for the dual office of secretary and treasurer, H. T. Parson. He was given complete charge of every inside activity and proved his calibre so clearly that when the $65,000,000 F. W. Woolworth Company was formed in 1912, with a total of 596 stores in the combination, he was made secretary and, four years later, vice-president, treasurer and general manager, a triple position which marked him as the dominant factor in the company. Mr. Woolworth meanwhile having largely withdrawn from active duty. When Mr. Woolworth died, last April, Mr. Parson naturally stepped into the presidential chair.

### What He Learned

"What has your twenty-seven years' experience in handling hundreds of stores and millions of customers taught you that might be helpful to other merchants and business men? Also, what can you tell young men and women on the subject of getting on, seeing that you have thirty thousand or forty thousand under your charge? In other words, what has been the secret of the Woolworth success?" I asked Mr. Parson.

"I fear I cannot sum up the whole story in a few epigrams," replied Mr. Parson with a smile. "While our basic principles have been few and simple, a thousand and one little and big things have entered into the building up of our business. To hard, unremitting work, which, of course, is at the base of every great success, we have wedded foresight, basing our foresight on the most exhaustive information available. We are gluttons for facts, for exact, detailed information.

### Carefully Chosen

"For example, every location for a store is chosen, not by hit or miss, but on scientific principles. We never make a move on impulse, on mere theory, on guesswork. We not only look before we leap, but we take detailed measurements of the ground where we are going to land. Success cannot be attained by working in the dark; you must all the time know why you should or should not do a thing, and what the results are likely to be.

### Are Two Parts

"There are two parts to every business: dealing with the public and dealing with your own organization, your own employees. The public wants the greatest possible value for its money; this applies to rich and poor alike, we have found by experience. In dealing with employees, we have found that by far the best plan is to give every individual in the organization, wherever it can

IS THERE ROOM FOR ME?

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### ALSOP-ALL-SPARK

The Alsop-All-Spark, which is being manufactured by the All-Spark Ignition Co., Inc., 13 Water street, New York City, is controlled from the inside of the car, and the manufacturers claim that it eliminates in times of emergency all spark-plug troubles on four-cylinder cars.

The Alsop-All-Spark can be easily attached to any car. A hole is bored through the dashboard and the device is then screwed in over the engine. The dial is screwed on the side near the driver so that the handle projects through the hole and engages the centre of the device. The wires are taken from spark plugs and attached to the bottom set of terminals. New wires are attached to the top terminals and run back to the plugs.

The voltage control is from the dial on the dashboard. A slight turn, and

*Alsop-All-Spark*

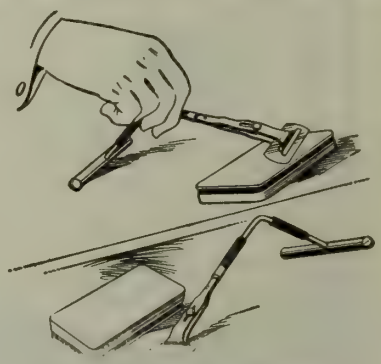
the spark is far more powerful, the manufacturers claim, than from the highest tension magneto with the advantage that a low voltage is used for starting. It is further claimed that at high speeds or under heavy loads it will fire every charge of gas regardless of dead plugs, poor or high compression, oil, carbon and uneven gas mixtures, insuring maximum power under all conditions, and also from any type of ignition system. An unqualified guarantee goes with this device—it is guaranteed for the life of a car.

---

### STRAINER SAUCE PAN

A new handy strainer sauce pan, made, it is claimed, of genuine old English gray ware, is being placed on the market by the Republic Stamping and Enameling Company, Canton, Ohio. This product is a combination strainer and sauce pan. This pan, it is stated, has been designed particularly to make housework easier. For instance, the water in which potatoes are boiled with the jackets on, can be strained off without burning or scalding the hands because of the new re-enforced handle and then the dome cover can be replaced,

*Strainer Sauce Pan*



confining the steam, which will burst the jackets, thus practically peeling the potatoes. The actual capacity of the pan is five quarts.

---

### SAFETY RAZOR SHARPENER

A new form of safety razor blade sharpener is being placed on the market by the Warner-Jones Company, of St. Paul, Minn., which they claim is the only thing of its kind in the world. The most original point about this sharpener is that in sharpening a blade it is impossible to make a stroke in any but a diagonal direction. Most other sharpeners require a straight vertical stroke.

This patent consist of the holder, two stones and a strop. Safety razor blades

*Safety Razor Sharpener*

can be both honed and stropped with this device.

We would be pleased to hear from any of our readers regarding this, so many makers have a heater called Oak that it is difficult to distinguish or trace some brands.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

MANY important price changes have been made this week and in almost every instance the quotations are higher. Brooms show an advance of ten per cent. Other increases include all lines of cotton cordage, Stilson wrenches, wrought iron nipples, wrought butts and hinges and sash cord.

Auto coasters, which advanced last week, are again higher, while Ingersoll watches, coppered rivets and building papers, both plain and tarred, are also higher.

An early advance in the price of turpentine will occasion no surprise, as this is expected as soon as the Germans complete arrangements for credits and enter the field as large buyers.

Linseed oil is easier and further reductions may be made as supplies of seed become more plentiful.

Rat traps of the cage variety are up twenty per cent.

The situation in regard to sheets is growing more acute all the time. "If I knew you were going to be my best customer I could not give you even a sample sheet," was the way one large jobber summed up the outlook. Another who had just returned from New York states that prices of sheets are not expected to lower for two years.

Business in general is reported excellent, merchants only trouble being to get the goods to sell.

# MONTREAL MARKETS

MONTREAL, Oct. 30—Many changes are recorded in the hardware markets this week and there is a steady upward tendency on manufactured goods in particular. Rat traps of the cage variety are up about 20 per cent. Wrought nipples are higher. Various butts and hinges, bolts, etc., are marked up about 10 per cent.

Cotton rope and twines, awning and sash cord, candlewick, etc., are increased in price. Manila rope is quoted higher in the States one cent per pound, but is no higher here, though the tendency is naturally quite firm.

Galvanized sheet markets are very high and prices are showing a wide range, stocks getting very limited and the outlook being unsatisfactory for supplementary stocks later.

Pig tin is showing much change from day to day, now up, then down again, but there is no quotable change here. Lead prices are likely to be higher. Spelter is easier. The condition of trade is decidedly active and the outlook for a continued brisk fall is excellent. Supplies are hard to obtain.

## *Cotton Rope Is Up; Twines and Cord, Too*

**Montreal.**

COTTON GOODS.—Increased prices are in effect for coton rope and twines, etc. New base prices for rope are: 3-16, per lb., 75c; ¼ and up, 74c. Sash cord, No. 6, lb., 80c; No. 7, 79c, and 8-12, 78c. Cotton twine is up about 5 per cent. all around, braided chalk lines and candlewick taking a similar advance.

## *Rat Traps Higher; Nipples, Butts*

**Montreal.**

RAT TRAPS, NIPPLES, BUTTS.—"Hold-'Em" line of wire cage rat traps are quoted higher, the increase being about 20 per cent.

Pipe nipples are marked up, four-inch and under being 77½ per cent., and over four-inch, 67½ per cent.

Various butts, common and fancy, bolts, etc., of Canada Steel Goods make and goods of Taylor-Forbes manufacture are advanced in price, discounts ranging around 10 per cent. higher.

## *Makers Kept Busy On Stove Deliveries*

**Montreal.**

STOVES AND WARES.—The manufacturers of stoves and ranges are having their hands full these days to cope with the demand. Heater business has been heavy and there has also been a keen demand for ranges and stoves. The tendencies are very firm and no declines are probable under present conditions, and advances for many lines would not be surprising.

The sale of stove boards, furnace scoops, coal hods, ash shovels, etc., are very active and the price undertone is very firm.

## *Active Demand But No Change For Oils*

**Montreal.**

OILS AND GASOLINE.—The demand for coal oil and gasoline is heavy and stocks are ample to meet the needs. Prices are without quotable change, the range of coal oils being from 22 to 25c per gallon. Motor grade gasoline is still selling at 33c.

## *Good Nail Movement And Prices Held*

**Montreal.**

NAILS AND WIRE.—Prices are steady and firm on wire and cut nails, and the basis still holds at $4.75 per keg. There is a fair sale of wire and the base quotation remains at $5 per 100 lbs. for No. 9 Ga. and larger.

## *Active and Steady Are Iron and Steel*

**Montreal.**

IRON AND STEEL.—There is an active movement of bars and the tendencies are steadily firm. Bars are likely to figure on jobbers' sales from now forward, and as yet there has been little difficulty in obtaining requirements.

IRON AND STEEL

| | |
|---|---|
| Star finish machinery steel | 3 30 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |
| Sleigh shoe steel | 3 75 |
| Tire steel | 3 95 |
| Toe calk steel, per 100 lbs. | 4 65 |
| Band steel | 3 75 |
| Harrow tooth steel | 3 90 |
| Mining tool steel, per lb. | 0 22 |

| | |
|---|---|
| Black Diamond tco steel, per lb. | 0 22 |
| Black Diamond cast steel, lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *U.S. Manila Firmer; Jute Prices High*

**Montreal.**

ROPE AND CORDAGE.—There has been no quotable change this week on rope. In the States, manila rope prices are up one cent, and as there is a scarcity of genuine manila, the tendencies are firmer. No change is made here, the basis on pure manila being 31c; Beaver and British manila, 27c, and sisals, 23½c. Jute is very firm and high.

## *Will Sheet Stocks Entirely Disappear?*

**Montreal.**

SHEETS AND PLATES.—It is in order to say that the situation as to supplies of galvanized sheets has already become acute, and those who have any stock are fortunate. Some are entirely sold up, while others are scouting around for supplies wherever there is hope of obtaining them. Deliveries from the mills are not likely to improve for weeks, and it is therefore correct to say that prices are, and will continue, to be nominal. The following range of quotations is subject to immediate revision, and prices none will guarantee for any length of time. One informant stated that black sheets might even be shipped to the mills to be coated and then returned to the owner.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 65 | 6 40 |
| 12 gauge | 5 70 | 6 35 |
| 14 gauge | 5 75 | 6 50 |
| 16 gauge | 5 85 | 6 65 |
| 18-20 gauge | 6 30 | 6 35 |
| 22-24 gauge | 6 35 | 6 40 |
| 26 gauge | 6 45 | 6 50 |
| 23 gauge | 6 75 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | | 9 00 |
| 28 gauge | | 8 85 |
| 26 gauge | | 8 75 |
| 22 and 24 gauge | | 8 40 |
| 20 gauge | | 8 25 |
| 18 gauge | | 8 25 |
| 16 gauge | | 8 00 |
| English Standard— | | |
| 28 gauge | | 9 25 |
| 26 gauge | | 9 00 |
| 24 gauge | | 8 40 |
| 22 gauge | | 8 00 |
| 18 and 20 gauge | | 8 00 |

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Very Firm Are Lead Products*

**Montreal.**

LEAD PRODUCTS, SOLDER—While the market is unchanged, the tendencies are firmer, and it is not at all improbable that advances may be made ere long for solder and other lead lines. The difficulty of securing English lead will become greater a little later on, it is stated, and the tendencies will then be higher, some anticipate, on American.

| | |
|---|---|
| Lead pipe | 0 12½ |
| Lead waste | 0 13½ |

Note.—Lead pipe is subject to a discount of 10%.

| | |
|---|---|
| Lead traps and bends | 15% |

| 40/60 | 0 36 |
| 45-55 | 0 38¾ |
| 50-50 | 0 41¼ |
| Zinc sheets, casks | 0 17 |
| Do., broken lots | 0 18 |

## *Still Lagging Are Old Metal Markets*

**Montreal.**

OLD MATERIAL.—There is a decidedly unchanged market as far as old metals and scrap are concerned. Buyers are not seeking round lots, and there is nothing but a routine business of small proportions. With the steel troubles still unsettled, it was expected there would be a keener enquiry for old scrap, but this is not manifest, as yet.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |

| Yellow brass | 0 09 | 0 10 |
| Red brass | 0 15 | 0 16 |
| Light brass | 0 07½ | 0 08½ |
| Scrap zinc | 0 05½ | 0 06 |
| Light copper | 0 15 | 0 15¼ |
| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | | 15 00 |
| Malleable scrap (ton) | | 15 00 |
| Pipe scrap, ton | | 8 00 |
| Stove plate, ton | 14 00 | 15 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | | 21 00 |

## *Tin is Erratic; Lead Strong; Spelter Down*

**Montreal.**

INGOT METALS.—There is an unchanged feeling in copper, an erratic market on ingot tin, a strong lead market, and an easier position on spelter.

COPPER.—Still some demand and prices are unchanged. There is, if anything, an easy feeling.

TIN.—This item is changing daily, and the difficulty is that of defining the market, advances and declines being reported frequently in London cables.

LEAD.—There is a prospect of prices being advanced again on lead if the English lead supplies are shut off, which there seems to be prospect of in the near future. Demand has been active and prices hold firmly.

SPELTER.—A decline of one-quarter cent per lb. is recorded this week, the present basis here being 9¾c.

ANTIMONY.—Quite firm and price remains still at 10¼c per lb.

ALUMINUM.—A better demand obtains for this and the price remains unchanged at 34c.

PIG IRON.—$50 per ton is still quoted on small lots.

# TORONTO MARKETS

TORONTO, Oct. 30—The general tendency of prices on nearly all lines of merchandise is very strong and usually upward. Brooms, which HARDWARE AND METAL forecast last week to be higher, show an advance this week of 10 per cent. Hercules sash cord is now quoted at 78 cents base. Cotton rope over ¼ inch and upwards is now quoting at 80 cents. Cotton twine, 5-pound lots, 3 ply, 80 cents; cones, 3 ply, 76½ cents and 4 ply, 80½ cents per pound. Stilson wrenches are quoted at: 6 inch, $12.00; 8 inch, $13.50; 10 inch, $15.00; 14 inch, 21.00; 18 inch, $30.00; 24 inch, $43.50 and 36 inch, $81.00.

Wrought butts and hinges advance approximately 10 per cent. The new prices on some of the better known butts are: Nos. 842 and 838 net list; 840 advances 5 per cent. on list; 810 advances 10 per cent. on list; 800 advances 12½ per cent. on list; 804 discount 5 per cent.; light tee and strap hinges net list. Building paper, especially tarred, is scarce and some state there is quite a famine prevailing. Ready roofing is also hard to procure. This may be traced to the shortage of waste materials used in the production. The continued scarcity of black and galvanized sheets is causing great inconvenience.

Other lines to show an advance are Ingersoll watches, coppered rivets, tinned rivets and building paper, plain and tarred.

## *Hercules Sash Cord Advances to 78c Base*

**Toronto.**

HERCULES SASH CORD advances. HARDWARE AND METAL predicted that cotton products were firming, and this week we record an advance. The reason for this advance is given that the cotton crop has not shaped at all well this year, which makes about the fifth crop below the ten year average. Then it is expected the European buyers will be in the market soon, as they are shaping their mills to start immediate operations. The great difference in the

relative value of the different moneys has also been a large factor, as American money in some cases is worth nearly seven times as much as some of the aforesaid European. The price quoting at present is 78 cents base.

## *Cotton Rope, and Cotton Twine, Advance*

Toronto.

COTTON ROPE AND WRAPPING TWINE.—Practically the same factors have affected this commodity as we mentioned for sash cord; the demand has also affected the above considerably. The prices are as follows: Cotton rope, ¼ inch and up, 80 cents per pound; cotton twines, 5 pound bags, 3-ply, 80 cents per pound; cones, 3-ply, 76½ cents; 4-ply, 80½ cents per pound.

## *Stilson Wrenches Climb Upwards*

Toronto.

STILSON WRENCHES show a new figure, having advanced considerably, due, no doubt, to the scarcity of raw material and conditions in the steel industries generally. The new prices are as follows: 6 inch, $12.00; 8 inch, $13.50; 10 inch, $15.00; 14 inch, $21.00; 18 inch, $30.00; 24 inch, $43.50; 36 inch, $81.00.

## *Wrought Butts and Hinges Advance*

Toronto.

WROUGHT BUTTS AND HINGES advance approximately 10 per cent. This is in accordance with our previous reports, where we stated that all prices were withdrawn, that is, regarding wrought hardware. Some of the most popular lines of butts are quoted as follows: 800 advance 12½ per cent. on the list; 838 net list; 840 advance 5 per cent. on the list; 804 discount 5 per cent.; 810 advance 10 per cent. on the list; 842 net list; light tee and strap hinges net list.

## *Famine in Builders' Paper Causes Advance*

Toronto.

FAMINE IN BUILDERS' PAPER.—It is stated that a famine now generally prevails in builders' paper. The shortage in this line, it has been stated, is felt from the manufacturer down to the consumer. The shortage of scrap paper in sufficient quantities is very acute. In fact, it is said that scrap paper and wool are not to be had, and are practically off the market. This also applies to roofing.

## *Bolts and Nuts Hold Firm*

Toronto.

BOLTS AND NUTS.—It is not expected that the change in price of American bolts will affect Canadian prices. Most of the bars that are used for this purpose being rolled in Canada, although manufacturers are rushed to keep up with orders, as the Canadian strike in the spring, which lasted several months, set majority of makers behind in their shipments.

## *New Prices on Refrigerators and Screen Doors*

Toronto.

REFRIGERATORS AND SCREEN DOORS.—The new prices are now made up for the new season on these lines, but are too varied and numerous to mention here.

## *Nails Scarce; Remain Firm*

Toronto.

NAILS remain firm and somewhat scarce, owing no doubt to the seasonable shipments sent up to the head of the lakes before the close of navigation. Then, too, the American firms have been buying Canadian nails quite freely. It is not expected that an immediate advance will take place at present.

## *Stoves and Wares Scarce; Still Hold*

Toronto

STOVES AND WARES.—The stove situation has not improved in the least; in fact, it is worse, if anything. Raw material is not to be had, and even if it were, it is stated manufacturers could not possibly attain their old footing this season. A great number of wood burning stoves of all kinds are being demanded this year, due, it is expected, to the high cost and scarcity of coal. The most popular of these, of course, are the air-tight heaters, although one manufacturer stated to HARDWARE AND METAL that his firm were over one hundred wood furnaces behind in their orders.

There is no lack of demand for enamelware, and although the price has not changed as yet, it seems more of a matter of getting the goods, the price being second consideration.

## *Corn Brooms Advance 10 Per Cent.*

Toronto.

CORN BROOMS, as was predicted by HARDWARE AND METAL, have advanced. It is expected that this new advance will stimulate rather than curtail trade, as busines has been very sluggish in this line of late, most merchants holding back for the bottom to fall out of the market. The reason has been given that the better class of corn is too long in length, and as it is bought by the ton the waste is considerable, owing to such a length having to be cut off. The advance is approximately 10 per cent.

## *Oil and Gasoline Hold*

Toronto.

OIL AND GASOLINE still hold. No change is at present looked for. Fuel oil has shown a big turnover. Many private homes have installed auxiliary burners, besides the larger buildings and factories, in order to insure against future coal famines, and in trying them out, find them satisfactory, with the result that oil for this purpose is going out in increased volume.

## *Lead and Zinc Show No Advance*

Toronto.

LEAD AND ZINC PRODUCTS.—The prices are firm. Owing to the advance and strong tendency of lead, the demand still holds good, and is showing a stronger tendency, although no change in price is immediately looked for. Quotations are as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | | $0 12½ |
| Lead waste pipe, list, per lb. | | 0 13½ |
| Do., over 6 inches, list, per lb. | | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | | 0 17 |

## *Sheets and Plates Advance 25 Cents*

Toronto.

SHEETS AND PLATES.—A twenty-cent advance has gone into effect on sheets, both black and galvanized, and if the situation is not soon relieved a further advance may take place as a famine may set in. It is expected a larger volume of this year's business will be carried into next year. The following lists are more or less general on account of jobbers quoting different prices, according to their situation. Quotations are as follows:

**BLACK SHEETS—**

| | | |
|---|---|---|
| 14 gauge | 5 45 | 5 65 |
| 16 gauge | 5 60 | 5 75 |
| 18-20 gauge | 5 15 | 6 30 |
| 22-24 gauge | 6 20 | 6 35 |
| 26 gauge | 6 30 | 6 40 |
| 28 gauge | 6 45 | 6 50 |
| 3-16 inch plate | 4 90 | 6 25 |
| ¼-inch boiler plate | 4 50 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS.**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | 8 90 | 9 50 | .... | 9 25 |
| U.S. 28 | 8 30 | 9 90 | .... | 8 55 |
| U.S. 26 | 7 90 | 8 50 | .... | 8 20 |
| 22 and 24 | 7 70 | 7 90 | .... | 8 00 |
| 18 and 20 | 7 50 | 7 70 | .... | 7 80 |
| 16 | 7 25 | 7 50 | .... | 7 60 |
| 12 and 14 | 7 05 | 7 25 | .... | 7 35 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Boiler Tubes Scarce; Holding Firm*

Toronto.

BOILER TUBES.—Stocks continue low and as Canada depends to a great extent for supplies from the United States no immediate improvement in the outlook is likely. In fact, some claim there is almost a famine in some sizes. A fair volume of business is being offered. A higher tendency is noted. Quotations are as follows:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |

| | | | |
|---|---|---|---|
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Iron Bars and Steel Still Hold Strong*

**Toronto.**

IRON BARS AND STEEL show no change in price, although this commodity is very scarce. Production, it is stated, has greatly increased within the past week, although it is not known how soon shipments will arrive in Canada from the United States. The scarcity of labor seems to be one of the main drawbacks, many manufacturers claiming that they are almost held up for labor. German competition in steel is expected not only in France, but in England, where high prices show no signs of being checked. Arrangements are about completed whereby a French syndicate of steel companies will take over iron and steel works in Lorraine, which have been under the control of the French Government since armistice. Quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Scrap Materials Remain Unchanged*

**Toronto.**

WASTE MATERIALS.—At the present writing waste materials are rather dull. The general industrial disturbance, with innumerable lockouts, strikes and embargoes, has materially held back production and choked off the expansion that should be in full play by this time. Cast iron has shown some activity; the future prospects are bright and higher prices are looked for immediately the coal situation and general unrest have been satisfactorily settled. The present quotations are:

| Dealers' Buying Prices— | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 12 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red Brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 18 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 07 |
| Overseas, lumbermen's rubber boots | .... | 0 05 |
| Bicycle tires | .... | 0 1½ |
| Automobile tires | .... | 0 03 |

## *Wrought Pipe Continues Scarce*

**Toronto.**

WROUGHT PIPE.—Owing to the shortage of skelp, wrought and steel pipe are very scarce, and some report almost a famine. It is not expected an advance will immediately take place, although the situation is very unsettled.

INGOT METALS.—These are very firm with a strong tendency to advance generally, although copper shows some weakness while spelter and antimony show a higher price. The producers are finding it difficult to meet the general requirements of their customers, and a warehouse business seems to be the order. Considerable anxiety is being felt regarding the coal situation.

COPPER.—This is in a fair demand although the price shows a decline. It is not expected the price will stay for any length of time at this figure. The European situation has not cleared to any noticeable extent, and no one seems to be able to predict just what will happen as some of the foremost financiers' predictions seem so far off the mark and hardly signify the state of affairs from day to day. It is to be wondered just how the money situation between the different countries will work out, as almost every nation has a different rate of exchange, and American money is worth in some cases seven times as much as some European.

SPELTER.—This has been showing good returns, and as predicted by HARDWARE AND METAL last week has taken the forecast advance. Business still continues fair, the price now quoting being 10c per pound.

LEAD.—The market still holds firm for this product, although no change is noted this week. Consumers are still inclined to stock, which is giving the situation a firm tone. Lead is now quoting at 8c per pound.

ALUMINUM.—A fair quantity is being handled, with the average demand. The price is firm with no change showing at present, the quotation now showing being 34c per pound.

ANTIMONY.—Antimony advanced to 11½c per pound this week. The price holds firm and a good volume is being handled.

TIN.—Tin still holds firm. Most industries have been interrupted by the strike of general labor, and transportation difficulties and owing to the price and unsteadiness of the markets considerable number of firms have been living from hand to mouth, and it is believed that in most cases they have been only lightly covered. This has a tendency to keep the market very unsettled, and considerably firmer. The quotations now going are from 59c to 60c per pound.

# LONDON MARKETS

LONDON, Ont., Oct. 30—The demand for most seasonable lines far exceeds the supply and merchants all through this district are handicapped by not being able to get sufficient merchandise to fill orders. Prices are very firm generally, while advances are shown in Richards & Wilcox mounted grindstones, Frost King weatherstrip, O-Cedar mops and polishes and wrought nipples. Auto coaster waggons, which were advanced last week, are advanced again this week. A general advance is shown also in cotton goods.

Higher prices are expected in turpentine. Linseed oil prices are lower.

Building continues brisk and there is a heavy demand for builders' hardware. Plans are still being prepared for new dwellings and indications point to a heavy spring demand for materials. Collections generally are reported excellent.

## *Another Advance in Auto Coaster Wagons*

**London. Ont.**

AUTO COASTER WAGONS. — Although an advance was noted in these goods last week, prices have again been revised upwards, and quotations are now figured at 35 per cent. from new list, as follows: No. 00, $32.89; No. 01, $58.27; No. 1, $70.30; No. 2, $77.71; No. 3, $86.03; No. 4, $98.05 dozen.

## *Neverslip Calks and Shoes Show No Change*

**London. Ont.**

CALKS AND SHOES.—There is a fair demand for Neverslip calks and shoes. Quotations show no change, and are as follows:

Extra light drilled and tapped shoes—No. 1, 40c pair; No. 2, 40c pair; No. 3, 45c pair; No. 4, 45c pair; No. 5, 50c pair. All less 10 per cent.

Neverslip Calks—4 x 5-16 in., $2.80 per 100; ⅜ in., $2.80; 7-16 in. and ½ in., $3.00; 9-16 in. and ⅝ in., $3.20. Less 15 per cent.

## *O-Cedar Mops, Polishes Now Sold at Net Cash*

**London. Ont.**

MOPS, POLISHES.—O-Cedar mops and polishes are now sold at net cash, thirty days, in place of 2 per cent. thirty days. Quotations are as follows: Mops, No. 1, No. 3, No. 5, No. 14. $12.60 per dozen, net cash. Polishes, 4 oz., $2.10; 12 oz., $4.20; quarts, $10.50; ½ gallons, $16.80; 1 gallon, $25.20 dozen, net cash.

## *Cotton Goods Are Up About Five Per Cent.*

**London. Ont.**

COTTON GOODS.—New and higher quotations are effective on cotton goods. The advances figure out to about five per cent. Quotations are as follows:

Sash cord—No. 6, 80c lb.; No. 7, 79c; Nos. 8, 9, 10 and 12, 78c.
Braided awning cord—No. 3, $2.15 per dozen; 3½, $2.50 dozen; 4, $4.00 dozen; 4½, $5.50 dozen.
Cotton rope—3-16 in., 77c lb.; ¼ in. and larger, 76c lb.
Twisted cotton clothes lines—30 ft., $2.85 per dozen; 48 ft., $4.15 dozen; 60 ft., $5.15 dozen.
Candlewick, 83c lb.
Seine twine—No. 15 and smaller in 1 lbs., 96c lb.; No. 15 and smaller, in ¼ lbs., 97c lb.; No. 18 and larfer, in 1 lbs., 95c lb.; No. 18 and larger, in ¼ lbs., 96c lb.
Lamp wick, 32-yd. rolls—Nutmeg, 70c per roll; O, 80c roll; A, $1.00 roll; B, $1.45 roll; D, $2.35.

## *Higher Quotations on Weather Strip*

**London, Ont.**

WEATHER STRIP.—New and higher prices have been named on Frost King weather strip, the quotation being $4.65 per dozen packages.

## *Stove Boards and Ash Sifters Selling*

**London, Ont.**

STOVE BOARDS, ASH SIFTERS.—There is a good demand for these lines. Prices are as follows: Stove boards, wood lined, 30 and 5 per cent.; paper lined, 40 and 5 per cent.

ASH SIFTERS. — Common wood sides, $3.00 per dozen; Banner, $3.20 each; Rocker No. 1, $4.75 each.

## *Snow Shovels and Furnace Scoops Sell*

**London, Ont.**

SNOW SHOVELS, FURNACE SCOOPS.—There is a good demand for these goods. Quotations are as follows: Furnace scoops, long handle, $8.75; D handle, $8.75 per dozen.

SNOW SHOVELS.—Canadian shovel make, Jones. Prince, No. 20, $7.88; Queen, No. 30, $8.75; King, No. 40, $10.-50; Moose, No. 50, $13.16 dozen.

## *Call For Linoleums, Oil Cloth Binding*

**London, Ont.**

BINDING.—There is a call for both linoleum binding and oilcloth binding. Quotations are as follows:

OIL CLOTH BINDING.—Zinc, 6-4, $1.60 per dozen packages; zinc, 8-4, $2.10 dozen; brass, 6-4, $3.60 per dozen packages; brass, 8-4, $4.50 dozen.

LINOLEUM BINDING.—Zinc, 50 yards to box, 9-16, $4.00 per 100 yards; ¾, $4.25 per 100 yards; ⅞, $4.50 per 100 yards.

BRASS.—9-16, $5.50 per 100 yards; ¾, $6.50 per 100 yards; ⅞, $7.00 per 100 yards.

## *Advance Shown in Mounted Grindstones*

**London. Ont.**

MOUNTED GRINDSTONES.—New and higher quotations are in effect for Richards Wilcox mounted grindstones. The new price is No. 300, $7.20 each.

## *Limited Supplies of Large Head Nails*

**London. Ont.**

AMERICAN LARGE HEAD ROOFING NAILS.—While there is a good sale for these nails, supplies are limited at present. Quotations are as follows: Kegs, $9.00 per 100 lbs.; 25 lb. boxes, $9.50 per 100 lbs.

## *Nails Selling Well; Prices Are Very Firm*

**London, Ont.**

NAILS.—There is an active demand for nails. Prices are very firm. Quotations are: wire, $4.70 base; cut, $4.75 base.

## *Higher Quotations on Wrought Nipples*

**London, Ont.**

WROUGHT NIPPLES. — Wrought nipples have advanced, the quotations now being 4 in. diameter and smaller, 77½ per cent. off list.

## *Demand is Brisk For Oil Heaters*

**London, Ont.**

OIL HEATERS.—Oil heaters are selling well. Quotations are as follows: Perfection, No. 525, $7.00 each; No. 530, $8.25 each; No. 630, $10.25 each, less 25 per cent.

Wicks for above on carrier, No. 500, $3.45 per dozen.

## *White Lead in Oil Remains Unchanged*

**London, Ont.**

WHITE LEAD IN OIL.—There is a fair sale for white lead in oil. Prices are holding without change, the quotations being: Pure, tons, $16.35 per 100 lbs.; less tons, $16.70; Elephant, tons, $16.95; less tons, $17.30.

## *Turpentine May Advance Shortly*

**London, Ont.**

TURPENTINE.—While quotations on turpentine show no change, an advance shortly is not unlikely. Quotations are as follows: 1 bbl. lots, $2.45 per imperial gallon; 2 to 4 bbl. lots, $2.44 per imperial gallon; 5 gallon lots, $2.55 per imperial gallon.

## *Reduction Made in Linseed Oil*

**London, Ont.**

LINSEED OIL.—New and lower prices have been named on linseed oil. bbls., $2.62; 3 to 5, $2.61; 6 to 9, $2.59 The quotations are as follows: 1 to 2 gallon; boiled, 1 to 2 bbls. $2.65; 3 to 5, $2.64; 6 to 9, $2.62 gallon; less bbls., add 10 cents a gallon.

# WINNIPEG MARKETS

WINNIPEG, Oct. 30—Market prices during the past week again show a number of price changes and in all cases these register advances, including such lines as belt rivets and burrs, tinners' rivets, carriage rivets, wagon box rivets, Ingersoll watches, orange and white shellac and pipe taps, and from present indications further advances are to be expected in many other staple lines between now and the first of the year.

Business still continues fairly brisk in all lines, particularly the seasonable lines, while sorting business is also reported good in all general lines of shelf goods.

## *Rivets Show Five to Ten Per Cent. Advance*

**Winnipeg.**

RIVETS.—Following revisions by the manufacturers, new prices have been named on coppered and iron rivets, which show a general advance of between 5 and 10 per cent. over former quotations. The following are to-day's ruling prices:

Coppered rivets and burrs, assorted—No. 8, 32c lb.; No. 10, 34c lb.
Coppered rivets only—No. 8, 20c lb; No. 10, 21c.
Coppered burrs—No. 8, 32c lb.; No. 10, 34c lb.
Tinned rivets—No. 8, 25c lb.; No. 10, 26c lb.
Tinned burrs—No. 8, 42c lb.; No. 10, 44c lb.
Carriage rivets—No. 6, ½ and ⅝, 16c lb.; ¾ and ⅞, 15½c lb.; 1 in. to 2 in., 15c lb. No. 3—¼ and ⅝, 15c lb.; ¾ and ⅞, 15c lb.; 1 to 3 in., 14½c lb. No. 1—½ to ⅝, 15c lb.; ¾ to ⅞, 15c lb.; 1 to 3 in., 14½c lb. No. 0—½ to ⅝, 15c lb.; ¾ to ⅞, 15c lb.; 1 to 3 in., 14½c lb.
Hame rivets—No. 7, ¾ in., 16c lb.; ⅞ in., 15½c lb.; 1 in., 15c lb.
Tinners' rivets—Black, 8 oz., 16c; 10 oz., 17½c; 12 oz., 19c; 14 oz., 20½c; 1 lb., 21c; 1¼ lbs., 23c; 1½ lbs., 27c; 1¾ lbs., 30c; 2 lbs., 32c; 2½ lbs., 41c; 3 lbs., 45c; 3½ lbs., 53c; 4 lbs., 58c; 5 lbs., 73c; 6 lbs., 81c; 7 lbs., 95c; 8 lbs., $1.09 per 1,000. Tinned, 8 oz., 23c; 10 oz., 26c; 12 oz., 28c; 14 oz., 31c; 1 lb., 34c; 1¼ lbs., 39c; 1½ lbs., 47c; 1¾ lbs., 53c; 2 lbs., 58c; 2½ lbs., 73c; 3 lbs., 83c; 3½ lbs., 97c; 4 lbs., $1.08; 5 lbs., $1.37; 6 lbs., $1.58; 7 lbs., $1.85; 8 lbs., $2.10 per 1,000.
Wagon box rivets—No. 6, 16c; No. 3, 16c; No. 1, 16c lb.

## *Ingersoll Watches Are Revised Upwards*

**Winnipeg.**

INGERSOLL WATCHES. — Another heavy advance has just gone into effect on Ingersoll watches following a recent revision by the manufacturers. To-day's prices are given as follows: Maple Leaf, $1.80 each: Eclipse, $2.65; Junior, $3.15; Reliance, $5.50; Midget, $3.15; Midget Wrist, $3.35; Waterbury Radolite, $5; Maple Leaf Radolite, $2.35; Midget Wrist Radolite, $3.90.

## *White and Orange Shellacs Are Higher*

**Winnipeg.**

SHELLAC.—New prices are now effective covering orange and white shellacs, both of which show an advance on

previous prices. To-day's ruling prices are given as follows: Orange shellac, 1-16 gal., $7.50; ⅛ gal., $7.10; ¼ gal., $6.90; ½ gal., $6.50; 1 gal., $6.30. White, $8, $7.60, $7.40, $7, $6.80 respectively.

## *Pipe Taps Are Slightly Higher*

Winnipeg.

PIPE TAPS.—Pipe taps show a slight upward trend during the week, and new prices average approximately 5 per cent. in excess of former quotations. To-day's ruling prices are given as follows: Pipe taps, ⅜ in., 48c; ¼ in., 57c; ⅜ in., 76c; ½ in., 95c; ¾ in., $1.33; 1 in., $2.09; 1¼ in., $2.50; 1½ in., $3.30; 2 in., $5 each.

## *Advance is Likely in Price of Wrenches*

Winnipeg.

WRENCHES.—Prices on wrenches of all kinds continue very firm, and from present indications higher prices are to be expected as raw materials will be seriously affected by the present steel strike, while wages will also play a big part in production costs. To-day's market prices on the various lines are confirmed as follows:

Agricultural wrenches—6 in., $6.70; 8 in., $8.00; 10 in., $9.40; 12 in., $12.00; 15 in., $16.80 doz.

Perfect handle wrenches—6 in., $12.00; 8 in., $14.40; 10 in., $16.80; 12 in., $21.60; 15 in., $28.80 doz.

Stilson pipe wrenches—6 in., $1.00; 8 in., $1.15; 10 in., $1.25; 14 in., $1.75; 18 in., $2.50; 24 in., $3.65; 36 in., $6.75 each.

Trimo pipe wrenches—10 in, $1.60; 14 in., $2.10; 18 in., $3.00; 24 in., $4.35 each.

## *Linseed Oil Prices Are Holding Firmly*

Winnipeg.

LINSEED OIL.—Linseed oil prices continue firm on the local market, and from present indications no decline is anticipated in the near future. The demand at present is reported very light, while stocks are below normal. To-day's market prices are given herewith: Linseed oil, raw, in barrels, $2.75 gal.; boiled, $2.78 gal.

## *No Changes Shown in Turpentine Quotations*

Winnipeg.

TURPENTINE. — Turpentine prices are still holding very firm on the local market with only a limited demand, while reports from American markets show concessions in prices at some points. This is attributed to the fact that much of the export trade has been held up on account of strikes, and as soon as shipment begins to move prices will stiffen. To-day's prices are confirmed as follows: Barrel lots, $2.65 per gal.; 5 gal. lots, $2.70; 1 gal. lots, $2.70, plus the usual extras for containers.

# PITTSBURGH MARKETS

PITTSBURGH, October 30.—The rate of recession of the iron and steel strike continues to be a very slow one, though it has improved a trifle in the past week or two. While production was down to about 50 per cent., taking the steel industry as a whole, at the middle of the first week of the strike, it is now, after five weeks of strike, fully 60 per cent. Gains of two or three per cent. a week, however, are very small, considering that the strike, through its own efforts, never had a chance of winning when the first week showed that it could not close more than half the industry.

There has been a theory that the strike was being kept going by hopes of intervention from Washington. If so, that hope must now be gone. The Senate committee on education and labor, which investigated the strike, concluded that the strike was almost wholly by the foreign-born, ignorant of the language of the country, and decided to urge legislation to Americanize foreigners. The labor or industrial conference, which had been urged to take up the steel strike, is disbanded. Wednesday, October 22, the labor group bolted because its resolution favoring collective bargaining was not adopted. President Wilson then asked the public group to continue the work, thus politely relieving the employers' group from further activity, but after a couple of days the public group concluded it could do nothing, and disbanded. So far as Pittsburgh opinion is concerned, the failure of the conference created no surprise. There had been much doubt whether such a conference would get anywhere.

It is too soon to observe whether the collapse of the labor conference is going to cause the strike to crumble more rapidly. It must be remembered that labor was in rather short supply in the iron and steel industry before the strike, and even with the strike entirely over the mills are likely to be somewhat short of men. Furthermore, the strike has been causing much moving around of men, and working forces will be more or less disorganized for some time, thus restricting production. One observer estimates that even if the strike now wanes rapidly it will be six months from now before working forces are as efficient and well balanced as before the strike.

### Gains in Output

In Western Pennsylvania employment has increased somewhat in the week. Except for a few plants there are approximately as many men as needed, but taking the region as a whole production is 10 to 15 per cent. under normal. The has been in the case of the Lackawanna Steel Company, in the Buffalo district, whose works were completely closed at the beginning of the strike, but which are now showing a moderately fair operation. The tonnage is not altogether in proportion to the number of men in employment, but is increasing. Other works in the Buffalo district that were affected by the strike are doing better.

The Mahoning Valley in Ohio, which comprises about 10 per cent. of the country's steel making capacity, was closed tight within the first two days of the strike. It is expected that whenever operations should be resumed in the valley, and particularly at Youngstown, the principal point, the resumption would occur through there being a general break in the strike. That, however, has not been the course. Three weeks ago one blast furnace in Youngstown resumed, but even now only a small percentage of the capacity of the valley is in operation. It is understood that in many cases the men at work are living inside the mills.

The Wheeling district remains closed tight, except for a few sheet and tin mills in Wheeling that have operated right along, and two or three plants on the outskirts of the district. It is the common belief that it is at Wheeling that the strike will hang on the longest, the district being famous for strikes and labor troubles generally. Reports from Gary and Chicago are that operations are heavier in that district, though it is very doubtful whether production there approaches 50 per cent. of normal. The whole South continues to operate normally, as does Eastern Pennsylvania.

### Steel Price Prospects

If the law of supply and demand were allowed free play it would send steel prices up. Steel was by no means plentiful before the strike, yet the mills were making approximately as much as they could, their output being between 85 and 90 per cent. of capacity, and at the rate of about 2,500,000 gross tons of finished rolled steel a month. The deficiency in output in the first month of the strike was between 1,000,000 and 1,250,000 tons, and the second month, now entered upon, promises to witness loss of by far the better part of a million tons, so that even if the strike should now recede rapidly there is indicated a deficiency of at least 2,500,000 tons, or a whole month's production, since after the men are all back at work production will not at once jump to normal. Before the strike steel prices were strong, and they are low rather high compared with commodity prices in general. The March 21 steel prices, which have remained since then as the quotable market, are 81 per cent. above the ten-year pre-war average of steel prices. The Dun and Bradstreet index numbers, of commodities in general, have advanced since March 21, and now stand at 112 per cent. and 128 per cent. respectively above their corresponding pre-war averages. Demand and supply would point to higher steel prices, and relationship of steel to other commodities would point the same way.

From the present outlook, however, the prospect is that basis steel prices will not advance. While no formal announcement has been made, there is much reason for believing that the United States Steel Corporation is strongly opposed to there being any price advances, either during or for some time after the strike, and some of the large independents may line up on that side. The smaller mills, those that do not sell far ahead, would undoubtedly charge all

they could get, and that would mean premiums on early deliveries, with prices unchanged for delivery at mill convenience.

All the indications are that demand for steel will be heavy for a long time to come. The cost of making steel is not likely to decrease materially, and is much more likely to increase. When the strike is all over the mills will consider the matter of adopting the eight-hour shift as against the present twelve-hour shift, and its adoption will probably hinge largely upon the question of its being possible to obtain the additional men needed. If that is done men will receive less pay per day but higher pay per hour and thus the wage cost of making steel will increase. With values of commodities generally so much higher, relatively, than steel prices, it is not entirely improbable that in the long run steel prices will advance. Some time in the future there will be panic and industrial depression, with men hunting jobs instead of shirking work, but practically everyone expects that time to be several years in the future, leaving time for various fluctuations to occur meanwhile.

Pig iron is strong and advancing, largely in line with its strong tone before the strike, rather than because of the strike. While the strike has closed a few merchant furnaces it has also decreased the quantity of merchant pig iron used directly or indirectly by the steel works, so that advances in pig iron are not to be ascribed wholly, or perhaps even largely, to the strike. The lake front furnaces at Chicago, Cleveland and Buffalo have been greatly affected by the strike, but few furnaces elsewhere are idle from strike.

## HE WAS SELECTED FROM 35,000 EMPLOYEES

Continued from page 84

centage of offenders among our own employees is very small.

### Courtesy Essential

"We attach great importance to courtesy. Mr. Woolworth not only long ago adopted the now popular injunction, 'The customer is always right,' but he had a habit of every now and again sending a telegram to every store to some such effect as this:

"'Good morning! Did you say good morning to each customer this morning?

"'FRANK W. WOOLWORTH.'

Any lack of politeness is fatal to the prosperity of the store.

"Next to polite service we impress upon all our workers the importance of prompt service. People may not mind spending half an hour walking leisurely through a store looking at goods, but once they ask for an article they are impatient if they are not served immediately. The merchant who aspires to be successful must take into account all such idiosyncrasies of the buying public and cater to them.

### Took Much Pride

"Mr. Woolworth took great pride in the intense loyalty of his organization. Not only were all the district managers and executives brought together from all parts of the country once a month for a lengthy conference, but once or twice a year Mr. Woolworth invited each district office to send representatives to a golf tournament at Glen Cove, Long Island, where he had his country home. A cup was presented to the winner, usually at a festive dinner, where 'the boys,' as he called them, had opportunity to get better acquainted.

"One of his greatest satisfactions in life was that he had been instrumental in enabling hundreds of his associates to amass fortunes. The more money any of his men made, the happier he was—and of course the better it was for the company, since all commissions earned represented just so much profits for the company. He used to be fond of remarking that some men had one partner and some a few, but that he had more than a thousand. He believed that the best way to build up any business was to give the men in it a chance to earn big money by sharing the profits they directly helped to earn.

### Two Understudies

"Another of our principles is to have at least one, and, wherever possible, two understudies for every position in the organization. No matter who becomes sick or dies or goes off on a vacation or a trip, somebody is ready to fill the place efficiently.

"Organize, systematize, deputize, and economize, has been our guiding maxim. Mr. Woolworth tried always to look and plan five or ten years ahead, and his ambition was to establish a store in every civilized town in the world. Now that the war is over, instead of opening one new store every week, we will be in a position to branch out more rapidly, and although Mr. Woolworth's goal seems a high and distant one, we mean to press courageously toward it."

## BIG MARKET FOR FUEL OIL

France is in the market for about $50,000,000 worth of American fuel oil annually, according to figures submitted to the meeting of the oil group of the International Trade Conference at New York by Captain Ingouf of the French mission. He said that outside an annual output of 50,000 tons in Alsace, France had to buy practically all her oil from other countries. Before the war the yearly consumption was 120,000 tons, but the demand had now risen to 500,000 tons yearly, one-half kerosene and one-half gasoline. More was being required for fuel purposes also, because France, like other countries, was short of coal. As to road oil, there are 440,000 miles of roads in France, 14 per cent. of which require reconstruction. For this reason there may be a demand for oil for surfacing.

## SAYS AUTO ACCESSORIES EASY

(Continued from page 51)

up this way, regardless of the convenience.

### Carefully Trained

Mr. Mathewson looks with pride and confidence on his two sons, Victor and Aldon. He has thoroughly trained each to his particular adaptability and this may have had more than anything to do with his success.

Aldon, who is mechanically inclined, was trained in the workshop, and now has full control of their large works, which employ twenty men and where possible try to employ returned men. Besides the general furnace work the firm manufacture fire doors and skylights and have developed a large business and successfully handle a large amount of this work in conjunction with the builders' hardware department.

Victor has charge of the hardware store, and personally supervises the shipping and delivery of goods, and all store displays and arrangements, and invariably dresses the windows himself. He claims the above mentioned are the most vital factors in successful merchandising. He also has allotted a special department to each clerk, so that all feel a certain responsibility for the success and well-being of the firm.

*Signs of the Times*

# Make Winter Months, Profit Months

## Keep Things Moving in the Paint Department—People Can be Educated Into Doing Indoor Work During the Cold Weather by the Right Kind of Arguments

WHEN the bear crawls in for the winter, he becomes oblivious to his surroundings; not so with humans, they need their homes bright, cheery and comfortable. Floors need to be kept in good condition for sanitary and social purposes and for appearance sake. Walls require bright, warm decoration. Woodwork must be freshened up. Furniture requires renewal and adapting to longer service or to new uses.

There are any number of reasons for keeping up the sale of paints and varnishes during the late fall and winter.

It's going to be Johnny's first Christmas home after a long period overseas. The family want to do themselves proud at these festivities. Paints and varnishes will help along immensely to make the old home the bright, cheerful old place that it was when Johnny knew Santa Claus as the real personality that he has always been pictured.

### Need Paint and Varnish

Kate, Jane and Matilda, who have been waiting and longing for their boys to come marching back home again, have been nervously busy arranging their trousseaux and turning the house upside down in preparation for the eventful day. Paints and varnishes are not going to be overlooked for such an occasion.

The plain old-fashioned annual Christmas reunion, when Grandpa and Grandma and Uncle Will and Aunt Sophie and the kiddies all gather together will necessitate the refurbishing of things in general.

The day in and day out care of the home by the "better half" of the house finds no let up in her steady effort to maintain coziness and economy. Paints and varnishes are constant allies in her warfare against wear and tear and any tendency towards shabbiness.

### Silent Influences

There are hundreds of silent influences in the care and upkeep of the home that are potent with possible paint sales for the paint and varnish dealer who will bring them to actual business, profit with suitable window displays, seasonable advertising and suggestive ideas that will bring those lurking longings to active buying desire.

Take floors for instane, and as a starter—whether they be hardwood, softwood, linoleum or just borders about the rug, they are in for a hard winter. Heavy boots, melting snow, and romping kiddies are going to put them to the hardest test unless their surfaces are properly varnished, painted or waxed. Does your trade fully realize that you have a line of crack fillers, varnishes, floor paints, linoleum varnishes, floor waxes and polishing oils that will put them in good condition? Certainly they do not if you don't use your windows and advertising to suggest possibilities of good floor upkeep. Supposing your trade does realize all of this, (which they seldom do not), are you going to let your competitor, or the mail order catalogue run away with this business because they keep these lines in prominence while you hustled them to the back of the store, or forgot about them when the first leaves began to fall.

### It is Being Done

"People don't do that sort of thing at this time of year," says someone in excuse. Nor did the flappers wear fox furs in the hot days of July till the fashion magazines suggested the idea. Whether these are comfortable or not, I'm not prepared to say, but it's being done just the same, because the fashion fellows started the notion in their advertising.

The sensibleness of painting and varnishing indoor surfaces during the indoor months is far more reasonable, both from the standpoint of comfort and economy. "Afraid to try it," is indicated in the attitude of many paint and varnish dealers when such innovations are proposed. John Wanamaker, Marshall Field, Whiteley, and many others in the retail field occupy the positions they do to-day, because of their own innovations and initiative along lines that no other retail merchant thought it was possible to carry out.

It was once proposed to Whiteley, of London, England, that he sell a white elephant and a pint of fleas. Whiteley did it and got his money for them.

The trouble has been that the average retail merchandising of the country is too prone to follow the habits of the public, rather than make the habits of the public follow their merchandising. The former method lulls to sleep in the following of a rut that will change but little unless some dynamic merchandising force upheaves it into new channels. The latter has been accomplished and accomplished in a big way.

Corn-flakes, postum, wall boards, phonographs and many other profitable commodities have become a habit because they were kept constantly in the minds of the public with both general and local publicity.

**Ontario—Whites Ltd., 41 Hurontario St., Collingwood, Ont.**
**Edwin Chown & Son, Kingston, Ont.**

## Benjamin Moore & Company, Limited

TORONTO [illegible] WINNIPEG

Yes! the habits of the public in regard to the use of paints and varnishes can be shaped and changed and done so quickly. But not if the paint stock and displays and suggestive ideas are kept under the counter and in the back of the store.

Something like the old lady and the mouse trap. She caught mice when she kept it baited and near the mouse holes, but she only caught her finger when she kept it in the cupboard drawer.

**Rests With Women**

But the crux of the indoor month painting habit rests with the women. They are the ones who face conditions within the home from the first to the thirty-first of the winter months. They realize where the wear and tear is going on most rapidly. They are the first to want changes and alterations that require paints and varnishes. They appreciate most thoroughly any suggestions that paints and varnishes can offer for improving home life and the economy of upkeep.

Even the women whom circumstances favor with less constant contact with home, desire the service that paints and varnishes can render in maintaining the upkeep or decorative innovations necessary for their social activities.

Coming to the ledger side of the business. A more or less constant moving of paints and varnishes during the winter months contributes towards increasing the much sought increased turnover. Increased turnover puts a favorable crimp in ever-present overhead expense. Increased turnover keeps invested capital on the hop, step and jump, and when capital is jingling around in this way, it loosens up more profit than when sluggishly slumbering on the shelf.

**Time For a Change**

The paint department of the past that has been amiably ambling along behind the fixed spring buying habit of the consumer, has grown to no mean importance. Slowly this public habit has been drifting into the fall painting habit as well and the paint department has met its need of profit accordingly. Now let it dance along merrily through the year as an all-year, every-month-a-profit-month department by encouraging indoor-month painting, fall painting, and still more painting in the spring.

It can be done if paint dealers will seasonably arrange their paint departments and advertising to encourage these new habits. Let your paint departments lead, don't allow them to follow; it's the early birds and the leaders that pick up the worms and lap up the cream and the other good things that come to those who are first. **Oh, yes! it can be done.**

# The Brush Department

## Advances in Brush Prices Not Proportionate to Raw Material Costs

### Manufacturer Gives Concrete Instance of Prices To-Day and in 1913, Showing That Figures Now Are Four Times Greater

SCARCITY and high prices of bristles used in the manufacture of paint, scrub and other kinds of brushes offer no immediate relief, in the opinion of Mr. E. C. Boeckh, of the Boeckh Company, for the continued high price to the retailer. Other than the increased difficulty in securing the raw material due to the fact that Russian bristles are no longer available, there are a number of contributory causes which tend to constantly increase the cost of brushes. Mr. Boeckh states, however, that the cost to the retailer has not advanced in proportion to the increased cost of raw material.

In referring to advanced prices of raw material, Mr. Boeckh said that one size of bristles had advanced 115 per cent. since 1913. Another size, one-quarter of an inch longer, had advanced 250 per cent.; while other advances range from 190 to 250 per cent. The average advance on bristles, Mr. Boeckh fixed at about 150 per cent. since 1913.

Black, white and grey fibre, used in the manufacture of scrub and whitewash brushes, advanced since 1913 on an average of 110 per cent., and Mr. Boeckh produced a letter just received from, possibly, the largest wholesale house on the continent, advising him that all quotations on these fibres were withdrawn.

**Other Big Factors**

Other factors which enter into the cost to the retailer are war duty, exchange, increased freight rates and the price of silver. On bristles from the United States there is a 7½ per cent. war duty, the exchange is 3½ per cent., and the freight rates have advanced. Where the freight rate from England used to be about two per cent. per pound, it is now 11½ per cent. of the value of the shipment. The price of silver has to be reckoned with, because all bristles, which now come from China, have to be paid for in silver. In 1915, silver was 50 cents a pound; in 1918, it had advanced to 96 cents, and the price now is $1.20.

**Price Has Quadrupled**

A concrete example was given by Mr. Boeckh of the advance in price of material when laid down in his warehouse. In 1913, a shipment of 78 cases was received which cost them $5.912. This same shipment to-day, freight and duty added, would cost them $23,952.

In spite of all, business is brisk, and combined with the uncertainty prevailing in the labor market, the rapid advance in prices, Mr. Boeckh states that his chief difficulty is to fill the orders received.

---

### SHERWIN-WILLIAMS EXPANDING

Extensions to the various plants of the Sherwin-Williams Company at Montreal are now planned and will be undertaken in the immediate future.

"Factory facilities, additional storage, and increased oil mill capacity will be provided," said Mr. W. S. Fallis, the managing director to HARDWARE AND METAL. The steady growth of the business and demands made upon the present equipment and plant make it necessary to undertake this extension programme in the immediate future. These plans will make it possible to maintain and extend the present service of the company, and in its oil mill extension, particularly, the increased facilities will fill a need that has existed for some time. The new additions will be made to the head Canadian plant on Centre Street.

### WILL RECOMMEND EARLY BUYING

"We shall advise our customers to buy their spring paint requirements early," said Royal Cluxton, manager of the Canada Paint Co., Ltd., Montreal, to HARDWARE AND METAL. "Industrial conditions are such that it will be worth while for the dealer to get his supplies early. It will be to his advantage all around, and of course he will get spring dating on these shipments. If he places his orders early it will make a better service all around."

### TO DOUBLE OXIDE OUTPUT

The Canada Paint Co., Ltd., Montreal, is planning to extend its facilities for mining oxides at Red Mill, Quebec. This will call for the expansion of milling facilities, and ores taken from the mines will be available later in increased quantities. The plan is to double the output. Already, it is stated, the increased output is quite readily absorbed, there being considerable export of the same.

It is also planned, HARDWARE AND METAL is informed, to extend the plant at the head office, William Street, Montreal. Here the facilities will be increased for the manufacture of insecticides 50 per cent., while on various lines of paint an increase of 25 per cent. in output is planned. This will enable the firm to manufacture supplies in advance, thus ensuring speedier delivery of orders as received.

## "The Right Paint to Paint Right"

Right, because it's properly manufactured all the way through. The materials are selected as material ought to be. It is ground with exacting care and inspected and tested at every stage of manufacture. No brushing or covering test is too severe if it is within the bounds of practical paint making.

## HE WAS SELECTED FROM 35,000 EMPLOYEES

Continued from page 67

be done, a share of the profits they themselves help to make.

"There are practically in our whole force, from store manager up, only myself and three vice-presidents who draw a salary. Every store manager is dependent upon the profits his store makes; every district manager's income is regulated by what his district makes; and those of us who are executives at headquarters get a share of the general results for the year. This means that every responsible employee, particularly every manager of a store, feels that he is a direct partner, and that the greater the profits the larger the income received.

### Must Have Loyalty

"You cannot run any large enterprise successfully without loyalty and enthusiasm through all ranks. The way to secure this loyalty and enthusiasm is to pay for it. Every man has a chance to develop initiative, and if he makes good he gets a large share of the profit. In a sense each one is in business for himself as a local merchant, part of his local community. He employs his own help, orders such goods as he thinks best and in any quantity he desires. We virtually set him up in business; furnish him a store, stock it with goods, and teach him how to get the best results in store management. The rest is up to him. Of course if he doesn't succeed, we have to put another man in his place. We never go outside the organization for a man to fill any position above a clerk, and all the important men have understudies training to fill their positions at any moment."

"You emphasize foresight. Can you give me a concrete illustration?" I asked.

"Yes. As soon as it was announced that the United States Steel Corporation was to build a large plant at Gary, Indiana, we obtained a copy of the plans, studied out which would be the best location, and before fifty houses had been built a Woolworth store was ready to handle the business which we knew would come.

### Get the Facts

"How do we not only look before we leap, but take detailed measurements of where we are to land? Well, for one thing we are constantly compiling what is virtually a census of the United States. We not only procure promptly every helpful report compiled by the Census Bureau at Washington, and by all state census bureaus, but the head of the eleven districts into which we have divided the country keeps the closest possible tab on the trend of population, and reports to us the places that are growing and those that are declining. We shun dead or decaying towns. We open on an average at least one store every week. Very often our decision to open a new store is based upon the statistical information supplied by our own district men, or by our own buyers or traveling superintendents, or others of our forty men on the road; but not infrequently we receive tips from manufacturers or buyers with whom we do business, from real estate men, or even from outsiders who write to us. Then we watch all newspapers for clues. Every suggestion, no matter what its source, receives careful consideration.

### Examine Situation

"Once we have made up our minds that a certain place looks like a good prospect, we send one of our corps of experts to examine the situation. He finds out everything possible about the general position and prosperity of the town, and if he is satisfied that a store is likely to succeed he proceeds to determine the ideal location. Having ascertained the best and busiest shopping centre, he next investigates available space. The next, and very important, step is to take a complete count of the number of people who pass different possible sites each hour of each day. We always go with the business tide; we never attempt to buck it.

"It would often be fatal even to open on the left side of a street if the right side is the popular one—and it is curious how many streets there are which are prosperous on one side and not on the other. We found, I recall, when we investigated Brooklyn, that Fulton Street was the choice location, provided we could get space on the east side. Rather than venture to start on the west side, we waited our chance to obtain a building on the best side.

"We were ridiculed a good deal when it became known that we contemplated opening a large store on Fifth Avenue opposite the New York Public Library; but the acid test had been applied to this location and we were confident that the innovation would prove extremely profitable. There was a time when only the poorer people patronized our stores; but this began to change about fifteen years ago, and for the last eight or ten years we have done almost as much business with the well-to-do as with the less well-to-do.

### Got the Goods

"We were confident that the tide of shoppers on Fifth Avenue would not flow past our doors if we stock up with suitable merchandise. From the very first day, when forty-five thousand persons swarmed into the store, it has made money every time the doors have been opened. A great many rich people drop in and make, not one purchase, but a dozen or a score or more. They get a lot of things, for example, for their children. Also, it is not uncommon for philanthropically-inclined men and women to buy enormous quantities of five and ten cent articles for children's homes or nurseries or other charitable institutions.

### Important Feature

"The main consideration, of course, is to stock each store with the kind of articles that are used in that particular locality. We sell thousands of sunbonnets in stores in agricultural districts, but we wouldn't expect a demand for them on Fifth Avenue. Nor would we load up on Fifth Avenue with the tin lunch pails and boxes which many miners use. Each store manager is given an entirely free hand to make his own selection of goods. We have a range of perhaps fifty thousand articles for him to choose from, but the average carried in each of our thousand stores is about seven thousand. It is his duty to know his trade and, since his pay is dependent upon his profits, it is of vital moment to him that he exercise discretion, and not find himself saddled with unsalable merchandise.

### Never Go Outside

"I may say that we never go outside the ranks of our own organization for any employee whatsoever above the rank of clerk. Every store manager, district manager, superintendent, buyer, etc., no matter whether he comes to us with a college education or a common school education, must start in as an assistant in a store. He must demonstrate that he is fit to manage a store before he is given promotion.

"We take great pains to keep in the closest touch with our forces so as to spot talent. But once a man earns our confidence we give him practically free rein. Mr. Woolworth had very emphatic ideas on this subject, which he once expressed thus: 'When you put a man in charge of a branch of your business, leave him alone unless he asks for help. If your judgment was good in putting him there he will not ruin you, and he ought to be trusted. If your judgment is not good, you have no right to be in business.'"

### The Central Idea

Time and again in course of our conversation, Mr. Parson returned to the central idea of the whole Woolworth structure—namely, maximum values at minimum cost. I asked him to tell in some detail just why Woolworth's could sell for ten cents many articles which cost a quarter, or even more, elsewhere. This struck a responsive chord, for Mr. Parson feels that there is something more to the Woolworth business than mere money-making, that it has been a godsend to millions of families, that it has saved incalculable amounts for American homes, that it has in many cases improved, not to say revolutionized, manufacturing processes by introducing large-scale, economical production, and that during the war its uncompromising stand against the raising of prices has done not a little to keep down the cost of living for the rank and file of the people. The Woolworth Building has been called "The Cathedral of Commerce." The Woolworth men feel that they are preachers and practisers of the gospel of low prices and high quality, that they have been missionaries in ushering in a new order of merchandising which has been a blessing to the people.

### Specially Trained

"To begin with," said Mr. Parson, "all our thirty-two buyers are men we have trained, men who have pulled to the front by sheer, conspicuous fitness for the work; and they know exactly what our requirements are. Each handles only one line—glassware, or candy, or enamelware, or dry goods, etc.—and can therefore concentrate all his attention upon his specialty, going anywhere he pleases, either here or in foreign countries.

"These men are not simply buyers in the sense that the public thinks of a buyer. They are often creators of merchandise. They sense a demand for an article, or they take an existing article costing twenty or thirty or even fifty cents, study out how it can be produced most economically, take it to an alert manufacturer, go over the whole problem in detail with him, and experiment until the cost has been reduced to a point permitting of its sale at ten cents, or five cents, as the case may be. By turning a whole factory on to one article and keeping it going at full tilt all the year round, wonderful economies can be effected by manufacturers. We do no manufacturing ourselves. It is one of our fixed rules to stick to selling goods.

### Made Good Profit

"One of our buyers thought it would be possible to sell for ten cents a genuine gold-filled ring which was catching on at fifty cents. The manufacturer laughed at the feasibility of the idea, and explained that he was already selling enormous quantities of them, 450 dozen in the previous year. The next year he made 720,000 rings, all for us, which we sold at a profit, and which netted him far more than he had previously received.

### Found No Flaws

"One day the proprietor of a Western departmental store visited our Fifth Avenue place, as thousands of merchants visiting New York do every week. This merchant was astounded to find on one of our ten-cent counters little Japanese vases of exquisite pattern. He examined several of them microscopically, certain there must be flaws in each one, since he was selling them in his own store at seventy-five cents each. Our buyer had simply shown the makers how to reduce costs by making thousands where formerly they had made only hundreds.

"Mr. Woolworth used to go to Europe and do a great deal of buying. On one trip he took with him a penknife which had taken his fancy, and which was made by a German manufacturer from whom he had bought cheaper goods. He asked the manufacturer how much it cost him to make it. The figure was several times ten cents. 'If I give you a very large order, at what price would you let me have it?' 'Sixteen cents,' replied the maker. 'If I gave you an order sufficient to keep your whole factory going night and day for a whole year, what's your bottom figure?' The manufacturer did a lot of figuring, then replied, 'Eight cents.' 'Done,' said Mr. Woolworth.

Continued on page 84

# Varnish Troubles

When varnish goes wrong the dealer who sold it usually gets a share of the blame from the buyer, although this is usually unjust.

Dealers who carry Berry Brothers' Varnishes, Enamels and Stains do not have varnish troubles. The uniform dependability of all "Berry" products makes their sale safe and easy, and the great demand for them is always growing greater.

Liquid Granite FLOOR VARNISH Luxeberry WHITE ENAMEL

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Oct. 30.—Indications now point to an early reduction in the price of linseed oil. Spot oil, at the moment, is a little lower, and within a week it is possible that a $2.50 basis may be reached. Seed is sifting through to the crushers in larger amounts, but weather conditions in the Canadian West have been against a free movement. Local demand is limited

Turpentine is a trifle lower and there is ample supply to meet a limited demand from the trade. The jobbers state that it takes five to six weeks to obtain supplies from the South.

Putty is not moving actively as yet, while white lead in oil sales are also fewer to the local trade. Demand during the past season has been very heavy, and all sources report a very satisfactory year.

### *Immediate Relief on Oil is Looked For*

**Montreal.**

LINSEED OIL.—While the present range of quotations on linseed oil is not changed to any great extent, the feeling is easier and seed supplies are expected to be much improved within another week. This should ensure a quotable basis of around $2.50 for the first half of November, and of $2 for the latter half. One crusher stated that a lot of around 50 barrels had sold for around $2.75 per barrel, while single barrel lots were bringing $2.85. Sales are limited, and within another week the market should be marked down somewhat.

| Raw— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 85 | 2 95 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| **Boiled—** | **Imp. Gal.** | |
| Single barrels | 2 87½ | 2 97½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *Turpentine is Held; Deliveries Slow*

**Montreal.**

TURPENTINE.—Deliveries of turpentine take from five to six weeks and this makes it difficult to gauge one's stock. The market is steady and in one quarter is down 10c per gallon. What limited demand exists from the trade is well taken care of at present.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 35 | 2 65 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Demand Not Large on Putty; Glass to Come*

**Montreal.**

PUTTY AND GLASS.—There is not a great demand, as yet, for putty, and the market is without quotable change. It will likely rule steadily for a while yet.

Glass is a scarce commodity, especially for the popular sizes, but within a week or two the importers hope to have larger stocks, and so be in a position to meet requirements.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%. 15 days. net 60.

### *Small Business Here For White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—Locally, and for domestic account, there is but a fair amount of business. There has been a continued heavy demand from export sources, however, and the corroders have been well pleased with the extent of this business, which will afford a large outlet, probably, in the year ahead.

Prices are still unchanged, with five ton lots quoted at $15.50 per 100 lbs.; ton lots at $16, and smaller quantities at $16.35.

### *Seasonable Trade For Mixed Paints*

**Montreal.**

PREPARED PAINTS.—The paint makers have been viewing the season in retrospect, and are well pleased with the 1919 results generally. The outlook for next year is excellent. In the meantime there is a certain amount of good business, but the approach of cold weather has naturally reduced the sales of outside tints. The market is unchanged.

## TORONTO

TORONTO, October 30.—Spot delivery of linseed oil and also turpentine is getting to be a serious problem, one large importer having had word that it would be impossible to fill his last carload order for immediate delivery. All deliveries appear to be light with a very strong demand. It is reported by some that turpentine was hardly ever scarcer. Holders are very indifferent and are inclined to hold any stocks they may have. The foreign situation has not cleared up as yet, the Germans being in need of large supplies, but owing to the vast difference in their relative money values the price is prohibitive as their mark is quoted at almost seven times lower than its equivalent in American money. To-day's quotation is $2.45 per gallon.

Linseed oil spot deliveries have strengthened temporarily as it is almost impossible to procure this year's seed, which has been greatly delayed, and crushers claim they are without oil and have no seed to crush. The quotations at present are, spot delivery $3.25 per gal. November 15 shipments, $2.62 for raw and $2.65 for boiled.

### *Turpentine Continues Scarce*

**Toronto**

TURPENTINE.—Turpentine is still a serious problem with the importer. One large importer was refused delivery on his last carload, and general delivery is light with a strong demand. The fact that paint manufacturers claim to have had a bumper season is in itself significant of the demand for turpentine for painting alone, regardless of the many other uses it is required for. Present quotations are:

| Turpentine— | Imp. gal. |
|---|---|
| 1 barrel (barrel included) | $2 45 |
| 2 to 5 barrels (barrel inclued) | 2 44 |
| 5 gallon lots | 2 55 |

### *Spot Linseed Oil Shows Advance*

**Toronto.**

LINSEED OIL.—Linseed oil shows an advance for spot delivery owing to the scarcity now prevailing. Crushers state they are practically without supplies and seed has been delayed to such an extent that they have almost no seed to crush. The situation, it is expected, will remain serious till the new seed comes in. Spot deliveries are quoting at $3.25 per gallon, while futures are considerably easier, and for late November shipments are quoting around $2.62 per gallon for raw and $2.65 for boiled.

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | .... | 3 25 |
| 3 to 5 barrels, gal. | .... | 3 24 |
| 10 barrels and over | .... | 3 22 |
| | **Boiled** | |
| 1 to 2 barrels, gal. | .... | 3 28 |
| 3 to 5 barrels, gal. | .... | 3 27 |
| 10 barrels and over | .... | 3 25 |

# Lowe Brothers Paints

# For You!!

A Better Sales Service than you ever expected One that is "different," continuous and productive.

"Save the surface and you save all" *Paint & Varnish*

A service with the "individuality" and power that moves you "out of the rut."

The great, far-reaching organization of Lowe Brothers brings in touch with you every consumer in your vicinity—and interests him to a point where he must buy from your store.

Lowe Brothers' advertising and promotion work is maintaining and stimulating a huge volume of sales everywhere, all the time. Get your share. Ask about our "different" proposition.

## Lowe Brothers, Limited

**TORONTO, DAYTON, BOSTON, NEW YORK, CHICAGO, KANSAS CITY, MINNEAPOLIS, ATLANTA**

***Distributors: MacKenzie Bros. Limited, Winnipeg***

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

## *Mixed Paints Are Selling Briskly*

**Toronto.**

PAINT.—The general opinion of the paint business is very bright. Most manufacturers state that their turnover for last month was up to 60 per cent. higher than for the same month last year. Mostly all are booking spring deliveries, while recognized agents of the companies are getting their deliveries under way now with spring booking, which gives the producers a chance to mix in accordance to the legitimate demand.

## *Shellac and Varnish Revised*

**Toronto.**

SHELLAC AND VARNISH.—Prices have been revised upwards in some instances although it is not what would be termed an advance. Some makers were selling too cheap according to other market changes and were forced to revise prices in accordance with the proper market.

## *White Lead in Oil Selling Well*

**Toronto.**

WHITE LEAD IN OIL.—A very fair business is offering for white lead with no changes in price noted. Grinders state they are very well satisfied. Quotations are as follows: 5-ton lots, $15.85 per hundred; 1-ton lots, $16.35, and in smaller quantities, $16.70.

## *Glass Still Scarce; No Change in Putty*

**Toronto.**

GLASS AND PUTTY.—The glass situation has not been relieved as yet. Jobbers report a very brisk demand and have considerable trouble supplying the demand. Putty is quoted as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels ..... | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron ... | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron .... | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons.. | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels ... | 7 10 | 7 35 | 7 70 |

## GLIDDEN COMPANY EXPANDING

The Glidden Company Ltd., of Toronto, has leased a large warehouse at 327 Craig St., Montreal, and will carry a full line of paints and varnish specialties there to look after the trade in Quebec, the Maritime Provinces and Newfoundland. The Montreal branch will be in charge of Leonard Mould, who has been with the Glidden Co., Ltd., for ten years covering the Eastern territory. The firm has extended its plant in Toronto and is entering a new though allied field, and is planning a big paint era in Canada.

It is just learned that McArthur Irwin, Ltd., of Montreal, who have been the exclusive distributors for Glidden products for many years for the Province of Quebec, through special arrangements, will still continue to supply the trade as in the past with Glidden products.

## HE WAS SELECTED FROM 35,000 EMPLOYEES

Continued from page 80

**Wouldn't Believe It**

"At first nobody believed that phonograph records could be sold for ten cents. We saw an unlimited field for such an article, and we got busy. It was not long before we were selling almost half a million of them every month, and they are still one of our best sellers.

"The war naturally shut off our supplies of many goods, as we normally bought about an eighth of our merchandise from Europe. We wanted to get domestic supplies of a ten-cent iron toy previously obtained in Germany. An American manufacturer took up the problem in earnest, but finally declared that, no matter how large the order, he could not get production down to a feasible point. Our buyer went over his calculations with painstaking care and could find no chance for reducing anything until he reached the charge for painting. The manufacturer assured him his figure represented bed rock. Our buyer went into the factory, saw that rows of girls were painting toys with brushes, and grasped the solution in a flash. 'Leave off this little red stripe and this little yellow stripe and simply dip the toys in vats,' he instructed. We got the toy and the manufacturer got his profit.

**Can't Get Dolls**

"There is only one thing we haven't been able to duplicate here—dolls. No American manufacturer appears to be able to make a doll to retail at ten cents that is worth much. On the other hand, Christmas tree ornaments, of which it is estimated we supply about half of all that are used in America, are now being made here better than they were ever made in Germany. The Germans blew them so thin that they were nothing but bubbles, and the loss through breakage was tremendous. The American product is just as beautiful and a great deal more substantial.

"For a time we thought we would be up against it in procuring crochet cottons, one of our large imported sellers, at ten cents a box. But we set an American mill on the job, and now a large plant has been built to supply us with crochet and embroidery cottons, of which we have sold in one year 2,250,000 boxes.

**Eliminate Waste**

"Elimination of waste and conservation of by-products are far more important items in the aggregate than you would suppose. Waste material, such as paper and excelsior, is put through a baling press and brings us in more than one hundred thousand dollars a year. All our boxes, barrels, pails, and every sort of container, instead of being torn open in the usual way, are opened with the greatest care, so as not to spoil them for re-use. They are all sold to second-hand dealers and bring us in enough to pay dividends on two or three millions of capital.

**On Cash Basis**

"We have a system of paying for what we buy which is a real factor in lowering our purchase prices. We pay our bills at least once every week, and, no matter where a manufacturer is located, we send out his check so that it will reach him on Friday, so that he can have the money for his pay roll on Saturday. To many small manufacturers this is a very great convenience, since it means that, as he gets some credit when buying his materials, we practically finance him.

"We always pay cash, and as cash discounts average two per cent. the sum thus saved on, say, our current year's purchases of approximately $100,000,000, foots up to about $2,000,000. Our prompt-payment rule influences many manufacturers to do business with us, and this, combined with the magnitude of the orders we give, enables us to secure extra-favorable price quotations.

**Run Into Millions**

"The losses of the department stores through bad debts run into millions. We have no bad debts, since we sell only for cash. Bookkeeping incidental to charge accounts is a heavy expense item in department stores. We have no such cost. Delivery costs are terrific in the case of all large stores—simply terrific. We are subject to no such drain. The ordinary department store turns over its capital once or twice a year. We turn over our stock about seven times a year; hence, when you multiply even a very small margin of profit seven times in a year, you have a very satisfactory annual profit. When Mr. Woolworth conceived and built the highest building on earth he had very prominently in his mind the advertising value of the undertaking, and I may add that the effectiveness of this master stroke was a source of keen satisfaction to him, particularly because all his friends told him he was crazy, and that nobody would rent offices forty or fifty stories in the air—predictions that have been wholly falsified, for we have a waiting list of prospective tenants yards long, and the return on the $14,000,000 investment is quite satisfactory."

**Their Best Customers**

"Farmers are our best customers," was one surprising revelation made by Mr. Parson. "In North Dakota, for example, we do more business per head of population than in large cities. When a farmer comes into town to trade it is not at all unusual for him and his wife to spent five or ten dollars in one of our stores in the purchase of hardware, house-furnishing goods, curtains, oilcloth, picture hangers, picture wire, picture frames, cotton goods, cooking utensils, crockery, glassware and, in some cases, phonograph records, sheet music and other things incidental to music, which, by the way, has spread enormously among the farming population within the last three or four years.

**Not Asked to Buy**

"One reason why country people, as well as city people, like to come into our stores is because they are never asked to buy a single thing. No floorwalker is stationed at the door to buttonhole you and ask what you want. This system of allowing the people full freedom to look around unmolested has worked out exceedingly well, for we make a point of displaying our goods to the best possible advantage, and a person who drops in to buy five cents' worth often picks out a dollar's worth in strolling from counter to counter.

**Remove the Cause**

"Yes, this displaying of so many small articles on counters where thousands of people pass, often in crowds, entails a certain amount of loss through pilfering. We figure upon a loss, from all causes, including breakages and thefts, of five per cent. from the time goods reach a store until their sale. Our scientific system of keeping records enables us to see exactly where losses rise above normal. We can tell which counter is having a bad record and, of course, we set about locating and removing the cause.

"We have found that employing private detectives is the worst plan of all for spotting pilferers. They feel that they are in duty bound to make an arrest, and when they make a mistake you have a nasty suit on your hands. The plan we have long used has been to place trusted employees in each store and tip them off when abnormal losses occur in any part of the store. They keep strict watch, and usually are able to spot the cause. If an employee of the store is guilty he or she is dismissed. The per-

# An Important Paint Announcement

**The Glidden Company announces the addition of a complete line of house paints to its list of quality products**

FOR nearly fifty years the Glidden Company has made both paint and varnishes for industrial and home use. The Glidden Green Label varnishes and Glidden Jap-a-lac household finishes are household terms throughout the Dominion. During this time, Glidden paints have been made and sold largely for marine and industrial uses. In these fields, Glidden paint quality is as well known as is Jap-a-lac in the home.

Now this same good paint service is available to paint dealers and users. By the addition of Glidden Endurance Paint to the Glidden line, every paint and varnish need can be fully met with a Glidden product **especially made for the purpose.**

Every gallon of this new Glidden product carries paint-making experience that will bring continuous profit to the dealer by reason of true service to the home owner. Glidden Endurance Paint is a pure lead and pure zinc paint made only of strictly good quality ingredients and according to a scientific formula. It is a product that will build increased dealer reputation.

***Write for full details, prices, etc.***

**The Glidden Company, Limited, Toronto, Ontario**

**Montreal, Quebec**

# Paint Sales That Pay a Profit

One unit or as many as you want, in a compact row

You want a profit on every sale, and you should have it. But with the present high cost of paint oils you stand a big chance of losing your profits, unless your methods of handling are systematic and free from loss of time, labor and oils.

Pumps on Sales room Floor. Tanks in basement where ver convenient.

BOWSER ESTABLISHED 1885

## Paint Oil Storage Systems

prevent paint oil losses. The pumps measure accurate quantities: no over measure, no leakage, no spilling, or evaporation. Everything is exact, systematic and saving. The sooner you install a Bowser System the sooner you will begin to reap the profits from proper storage equipment.

# This Booklet Lists 259 Shades *of* DOUGALL COLORS

*Manufactured Under The Famous Murphy Formulae*

These colors are not produced by any mere chance or perfected by haphazard manufacturing methods. Dougall Colors lead to-day because of specific reasons.

**Purity of Pigments**
**Fine Grinding**
**Uniform Quality**
**Exactness of Shade**

These are the basic principles of Dougall Color superiority.

# One Fact Sells Silkstone— Economy!

## Tell Customers the Facts

Silkstone Flat Wall Colours are cheaper than wall paper, more sanitary and lasting; Silkstone can be washed often and never rubs off; it gives a beautiful, soft, silky finish that will outwear any other wall covering. The economy of this splendid finish, that costs so little to apply and serves so satisfactorily, is an appeal to every customer.

While economy is a forceful appeal to housewives and furnishes a motive for an enormous purchase of Silkstone, it is a profitable article for the dealer. We suggest that you write us and so give opportunity for us to prove two things—that Silkstone sells, and that it is profitable to you. Better yet—write us about the benefit to you in an agency.

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

The Eden

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

The Eden IS THE MACHINE FOR THE LIVE DEALER

# Barrett Fast Selling Specialties for Farm and Home Trade

ON this page you will find brief descriptions of several popular Barrett Specialties. They are all fast sellers. If you don't carry all four of them you are overlooking good sales opportunities.

The name "Barrett" is recognized everywhere as standing for quality, and when you sell a customer these Specialties you can do so with the knowledge that they will give satisfaction.

We mention below some of the main selling points of each. Read them over. Perhaps you can sell *more* by suggesting the different uses to your customers.

## Barrett ELASTIGUM

### For Repairing Leaks Everywhere

BARRETT Elastigum is an elastic, waterproof plastic cement that spreads freely and adheres tenaciously to wood, metal, stone, brick or concrete. It can be used on wet or dry work and is always ready, without heating or mixing. It dries slowly, and makes a permanent, elastic joint that will not crack or pull away, but always remains tight, in the hottest or coldest weather. Applied with a trowel.

Used as a damp-course under sills or wall plates, it prevents seepage and protects the wood work. As a water-tight cement for cellars, party walls, cisterns and structures of brick, stone or concrete it has no equal. Used also in place of putty for glazing, stopping cracks, stuffing cornices, building up "plastic" slate roofs, and as a stopping or cement for flashings, which it renders permanently waterproof as no other cement can do.

Put up in airtight cans of 5 lbs.; also in drums and barrels; 1 lb. tins, 5 lb. kegs, 25 lb. kegs, 100 lb. kegs, half barrels and barrels about 600 lbs.

## CREONOID

### LICE DESTROYER AND COW SPRAY

BARRETT Creonoid protects live stock. It is an up-to-date, antiseptic preparation made from coal-tar, the source of so many of the wonderful modern remedies.

Effective for spraying cattle, horses, hogs and disinfecting chicken houses and stables against lice, vermin, flies, etc.

Remind your customers that Creonoid is cheap enough to use freely. Tell them to spray their larger animals often, and to paint or spray all perches, stalls, floors, walls, etc., in hen roosts, barns, pig pens and stables. They will soon see the difference in egg and milk production and in the health of their animals.

Put up in airtight cans of 1, 5 and 10 gallons, and in barrels and half barrels.

## Everjet Elastic Paint

### Protects Exposed Surfaces

BARRETT Everjet Elastic Carbon Paint is a tough, elastic glossy-black, carbon paint of wonderful durability; a paint that will add years of service to exposed surfaces—metal, wood, brick, concrete, etc. It is proof against all weather influences and acids, gases, steam vapors, etc.

For lengthening the life of steel or iron work, farm machinery and implements, metal roofings, in short, for any metal surface whatsoever—Everjet is unequalled. It will not blister or crack off, but forms a perfect elastic coating which expands and contracts with the metal under any variation of tem perature.

Put up in airtight cans of 1 gallon (12 cans to a case) and 5 and 10 gallons. Also in barrels of 40 gallons and in half barrels.

BARRETT'S Everlastic Roofing Cement is a black bituminous compound manufactured expressly to resurface old or worn out Prepared and Rubber Roofings of all kinds; there is a wonderful field for this product for this class of work. It is about the consistency of molasses and is liquid under ordinary weather conditions. IT IS ABSOLUTELY IMPERVIOUS TO MOISTURE AND CAN BE USED IN ANY CLIMATE, IT ALSO RESISTS EFFECTIVELY THE ACTION OF ACIDS, ALKALIES, VAPORS, ETC.

Made up in 1 pint cans (cases of two dozen), 1 gallon lithographed cans (cases of one dozen), 2, 5, 10 gallon wood jacketed cans, barrels and half-barrels.

# THERE ARE NO SUBSTITUTES FOR DAIRY FOODS

*P.M. Sharples*

The above slogan appearing in every advertisement of the Sharples Separator Company is the slogan of every North American dairyman.

For nearly forty years, Sharples has been identified with the North American dairy industry and at all times has been fighting for the ideals of the North American Dairyman.

For nearly forty years the Sharples dairy machines have been the standard for North American dairymen. Dealers identified with the Sharples institution realize the value of this Sharples goodwill.

THE SHARPLES SEPARATOR CO., West Chester, Pa.

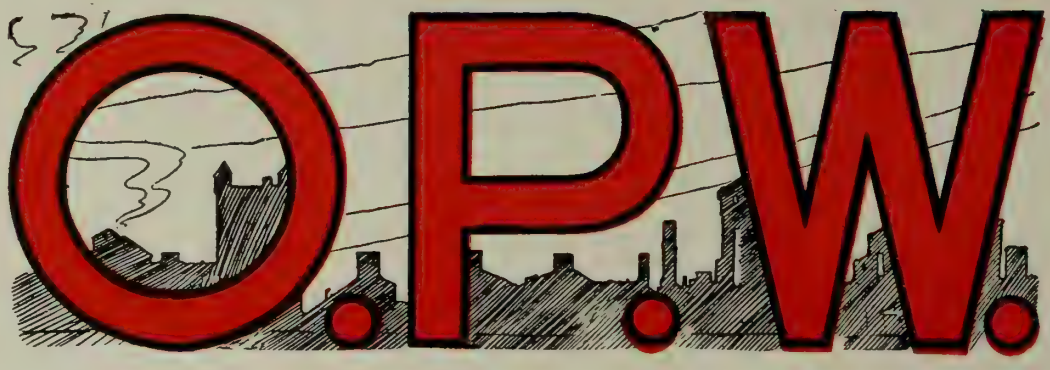
# Elephant White Lead

Truly, this is Canada's favorite. For many years it has held first place because of its unchanging quality.

Every pound of genuine Elephant White Lead that leaves our factory bears the government stamp of purity. Its snowy whiteness and smoothness of texture have made it the popular choice of the painter.

## The CANADA PAINT Line

consists of a perfect finish for every surface—Paints, varnishes, stains, enamels, oils, dry colors, insecticides, etc., etc.



To sell the C. P. line means to increase sales. It is the line of least resistance. It is the line that leads to an expansion of business.

# Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The

# Canada Doing Things in a Big Way

## Filling Orders for Goods From All Parts of the World and Inquiries for More Pour in With Every Mail — Factories Equipped With Most Modern Machinery— Exports Showing Enormous Increases

THE people of Canada has shown their aptitude for doing things in a big way, not only in war, but in peace times as well. Almost a year has rolled around now since the signing of the armistice. Factories all over Canada which a few short months ago were working night and day to supply the boys on the firing line, were quickly converted into hives of peace-time activity and the wheels set humming to supply the needs of a world facing the greatest shortage of commodities ever known.

Canada, richer perhaps in undeveloped natural resources than any other country on the globe, has worked as hard as ever. The Dominion's war efforts won the admiration of the world. In the last few months the world has learned that Canada is a good place to turn to for supplies, and Canadians have been kept busy filling the orders that have come in thousands with every incoming mail.

### A Thrifty People

Canadians have been able to show results because they are not only an enthusiastic people, but have gone about things in a business-like way. They have so managed affairs that a splendid war effort in Europe has gone hand-in-hand with prosperity at home. On every side factories have doubled and trebled their capacity, built larger buildings and installed the most modern equipment. It might have been expected that with the advent of peace the output would diminish appreciably. This has not been the case. While the demand for war materials and supplies fell off, it was almost immediately replaced by the calls of a merchandise-hungry world. And Canada has responded. Not only her factories but her army of workers on the farms, in the mines, in the forests and from coast to coast, have worked as hard as ever, and merchants and business men all over the world have learned that Canada is a good nation with which to trade.

### Canada Continuing

Canada is continuing to do things in a big way. Realizing that the war devastated countries of Europe needed commodities as never before and were temporarily without means of paying for them, the Canadian authorities got busy. The credits granted up to the present time approximate $110,000,000.

Of the total amount, $25,000,000 each has been set aside for Roumania, Greece, France and Belgium, and the balance was allotted to Italy for the purchase of frozen beef. Italy has used up the entire amount allotted to her. Belgium has used her allocation to the extent of $1,008,021.68, and Roumania up to $5,053,656.42.

### Send Your Inquiries

Firms in any part of the world will find Canadian houses good houses to get acquainted with and to trade with. In this issue of HARDWARE AND METAL will be found the advertisements of a large number of firms who will welcome inquiries regarding the goods they have to offer, and will be pleased to furnish prices and full information. Merchants in distant lands who are interested, will find that it will pay them to write promptly and get in touch with these firms and establish a connection that will be mutually profitable.

### Export Figures

Just how splendidly Canadian trade is being maintained may be gathered from the following figures. The last available official figures are up to the end of August, and the amounts, taking in only domestic goods and not those imported and re-exported for foreign account, since the signing of the armistice, are as follows:

| 1918. | Exports. | Imports. | Excess of exports |
|---|---|---|---|
| Nov. | $119,161,003 | $73,090,048 | $46,070,955 |
| Dec. | 107,474,401 | 73,341,265 | 34,133,136 |
| 1919. | | | |
| Jan. | 116,358,387 | 73,749,397 | 42,608,990 |
| Feb. | 82,899,483 | 64,117,126 | 18,782,357 |
| Mar. | 91,152,361 | 71,749,569 | 19,402,792 |
| Apr. | 64,489,159 | 54,255,219 | 10,233,940 |
| May | 92,258,687 | 71,344,816 | 20,913,871 |
| June | 87,348,952 | 75,015,479 | 12,333,473 |
| July | 113,787,099 | 84,281,499 | 29,505,600 |
| Aug. | 116,564,792 | 81,357,485 | 35,207,507 |

### A Big Percentage

Agricultural products, mainly foods, still show the largest total, although they are followed closely by animals and animal products. Together they give a total for products of the farm equal to about 60 per cent. of the total domestic exports of the Dominion.

Following agricultural exports in the order named, come products of the pulp and paper and lumbering industry, or products of the forest; products of the iron and steel industry; ores, metals

and metal manufactures other than those made from iron and steel; the textiles, fibres and textile products, non-metallic minerals, products, etc.

At the Commercial Intelligence branch of the Trade and Commerce Department at Ottawa they will tell you that they are flooded with inquiries from people anxious to trade with Canada. There were many during the war, but it was hard often to take advantage of them. Shipping space for private individuals was scarce, but this situation has steadily improved and now every outgoing boat carries a cargo of Canadian goods.

A great business has arisen. In one case a tool manufacturer informed the department that, as a result of connections made through the department he had developed an export trade which now amounts to two-thirds of his whole business. Another company got orders for wire amounting to over half a million dollars.

One of the smaller Canadian rubber manufacturers got an inquiry from China during war time for goods in his line. He talked the matter over with his partner, and both were inclined to regard it as somewhat of a joke; but they took a chance. They got this order from China, with repeats, and developed a large import and export business, going into other foreign countries as well. A firm dealing in minerals in Montreal got orders in three months for over three hundred and fifty thousand dollars' worth of goods.

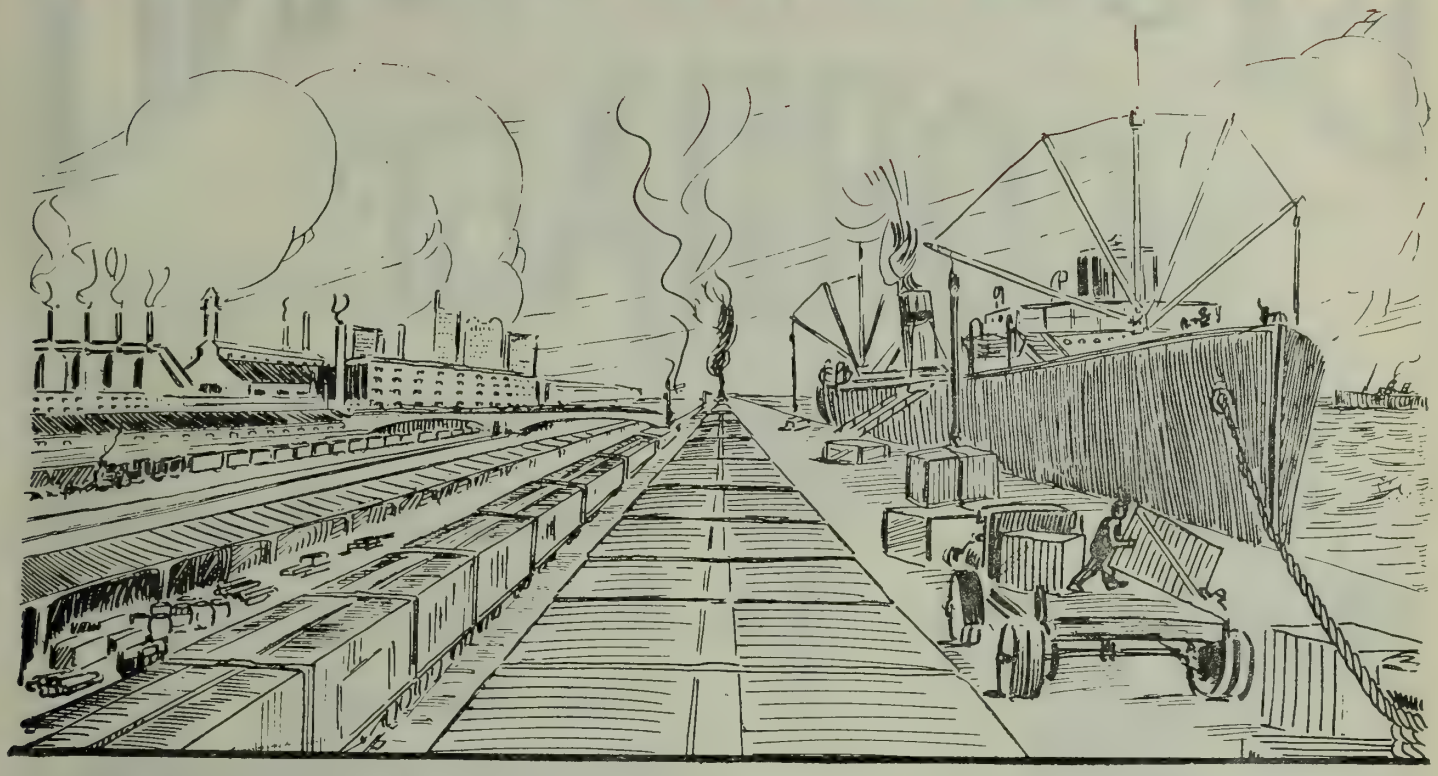
A Canadian firm is sending goods to Italy, the Argentine and other foreign lands where it would seem foolish to think that a trade could be built up from Canada; but one of the beauties of trade is that its possibilities are endless. It would scarcely seem possible, for example, that sausage casings from Montreal are being shipped all over the world; but they are. The "raw material" is imported from Australia and this firm has four establishments of its own in that country.

During the past two months there have been nine Canadian Trade Commissioners from different parts of the world going over the ground in Canada. Among them were such well-known men as B. S. Webb, from the Argentine; D. H. Ross, from Australia; W. A. Beddoe, New Zealand; J. W. Ross, China; W. J. Egan, South Africa; J. E. Ray, Manchester; Major G. B. Johnson (lately from Japan, bound for Brazil); H. R. Poussette, who before the war was in the Argentine, and is going on a special trip to China, Japan and Siberia.

Messrs. D. H. Ross and W. J. Egan are now travelling in Ontario. They have visited the Maritime Provinces and Quebec, calling on the manufacturers to get acquainted and to acquaint them with conditions in their own trade domains. When they complete their work here they will go to the Pacific coast, and eventually take ship back to the countries to which they are "accredited." There has been a great and encouraging interest shown by the manufacturers in their visits.

The Canadian Commercial Intelligence branch has received about three times as many inquiries in 1919 to date as in the whole of 1918, for addresses and other information. They are coming from all classes of manufacturers. A good many manufacturers are sending out travellers, and letters of introduction are constantly being asked for from the department.

The banks have been taking an interest in securing information from the department of Trade and Commerce. This is of importance, as the extent of our export trade depends very largely on the willingness of the banks to finance it.



Moving pictures of Canadian scenes and Canadian trade processes are now being shown in the United Kingdom, France, Greece, Australia, New Zealand and South Africa. The titles of the pictures and "scenario" are being translated into Spanish with a view to use in South America. They have also been translated into Russian. The pictures are also being shown in the United States, and eventually will be familiar to movie fans all over the world.

An interesting sidelight in connection with the way Canadians are going after business is shown by the fact that the authorities have received requests from thirty to forty individuals or companies of soldiers or officers who are anxious to put to use the knowledge they gained in fighting the Hun. They think they can beat him at the trade war also. They represent a previous business experience of a wide nature from bankers to broom-makers, from bridge-builders to candy-makers. There is a wealth of experience and ability available there. The majority of them speak French and English, and frequently several other languages. Here are our commercial missionaries, well equipped and ready to go into any part of the world and boost Canadian trade.

*No country in the world has such unlimited waterpowers as Canada. The illustration shows one of the many big plants in which cheap power is obtained by harnessing the current of a river.*

**Hamilton, Ontario**

**Warehouses: Winnipeg, Toronto, London, Montreal**

# — KRIBS —

SIMPLICITY is the keyword in describing the Kribs Electric Washer.

The machine delights the eye — finish and superior construction are so apparent. Knowledge of its efficiency, however, increases the admiration of the customer.

Nothing to get out of order. A child can operate it.

All moving parts are protected. The machine is smooth running, there is no slamming or jarring effect when in operation. It washes the most delicate fabrics or the heavy blankets and bedding with equally pleasing results.

No need for an outlay of from $150 to $200 for an electric washer. This machine retails at a good profit for *less than* $100.

Dealers not already in touch with this line should write to-day for information. Profit and satisfaction. Selling it is a pleasure.

The buyer becomes a booster.

# SOUVENIR

## CAST IRON RANGE

## 23 Years Continuous Service

### *Read what one satisfied user says about his "Souvenir" and the test plan of buying*

The Hamilton Stove & Heater Co.,
Hamilton, Canada.

London, Canada, August 21, 1919.

Gentlemen:—This bit of Stove history may be of interest to you as successors to the firm that built our kitchen range:—

Some thirty-five years ago I brought into Canada a bright, active young English wife. Neither of us knew anything about a Canadian Kitchen range; we paid a big price to a big firm for one of their latest models; and for twelve years we had kitchen misery.

Then for about eighteen months I began a systematic enquiry among the dealers and then went to the homes of their customers and heard their private opinions after various terms of service:—The race narrowed down to two; with not a single user who was not well satisfied with either; with our minds prejudiced in favor of the rival of the Souvenir I decided to buy on a test plan and absolute guarantee; and with that plan approached all the dealers, and not one of the several competitors would entertain the test except the firm handling the Souvenir (A copy of contract enclosed).

We tried wood, coke, soft coal and hard coal; it made no difference, the Souvenir handled them all.

Instead of taking up 90 days' trial, we were fully satisfied in a month and paid in full $30.00.

On October 13th next, this range will have been 23 years in continuous service, and I would not take the original price for it to-day if offered. We have renewed nothing beyond the fire back bricks and the iron rest supporting same. It is also fitted to burn natural gas; this we did not try, because London has none.

In addition to our kitchen work, we heat a 30-gallon Soft Water Bathroom Tank upstairs some 25 feet away, and from which we get heat enough to protect the bathroom from frost during the winter months.

Our test plan of buying may have silenced timid rivals; but it gave us all we could desire, THE QUEEN OF KITCHEN RANGES, and almost a quarter of a century of kitchen range pleasure, and still going good as ever.

This range can be seen at my residence any time as proof of these statements.

Very sincerely and unsolicited,

(Signed) J. M. PARSONS,

379 Wellington St., London, Canada.

WM. WYATT & SONS

General Hardware, Stoves, etc.

Mr. John M. Parsons,
379 Wellington St.,
London, Ont. London, OCT. 13, 1896

Dear Sir:—We hereby guarantee the No. 9-20 Champion Souvenir Range, sold to Mr. John M. Parsons, 379 Wellington St., City, to be first class in material and properly put together, having no defects in workmanship, economic in fuel, will bake or roast, in a thorough manner, any article to be cooked in the oven. That the firepot will run five years, with renewal in case of failure, to be made at our expense, at such time of failure, and that after five years' use, when required we will replace or renew in a proper manner anywhere in the city, the firepot, at a cost not to exceed $1.50, and hereby give him three months' trial or less, to satisfy himself by tests, using wood and then coal, in order to make a thorough test in all lines of cooking, when if satisfactory, he agrees to accept the same and pay us the price agreed upon.

WM. WYATT & SON.

# The BRIDGEPORT Line

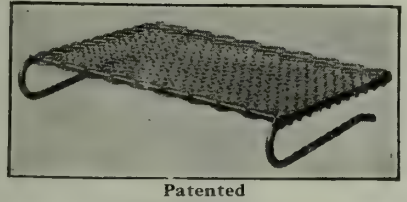
## *Builds New Business*

It's well-known and well-liked; it's good and it's extensive.

Being well known, customers call for it; since it is good and well-liked they reorder it. The extensive line of tools manufactured offers a sufficient variety to fill any order. Bridgeport tools are made by skilled workmen from the best material.

Progressive dealers stock the Bridgeport line because they have found that it sells well and gives them a good margin of profit.

Reliance Screw Drivers
No. 35 ASSORTMENT



This fine driver is packed in a very attractive display rack containing the following drivers: four 4 inch, four 5 inch, and 4 six inch. The rack as shown above is substantially made of hardwood in mission oak finish, with attractive white, violet and gold labels. Displayed in this way they sell "on sight." 18 Assortments in case.

# RALPH CONNOR

## *On "The New Canada and Its Needs"*

RALPH CONNOR, the famous Canadian novelist, who served for several years at the front and saw the war from many angles, is convinced that Canada must be prepared to make important changes if she is to profit by the lessons of the war. He has written a series of articles embodying his views and calling vigorously on patriotic Canadians to awake to the needs of the hour. The articles, which deal with economic, social and Imperial topics, were written for MACLEAN'S MAGAZINE and the first appears in the November issue, under the title: "The New Canada and Its Needs."

## Every Mother Who Lost a Son at the Front

will read with deepest feeling Nellie McClung's wonderful story, "Men and Money," which also appears in November MACLEAN'S. Mrs. McClung wrote this story with a purpose—to show the ease with which the world forgets the contribution these mothers made. But it is also a very fine story—real, human and gripping.

## "The Idle Hands at Ottawa"

*By J. K. MUNRO*

The recent session of the Dominion House was in many respects an idle one. There was not a great deal done, so the members had a lot of time to stir up things, and the result was some hugely interesting political situations. All of which J. K. Munro tells about in his usual unsparing and tersely humorous way.

## *Remarkable Features of a Remarkable Number*

The November MACLEAN'S is cram full of other big features—famous writers on vital subjects and everything Canadian. Look over this list:

**Baroness Orczy.**—The author of "The Scarlet Pimpernel," best seller of best sellers, is represented by a serial story, "His Majesty's Well Beloved."

**Robert W. Service.**—The great poet of the Yukon and the battlefront contributes a strong poem, "The Outlaw."

**Basil King.**—This great novelist who lives abroad contributes an interesting discussion on "Why I Remain a Canadian."

**Janey Canuck.**—An article on Mrs. Murphy's experiences as the first woman magistrate in the whole of Canada.

**Camilla Kenyon.**—A new novelist who promises to become a great favorite, tells a humorous story of adventure, and treasure, "Spanish Doubloons."

**Stephen Leacock.**—A humorous sketch entitled, "My Memories and Miseries as a School Master."

**"Two Men and an Idea That Grew and Grew and Grew."**—By Charles Christopher Jenkins.—A sketch of two remarkable and practically unknown Western Millionaires.

**"A Little Bit of Chicken Feed."**—By Allen C. Shore. A bright story combining love and business themes.

**"The Rainbow Death."**—By Madge Macbeth. An intensely interesting detective story.

**"The Search for Missing Men."**—By Gertrude Arnold. An article on hospital experiences at the front by a young Canadian V.A.D.

# MACLEAN'S will be Twice-A-Month

starting February 1st, next year. An important point to remember. If you want to keep up with things nationally Canadian, you'll have to get the MACLEAN'S Twice-A-Month habit.

*Over 70,000 Canadian Families Buy*

HAVE YOU RECEIVED HARDWARE AND METAL STOCK ELECTRO CATALOG YET?

## Just a few words about Hardware and Metal

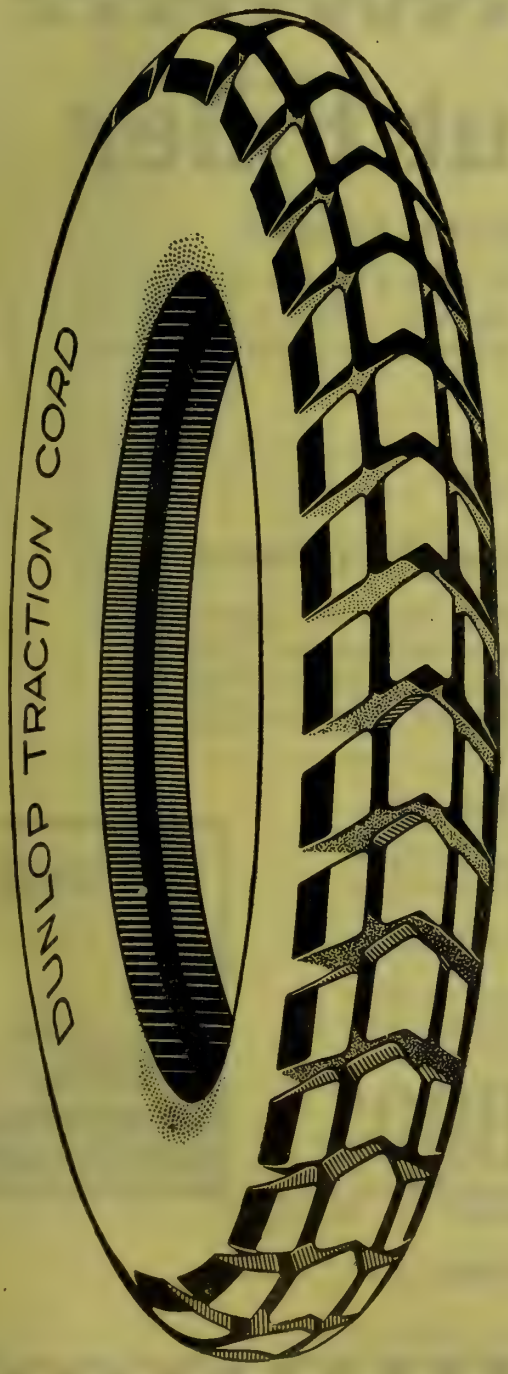
HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"



If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

DUNLOP TIRES

SEAL OF QUALITY

CORD

# The "Ace" of Tiredom

Dunlop Cord Tires **come right** to you because they **go right** from us.

The difference in the Dunlop price in comparison with some unknown and unvouched-for tires is a mere incident in comparison with the continuous service you receive from Dunlop Cord Tires—"Traction" or "Ribbed."

While Dunlop Cord Tires naturally become the motorist's property ultimately, they never cease to carry the Dunlop name.

That name which stands for so much that is notably praiseworthy in connection with the whole history of tire-making now means the last letter in "the last word" of tire merit to critical motor owners—it means Pre-War Quality and Price and Post-War Improvements and Satisfaction.

All sizes—30 x 3½ to 37 x 5.

**Dunlop Tire & Rubber Goods Co.**
**Limited**

**Head Office and Factories: Toronto**

**Branches in the Leading Cities**

# DUTCH BRAND

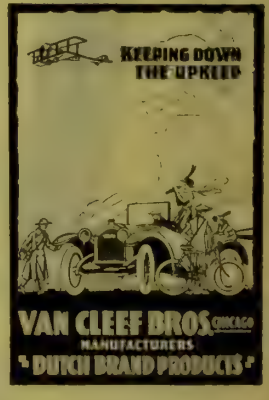
# PRODUCTS

# 2 in 1 Cut Filler

**ONE OF OUR BIGGEST SELLERS**

Motorists use Dutch Brand 2 in 1 Cut Filler for filling small cuts, bruises and gashes in casings. This heavy, liquid rubber prevents formation of sand and water pockets.

Easily applied; dries quickly.



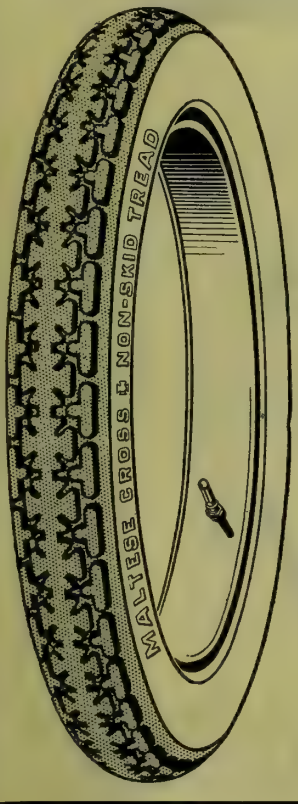
One dozen tubes in attractive cartons—a real "Sales Help." Through your jobber, or write us.

## Fine Shelf Goods For Hardware Merchants

Our lines cover many needs of automobiles, bicycles, trucks, tractors and airplanes. Some of these money makers are Auto and Cycle Patching Cement, Vulcanizing Cement, Radiator-Seal Compound, Valve Grinding Compound, Gasket Shellac—Tire Talc, Tire Fluid, Friction Tape, etc.

## *"Keeping Down the Upkeep" Keeps Sales Up*

We want you to have this little book telling about our products. If you are not already selling Dutch Brand products we'd like you to know about them.
Situated at Chicago we are able to serve Canada promptly to the East or West.
We have splendid equipment for turning out goods; modern buildings, methods and appliances; we maintain a high standard; we advertise extensively, and take care of the trade.



## VAN CLEEF BROS.

# SHOW IT —It Sells Itself

Show the motorist how this little vulcanizer can permanently vulcanize his punctured tubes —as good as new—with a firm, flat, feather-edge, **vulcanized** repair—in 5 minutes.

He has read about this wonderful vulcanizer in our advertisements—now let him know you sell it.

Let him see how simple it is—that anybody can perfectly mend tubes with it—anywhere—in any weather—without gasoline, cement or flame—without delay, without danger of injuring the tubes. The vulcanizer will quickly sell itself.

The Shaler 5-minute Vulcanizer gives you a good profit selling the vulcanizer—and besides it makes motorists come back to you to buy Patch-&-Heat Units to use with it—and you get "repeat sale" profits—regularly—selling additional Patch-&-Heat Units.

## Get These Big Profits—*Order From Your Jobber NOW*

Start now—to increase your sales and profits by demonstrating the SHALER 5-minute Vulcanizer. It builds business—it sells itself. Order from your jobber to-day to insure prompt delivery —write us for catalog of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists use.

**C. A. SHALER CO.** **1510 Fourth St., Waupun, Wis.**

## is the

# ROYAL OAK

ASK any responsible jobber or dealer. They will tell you, these men, that the Royal Oak Tire gives good service, that it satisfies their customers, and that it allows them a decent profit, and that its ability to yield big mileage on all sorts and conditions of roads gains good will for the dealer and jobber who sells it.

Letters on file in our office from all parts of Canada prove conclusively that the Royal Oak Tire wins confidence by its unvarying reliability.

We, therefore, do not need to say much about the Royal Oak Tire. From our knowledge of it and the knowledge gained from our customers, we should say it is able to do some very effective talking on its own account. If that's the kind of a tire you're out to handle, we'd like to hear from you.

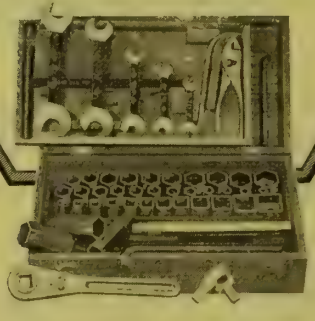
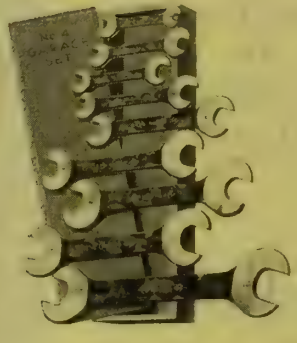
# MOSSBERG

## ALL STEEL WRENCHES AND TOOLS



In these days when dealers are insistently urged to "push" certain tools what a relief to stock Mossberg Wrenches, which need no pushing!



Furthermore, the Mossberg line is so complete that dealers don't have to devote shelf room to several makes; one line—Mossberg—meets all wrench needs.

Mossberg Socket Set No. 14, the "completest," containing an assortment of tools to fit every job.

No. 4 Garage Set of Open-end Wrenches; one opening of each wrench fitting U.S. Standard bolts, and the other opening of the same wrench fitting S.A.E. cap screws of the same dimensions.

**Send for complete catalogue and particulars.**

VERY little verbal argument is necessary to effect a sale in the case of

# "SPHINX"

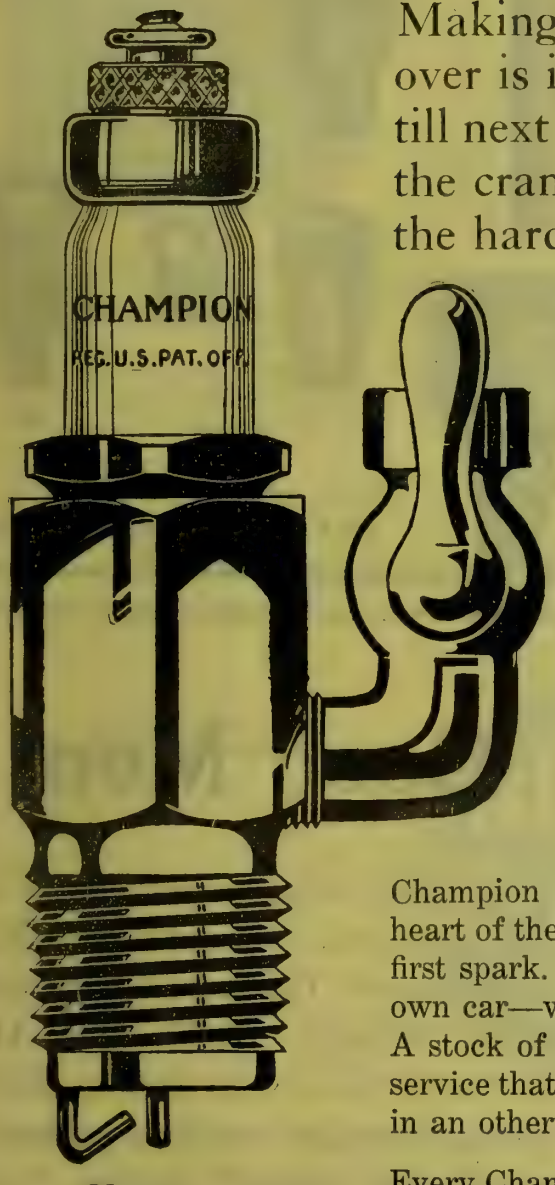
**ngland's Most Durable Plug**

interest is at once created in the attractive green metal box with the ingenious sealing band permitting the lid to be opened and the identification card to be perused. The sterling merits of the plug enclosed are vouched for by the Guarantee, unequivocal and without time limit, printed plainly on the box.

It is easy to sell Sphinx Plugs—and profitable. I shall be pleased to quote and to send you literature on request.

Sole Agent for Dominion: Wm. T. Evans, 1684 St. Urbain St., Montreal

Manufacturers: Sphinx Mfg. Co. Birmingham, England



# 'SPHINX'

## England's most Durable Plug

# Putting the Spark in a Cold Motor

Making a motor hum with the first turn-over is important to all motorists from now till next April. Getting a quick answer from the crank or the starter eliminates most of the hardships of cold-weather starting.

***Champion Priming Plug price $1.50***

## Champion Priming Plugs

Will not only help your customers to run their cars in comfort all winter, but they save gasoline, starters and batteries.

They take the worry and work out of driving a car, and it means more sales and profits to you. Show your customers how a "Prime Saves Time."

Champion Priming Plugs place the gasoline right into the heart of the motor, at the sparking point, where it catches the first spark. This is the plug that every man who drives his own car—whether passenger car or truck—needs right now. A stock of Champion Priming Plugs will help you to give a service that your customers will appreciate, and increase sales in an otherwise dull accessory season.

Every Champion is guaranteed to give "complete satisfaction to the user or free repair or replacement will be made."

Any jobber in motor equipment can supply you.

**Champion Spark Plug Co. of Canada, Limited**

**Windsor - - Ontario**

# IVER JOHNSON
SAFETY—AUTOMATIC **REVOLVERS**

## Cover the World

Yes, the Iver Johnson is known in every corner of the world as the "Hammer the Hammer" revolver—the one that can't go off by accident.

That's why the Iver Johnson line is easy to sell. Sales are closed with a minimum of time and selling effort.

And the Iver Johnson stays sold. No comebacks, no complaints. Its automatic safety feature, its simplicity and strength of construction, its assurance of accuracy and dependability—all these features create good-will, which reacts favorably on Iver Johnson dealers.

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber and Western Walnut grips.

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

*Write for firearms catalog and complete dealer information—also for literature on bicycles and motorcycles.*

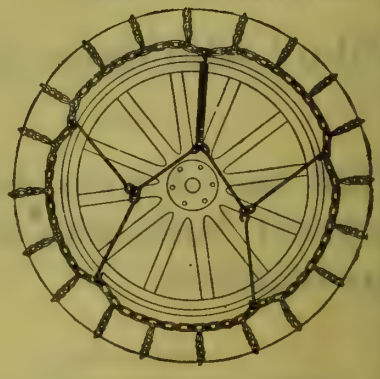
# Easy Money for Dealers

Motorists are using their tire chains every day and all day. And every single tire chain needs a Merchant's Chain Tightener.



These Chain Tighteners are selling like hot cakes. They take up scarcely any room, require a very small investment, and are very profitable to handle. Send in your order **now,** while the wintry season is with us.

**$1.00 a Pair**

## MERCHANT'S ANTI-SKID CHAIN TIGHTENER

Keeps chain from pounding against the fenders, prevents it from unhooking accidentally, holds it in place so that it cannot drag or rattle, while allowing it to "creep" on the tires and carry out to the full its non-skidding action. In fact it helps the anti-skid action by preventing the chain from slipping. Note the safety hook; they cannot come off.

Built of best materials, carefully made, it catches the chain at five points and holds it with an even, steady tension all around. Simple, easy to attach, no trouble at all.

U.S. and Can. Pat. Pending.

*Ask your jobber or write us for generous discounts.*

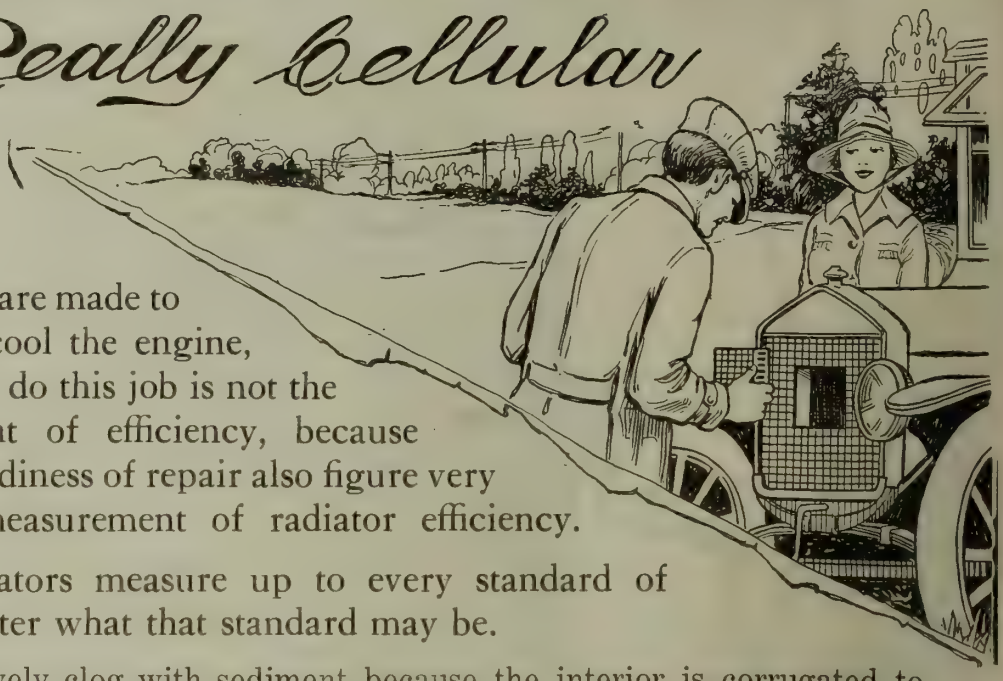
# Easy To Sell The Daisy Churn

Look at it. Look at the finish! Note the neat construction of the frame. Note the advantages built into it for the convenience of the user.

Made of quarter-cut oak, with galvanized and enameled frame—fit for the parlour. Lasts a life-time. Easy to run.

No farmer's wife will want a dash churn when she can get a Daisy. A dash churn is cheap, for it's only made of ash and it breaks a woman's back to work it.

Demonstrate the Daisy and your customers will have nothing else.



Have you our general catalogue? There's a copy for every hardware merchant. Write, if you haven't one, to

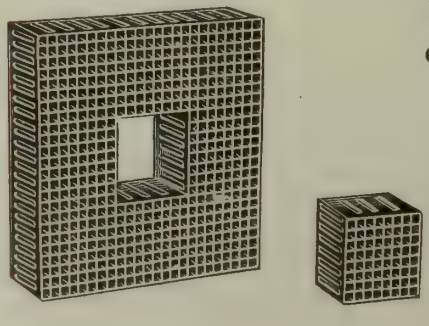
# McKINNON RADIATORS

## *Really Cellular*

RADIATORS are made to protect and cool the engine, but their ability to do this job is not the only measurement of efficiency, because durability and readiness of repair also figure very largely in the measurement of radiator efficiency.

McKinnon Radiators measure up to every standard of efficiency, no matter what that standard may be.

They cannot positively clog with sediment because the interior is corrugated to keep the water in constant agitated action. The cells and the air passages are so scientifically proportioned that a strong cooling draught is sucked through the air passages to keep the water cool, so that your engine hits regularly, runs smoothly and does not get over-heated during the summer days.



McKinnon Radiators are simply a combination of individual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core; the very method that hardens the metal and makes it crack so easily.

You dealers and garage men will readily see what a perfect radiator it is, how easy it is to repair by the simple soldering in of new cells.

Over 750,000 of these radiators are in use.

They are now being nationally advertised.

You dealers and garage men should be ready to sell this line, or to make repairs, as accidents will happen to the most careful drivers.

Write us for information—Address your communication to our "General Sales Department."

# HOLDFAST GASKET SHELLAC

## Is the Greatest Shellac in the World for All Kinds of Gasket Work

**Never has been equalled for sticking qualities---Dries just right**

Don't be confused or misled on this gasket shellac question. There are many cements, a few so-called shellacs, but for real, honest, **PURE** shellac there's nothing "within a hundred miles" of Holdfast Gasket Shellac; nothing that will make gaskets air-tight and resist the terrific heat to which gaskets are subjected like this wonderful preparation.

Holdfast Gasket Shellac is an extra high-grade, thick-bodied solution made from the finest quality of the gum. It sticks after all others work loose, dry up and blow away. It is skillfully prepared so that it always *dries just right*. On account of the extra large amount of flake shellac used to the gallon as well as the high quality, one gallon will do more and better work than two or three gallons of the ordinary shellac or cements. It is so well liked by those who know it, that every succeeding order is larger than the preceding.

YOU CAN'T AFFORD TO SELL OR USE AN INFERIOR SHELLAC OR CEMENT. Eventually you will come to Holdfast—don't wait, send for a sample and particulars *now*. Put up in many sizes and *pays you an attractive profit*, if you are in a position to sell it.

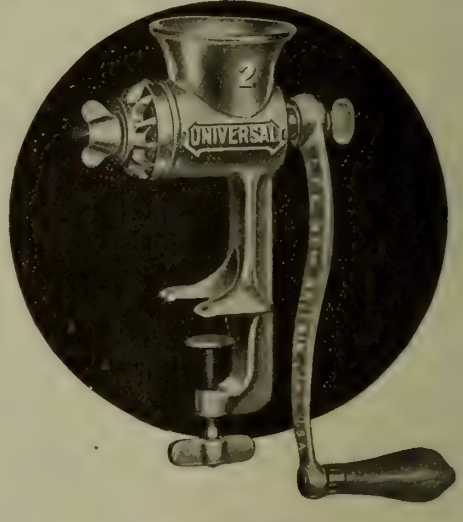
Universal Coffee Percolator.
No. 476.

The Trade Mark Known
UNIVERSAL
in Every Home

***Sell the goods that hold the trade, That's the way the money's made.***



There is no better getter of trade than these three UNIVERSAL appliances. The wise woman is eager to buy anything that saves time, labor and money in the home. UNIVERSAL Products have proved their worth and deserve a place in every kitchen.

Universal Bread Maker.
No. 4.

All things come to those who wait, but they will come sooner if you are too busy to wait for them. The great cry is "Down with the High Cost of Living." Housewives are increasingly active in this movement. They are eager to adopt every worthy scheme and device to save food, time and labor. They know, need, want, and will buy "UNIVERSAL" Bread Makers, Food Choppers and Percolators.

Now is the time to sell these UNIVERSAL Products. Write for our striking window display. Keep the goods showing and you'll keep them going.

Universal Food Chopper.

# "America" and "Canada" Hangers

## These Will Put "Pep" in the Turnover

"Pep" and quick turnover. Special features appeal to your customers and make quick, frequent sales.

"Canada" efficiency is based on anti-friction, steel roller-bearings.

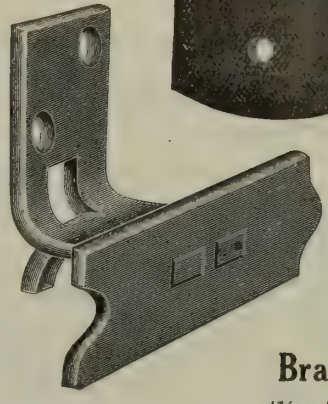
Runs on the same standard "National" track. It cannot jump the track.

**Don't forget the building activity everywhere.**

"Canada" Hangers are packed one pair complete with suitable bolts, in a strong, neat box. The weight is 75 pounds per dozen pairs.

Unquestionably the most popular, and has the largest sale of any Trolley Hanger in the Dominion.

The "America" operates in the Hatch Trolley Track—the only Track supported by the famous corrugated Track Brackets.



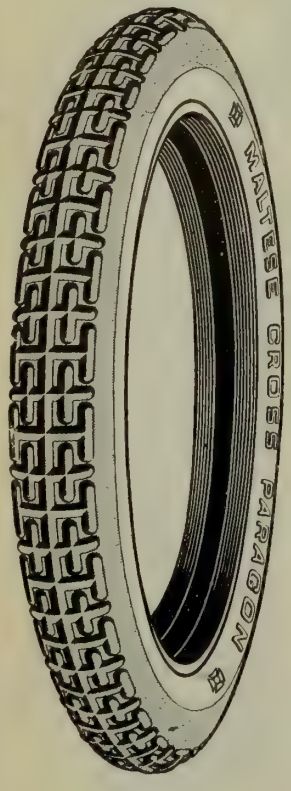
**These Are the Only Track Brackets That Are Corrugated.**

They are naturally much stronger and better than the ordinary plain Track Bracket.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.



**Braced Rail**

1¼ x 3-16 inches. In lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle.

# Maltese Cross Tires

## DISPLAY

**"The TIRES THAT Give Satisfaction" in Your Window.**

The heavy demand for Maltese Cross Tires this coming winter is going to find some of the dealers short of "The Tires That Give Satisfaction" if they do not stock up at once. The demand for Maltese Cross Tires has been very heavy of late and will be more so as King Winter approaches. All motorists know of the greater advantage Maltese Cross Tires have over other makes. They are masters of the situation when ploughing through rain, snow, slush and ice.

Dealers should see that they keep up a good display of Maltese Cross Tires, and watch your tire receipts grow.

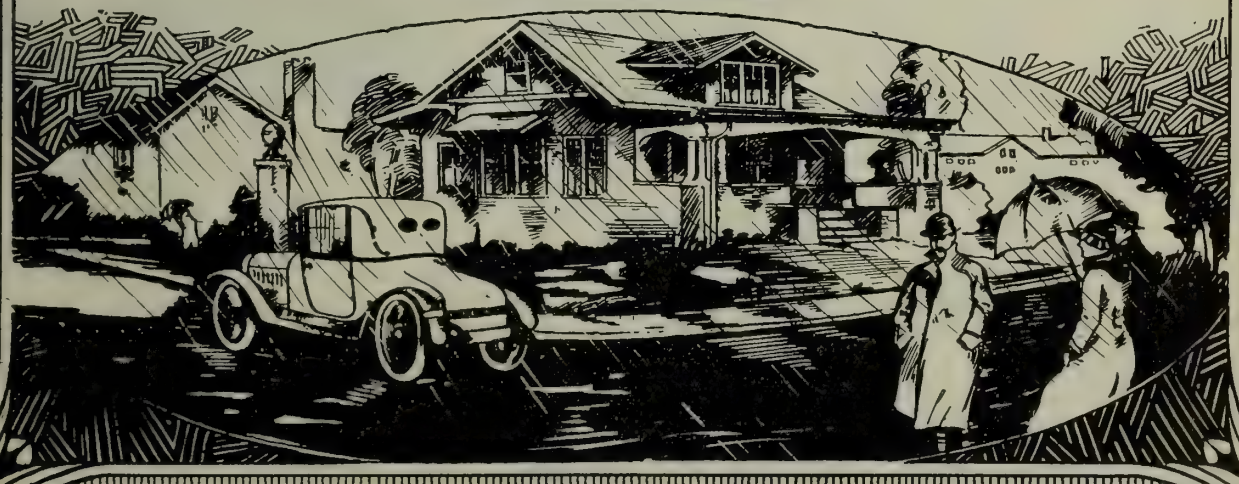
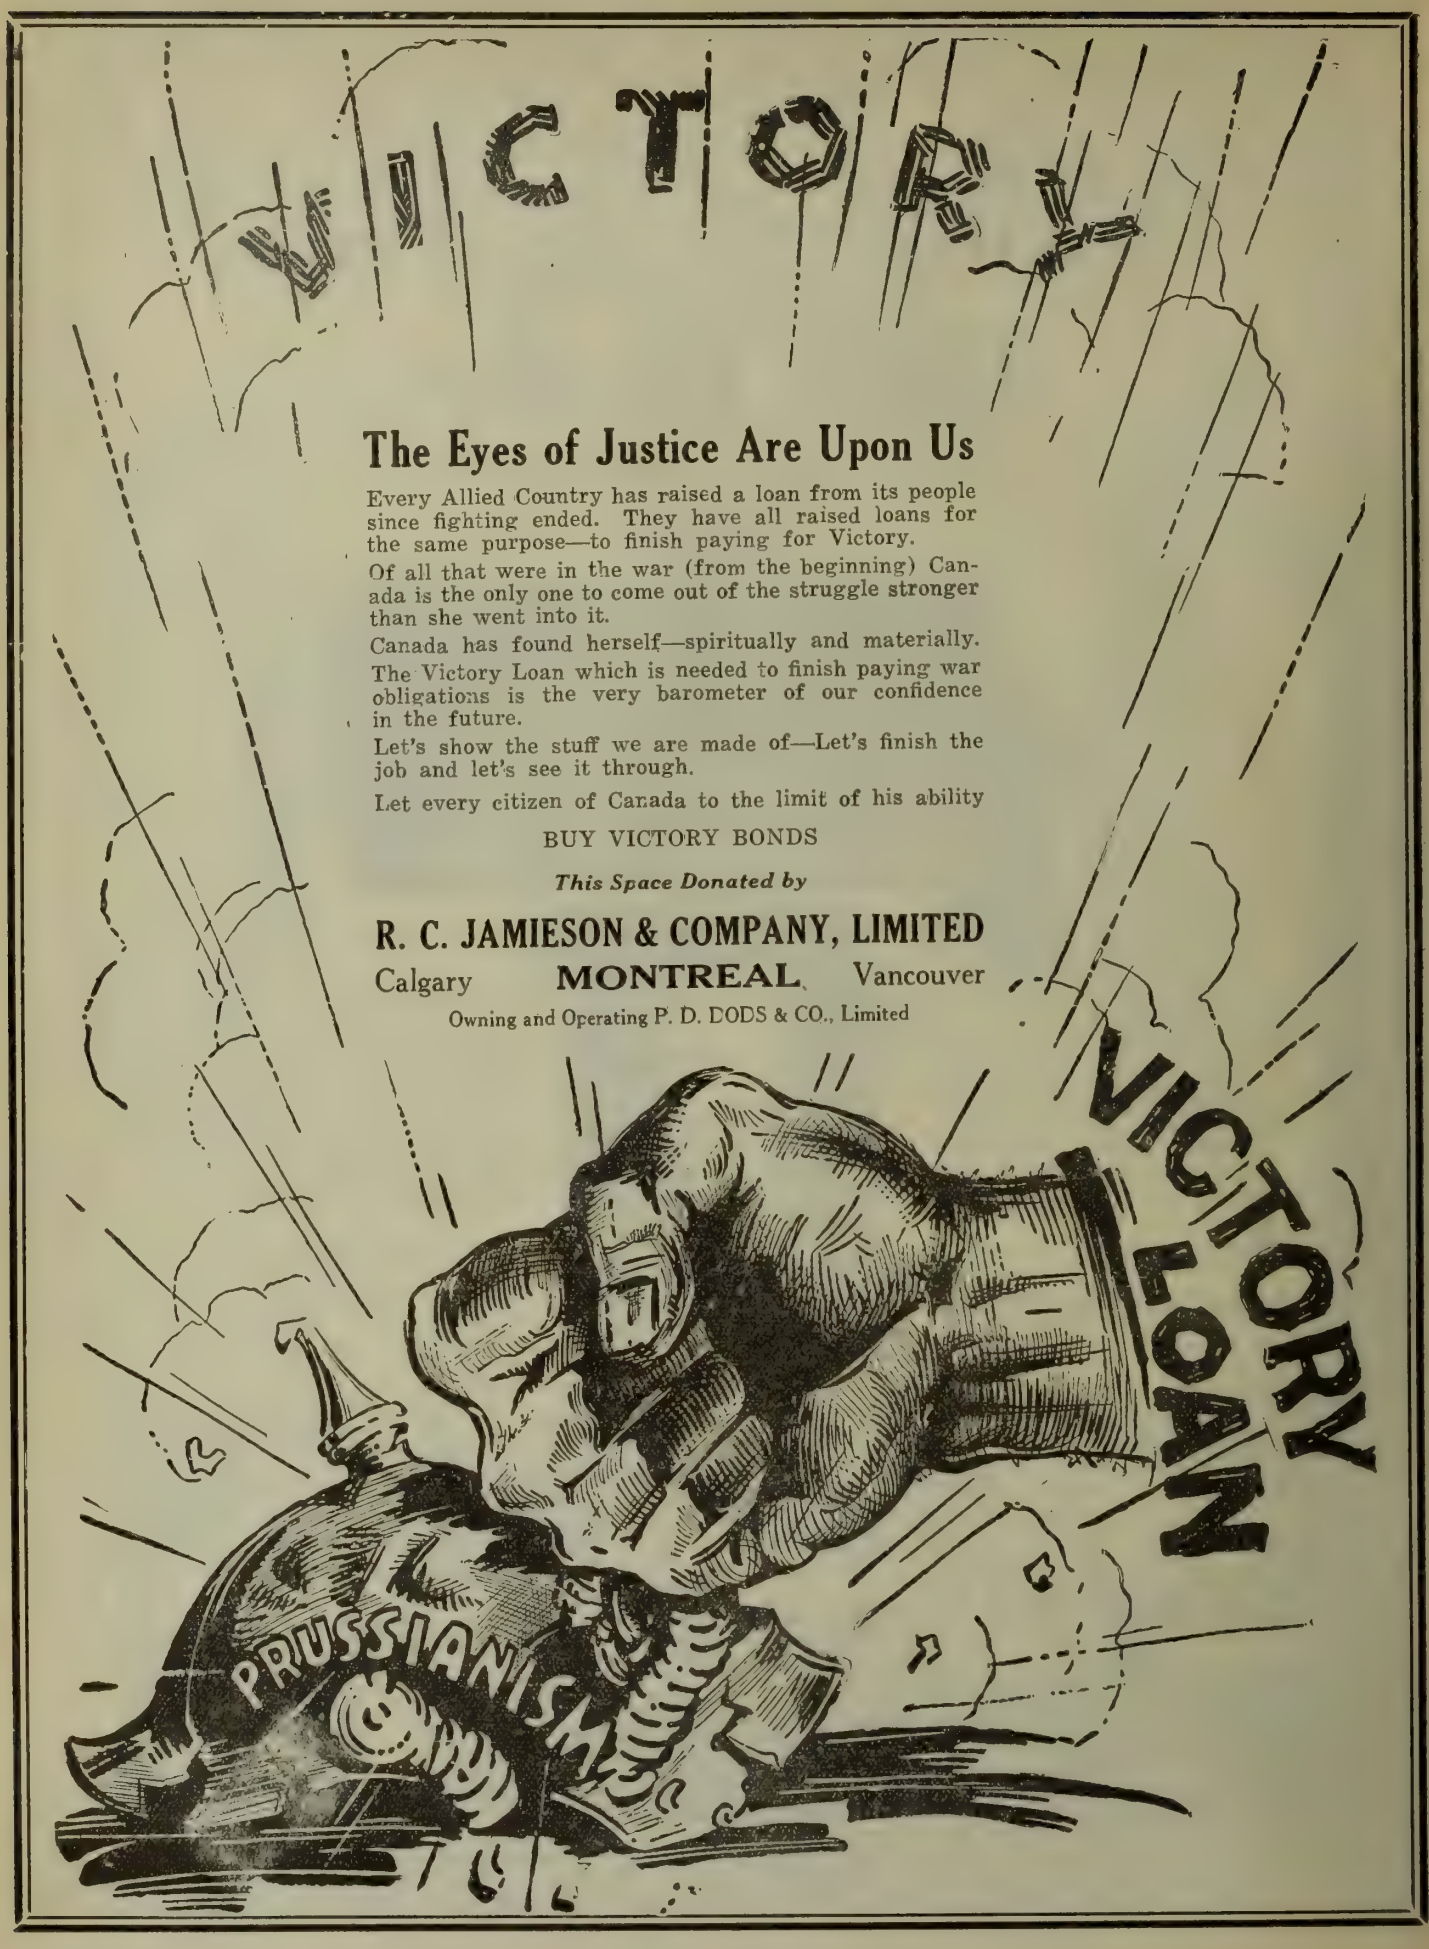
# Flexible Storm-Proof Door Hanger

## No. 77





No. 77 has all the good features of the No. 66 and in addition a flexible hinge joint. This joint allows the door to give, and swing out when bumped. When the door hangs down there is no vibration in the hanger.

No. 77 is very popular with the trade, being in the class of the Big "4." It has oil-holes for bearings, and a special way of attaching connecting strap to truck, permitting free action. The truck is held firmly upright.

**National Manufacturing Co.**

**Sterling Illinois**

## The Eyes of Justice Are Upon Us

Every Allied Country has raised a loan from its people since fighting ended. They have all raised loans for the same purpose—to finish paying for Victory.

Of all that were in the war (from the beginning) Canada is the only one to come out of the struggle stronger than she went into it.

Canada has found herself—spiritually and materially.

The Victory Loan which is needed to finish paying war obligations is the very barometer of our confidence in the future.

Let's show the stuff we are made of—Let's finish the job and let's see it through.

Let every citizen of Canada to the limit of his ability

# Butterfield Reamers

These excellent reamers, like other Butterfield tools, cover a wide range of styles. There are, of course, reamers with straight and spiral flutes, of carbon or high speed steel; reamers with threaded ends (self-feeding); locomotive taper reamers; bridge and boiler reamers and a great variety of others.

When you handle the Butterfield line you need never be "stumped" for a tool. We fill orders for special tools from drawings or samples.

The Canadian mechanic, and his shop executives, are thoroughly "sold" on Butterfield products. They increase your business, bring you customers (for they follow Butterfield tools) and found profitable trade.

## Butterfield & Co., Inc.

**Rock Island, Quebec**

# HACK SAWS AND TOOTH SHAPES

## Right down at the bottom of cheaper

cutting costs is the shape of the tooth. Years of experiment and actual working tests have given us the "Standard" shape tooth. It "cuts quicker and lasts longer."

And here's the reason. As a saw is used the points are worn off and the "contact area" of the teeth on the work becomes so great that enough weight to make the teeth "bite" crushes or breaks the blade. In other words, "the saw is dull."

Another thing: In the acute or "positive" angle tooth the leading edge points in the direction of the cut, it's always "digging in" under the surface and most likely to strip. The negative angle tooth simply scrapes off the metal and does not actually cut at all. The hook tooth is under the same handicap as the acute angled tooth. In all unusual teeth the "contact area," the friction producing surface, is greater than with the "Standard" tooth.

The easiest, surest way to get economy in Hack Saws is to use Starrett Blades with the Starrett Chart. Send for Catalog No. 21 "MA"

# LEND HIM A HAND

***You Lent Him a Hand to Establish Canada in the Minds of our Enemy. AND HE DID IT WELL!***

It is now up to us to establish him in his pre-war successful career, which he laid aside to go over and fix things up for Canada, and we who have the cash can lend it, NOT GIVE IT, MIND YOU? JUST LEND IT.

The reaction from war to peace has been sudden and strong. Our courage may be a bit spent, our enthusiasm for service a trifle on the wane, but the boys who have been over are still for us, and we must be still for them. Therefore, what if it does need a little extra courage and a big effort for us to get some cash together for VICTORY BONDS, let us do it with all the good spirit we have within us.

The HARDWAREMEN THROUGHOUT CANADA were always away up at the top when it came to doing their bit, and now that the work has got to be finished in real, first-class shape, you, they and we all will be there with a great, noble finish.

Encourage your clerks and your friends to buy VICTORY BONDS. Make it easy for your employees to do so.

## YOU ARE ABSOLUTELY SECURED

Why the very store you own is part security for the payment of these bonds.

# You Can Sell One to Every Horse and Cow Owner

HORSE owners are generally recognizing the benefit of FALL CLIPPING, as well as the spring clipping which puts the horse in splendid condition for the summer's work.

FALL CLIPPING gives a clean, comfortable coat, enabling the horse to keep healthy and strong during the winter's exposure. Any horse owner who has nursed a valuable animal through winter colds, chills, etc., will appreciate its value.

Many will clip this fall, and they are likely customers for Stewart Clipping Machines. You will cash in on the demand by displaying Stewart Machines now. They are so well known that they sell on sight—a quick, profitable turnover.

## Display Stewart Clipping Machines Now

### Stewart No. 1 Ball Bearing Horse and Cow Clipping Machine

The gear case is dust proof, excluding dust and dirt—it contains oil, the gears being continuously lubricated.

Gears cut from solid steel bar and made file hard by special heat treatment.

Machine is ball bearing and runs easily and smoothly.

Equipped with six feet of highest grade flexible shaft and the famous Stewart Single Tension Clipping Head.

**Retail Price $16.00**

## Every Dairy Farmer a Splendid Prospect for Clipping Machines

DAIRY officials, prominent dairy farmers and dairy publications are urging cow clipping as an absolute necessity for producing CLEAN MILK.

The flanks and udders of all dairy cows should be clipped at frequent intervals, especially during the fall and winter. The hair being kept short, these parts can be readily cleansed before milking, and the milk is not contaminated from filth.

In many communities it is demanded that all certified dairies clip their cows regularly. If your community health authorities have not already taken such action, they will eventually do so.

Stewart Clipping Machines, so successful in horse clipping, are just the thing for clipping cows. Their reliable construction and years of satisfactory service are well known.

Be prepared to meet the increased demand for Stewart Clipping Machines for clipping cows. It will soon be general, and the demand will be permanent and substantial as the dairy business itself.

We will co-operate with you in every way in increasing sales. Get a stock of Stewart machines, and go after the business now.

Every dairy farmer in your section is a sure prospect.

## *A Startling— but True Statement*

THE New Idea Warm Air Furnace meets and overcomes every problem, in the matter of successfully heating homes, business houses, etc. The

**NEW IDEA WARM AIR FURNACE**

is unquestionably the superior method of heating. With the New Idea you get warm, moist air—where you want it, and as much as you want.

The New Idea contains more heating surface than any other furnace. The large, roomy ash pit prevents the ashes from banking up and burning out the grates. The fire pot is guaranteed for five years. One striking feature is the New Idea Duplex Grates which are easy to operate and take care of clinkers of all sizes.

Sell your customers the New Idea and you have made friends for life.

"75 YEARS OF SUCCESSFUL MANUFACTURING"

# You Don't Give —You Lend

In deciding how many Victory Bonds you will buy, remember this important point—you are not giving—you are lending to your country!

You are lending at a good rate of interest.

You are lending on the highest security.

You are lending to maintain your own and your country's prosperity.

In your own personal interest you should make strenuous efforts to buy as many Victory Bonds as you possibly can.

You couldn't put your money in a better place.

You want to save money—everybody does.

It is the only way to get ahead.

And Canada needs to borrow your money to bridge the gap from War to Peace.

It's your duty to lend.

Take the proper view of this Victory Loan.

Say to yourself: "I am going to buy all the Victory Bonds I can pay for now and in the next ten months." What if it is an effort to pay for them?

Look ahead a little.

Think of what you will own when your Victory Bonds are finally paid for.

Every cent you pay on your Victory Bonds you lend to your country—you save!

Remember that, and

# "YANKEE" TOOLS

## PUSH DRILL No. 44

### *Saves Time at Every Turn*

**Here you have a rapid fire drill, with adjustable tension for hard or soft woods and the 8 different size Drill Points furnished with it.**

**A turn of the cap does the trick that saves time, labor and Drill Points. This drill is about as valuable to the average mechanic as any "Yankee" Tool we make. Built for hard service.**

*Your Jobber Can Supply*

## NORTH BROS. MFG. CO.

**PHILADELPHIA, PA.**

# Kiddie-Kar

*The Largest Selling Child's Vehicle in the World*

The sales of Kiddie-Kar since its appearance on the market have steadily increased until it stands supreme as the world's largest selling child's vehicle.

There are good reasons behind Kiddie-Kar's enormous sales; the margin of profit is large, there are no complaints or comebacks; girls love it as well as boys; it is a year round staple—not a novelty. Made in sizes for children from 1 to 8 years old.

See the trailer—a sure seller.

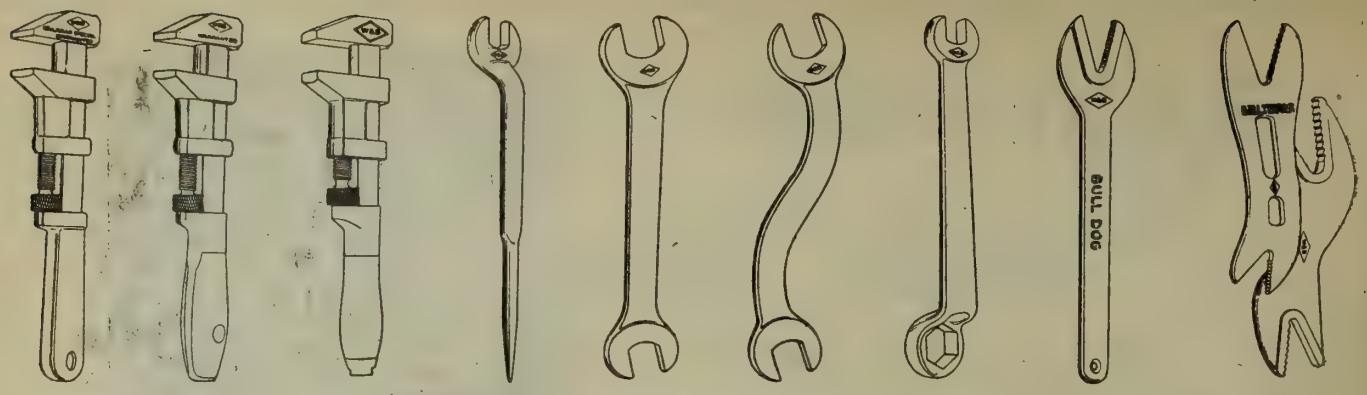
*More Than Half Your Customers See Kiddie-Kar Advertising in Over 3,000,000 Homes*

During these three months before Christmas your customers will see Kiddie-Kar advertised in full pages in color—the most compelling form of advertising.

**Canadian K-K Company** **Elora, Ontario, Canada**

# *THERE ARE MATCHES and* E-D-D-Y'S MATCHES

## *WHICH DO YOU SELL?*



There's just as much difference between Matches as between people.
Some you can always rely upon.
Others are never dependable.
Eddy's Matches are like old friends.
They'll Never go back on you (Never **come** back on the dealer either.)
70,000,000 of them go out daily to lend a hand in keeping things going throughout the land.
Quick turnover is the ideal of every merchant.
You need never worry about Eddy's Matches. Known from Coast to Coast, they sell themselves. Better send in your order to-day.

### THE PAIL THAT PROTECTS

If you're looking for REAL fire protection, no need to go further.
The EDDY FIRE PAIL is what you want.
Made of our justly famous Indurated Fibreware, it's moulded in one piece. No hoops nor wires.
No leaking nor shrinking.
Always ready. Always right.
Made by

**The E. B. Eddy Co., Limited - Hull, Canada**

# Sell the Full Line

It always pays to have the one right tool for the particular need of your customer. You wouldn't think of offering a monkey wrench to a structural iron worker, or a construction wrench to the garage man. He knows what he wants, and he knows he can find it in the "W & B" line.

You'll find every requirement of machinist, engineer, structural worker, farmer, automobilist and household customer well taken care of in the "W & B" line. For 66 years every "W & B" tool has been made to the standard:—

***"Make it better than anyone else can make it, put your name on it, and stand by it"***

# You Don't Give— You Lend

In deciding how many Victory Bonds you will buy, remember this important point—you are not giving—you are lending to your country!

You are lending at a good rate of interest.

You are lending on the highest security.

You are lending to maintain your own and your country's prosperity.

In your own personal interest you should make strenuous efforts to buy as many Victory Bonds as you possibly can.

You couldn't put your money in a better place.

You want to save money—everybody does.

It is the only way to get ahead.

And Canada needs to borrow your money to bridge the gap from War to Peace.

It's your duty to lend.

Take the proper view of this Victory Loan.

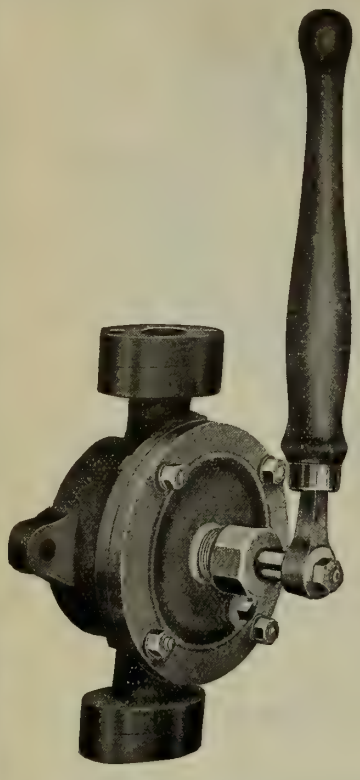
Say to yourself—"I am going to buy all the Victory Bonds I can pay for now and in the next ten months."

What if it is an effort to pay for them?

Look ahead a little.

Think of what you will own when your Victory Bonds are finally paid for!

Every cent you pay on your Victory Bonds you lend to your country—you save!



Remember that, and

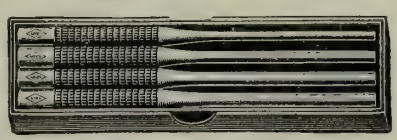
# Satinette

## Furniture Polish—Finishes with a Hard, Dry Lustre

*Furniture Polish*

Satinette polish sells to every automobile owner. After its use on a surface no dust adheres, making it particularly desirable for use on motor car bodies. This popular polish finishes with a hard, dry lustre, accentuating the grain and color of wood, and enhancing the beauty of furniture.



### Satinette Wall Paper and Kalsomine Cleaner

Cleans wallpaper, kalsomine, plaster, and window shades. A pleasing feature is the agreeable satin-like finish that it leaves. Packed in ideal air-tight containers Satinette never dries out or goes musty. It is well-liked, profitable to sell and the demand grows wonderfully.

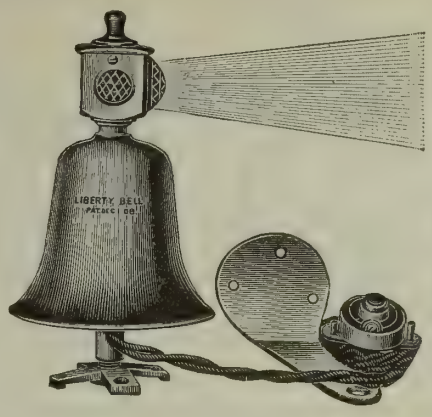
## PEERLESS ORNAMENTAL FENCING

is the last word in fencing, beautifies, protects and enhances the value of your property. It safeguards your children, keeps out marauding dogs, animals and destructive chickens, protects the lawn, shrubs and flowers and prevents trespassing. It wears well, too.



### *Beautify Your Home with*

**Peerless Ornamental Fencing.** It is built of strong, stiff wire, heavily galvanized and coated with zinc enamel to prevent rust. In style, durability, service and every feature combined to insure absolute satisfaction, the Peerless fencing is true to its name. It will not sag and cannot break down with ordinary use.

**Send for Catalog.** Shows many beautiful designs of fencing for lawns, parks, schools, churches cemeteries, etc. **Dealers nearly everywhere.**

**THE BANWELL-HOXIE WIRE FENCE COMPANY, Ltd.**

**Winnipeg, Man.** **Hamilton, Ont.**

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

## WARNS

### BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

## "LIBERTY BELL"

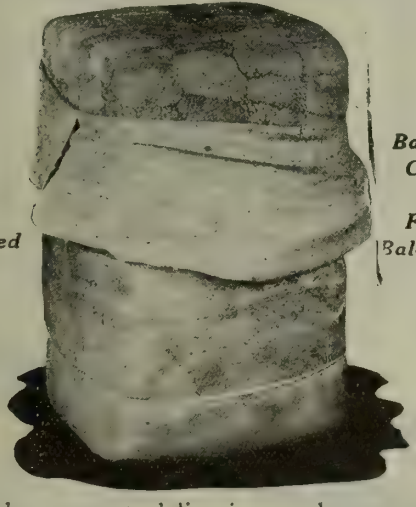
### DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL



***We have an attractive proposition for you. Write for prices.***

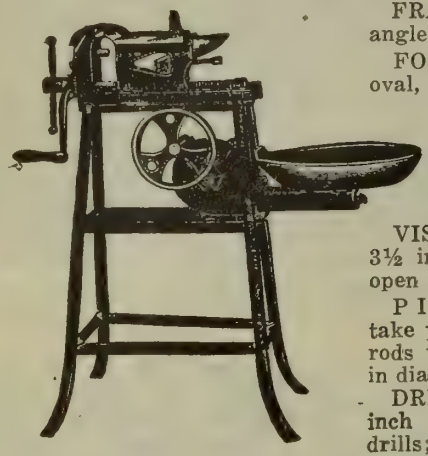
# 4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.



STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

**THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.**

## Rock Island Combination Forge, Anvil and Vise

FRAME—is steel angles.

FORGE — Pan is oval, 12 x 15 inches.

FAN — is driven by an accurately cut gear and pinion.

VISE — jaws ars 3½ inches wide and open 11 inches.

PIPE JAWS — take pipe and round rods up to 2 inches in diameter.

DRILL—takes ½-inch round shank drills; chuck is steel.

The machine weighs about 135 pounds. Order a sample. This tool will sell on sight.

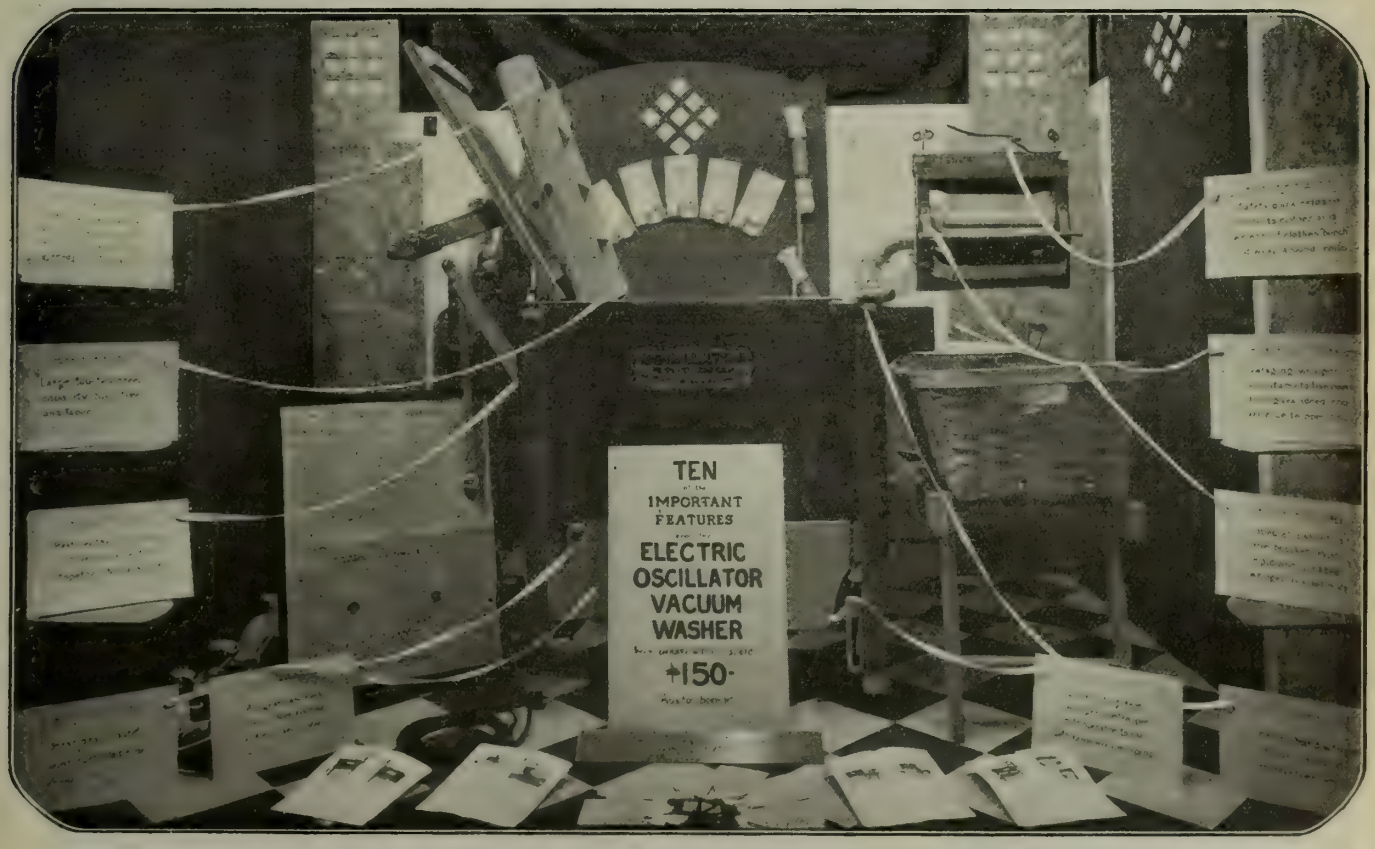
# Display Helps Sell Washing Machines

## Mills Hardware Company, of Hamilton, Ont., Has Sold More Than 400 Washers This Year—Window Displays and Attractive Advertising Big Factor in Producing These Results

"OUR sales of washing machines of all kinds—hand, water power and electric, will run well over 400 for this year," said Nelson Mills, vice-president of the Mills Hardware Co., Hamilton, Ont., in discussing the washing machine business with HARDWARE AND METAL.



Mr. Mills states that the business is one that has shown steady expansion, and that he is looking forward to excellent sales of electrical washers. The firm goes after business aggressively. Not only the washing machine trade, but in everything it handles. It does not believe in having "shelf warmers." The stock has got to keep turning over.

### Window Displays Help

"Window displays are a great help in increasing sales," said Mr. Mills. "We find that it pays, and pays well, to keep our windows attractively arranged and changed regularly. We use show cards and price tickets generously, and find that we get really excellent results. The price is the first thing anybody who is interested in what we are showing wants to know, and we believe in letting them know. Prices are shown in good plain figures, and very frequently we also place on the cards the name of the article. This is a help very often to buyers, as many of them seeing a new line for the first time, do not know just what it is or what it might be used for."

As may be seen from the accompanying illustration, the cards which are used in the Mills Hardware Co. windows are neatly executed, and care and attention is given to their preparation. It takes time, but Mr. Mills says it is worth it in the results obtained.

"We aim to back up our window

*Window displays like the above are producing big results in selling washing machines for the Mills Hardware Co. of Hamilton. Note especially the six little glass shelves set right up against the glass in each of the front corners of the window. In this display they are used to place show cards on. In other displays they make splendid little stands on which to place flashlights, cutlery or other small lines. They put the goods right up under the eye of people who are looking in the windows and speed turnover.*

displays by attractive advertising," said Mr. Mills. "I may say that we are doubling our space and using space every day. That will, perhaps, tell what we think of the results obtained from newspaper advertising better than anything else. We find that consistent advertising sells the goods and that people are keenly interested in advertisements which have a real message for the buyer. There are times when we discontinue our advertising. For instance, during February, and in July and August, we do not advertise. We realize that we certainly lose some business by not doing so, but we believe we can afford to do this during the periods mentioned, when normal business is so quiet."

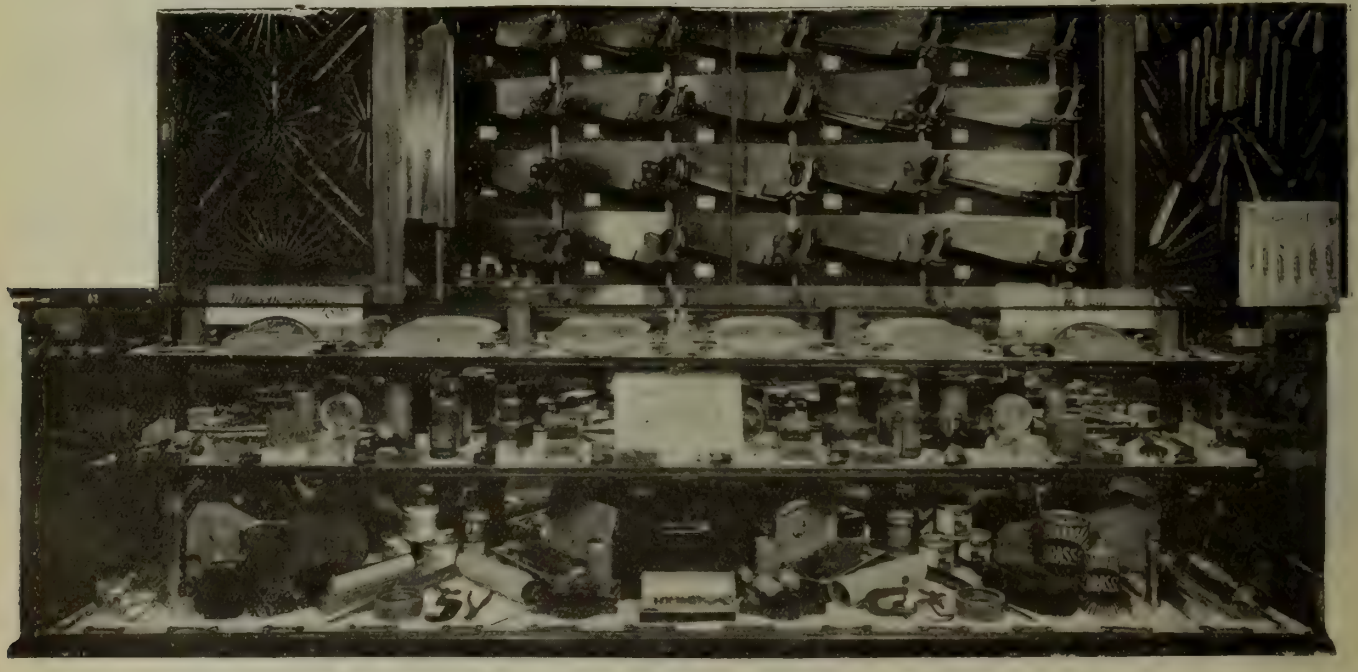
### Nothing Stands Still

Things do not stand still in the Mills hardware. There is always some plan under way for expansion of a department, the taking on of new lines or better ways of doing business. Just now the company is busy with plans for doubling its auto accessory department and very largely increasing the section allotted to sporting goods. In addition, there will be a rearrangement of the paint department.

Just recently the firm installed in its show windows twelve little glass shelves. There are six of these in each window, three on each side. They are small, triangular, and of bevelled glass, and fit neatly into the very corner of the window. They make ideal display stands for cutlery, flashlights, and various small articles.

### People Can See Them

"They put things right up under people's eyes," said Mr. Mills, "and are producing splendid results in sales."

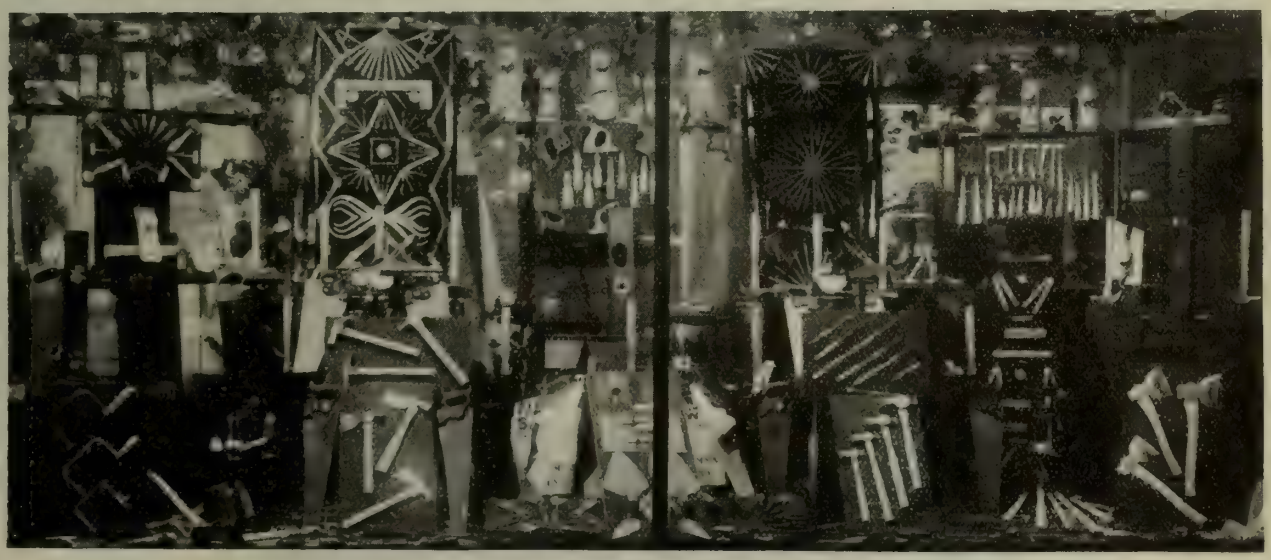


Speaking of the firm's business in auto accessories, Mr Mills stated that it was showing a most satisfactory growth, and as a result of this the accessories department will be doubled.

"We are going to continue our usual policy," he said, "and that is, to only

Continued on page 44

*Confident advertising has always been a part of the business policy of the Mills Hardware Co. They are not afraid to use space, and use it abundantly and they always have an attractive and interesting message to the buying public of Hamilton. Note the attractive use of illustrations and the prominence given prices. There may be some ideas here that you can adopt with profit in arranging your own ads.*



*This silent salesman of auto accessories up near the front of the store not only looks well but it sells the goods. Displays of this kind and the wall displays, such as are shown, are features of the Mills Hardware Co's. plan for keeping stock continuously moving.*

# Seasonable Window Suggestions

*Just now when hundreds of new homes are being finished up all over the country and attractive display of electrical fixtures carries real interest for the home makers, a combination window such as is illustrated above will also interest those early birds who are looking for appropriate Christmas gifts. Reading lamps make a really handsome and very acceptable gift.*

*Displays of tools always bring results in increased sales. On another page will be found a forecast of the building programme that is being developed. This will mean a big demand for tools. Aside from this entirely is the demand from factory and other sources.*

# The Victory Loan

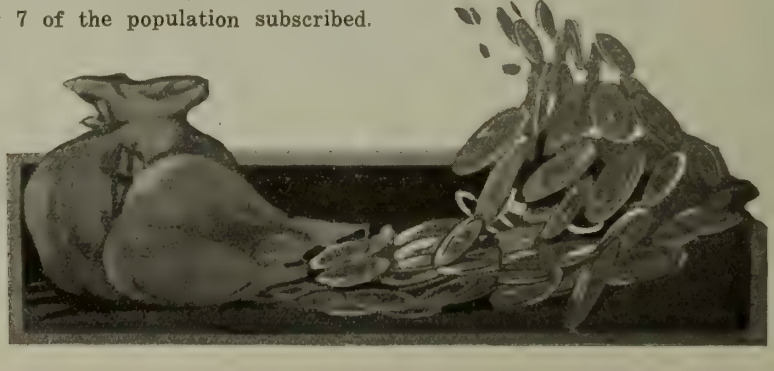
WITH the campaign for the sale of Victory Bonds half over, Ontario has to her credit 58.33 per cent. of her objective, or $131,727,800. That was the standing up to the time of going to press. The subscriptions of the whole Dominion at that time amounted to $226,715,827. A gratifying feature of the loan is the response from the rural sections of the province. It is an indication that the men and women who sent new men to undertake the heavy responsibilities of provincial government are not unmindful of the responsibility which devolves upon them as citizens of a sister nation, which gave freely of her blood and treasure during four and a half years of frightful conflict, to help finance Canada in peace as well as in war. The Prince of Wales Honor Flag has been won by 45 places, and industrial establishments whose employees have won the honor banner now number 121.

## Some Other Features

Aside from the patriotic motives which have inspired the Canadian people to subscribe to this and other similar loans during the last few years, there are other features of the campaign which are both encouraging and gratifying. One of these is the increasing number of subscribers. For the first loan in 1915, when there was a call for $50,000,000, there were 24,862 subscribers. The second loan for $100,000,000 had 34,526 subscribers; the third for $150,000,000, 40,800.

The first Victory Loan in 1917 for $150,000,000 was subscribed to by 820,035 people, the total subscription reaching $398,000,000.

## Steady Increase Shown



Last year when $300,000,000 was asked for and over $650,000,000 subscribed, there were 1,029,000 people who took the loan. Whereas in the first loan about one out of every 320 of the population subscribed, in the last loan about one out of every 7 of the population subscribed. We are still behind the British Isles in this respect, however, the record there is about one out of every 3 of the population. But these figures represent a new and intelligent interest in Government securities, an appreciation of sound financial investments, and a wholesome desire to finance all Canadian ventures with Canadian money. A portion of the money already subscribed has been loaned to foreign countries to purhase Canadian goods, and Canadian credit has thus been given a new place in the world's markets.

## Voluntary Subscriptions

Another pleasing feature of the campaign this year is the increasing number of voluntary subscriptions that are being given. The canvassers are leaving no stone unturned to offer the loan to every possible prospect, but they are receiving many more voluntary subscriptions than last year and the same amount of urging is not necessary. People well know the value of the loan from the standpoint of a safe investment with a per cent. interest equalled by few investments on the market. The fact that bonds this year are taxable is having no appreciable effect upon the number of subscribers on the size of their subscriptions.

## Merchants do Share

HARDWARE AND METAL is particularly gratified to see the number of merchants who are devoting their advertising space to the promotion of the loan. This, they are doing freely, and, added to it, they are giving a good deal of their time and energy to assisting in the work of carrying through the organization work in their own communities. The trade all over the province is showing a commendable interest and enthusiasm in the Victory Loan, and we feel sure that they will have no cause to regret their share in the last Victory Loan which follows the greatest tragedy in the world's history.

*New houses like those shown above, comfortable, well-built dwellings, are being erected in large numbers in various parts of the country and the call is always for more to relieve the shortage. This activity in building offers splendid opportunities for hardware merchants, not only in selling building materials and tools but in supplying the needs of those who are going to live inthe new homes.*

# 4000 New Houses Planned for Spring

## Are You Ready to Take Care of the Rush of Business That is Coming? — Record Demand for Hardware and Plumbing Goods is Expected — What the Housing Commission is Planning for the Future

CONSIDERABLE impetus to many lines in the hardware and plumbing trade has been given during the past eight months because of the Ontario Housing Act, which is responsible for the completion and occupation of some 400 houses since last April, and which will result in the completion and occupation of 1,500 houses by the end of November. A still greater impetus will be felt next year when, according to J. A. Ellis, Director of Municipal Affairs for Ontario, on whose shoulders the responsibility falls for directing the whole provincial scheme, some 4,000 houses will be built.

### Good Class of Houses

What this has meant to the trade can be judged from information given by Mr. Ellis to HARDWARE AND METAL, in which he stated that in the case of 90 per cent. of the houses built or now under construction existing sewerage systems or adequate water supply have made it possible and desirable to install high-class bathroom fixtures and other sanitary conveniences. In the case of two-thirds of these houses, hot-air furnaces have been installed and where the furnace has not been used, high-grade heaters are being purchased by the owner.

### $12,000,000 In the Spring

While 93 municipalities have already come within the provisions of the Act, the Government has assumed financial obligations, as yet, in only 83 of these, obligations amounting to $10,620,000. Actual cash advances have been made amounting to some $4,000,000; and plans already under way will mean a further demand upon the provincial purse to the extent of $12,000,000 by next spring.

Not a little of the success of the Ontario Housing scheme is, according to Mr. Ellis, due to the fact that the widest possible choice has been given the prospective builder in the selection of his style of house. This refers particularly to the exterior of the building. The interior may not vary to any great extent; but the Government experts have prepared many plans showing different plans for the exterior. This avoids the danger of erecting a long line of houses identically the same in appearance; incidentally, it helps to keep up the value of the property, because a prospective purchaser wants something just a little different from his next door neighbor.

### Local Conditions

Discussing with HARDWARE AND METAL the building of these houses and the effect upon the trade. Mr. Ellis said that each municipality was treated, as much as possible, according to local conditions.

"Where there is a sewerage system," he said, "we insist upon them connecting with it and installing all sanitary conveniences. Where there is no sewerage, we advocate septic tanks where the soil is suitable; and where there is neither of these we approve of a closet which, in turn, must be approved by the Provincial Board of Health. In 90 per cent. of these cases there is either sewerage or water connection. With regard to the sanitary conveniences and water supply, we have insisted that the best that can be done shall be done under local conditions. My policy has been to get the best possible results under local conditions.

### Hot Air Heating

"With regard to heating, the furnaces installed for this class of house are exclusively hot air furnaces. We do not insist upon a furnace being installed, but allow the house to be heated by stoves where the owner prefers it; but in the latter case we do insist upon the house being so constructed that a furnace can afterwards be installed, if so desired, without any structural alterations. I should say, roughly, that perhaps two-thirds of the houses built or under construction this year are equipped with hot air furnaces."

### Mostly $3,000 Houses Built

Mr. Ellis was questioned regarding the cost of the majority of the houses that had been built under the Act. "As a matter of fact," he said, "our limit is $3,000 for frame, stucco or brick veneer; $4,000 for a house of solid construction, that is, solid brick, stone, hollow tile, or concrete. These were the limits fixed by the Act when passed last March. Since then it has been found that the cost of construction has increased at least ten per cent. and, perhaps 15 per cent. all over the province. However, taking this into account, I think the only change necessary is to make a loan of $3,500 or $3,600 for brick veneer, leaving the other limits as they are.

### Few Brick Veneer

"The 1,500 houses that have either been built or are nearing completion have been built within the limits of the Act but we have had very few brick

veneer houses. I should say that two-thirds of the houses are $3,000 or less; and the balance are solid construction, or $4,000 houses. What we find by experience is that the cost of a brick veneer house is several hundred dollars more than the frame house, but that the cost of the solid brick house is only two or three hundred dollars more than the brick veneer. My conclusion is that where people can afford it they should build houses of solid construction, for under present cost of construction, they are getting more for their money than in any other way. The reason why there is so little difference between frame and solid brick is that lumber is so abnormally high in price."

**Will Prepare Many Plans**

"I intend at the beginning of the year," said Mr. Ellis, in referring to the work that had been done as a guide to the work of the future, "to get out a report showing exactly how many houses have been built in each municipality, and the class of construction and what the cost has been. There will also be photographs of the houses actually constructed and the plans of the same. I hope to have about thirty or forty of these so that the people will know exactly what the cost has been for each kind of house.

**Plans of Heating and Plumbing**

"In addition to these, I have had plumbing and heating plans of the six-roomed house prepared which I also intend to have published. The keynote throughout has been to get the very best in everything with the minimum of cost to the builder. New Toronto is just about finishing 60 houses of solid construction which are costing not more than $3,200 or $3,300 each. Port Credit has also a number of six-roomed houses of solid construction, costing them about the same price."

# Change Made in Income War Tax Act

## Important Amendment Provides for Penalties for Those Not Making Returns as Required by Law—Time for Giving Information Has Been Extended

AN important amendment to the original act regarding income war tax has been made. It will, in one respect, alter the machinery by which the Act is enforced. Instead of imposing the penalty of a fine collectible in the courts of the land, a departure is made whereby this penalty is collected in the same manner in which taxes are assessed and collected.

**The New Clause**

The clause reads:

"Every person required to make a return under sub-section one of this section who fails to make a return within the time limited therefor, shall be subject to a penalty of twenty-five per centum of the amount of the tax payable, and every other person who is required to make a return under the provisions of this section who fails to do so within the time limited therefor, will be subject to a penalty of ten dollars for each day during which the default continues, and all such penalties SHALL BE ASSESSED AND COLLECTED FROM THE PERSON LIABLE TO MAKE THE RETURN IN THE SAME MANNER IN WHICH TAXES ARE ASSESSED AND COLLECTED."

**Time Is Extended**

This clause, of course, refers to the returns to be made for the present year. There is also one other change in the Act with reference to the time when such returns must be filed with the proper officers. This time has now been extended to the thirtieth of April, and all 1919 returns must be forwarded to the proper authorities by that date.

An innovation in taxation like the Income War Tax naturally has required and has received a good deal of leniency in enforcement. Under the provisions of the Act, as originally passed in 1917, no obligation rested on the officers of the Crown, whose duty it became to enforce it, to give any notice whatever to those liable for the tax. It was specifically set out that,

> "Every person liable to taxation under this Act shall, on or before the twenty-eighth day of February of each year, WITHOUT ANY NOTICE OR DEMAND, deliver to the Minister a return.....of his total income during the last preceding calendar year."

**Took Precautions**

Recognizing that the Act was an innovation in taxation, extra precautions were taken by the Government to see that it would not become necessary, in the working out of the Act, to impose the penalty prescribed, namely, a fine of "one hundred dollars for each day during which the default continues"; and, in the case of false statements, "a penalty not exceeding ten thousand dollars or to six months' imprisonment, or to both fine and imprisonment." Notices have been sent out by the officers of the Crown ever since the Act came into force, not once but two and three times, to persons who, either knowingly or unknowingly, have failed to file the proper information with the Income Tax Commissioner or such other person deputed to receive the information.

**Were Not Imposed**

While a complete record of fines and convictions under the Act is not available to the public, it will probably be found that the extreme penalty of the law, or anything like the extreme penalty, has never been imposed. Justice has been tempered with mercy, and the exact letter of the law has not been carried out. Ever since the Act came into force, the daily newspapers have contained notices, at the proper time, of the provisions of the Act and the penalty of failing to comply with it. So far, there have been few, if any, cases of conviction due to absolute ignorance of the law, but rather to an unwise determination on the part of the person fined, to refuse to forward the proper information to the officers of the Crown.

### DISPLAY HELPS SALE

Continued from page 40

handle standard lines for which there is a demand. There are too many temporary novelties on the market that no one knows about for us to experiment with untried lines. We have been doing an excellent trade in accessories, and look for it to grow steadily."

**Display Helps Sales**

The entire Mills Hardware store is an invitation to the public to buy. Stock is attractively displayed everywhere one turns, and what is perhaps more important, it is displayed attractively. Sparkling cut glass, gleaming cutlery, shining nickelled goods, and polished steel and other goods extend their invitation to buy from all glass silent salesmen, from wall display cases, and from display stands. The whole atmosphere of the store impresses one with the feeling that here is a place where a quality stock may be obtained, where service is a feature, and where the customers' satisfaction is the store's aim.

### VALVE FACTORY FOR BELLEVILLE

The H. A. Wood Mfg. Co. has secured premises at Belleville, Ont., and as quickly as possible will commence the manufacture of automobile valves and other valves for high-pressure work. The company owns the Canadian rights of the Wood Airtight Valve Company, Limited, and is capitalized at one million dollars.

The men interested in it are: Dr. I. G. Bogart and Henry Hangrove, of Kingston; S. W. Jenckes, Sherbrooke, Quebec, and St. Catharines, Ont.; James R. Ness, M. G. Hunt, L. Denys, of Toronto, and R. J. Graham, Belleville.

# Big Recovery in Western Business

## Recent Months Show Substantial Gains—Big Industrial Development—Next Year to be Big One—Canadian Export Trade Heavy—Production May Soon Decrease

"THE West will have half of an average crop, I think." Back from an extended trip to Western Canada, lasting several weeks, Edward Goodwill, vice-president the Thos. Davidson Mfg. Co., Limited, Montreal, thus expressed to HARDWARE AND METAL his great satisfaction with present Western conditions and of the outlook for the future. Next year, thinks Mr. Goodwill, there will be a decided forward stride out there, and from a business standpoint he anticipates that the trade will experience much activity.

### Conditions Better

Mr. Goodwill made stops at Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Vancouver and other points. At all these points conditions were better than they have been for some time, and Edmonton and Vancouver, in particular, were much more healthy, from a business standpoint, than for some time past. Around the Edmonton district, improved crop returns late in the season had served to materially improve the outlook, and actual business at the present time is greater.

### Settlers Pouring In

North of Edmonton, in the Peace River Country, there has been considerable activity this year. "Crops were good up there," said Mr. Goodwill, "and a great many settlers have moved in. It is stated that 5,000 or 6,000 returned men went in there. These men require a great deal of hardware—perhaps $500 to $600 worth each, and this is a big thing for the hardware trade."

Mr. Goodwill believes that this north country is to have a future. It has produced many good yields and seems to be somewhat out of the experimental stage, as far as crop returns go. At present, outfitting is done at Edmonton, the goods being shipped to Athabaska Landing and trekked over the country from there.

"Owing to the fact that Manitoba had a better crop this year than either Saskatchewan or Alberta, there has been a great deal more movement of settlers to Manitoba. Of course, these have been a good type of settlers, mostly Americans. They have money and buy improved farms."

### Have Been Large Buyers

Asked as to the trend of buying among merchants, Mr. Goodwill said that there has been a very steady and healthy demand for some time.

"Buying was deferred in some sections owing to the poor crop prospects. Merchants were taking no chances. The first six months of 1919 were not so good as the first six of 1918. But since then they have greatly improved, and it is possible that the figures for the year will be larger than those for 1918. At present there is a large movement and business is excellent all through the country."

Mr. Goodwill believes that the Western business man is doing a good business, that is, that he is watching credits, etc., and paying close attention to essentials. His caution in buying, as above outlined, supports this tendency on his part. The old policy of stocking up heavily—beyond one's reasonable requirements—was evidently not obtaining to the extent it once did.

### West Will Manufacture

Already a considerable factor as a manufacturing centre, Mr. Goodwill believes that Winnipeg, from an industrial standpoint, will continue to expand. "Raw materials from Pennsylvania can be brought up the lakes, and this ensures transportation at a reasonable rate. A great deal of manufacturing can be done there to advantage. Of course wages are higher—higher than in some parts of the country. But they are higher in Vancouver than elsewhere in Canada."

Referring to housing, Mr. Goodwill said that this was an acute problem in Winnipeg.

"Here in the East," he said, "a man can buy if he cannot rent, but there it is impossible, as a rule, to either rent or buy. In one case that I know of, one of our men found that housing would cost him four times, in Winnipeg, what it cost in Montreal. There will be need for many new houses."

Mr. Goodwill stated that there has been a large demand for various manufactured products for overseas, and particularly from Great Britain. As a matter of fact, there was a big demand from many countries, but export, as far as his firm was concerned, had been confined very largely to Great Britain. "Of course, we have first taken care of the domestic trade and are still doing this," said Mr. Goodwill.

The movement of enamelled ware has been particularly heavy, and the trade which is secured has totalled many thousands from month to month. "We have turned many orders down that we cannot fill—orders for hundreds of thousands of dollars' worth of such products."

Asked as to whether these orders called for special patterns of enamelled ware, Mr. Goodwill said that they did not, but that regular stock wares were taken. It would be out of the question to entertain orders for special patterns, he said, for this would call for the making of special dies.

### Toys Were Big Sellers

Of course, there are other manufactured lines that are wanted in England in addition to the extensive variety of saucepans, kettles, basins, and regular kitchen utensils, which are always required. Of these enamelled ware lines, Mr. Goodwill said that many of the smaller utensils were popular, if anything, of smaller sizes than the average used in Canada.

Toys have been a big seller. Lithographed toys, such as tops, banks, whistles, horns, etc., have been in active demand. For instance, one individual order called for no less than 600 gross of these tops. They are packed and shipped in barrels. Toy drums have been a big seller, but for export these are naturally too bulky to permit of profitable shipping to export markets. During the war, "tanks" and battleships were popular sellers.

"It is not a matter of price," continued Mr. Goodwill, "so much as a matter of having the goods to supply. 'Give us the goods, never mind the price,' seems to be the attitude of the buyer."

### Will the Business Last?

Interest naturally attached as to whether the business will last. This, Mr. Goodwill thinks, is uncertain. The imports of enamelled ware from Austria and Germany before the war, for instance, were about 90 per cent. of the total requirements of Great Britain. Of course, the trade for these goods was completely shut off during the war and the new connections, already outlined, have been made, resulting in hundreds of thousands of dollars' worth of business being secured by the Canadian manufacturer. A great deal of this has come without intensive sales effort, the buyer seeking supplies where he could get them. These orders were filled, said Mr. Goodwill, as received, no definite shipping dates being specified, and it was further stated that shipping had been quite readily available for use when wanted.

The Canadian enamelled ware has been well received, and while it is not anticipated that the trade at present obtainable will last indefinitely, some connections will probably hold. Mr. Goodwill stated that the very uncertainty of permanence for such business precluded any expansion of a permanent nature in providing new equipment, etc. They had, he said, first looked after the home requirements, and then the export business which could be

handled was taken on after. Time would tell whether a permanent connection could be maintained.

**Difficulties Met**

Speaking of the present outlook for stoves and stamped wares, Mr. Goodwill stated that, while difficulties had been encountered, they had been fairly well met during the season. But as to whether the balance of the season could be provided for was dependent upon conditions that could not be foreseen. "Much will depend upon the attitude of the miners in the United States. If they strike, then production will be cut off and the situation will be rather serious. A great deal depends on what happens there."

Until the present time, manufacturers have taken care of trade requirements very well, and still, Mr. Goodwill states, there has been such a heavy drain upon raw material that present surplus is small. Take tinplates, for instance, as well as galvanized sheets. These are not only scarce, but supplies are well distributed to the jobbing trade and buyers are scurrying here and there to obtain their present needs, if possible. Already, prices on tinplate have soared and the situation is emphatically a nominal one on both tinplate and sheets of all kinds.

**Future Stove Costs**

"Will there be any advance in the price of stoves?" was the natural question asked by HARDWARE AND METAL.

"I would not say that there will be an advance, but anything may happen at any time to make a change necessary. Already there has been considerable increase in the cost of making, to the manufacturer, since prices were last increased. We have been trying our best to prevent advances being made, but I would not say that there will be no increase."

The same is true regarding various stamped wares. Increases have been staved off. Will it be possible to prevent new high prices becoming effective? As was pointed out in HARDWARE AND METAL some time ago, the prices last named—some months ago—would perhaps continue in force until material then in hand was absorbed. With stocks reduced as before outlined, and with only immediate and near future raw supplies in hand, prices cannot decline. Furthermore, with industrial unrest still maintained in the States, and upon which market the Canadian manufacturer must needs depend, there is no possible hope that prices can decline for a long time to come; the tendency is decidedly otherwise.

Eclipse Machine Company, Limited. head office Walkerville, Ont., capital $100,000, plans to manufacture and deal in tools, auto parts, bicycles, electrical equipment, etc.

# Europe Needs Canada's Products, Says Walter B. Ramsay

CANADA to-day has a trade and commercial duty to perform in supplying Britain and Europe with goods, just as she had for more than four years a military duty in aiding the Mother Country and her Allies in meeting the Teuton menace. We have vast natural resources, which can be manufactured to meet foreign as well as domestic needs, at prices which will mean prosperity for all our people.

*WALTER B. RAMSAY*

*President A. Ramsay and Son Company, Montreal, and Chairman of the Export Board of the Canadian Paint, Oil and Varnish Association.*

In exporting, the Government of Canada has set us a good example by establishing large credits in Canada for Roumania, Greece, Belgium, Italy and France, against which large quantities of merchandise and food have already been purchased; and when these credits are exhausted, and if our products have given satisfaction, we should be able to carry on, as nearly all Canadian banks are very keen to help, by giving credit to shippers, covered by negotiable securities.

**Getting After Orders**

The countries of Europe, and also the colonies, are greatly in need of Canada's products at the present time, and these orders can only be secured by personal representation or through some resident agent. Advantage should be taken of these conditions before some other country steps in and gets the "cream." The shipping situation, which has been unsatisfactory up to the present time, is rapidly improving. There are direct steamers sailing to South Africa, Australia, New Zealand, West Indies, South America, France, Italy and Greece, and many other countries from Canadian ports, and all these shipping companies are anxious for business. Canada has trade commissioners in all these countries, who will be only too glad to assist you or give you what information they possess.

A great many export companies have been organized in Canada, and they in turn can advise you as to the method of packing, shipping, etc. Also information regarding the importing of goods you require for manufacture, which are unobtainable in Canada, can be secured through the same channels, and possibly a large reciprocal trade can be developed between Canada and these countries, which should prove to be of great mutual advantage.

**To Carry Our Debt**

It is absolutely necessary that Canada should exert every effort to develop her industries and export, and also to make this country so attractive that it will draw a large number of immigrants of the right class to our shores. The reason is obvious, as Canada's debt is heavy, now amounting to $1,750,000,000, caused chiefly by the war, and the only way to successfully carry on and liquidate this debt is by having a greater population and greater production.

# Asking for First-Class Rates on Express Shipments of Electric Bulbs

A CASE in which the manufacturers and shippers of electric bulbs are vitally interested was recently brought to the attention of the Dominion Railway Board, which held a sitting in Toronto. As the law now stands, these bulbs are carried by the express companies at double first-class rate. The Canadian Manufacturers' Association, in taking up the cudgels for the producers and shippers, are asking for the normal first-class rate. They submitted evidence showing that electric lamps were carried in the United States and from the United States into Canada at the first-class rate. If was further shown that 22 per cent. of the export trade in this article from the United States in 1918 came to Canada.

**The Company's Claim**

The attitude of the express companies as voiced by the secretary of the Express Traffic Association, Mr. C. N. Hamm, was that incandescent lamps

# Better Off Without Whiskey

## First Hand Investigation Made Regarding Conditions in the Steel Strike Area Shows That Even the Bar-Keepers Are Agreed That Prohibition at This Time is a Blessing

IS there any relation between prohibition and strikes? If the manufacture and sale of intoxicating liquors were to be resumed, what would be the effect upon the industrial situation? These are pertinent questions at the present time, and the result of an investigation made by the "Iron Age" in the Pittsburgh district by a member of its staff, is of special interest. His report is, in part, as follows:

"In my first-hand study at Pittsburgh, McKeesport, Wheeling and Weirton, I talked with many people regarding the part prohibition is playing in the present steel strike.

### Prohibition a Blessing

"Steel mill officials, mayors, sheriffs, state, city and town police, soldiers recently returned from the other side, Americans employed in and on strike at the mills, railroad employees, chamber of commerce members, clothing, furniture, boot and shoe and other tradesmen, restaurant proprietors, as well as priests and ministers, all agreed that prohibition is a blessing.

"Not all of them believed in prohibition. In fact, most of them do not believe in it. But they nevertheless feel that at this particular time it is fortunate that prohibition is in force.

### Is Better Off

"Even a dispenser of near-beer, while engaged in wiping off his McKeesport bar, admitted that the town under conditions existing, is far better off without its whisky and other strong drinks. He regretted the loss of revenue from the sale of 'the hard stuff,' and the lack of life accompanying its consumption, but he appeared willing to forego both so long as the place remains quiet and his wife, children and home are safe. He added: 'I haven't had to throw a man out of here since July,' a coincidence that appeared significant.

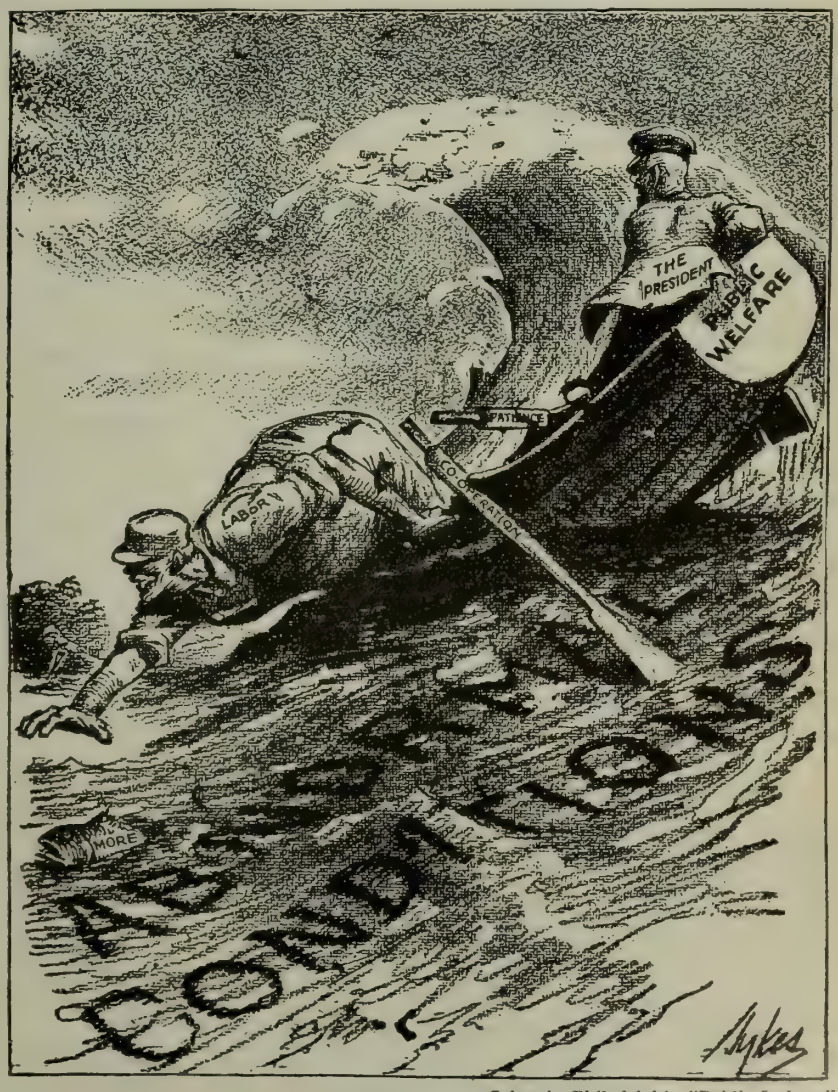
### Narrow, Selfish View

"Liquor interests elsewhere feel that the people of the country are losing a personal liberty in not being allowed to purchase liquor, the prohibition question with them being a National rather than a local one, strike or no strike. They appear to have a little interest in the welfare of the strikers or the people in their immediate vicinity, their views being narrow and selfish ones.

"In McKeesport I found an Austrian, on strike, who considered the lack of whisky a part of the steel mill plan to defeat labor, and a second man of the same birth, living on another street, who entertained much the same attitude. These two men are not American citizens and distinctly of the Red type. Questioned further, they appeared out of sympathy with everything in our country, from President Wilson down to their neighbor, who has gone back to work in the tube mill.

### Admit Its Value

"Strike leaders and their lieutenants are inclined to sidetrack the issue. When pegged down to a plain yes or no answer, they admit the value of prohibition at this time, although at heart they feel 'the strike would go better with whisky.' So possibly their statements are based on a fear that to sanction the sale of whisky, gin, etc., will link their name with the doctrine of the Reds, which is just the impression the labor leaders do not want people to get.



"One cannot help being impressed, no matter what sections of the strike zones are visited, with the efforts being made by the authorities to suppress the sale of liquor. Such efforts, and those directed against large gatherings of strikers, have resulted in remarkably few disorders.

### A Great Struggle

"The present steel strike will go down in history as one of the greatest struggles between labor and capital the world has ever witnessed. It also will go down in history as lacking in much of the violence usually attending such conflicts because of the enforcement of the National War-Time Prohibition Act.

"Tradespeople in those centres where the strike temporarily resulted in the closing of mills, say the bottom fell out of business for a spell, but that it has

Sykes in Philadelphia "Public Ledger."

"Sit Down"

# EDITORIAL COMMENT

THAT manufacturer who predicted that the price of shoes is going to come down April 1, might have been believed if he had named any other date.

* * *

THERE is little distinction between the man who refuses to sell at a fair price and the man who refuses to buy at a fair price—either one can turn business upside down.

* * *

THE weakest expression that a salesman can use over the counter is: "Will that be all?" because it leaves the door wide open for a negative reply.

* * *

BE very careful regarding credits. Use money and credits wisely as they are among your first requisites for making business either a success or failure.

## *THE SIXTH WAR LOAN*

CANADA'S sixth war loan and third Victory Loan is being subscribed to at a rate that is bringing joy to those in charge of the campaign, and is putting the returns to date far ahead of those of previous years. The success of this loan speaks volumes for the soundness of the Dominion and the prosperity of the people. It shows as nothing else could, that although they have been carrying for five years the burdens of a great war, they are still ready and willing to stand shoulder to shoulder and solve the problems of the after the war period. A feature of the present campaign is the number of requests from outsiders for subscriptions. This shows that the eyes of the world are not only on Canadian affairs, but that the future of the Dominion is viewed favorably. This is significant and its bearing on later development projects that may be undertaken is important. If Canada wants money to "carry on" at any time, it looks as though her chances are good for securing it.

## *AN OVERNIGHT MARKET FOR OIL*

ALMOST overnight as a result of the coal strike, an enormous market has developed for fuel oil. Just one instance will show how big this really is. The United States Shipping Board and the United States Navy have contracted for 66,000,000 barrels of fuel oil alone. This is an enormous quantity of oil, and when it is considered that all over the country manufacturers and others are planning to burn oil, it will be seen what may happen if the strike continues for any time. Another development of the situation is that the American Government authorities are taking all the steps necessary to secure the tanker tonnage necessary for transporting their fuel oil. This, beyond question, will mean a shortage of tankers for other purposes.

## *WILL HELP STABILIZE TRADE*

IT begins to look as if Great Britain's wonderful power to pay her debts is going to do more than anything else to clear up the tangle that has resulted in trade, because of falling rates of international exchange. In the war period John Bull carried a financial load such as has never been attempted in the history of the world and came through with flying colors in spite of the fact that huge purchases abroad caused a balance of trade against him and sent the pound sterling down to unusually low rate.

British finance, however, was always sound and the nations of the world were ready and willing to let Britain have all the goods she wanted. Settling time is the real test and the outstanding features of the Budget statement given by the British Chancellor of the Exchequer to Parliament, is the willingness of the British people to undergo further taxation in order that every obligation of the nation may be fully met. Five years ago the revenues of the British Government approximated a billion dollars. Now they are almost four and a half billions annually and ninety per cent. of this amount is being raised by taxation. The Chancellor's statement shows that it will be possible for the long future to reduce taxes considerably and still provide for all peace time requirements. He stated, however, that if it were necessary there were still sources of taxation untapped and that the British people were willing to be taxed to meet their debts. It is this spirit of justice and honesty that has given Britain the standing she enjoys in the world to-day. Aside from the fact that Britain has astonishingly large totals of quick and realizable assets is the spirit of the people.

## *ELECTRICAL EFFICIENCY*

CONDITIONS as they exist at present are forcing more people every day to realize the value of efficiency. In no place is this more strikingly shown than in the home life of the nation. The impossibility of obtaining adequate help, no matter what price is paid, is driving householders to seek relief in

electricity. Once they have tried this plan of solving their difficulties they are won for keeps. No woman who has ever used an electric iron will go back to the old system, especially when she recalls the hot summer days when the stove made the whole place like a furnace, while she finished up her ironing. The people are "sold" on electricity because it has proven that it will do the work they want done and do it quickly, cheaply and above all efficiently. It has proven that it will do more to eliminate drudgery than anything yet discovered. The potentialities of the electrical goods market is illimitable. The business at the present time, large as it is, is merely in its infancy. Hardware merchants all over Canada are in the very front rank as distributors of electrical equipment and are finding that one satisfied customer brings many others and that the goods not only sell themselves, but advertise themselves. Better still, such equipment as washers, cleaners, etc., demonstrate that they soon pay for themselves in actual outlay saved and no merchant could wish for stronger talking points than this.

---

### *HE HAS THE RIGHT IDEA*

"PEOPLE don't want anything that is 'Second Best,' or 'Just As Good,' they want the best," says a Western Ontario hardware merchant in his advertising this week. This is very, very true, and merchants all over the Dominion are finding as never before, that the buying public will turn down what they call "cheap stuff." They are willing to pay a good price, but they want something for their money. They are fully alive to the fact that compared with standards of five years ago they now have to pay a high price for what was then cheap. But they are willing to pay a little more and get something worth while. Many merchants are now taking the lead in this matter by offering a high-priced article of unquestioned quality as soon as a prospective buyer makes known his wants. They state that in the great majority of cases the article is bought without further question. There is no haggling over price. One hardware dealer stated to HARDWARE AND METAL, that he tried selling a really high-class razor at $6 as an experiment. He had previously been handling cheaper razors, but a friend in the business suggested that he take a couple of the $6 razors and try to sell them to the first prospects he had, emphasizing particularly the fine quality and the lifetime of service the razor would give. The hardware merchant was dubious about getting $6, but he said he was willing to try anything once and did as directed. He convinced the first two prospects he had for razor sales that the high-priced article was the thing for them if they wanted a really superior article, and now every time a man comes in to buy a razor he talks up the $6 article first. If he cannot sell him the $6 one he sells him a cheaper one, but he says it is remarkable the high percentage of $6 razors he turns over. The same thing applies to other lines. A manufacturer stated recently, that the writer would be surprised if he knew the number of $12 shaving brushes that are being sold. He says the sales are made simply because the salesman convinces the prospect that he is going to get long service and all-round satisfaction by buying the article of unquestioned quality. Stove men say the same thing. People will not, according to them, buy or even consider a stove that is what they think cheap.

---

### *PROHIBITION AND THE STRIKE*

ON another page will be found the results of a very careful investigation made into conditions in the steel strike area of the Pittsburgh district under prohibition. This is especially interesting at the present time when Ontario has just voted to go dry and a move for Dominion-wide prohibition is to be considered. Just what might have happened had the thousands of men on strike been able to obtain strong drink it is impossible to tell. But the chances are that there would have been loss of life and heavy damage to property. So far these unfortunate conditions have been missing and while the strike is still going on it is more or less orderly. The interesting part of the investigation from the standpoint of the retail merchant though, is the comment made by merchants in the strike area. The world in the past five years has been going through an experience that is without parallel in human history and its full significance is not easy to grasp yet, because we are so close to it. While some of the effects will be felt immediately, the greatest results will be apparent in the next generation. There seems little doubt in the minds of a great many people that it will be extremely beneficial for the little boys and little girls who are mere babies now to grow into manhood and womanhood without ever seeing or knowing what a barroom is, except by what they hear their elders say about it. It seems a safe prediction that the barrooms, as people of to-day knew them, are gone forever, and while many feel that there has been some infringement on personal liberty in their removal, the good that will result to countless thousands far more than offsets this.

---

### *PROTECTING THE MARKETS*

ANY danger that may have existed in regard to Germany trying to use Canada or other British colonies as a dumping ground for German goods, has been removed by the appointment of a president of the British Chamber of Commerce in Germany. His duties will give him complete control of the license department. It is announced that all goods leaving Germany for British ports without a license will be confiscated. It would be difficult to imagine a more complete protection of British markets from the Hun.

# EVENTS IN THE TRADE

## Business Changes

Milton, Ont.—George Dawson, of Guelph, Ont., has purchased the hardware business of M. E. Nixon.

Creemore, Ont.—Ross Walker, of Mansfield, Ont., has purchased the hardware of J. Akitt, possession January 1.

Kincardine, Ont.—Clayton Farley and David Maines have purchased the hardware business of J. H. McKee. Possession December 1.

## New Firms

R. J. Russell and S. J. Simmons have taken over the hardware and harness business of Russell Bros. at Dundalk, Ont., and the firm name will in future be Russell and Simmons.

## Obituary

The death occurred at St. George, New Brunswick, of Simon W. Boyd, of the hardware firm of Boyd Bros.

The death occurred at his home in Belleville, Ont., of Stephen A. Lazier, aged 86. For many years he conducted a general store at Prescott and Ottawa, and later a carriage factory at Milltown.

The death occurred at his home in Toronto of Charles S. Archibald. He was sixty-four years old and a native of Halifax. For many years he was engaged in the hardware business in the Maritime Provinces. He came to Toronto in 1908 as sales representative of the Nicholson File Company.

## Personals

H. Lendon of the hardware firm of Lendon & Cook, Leamington, Ont., is one of a committee appointed by the Board of Trade to represent them at the Great Waterways Convention to be held in Windsor soon.

Fred D. Brown, who some weeks ago sold out his hardware business at Melbourne, Ont., has moved to Essex and will carry on business in auto accessories and a patented rope halter.

Among the passengers on the Empress of France when she sailed this week for England, was Mr. George Henderson, president and general manager of Brandram-Henderson, Limited, Montreal.

P. H Kirby, of Wood Vallance, Ltd., who was recently laid up, is now able to be around again.

"Don" Ferguson, manager of Wood Vallance, Ltd., Auto Accessory Department, is attending the Motor Show now going on in Chicago.

## Trade Notes

Dodd & Landry, carriages and harness, has been registered at Montreal.

E. Fleming, hardware merchant at Hornings Mills, Ont., is retiring from business.

The Canadian Woodenware Company, St. Thomas, Ont., contemplates erecting an extension to its factory.

The Imperial Oil Company plans to double the capacity of its refinery at Woodside, Nova Scotia.

The Provincial Secretary has accepted the surrender of the charter of the British Souvenir Spoon Company, Limited.

The Burd Piston Ring Co., McIntyre Block, Winnipeg, are handling Burd piston rings for the Northwest territory.

The Brunswick Canadian Products, Limited, manufacturers of phonographs, contemplate locating a $200,000 plant at Woodstock, Ont.

The Ford Motor Company has purchased the plant of the Dominion Stamping Company at Walkerville, Ontario.

P. D. Gordon, for many years in the hardware business at Fort Saskatchewan, has become a member of the firm of J. A. Flett, Limited, Vancouver, B.C. He will take the position of managing director. Mr. Flett retains an interest in the business. The firm plans to enlarge its activities.

## Montreal News

D. Terrill, of Caverhill, Learmont and Co., Montreal, visited Quebec this week.

Mr. Radford, of the Toronto Lock Mfg. Co., was in Montreal this week.

Mr. Craig, of E. T. Wright & Co., Hamilton, was in Montreal this week.

J. B. Gaynor, of the Union Hardware Co., Torrington, Conn., was in town last week.

J. E. Hindes, of the L. S. Sharpe Co., Athol, Mass., called on the Montreal trade recently.

C. Howard Smith, vice-president of the Quebec branch of the Canadian Manufacturers' Association, was in Toronto recently.

L. P. Peaulne has accepted a position with Brandram-Henderson, Ltd., as a salesman, and will cover the Eastern Townships territory, recently under the direction of Charles Gratton, who has resigned.

Members of the Montreal branch of the Canadian Manufacturers' Association met in the old Colonial Club headquarters at the Windsor Hotel for an informal function. Harris Watson, of the Canadian Trade Commission, London, addressed them along the lines of Canadian export trade. Mr. Watson is in Canada to interest intending Canadian exporters and an informal discussion along these lines was undertaken.

## Incorporations

Congoleum Company of Canada, Limited, capital $1,000,000, head office Montreal, plans to manufacture and deal in floor coverings.

Adanac Storage Batteries, Limited, capital $100,000, head office Montreal, plans to manufacture and deal in electrical equipment and accessories.

Federated Leather Goods Co., Limited, capital $50,000, head office Montreal, plans to manufacture and deal in leather goods.

The L. R. Steel Company, head office Toronto, capital $2,000,000, plans to manufacture and deal in steel goods of various kinds.

The American Grain Separator Company, Limited, head office Winnipeg, capital $50,000, plans to manufacture and deal in fanning mills, etc.

The Lakefield Canoe and Boat Co., Limited, capital $50,000, head office Lakefield, Ont., plans to manufacture and deal in boats and canoes.

Sanford Riley Stoker Co., of Canada, Limited, capital $100,000, head office Windsor, Ont., plans to manufacture and deal in equipment for burning fuel.

Peace River Petroleum, Limited, head office Toronto, capital $5 000.000, plans to carry on a general oil development and refining business.

Ingram and McMaster, Limited, capital $60,000, head office Welland, Ont., plans to carry on a general hardware business.

**DAVIDSONS ERECT NEW BUILDING**

The Thos. Davidson Manufacturing Co., Limited, Montreal, is completing an addition to its main factory which will afford greatly increased space for office and warehouse requirements.

The structure is of solid brick and concrete construction, five stories high, and covers a space of 100 by 50 feet. It will be ready for occupation, HARDWARE AND METAL is informed, before the close of the year.

# C. F. Kendall Goes With McArthur Irwin Limited

C. F. Kendall, whom it is announced has joined the firm of McArthur, Irwin, Limited, as Paint and Color Works Manager, has had a long and successful business experience, beginning sixteen years ago as a salesman, when he was but twenty years of age.

He joined the Martin-Senour Company in 1911, being one of their pioneer salesmen in Canada, later coming to Montreal as Sales Manager for that firm.

*C. F. KENDALL*

*of Montreal, who has joined the firm of McArthur, Irwin, Limited, as Paint and Color Works Manager.*

"Ken," as he is known among his friends, has always been a defender of clean business methods, and his long experience as a paint-man has well fitted him for the wider opportunities now presented, and which will require his direct attention throughout the Dominion.

Mr. Kendall succeeds A. W. Poole, who has resigned to assume active management of the firm of Stewart & Wood, Limited, Toronto, in which firm Mr Poole has purchased a controlling interest.

## MORE BRITISH MERGERS

Big industrial mergers continue to be formed in England, and among those just completed are Scottish Oils, Ltd., with a capital of $20,000,000. This brings the following companies under one control, and important developments are expected from this fusion: The Broxburn Oil Company, the Oakbank Oil Company, the Pumpherston Oil Company and Young's Paraffin Light & Mineral Company. The object is to acquire the ordinary shares of these companies as well as the good will of James Ross & Co., the Philipstoun Oil Works and the Scottish good will of the British Petroleum Company and the Home Light Oil Company.

Provisional arrangements have been entered into for the sale of the properties of the Bolok Rubber Estates and the Rotterdam-Deli Hevea to a company to be called the United Rubber Estates, with a capital of $2,500,000.

A new company, entitled the Metropolitan-Vickers Electrical Co., Ltd., is the result of the merge of Vickers' interests with those of the Metropolitan Carriage, Wagon & Finance Co., Ltd. A greater standardization of engineering products and consequently a larger and cheaper output will, it is hoped, be made possible.

Wrigleys & Co., engineers, of Birmingham, have acquired the British Government cartridge factory at Halesowen, Worcester, at which they anticipate employing over 1,500 workers, which number is likely to be increased.

## MONTREAL BOARD OF TRADE INDIGNANT

The Montreal Board of Trade has been very actively opposed to the attempt of the Government to rush through the G.T.R. Purchase Bill. A deputation recently visited Ottawa regarding this matter but secured very little satisfaction. It is understood that the entire council of the Board will go to Ottawa and further press the claims that have presented themselves to the Board as to why this agreement should not be undertaken.

**Ordered to Remove Advertising Sign**

The Administrative Commission of Montreal, it is stated, has served notice on a large Montreal advertising company that within thirty days they shall be required to remove advertising signs unless they consent to pay the City tax at the rate of 50 cents per foot. At this rate if the company is minded to meet the request the cost would appear to be excessive for the privilege of continuing these signs in their present various locations.

**Montreal to Have Information Bureau.**

A movement is on foot in Montreal to afford intending companies and others who desire to establish factories and so forth in Montreal and vicinity, information regarding location, etc. The Administrative Commission under Mr. Decary, Chairman, has promised that something will be done in the near future and that the department will be enlarged as finances permit. A delegation from the Montreal Chambre de Commerce, headed by the President, Joseph Quintal, called the other day and impressed the necessity of having something of this sort upon the chairman of the Commission. It is proposed to seek and consider the views of various business men as to the best means of carrying out this important effort.

# "Tom" Houghton Returns To Martin-Senour Co.

"Tom" Houghton, for some time associated with Lewis Bros., Limited, Montreal, as assistant sales manager, has resigned to accept a position with his old firm, the Martin-Senour Company as sales manager.

Mr. Houghton is well known to the hardware and paint trade throughout Canada, particularly in Ontario and Quebec, having been on the road, and also having been connected with the retail and wholesale hardware trade for several years in Ontario and elsewhere. Among the firms with whom he was associated were the Hobbs Hardware Co. of London; McIntosh, Huntington Co., Cleveland, Ohio; Lewis Bros., Ltd. For many years Mr. Houghton was in the retail hardware business on his own account. Then, in 1915, he entered the service of the Martin-Senour Co., first on the road and later as sales promotion manager.

*"TOM" Houghton*

*Who has been appointed sales manager of the Martin Senour Company, Montreal*

At the annual family dinner of the company held in Montreal last week, "Tom," as the boys know him, was enthusiastically welcomed back to the "100 Per Cent. Pure" family. Mr. Black, the general manager of the company, said to HARDWARE AND METAL that Mr. Houghton rejoined the company at a most appropriate time, the assembled salesmen affording him an opportunity for stating sales plans that would work out to the interest of salesmen and dealer agents alike.

The Electric Insulation and Varnish Company, Limited, is given permission to increase its capital from $60,000 to $300,000.

# President of Steel Company is Looking for Record Business

## W. T. Hobson Says American Strike is Not Affecting Things Materially—Export Trade is Picking Up Nicely

WITH their stock yards laden with raw materials sufficient to "carry on" till the middle of the summer of 1920, the Steel Company of Canada, Hamilton, Ont., is not worrying as yet over the steel strike in the United States. Such was the statement made to HARDWARE AND METAL by W. T. Hobson, president of the company. He stated that they had their stocks of ore in for work that would keep them busy till next June. The only delays in getting raw materials at the present time were due to shortage of cars.

"Our regular line of customers continue from year to year," said Mr. Hobson, "and so far as we are concerned we would not know there was a strike on."

### Full of Promise

Touching on the outlook for the future, Mr. Hobson said it was full of promise. Export trade was picking up nicely. Representatives of the company had just returned from Australia, New Zealand, Japan and China, and they had had a man in England for some months. Without exception, their representatives brought with them most encouraging reports of conditions and prospects for bigger business. Mr. Hobson considered that the last half of 1912 and the first half of 1913 might be taken as the last normal year for their business. By reason of additional equipment which increased their capacity, and new business, business was better now than this last normal year. Much of the raw steel is now finished into screws, nuts, etc., and, by no means, is all their raw material now sold. Over 400 tons of wire rods were rolled each day in their plant.

### Sees Big Business

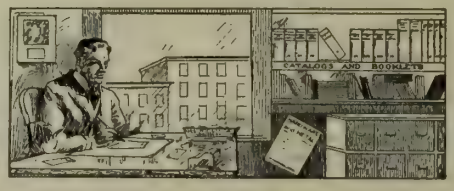
Potential business in the United States was described by Mr. Hobson as being enormous. They are looking for big business there.

"When conditions in the United States settle down," said the president, "we will have the best business there we ever had."

Little or no trouble arising from the prevailing unrest in labor circles is being experienced by the Steel Company of Canada. They have been able to get men when they wanted them and now that many men engaged in public works of one kind and another are being thrown out of employment for the winter months, labor, as far as they are concerned, is plentiful.

## ASKING FOR FIRST CLASS RATES

Continued from page 46



were very bulky and light in proportion to other goods, the result being that cars were often loaded with electric bulbs to the exclusion of the more profitable goods. To the contention of J. S. Walsh of the C. M. A. that lighter articles such as musical instruments, wicker furniture, tins, wire goods, etc., were carried at normal rates, Mr. Hamm replied that these articles were not sent in such quantities.

### The Chairman's View

The chairman of the Board, F. B. Carvell, in championing the rights of the people, said: "I do not accept the idea that the express companies can say we won't accept a certain class of goods because it does not suit us. The express company is a public utility, and the people are entitled to use it if they like."

No decision was given by the board at the time of the hearing; and HARDWARE AND METAL learns from the C. M. A. that no judgment has yet been received by them of the attitude of the board in the matter.

The attitude of the C. M. A. in the matter is that the only justification the express companies would have for charging such a rate would be the percentage of breakages as being very high. This was not shown by the companies in the case which they presented to the board.

## CATALOGUES AND BOOKLETS

### Ford Motor Repairing

Albertson & Company, Sioux City, Iowa, have issued a book entitled "The A B C of Ford Motor Repairing." The book is perhaps unique, in view of the fact that it is original in its idea of instructing Ford owners in the proper methods of grinding, refacing and reseating valves and valve seats. The book contains thirty-two pages, and is very attractively illustrated. Readers of HARDWARE AND METAL, who desire copies, may obtain them upon request.

### National Manufacturing Company

The National Manufacturing Company of Sterling, Illinois, has issued a folder, attractively printed in colors, listing the lines of garage hardware it manufactures. Readers of HARDWARE AND METAL may obtain copies upon request.

The Otton Hardware Co., Ltd., Barrie, Ont.—Will you inform us who makes repairs for Western Todd wood heating stove, No. 29?—We would be glad to obtain this information from any of our readers.—Editor.

British American Paint Co., Ltd., Calgary, Alberta.—Kindly advise us who makes Sanitas and Sanitile.

This is manufactured by the Standard Textile Co., of New York. Stauntons, Limited, 944 Yonge St., Toronto, Ont., have the sole agency for Canada.—Editor.

The Saskatoon Hardware Co., Saskatoon, Sask.—Will you give us the name of the manufacturers of brass cuspidors?

Brass cuspidors are made by Chadwick & Company, Hamilton, Ont.—Editor.

A. C. Clemens, Milverton, Ont.—Will you inform me who makes the Peerless Premier Range?

Peerless Premier Ranges may be procured from Clare Brothers, Preston, Ontario.

## FUEL AND GAS OIL ADVANCE HALF A CENT

Notices sent out by the Imperial Oil Company during the week state that, from November 1, the price of fuel and gas oils would advance one-half cent per gallon.

According to Mr. R. W. Caldwell, sales manager of fuel oils of the Imperial Oil Company, this advance has no direct bearing or connection with the bituminous coal strike in the United States. There has, he says, been a general advance in oil markets; and this advance was in accordance with this general upward tendency of the entire market. Mr. Caldwell stated that he did not anticipate another advance in the near future. The general advance in the market, thought Mr. Caldwell, was difficult to account for except on account of the increasing cost of production, due to labor unrest and demands.

## PAINT FIRM WINS HONOR EMBLEM

The wholesale paint firm of McArthur, Irwin, Ltd., Montreal, was the winner of the first Prince of Wales Honor Flag to be secured in Montreal by an Employees' Committee. The boys went "over the top" before the booming of guns announcing the big canvass had scarce died away. Mr. Irwin was, of course, delighted to see the response from his men, and within a few hours Mr. Bengough, the accountant of the company, was able to announce that last year's objective had been exceeded.

# Convention Martin-Senour and International Varnish Companies a Success

FORTUNATE in the selection of their dates (for did they not fall within the week of the visit of H.R.H. the Prince of Wales), the Fourteenth Annual Convention of the Martin-Senour Company, Ltd., and the Second United Convention with the International Varnish Company, Ltd., occupied the close attention of attending divisional managers, managers and salesmen, for four days last week. Beginning on Monday, October 27, and closing on Thursday night, October 30, this convention proved to be the largest and best ever held.

Comparing it with previous gatherings of this nature, General Manager A. T. Black stated to HARDWARE AND METAL that it was the most successful in every respect, in point of attendance and manifest interest on the part of the salesmen, that had yet been held. Arrangements had been such that managers were able to attend from the most distant points, thus bringing together the East and West for the helpful "heart-to-heart" talks that a good convention affords.

### An Innovation

The sessions were held, this year, at the Place Viger Hotel, Montreal, and the delegates were also taken through the factories during the progress of the convention that they might witness the various operations, inspect various processes of manufacturing, etc.

One of the most helpful ideas carried out was that of the arrangement of the convention hall itself. With a 24-sheet poster as an appropriate and effective background, a model miniature house was brought in and exhibited, being decorated and tinted within and without with paint and varnish products manufactured by the two companies. This afforded salesmen the most practical of demonstrations as to what the company's products were best suited to, and because of the uniqueness of this plan the interest of the salesmen was secured at the outset and maintained to the very last. The plan served to emphasize the importance of providing the right setting in order to obtain the desired result. Given the right "atmosphere," a sales convention can be made a rousing success, and here was the plan that helped attain this object.

### Wide Variety of Topics

It was fitting that the opening session on Monday morning should begin by singing the National Anthem, and this was followed by a pleasant informal introduction of the "First Timers" to the "Old Timers," General Manager A. T. Black following with an address of welcome, in which the men were made to feel at home. Other addresses were made by L. C. DeMerrall, J. H. Conover, and W. P. Walsh.

The whole session on Tuesday was given over to the demonstration of products, etc., demonstrations and tests, sales talks on various specialties. In the latter, the salesmen figured, and this gave the "road" men an opportunity of outlining how they put sales over.

Copper paints and marine lines were dealt with by Messrs. DeMerrall, Walsh, Bernier and Sheppard, and an interesting talk was delivered on insecticides.

Advertising and sales promotion addresses and talks were in charge of the new sales and advertising manager, Tom Houghton, while R. S. Daly had charge of the session on manufacturing and sales.

### In Lighter Vein

General Manager Black has established a reputation in the care with which he provides for the entertainment of his salesmen. In fact, it would seem that others within the organization have "aspirations," too, judging from the real stunts which were credited to them on the occasion of the Annual Family Dinner, held on Wednesday night at the Canada Club. Remembering what the company's caricaturist said, that "there is more joy in heaven over one sinner that repenteth," it was quite in order that "glad rags" should clothe the person of "Tom" Houghton, just back from an absence to "strange" pastures, to his "first love" in Montreal. The elaborateness of his admiral's uniform reminded the guests that the "Prince is in town"; in fact Admiral Spaghetti, as his high title was, had the honor to receive from H.R.H.—delivered by special courier—an illuminated address bearing good tidings to the "Big Family," and a neat (?) decoration for General Manager Black, "The Prince of Good Fellows." In his somewhat arduous duties, the admiral was assisted by Harold Reid, who, in the role of special constable, discharged his obligations well.

The dinner itself was most enjoyable, and the toast list an interesting one, the informative after-dinner speeches proving acceptable and pleasing, with Mr. Black as toastmaster. Added to this the extensive programme, "The Greatest Show on Earth," comprising the "M-S. Troupe of Famous Artists" and the "I-V Performers," characterized in their "gorgeous garments, shapely shapes, sparkling speeches, mirthful melody, dry drinks, excellent eats, spicy songs, side-splitting satire," it can be understood that there was one big round

# THE CLERKS DEPARTMENT

## Don't Speculate, Young Man, and Don't Listen to "Tips" on Stocks

### Some Suggestions Also to Aid the Small Investor in Handling His Money Safely—Avoid Temptation to Get Rich Quickly

ONE of the most distinguished as well as successful business men in America is Barton Hepburn, for many years president of the Chase National Bank in New York City. He has always been keenly interested in helping to protect the thousands of people who have little money to invest, and know little about finances, from the wiles of the "get-rich-quick" men. He has been especially interested in showing young men how to invest and recently gave $200,000 to the New York Chamber of Commerce, stipulating that the income is to be used in conducting examinations for young men wishing to enter business offices. Some of his advice to those looking for investments is given in the "American Magazine" as follows:

There are tens, possibly hundreds, of thousands of citizens who, for the first time in their lives, possess money for investment purposes. Extraordinary conditions have placed large sums in the hands of the agricultural and producing classes.

**Little Experience**

The majority of those who are enjoying this new prosperity have little or no experience in investment, have had only casual acquaintance with banks. Never before having owned money in quantities beyond their immediate needs, they have given little thought to investment, and, as a result, a large number of them have been, and are being, victimized by promoters and swindlers.

A very common belief on the part of people who have money-making aspirations is, "If I only had capital to invest I could make a fortune!"

**Is Hard to Keep**

The idea is widespread and constantly finds expression in popular speech and writing. But the truth is that it is as difficult for any person to keep money as it is to make money; and, under prevailing conditions, it is much more so for the man with small capital.

The temptation to any person acquiring money quickly is toward speculation rather than investment, toward gambling rather than toward safe returns. It is human nature for a person, suddenly making money, to believe that he can make much more. Stock promoters realize this tendency, therefore the present situation, with thousands of the newly-rich gambling in stocks.

**Doubly Baited**

The lure by which such promoters have sought to drag this new wealth into speculation is doubly baited: first, with nearly worthless stocks, or stocks of unknown and doubtful value; and, second, with the opportunity to buy on margins. At best this is gambling; at worst, swindling.

No one permanently makes money by gambling in any form. A throw of the dice or a fortunate turn of the market may enable a lucky fool to realize a so-called profit. But the speculative instinct which induced the first hazard will induce many more. And, in the long run, the lucky throws will be in the minority. It is a matter of business experience that people do not attain fortunes in any such way.

**A Big Difference**

Investment is buying stocks after the value is proved. Speculation consists in trying to guess what the value will be. Buying stocks on the prospect of a company striking oil or discovering gold is like betting that you will find money on the sidewalk. Leave such gambling to those who think they can afford losses.

There are such gamblers, who figure that they can afford fifty losses if they make one success. But these usually prefer to gamble with your money instead of their own. The man who can afford only one loss has but a slight chance.

Judged from the literature furnished the public, there are open for development at the present time literally thousands of properties of wonderful value, from which enormous profits are sure to be realized by anyone investing!

**Would They Do It?**

If these properties do possess such value, would the promoters make so great an effort to part with them? Even if the promoters believed them to have any such value, would they strive to sell? Would they be anxious to give you the chance to reap such great rewards?

These promoters are not philanthropists; they are not humanitarians; they are not seeking to distribute wealth throughout the world—usually they are striving to increase their own portion.

The methods used by these men should put people on their guard—but it has not been so. That is a tribute to the salesmanship of those men who can sell one one-hundredth realty and ninety-nine one-hundredths conversation.

**On the Safe Side**

It is a further tribute to their ability—of one sort, at least—that they know the laws and usually manage in selling to keep an inch or two on the safe side of the line. However, after one has lost his money through a foolish investment it is little consolation to the loser to visit the district attorney's office, or to appear before the grand jury in an effort to have the party who has imposed upon him indicted, with the conviction depending upon how artfully the promoter has dodged the letter of the law.

**The Wrong Kind**

Stock promoters of the wrong kind endeavor to get rich without perspiration of the brow. They have a stock which, at best, has only a "guess value." Their aim is to sell enough of this stock to pay promotion and development expenses, and their own liberal salaries. If they are lucky and win a large stake, the investor, who has assumed all the risk, is awarded a small portion of the profits, minus large salaries and bonuses.

Values are founded upon production, transportation, distribution and merchandising. The great fortunes of the world have been made by rendering a public service, by creating something which the public requires, and selling it at cost with a manufacturers' profit; or by procuring commodities which the public wants, and distributing them at a fair profit above the cost of the article and the service rendered.

**How They Do It**

Generally, in every community, the men who make money do it by creating commodities, or services, which supply public necessity; or by transferring or merchandising the same—bringing the things so produced in contact with the individual want. They render a public service, and for such service are entitled to compensation and profit in such proportion.

The great industry of the world consists in putting things to rights, in bringing the article within reach of the want. The man who tills the soil produces food for the sustenance of people in manufacturing districts, who, in turn, furnish him with clothing, implements, and other necessities.

**Should Ignore "Tips"**

The small investor should ignore entirely "tips" on stocks. The so-called "tip" is one of the ridiculous features of stock gambling, yet thousands of persons solemnly whisper to each other "tips from the inside." On the fringe of the legitimate business of buying and selling stocks and bonds there hangs an army of promoters, gamblers, and sharpers, who are keen to take advantage of lack of investment knowledge. They have a system of disseminating "information" for the purpose of inducing speculation in certain securities which it is to their interest to promote. By means of discreetly placed "confidential information" they can spread news over the country in a few hours.

The remarkable thing about this system is the number of persons who have faith in such "tips." It is true that men believe the things that they want to believe. The condition would be amusing were it not fraught with such serious consequences.

**It is Likely False**

If you get a "tip" you may know that all the chances are that it is false, and that, in almost every case, it is given for the purpose of inducing you to buy.

Ask yourself, how can any man or group of men control a stock? If they could control it, would they "tip" anyone else and allow him to share in the profits? How would the man who "tips" you know about it, even if it were true? When you get a "tip" ask yourself these three questions, and you will not invest.

A man whispers to you that some "big financier" told him something in confidence. Is it likely the "big financier" would tell such a man? Is it probable that you would trust a man who would violate such confidence? Yet thousands of men of recently acquired prosperity are loaded up with

worthless stocks through believing just such absurd "tips."

**Take Things Easy**

The proper thing to do is to buy stocks and bonds yielding a safe return, place them in a safety deposit box and draw the interest. If the market price drops, you need not be concerned. If it increases to any considerable extent, you can sell, and reinvest in a lower-priced stock that will yield a larger return.

No one can tell you just what stocks or bonds to buy, but in purchasing securities, these general rules apply:

Avoid any investment where the returns promised are out of proportion to the investment;

Buy only securities based upon actual values;

Buy only securities which have yielded an interest payment over a period of time;

Buy outright and never on margin.

As a general rule it is better to buy stocks than bonds on a rising market, and better to buy bonds than stocks on a falling market.

# Westerner Sees Big Business Ahead

## L. C. DeMerrall, Western Manager Martin-Senour Company, Tells of Outlook—Many New Houses—6,000 New Soldier Settlers—Five-Fold Increase

"WITHIN the past twelve months sales of paint at the Coast have been as large as all the sales of the five years previous put together. And there is no place in Canada where more paint can be sold and used than in British Columbia, and especially in Vancouver."

This hopeful statement of L. C. DeMerrall, Western manager for the Martin-Senour Company, Montreal, and whose headquarters are at Vancouver, made to HARDWARE AND METAL during a visit Mr. DeMerrall made to the head office this week, sounds an optimistic note which is backed by actual improvement of conditions there. And Mr. DeMerrall says that the best is yet to come and that painting will be carried out next year on a more extensive scale than ever. One of the reasons why paint products are so greatly in demand is because of the fact that houses and other buildings are constructed, mostly, of wood. And the increase in their number will afford more and newer prospects.

**Why Painting Deferred**

The west coast suffered for a time from the withdrawal of thousands and thousands of good men to the cause of liberty in Flanders. Houses were, in many instances, literally boarded up. The reservists, for instance, who may have made Vancouver and Victoria their home for years, enlisted early. Then a degree of depression came. "Rents that had been well over $100 a month declined," said Mr. DeMerrall. "A house that would bring as high as $150 or $165 per month before the war was reduced to $35 and $40. Recently rents began to recover, and a good house now will bring $65 to $75 per month. This means that the owner can afford to undertake painting that he could not proceed with when rents were so low, and when a house costing, say $12,000, would rent for $35. There will be a lot of painting, therefore, under these bettered conditions."

In some cases a number have been tempted to use inferior paint, with the result that it did not wear. They will have to paint again, and will likely use the more dependable grades. Then, again, the climatic conditions cause a species of moss to grow on the wood, and this has to be removed, and painting really needs to be done oftener to preserve the building.

**Use Darker Shades**

Mr. DeMerrall states that the lighter shades such as whites, yellows, and so on, used so extensively in most districts, are not so much in favor at the Coast. This is because of conditions that are peculiar to that land of abundant foliage and greenery, and where the very setting enables the house-owner to employ reds, greens, and other deeper shades

*L. C. De MERRALL*
*Western Manager of the Martin Senour Company.*

to the best possible advantage. The effects produced through the use of these are very pleasing. This greater use of the dark shades had, in some instances, permitted inferior grades of paints to find a way into the market, and causing some undesirable competition. The user did not always obtain the value that he expected when he purchased these cheap paints.

"Shingles are used very extensively out there. Produced right at hand from the B. C. lumber, shingles are used frequently in rebuilding and repairing."

"What do they do when the shingles become covered with this moss?" HARDWARE AND METAL asked.

"Tear them off and use new," replied Mr. DeMerrall. "They use a large quantity of shingle stain there, too."

**Big Soldier Movement**

"It is estimated that about six thousand returned men have come to British Columbia since the close of the war. This number is in addition to the men that made their homes there before the war. And, of course, the men who went from British Columbia, British officers and others, have returned, although the casualties among these men were very excessive."

"Will they make good settlers?" was asked.

"Doubtless many of them will. They had the advantage of securing transportation to any point in Canada, and many of them said, 'We may as well go through to the Coast, and if we do not like it we can return.'"

Of course this influx of new men brings up the question of housing. The increased population has already taxed the existing housing, and new houses are being erected. "There is more new housing under construction in Vancouver than I have seen anywhere in the country," said Mr. DeMerrall. "On every outstanding location one can see new houses going up."

**Good Crop—Development**

Mr. DeMerrall, asked as to the prospect of the shipbuilding industry, said that there was uncertainty as to its permanence. "At the present time one or two of the big shipbuilding companies are preparing to handle boats of up to 9,000 tons capacity and to make small or extensive repairs to them, but I think that the future of the Coast lies more in the development of its natural resources. The steel boat seems to have displaced the wooden ship. There are big resources in the way of timber that should be largely developed."

As to the conditions of crops there, Mr. De Merrall said that this year had proven one of the best in history. Particularly was this the case with regard to small fruits, apples, etc. "The farmers are getting good prices, too, and owing to the understanding they have in marketing, there is not much loss. There is a good market for the various products.

**Paving the Price**

"Are collections good?"

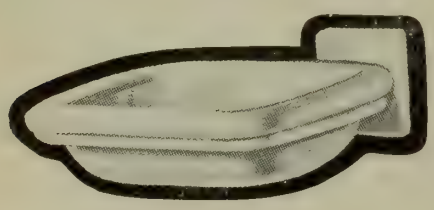
# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### KEY SOCKETS

The Benjamin Electric Mfg. Co. of Canada, Limited, 11-17 Charlotte St., Toronto, is putting on the market a new line of snap shell key sockets, 660 watts, 250 volts. The switch mechanism is operated by means of a small lever or toggle button, which indicates when the

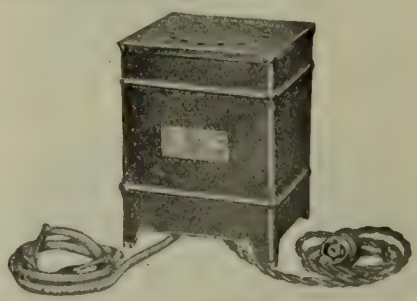


*Key Socket*

current is on or off. ON when the lever is down, OFF when it is up. The positive action of the quick make and break switch makes this socket, it is claimed, one of the best in operation and service, being of ample current carrying capacity and rugged construction. The standard finish is brushed brass, but other finishes come in polished brass, rich gilt, wrought iron, Bauer Barff, polished nickel, statuary bronze, all copper or white enamel.

### SOAP DISH

The American Enamelled Products Co., 2120 Prairie Avenue, Chicago, is putting on the market a line of white porcelain enamel bathroom, restaurant and hospital appliances. The illustration shows a soap dish. The manufacturers claim for their products originality and beauty of design, and that the enamel is not a baked paint, celluloid or imitation, but genuine vitreous enamel. The goods are



*Soap Dish*

absolutely guaranteed to be absolutely sanitary and neither to rust, craze, nor discolor. By special inventions for attaching fixtures to walls, all screws or bolts, it is stated, are completely concealed from view.

### RECTIFIER

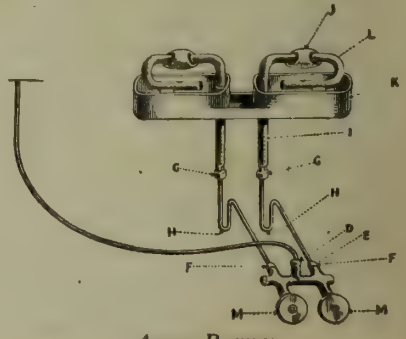
The Canadian General Electric Co., of Toronto, is placing on the market a small-sized battery charger for charging storage batteries from 2,115 volt, 60 cycle alternating current circuit. It has been especially designed to meet the requirements of the automobile owner who desires to charge his starting and lighting battery at home or in a private garage. This device, it is stated, will charge one three-cell battery at five amperes, two three-cell batteries at 3 amperes, three three-cell batteries at 1½ amperes, or one six-cell battery at 3 amperes. The essential parts are a transformer for reducing the voltage and a Tungar bulb for rectifying the current. Both are contained in a sheet metal case. The operation, it is claimed, is extremely simple. The equipment is set on the floor or on the running board of the car, or hung on the wall. The direct current leads are connected to the battery with the spring clips, which are provided, and the attaching plug is screwed into any convenient lamp socket. The charging starts immediately.

*Rectifier*

### WILL MARKET NEW BRAND LEAD IN OIL

McArthur, Irwin, Limited, Montreal, are placing on the market a new line of white lead in oil. This will be marketed under the firm's established brand name, "Crown Diamond," this name having been adopted in 1842. The initial capacity of the plant is ten tons daily, and already a considerable export business has been catered to. Regular sizes such as one, two, five, twelve and a half, 25, 50 and 100 lb. drums will be available for the domestic trade and for export in the sizes required by purchasers.

The superintendent and manager of the lead works is R. H. Monk, and the new plant in Outremont was recently enlarged and re-adapted to take care of the expansion, some $300,000 or more being expended.



### THE ACME BURNER

The Acme Burner and Heating Co., Limited, 3 Wellington Street West, Toronto, is manufacturing the "Acme" burner, for which the following claims are made: It is stated that it uses every particle of fuel, which is consumed slowly, there being but one tiny feed

*Sectional View*

hole through which the oil vapor or gas burns with a constant flame, giving forth a steady and constant heat. The burner may be placed in any cook stove, base burner, ordinary coal stove, hot air furnace or hot water boiler in a few minutes, all ready for use, and is a quick and powerful heater, whether for cooking or for house heating. The construction is simple, the oil being turned on at A and flows through the tube. Valves F are opened, allowing the oil to run into the basin K, through the small apertures L. This is lighted with a match and the flame heats the feed pipe, putting it up to a high terminal temperature and vaporizing the oil. The flame striking the plate J, spreads like a fan. The burner, it is stated, is especially desirable in towns, villages and rural districts, where there is no gas.

*Acme Burner*

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

HIGHER prices are still the order this week and many important changes have been noted. The general tendency is for firm markets and reports indicate that prices on many commodities are likely to move to higher levels. Axes have advanced $1.50 on single bit; $2.00 on double bit and handled. Makers have also adopted the new system of listing axes and is similar to the American method of classifying the different weights and each class shows a different extra over base price.

Bristles are again active and show an advance of 12½ per cent. Enamelware, copper sheet iron and galvanized ware show an advance that will approximate from 4 to 10 per cent. Some styles of wrought butts show an advance.

Stevens' rifles again advance, also Sargent lines. Silver polishing creams are also higher. Iron bars and steel have strengthened considerably. Coe's wrenches are marked up and stoves may change any time.

Dry and tarred felts, stove pipe and stove pipe elbows are also higher. Three-In-One oil has a higher price. Fuel and gas oil are stronger by ½ a cent per gallon. The sheet situation is as yet unrelieved in spite of the fact that some mills claimed they could have a considerable amount of the demand supplied immediately. The present coal strike, if continued, will have a tendency to keep production back further than ever.

# MONTREAL MARKETS

MONTREAL, Nov. 6—There is a decided upward tendency on most lines and actual increases are effective for various lines of hardware and other specialties. Sargent lines are again advanced, this being about 10%. Dry and tarred sheathings and felts are also higher, due to the cost of waste paper.

All lines of stamped ware, tubs, pails, nickel-plated goods, fire shovels, frying pans, etc., are marked up from 5 to 10%. This was forecast last week in HARDWARE AND METAL and is a result of the present scarcity of material, due to the big strike in the States. Definite price lists are now being printed and will shortly be available. In the meantime, old quotations are withdrawn. Enamelled ware is also affected.

Silver polishes are higher—of the cream variety. Coe's wrenches are marked up. Axes are higher, all kinds being advanced. Stoves are firm and prices may be revised upward at any time. Nails are very firm, as are also steel and iron bars. There have, as yet, been no increases. It is probable that lead products will soon advance under the influence of higher pig lead prices. Pig lead is advanced this week and spelter and antimony also are marked higher. Copper is weaker and there is very little movement.

## *Dry and Tarred Felts Are Higher*

**Montreal**

SHEATHINGS, BELTS.—Due to the higher cost of waste papers, the manufacturers of these lines have increased prices and some of the new quotations are as follows: Anchor dry sheathing, No. 2, per roll, 66c; heavy dry straw sheathing up 40c per cwt. to $3.75; Stag Brand, Surprise up 3c per roll to 73c; heavy tarred straw sheathing up 40c per cwt. to $3.90, and Anchor Brand tarred felt, No. 2, up 2c per roll to 84c. These are quotations f.o.b. Montreal or Toronto.

## *Flour Sifters Higher; Hardware and Wrenches*

**Montreal.**

SIFTERS, HARDWARE, WRENCHES—An advance is made in the price of flour sifters, the same being marked up from $2.10 to $2.45 per dozen.

Various hardware made by Sargent and Co. has also advanced again to the extent of about 10 per cent. Coe's wrenches are now quoted on a new revised list and from which the discount to the trade is 5 per cent.

## *Axe Prices Higher; Also New Arrangement*

**Montreal.**

AXES.—The price of axes has been under revision and a new arrangement is also being effected relative to fixing a "base" for the various sizes. Advances of $1.50 per doz. are made for S.B. axes; $2 for D. Bitted; $2 per doz. for handled axes, and $1 advance for boy's and hunter's.

3¼ to 3¾ pounds is made the new base arrangement. For 4 lbs., 25c is added to the base, and 50c added to larger sizes.

## *All Wares Advanced; Stoves Are Very Firm*

**Montreal.**

WARES AND STOVES.—A general advance has been made this week in various wares, and while the new net lists are not to hand, the advances are from 5 per cent. to 10 per cent. These follow the very definite tendencies pointed out of late and last week HARDWARE AND METAL stated that "any advances for many lines would not be surprising." These changes are in definite accord with the recent scarcity of material provoked by the strikes in the States. With the miners' strike on, the difficulties have been accentuated. Increases apply to stamped ware, galvanized tubs and pails, japanned ware, nickel plated copper ware, stove pipes and stove pipe elbows. The price, per 100, of 7 in. stove pipes is now $19.78 per 100 and of elbows $2.35 per doz. A

full list will be forthcoming from the printers, it is stated, in a few days.

The stove market is a firm one, the undertone being decidedly strong and advances for the various lines are not improbable.

## *Plenty Gasoline and Oil is Moved Out*

**Montreal.**

OIL AND GASOLINE.—There is little new in these commodities, a steadily good demand obtaining for both lines. Coal oil, as to grade, is selling at 22-25c per gallon, while motor grade gasoline is quoted at the unchanged price of 33c.

## *Firm Undertone Marks Nail Market*

**Montreal.**

NAILS AND WIRE.—The market is firm. Under the existing conditions it is not at all probable that there will be any declines now, and some suggestion has been made that, if raw material continues scarce, an advance would not be improbable. In the meantime the jobbers are reporting a heavy demand. Wire and cut nail basis remains at $4.75 per keg, and smooth steel wire is based at $5 per 100 lbs.

## *Normal Sale Obtains And Rope is Steady*

**Montreal.**

ROPE AND CORDAGE.—A normal trade obtains for various sizes, and there is quite a decided firmness on manila, particularly. In one case, an advance of one cent per pound was added by a U.S. manufacturer. Jute twines are very firm. The present basis here is as follows: Pure manila, base, 31c; British and Beaver manila, 27c, and sisal, 23½c.

## *Black Sheets Higher; Scarcity All Around*

**Montreal.**

SHEETS AND PLATES.—There has been an advance of 25c per 100 lbs. in the price of black sheets. These are becoming scarce, and the situation is decidedly unimproved with regard to galvanized sheets, the supplies of which are dwindling all the while. Those who are securing their wants are, in many cases, paying a premium to obtain them.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 65 |
| 12 gauge | 5 95 | 6 60 |
| 14 gauge | 6 00 | 6 75 |
| 16 gauge | 6 10 | .... |
| 18-20 gauge | 6 55 | 6 60 |
| 22-24 gauge | 6 60 | 6 65 |
| 26 gauge | 6 70 | 6 75 |
| 28 gauge | 7 00 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | .... | 9 00 |
| 28 gauge | .... | 8 85 |

| 28 gauge | .... | 9 25 |
| 26 gauge | .... | 9 00 |
| 24 gauge | .... | 8 40 |
| 22 gauge | .... | 8 00 |
| 18 and 20 gauge | .... | 8 00 |

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Bar Steel and Iron Are Active and Firm*

**Montreal.**

IRON AND STEEL.—There is a steadily good demand for steel and iron bars, on which there have been no changes. The tendencies are somewhat firmer, if anything, in view of the whole situation as surrounding raw material supply and fuel for manufacturing purposes. Supplies are adequate, it is understood, to meet the present requirements.

## *Lead Products Firm Under Influence Pig*

**Montreal.**

LEAD PRODUCTS.—In view of the fact that there has been a constantly firming pig market, lead in manufactured form is firming and solder and all lead products will, if these increases continue, be soon quoted higher. The movement for October totaled up well, but there is room for improvement still.

## *Foundries Buy Supply Iron; Prices Higher*

**Montreal.**

OLD MATERIAL.—There has been considerable activity in the old stove and machinery cast markets. This is due to the fact that foundrymen are purchasing against their winter needs, and $23 to $24 per ton is being quoted for machinery cast and $20 to $21 for stove plate. Yellow brass is quoted at 10-11c. Wrought iron is a little firmer. Otherwise the market conditions are quite dull.

| Dealers' Buying Prices— | | |

## *Lead, Spelter, Antimony Higher; Copper is Dull*

**Montreal.**

INGOT METALS.—There has been marked strength this week in pig lead, spelter and antimony. Copper is dull. Considerable business is passing.

COPPER.—This is very, very dull and no great movement is reported, in fact a quiescent market obtains. Price quoted here is 25c per lb.

TIN.—Still fluctuating from day to day, but with little change here, the price remaining at 58c per lb.

LEAD.—Strength is manifest on pig lead everywhere. There has been a good demand in the first place, and importers figure that there will be increases still. Present quotation, 8¼c.

SPELTER—Is stronger. There is some activity and prices have been marked up here to 10c per lb., an increase of ¼c.

ANTIMONY.—A firmer market here and with a quarter cent increase the quotation is now 10½c per lb.

ALUMINUM.—An unchanged quotation of 34c per lb. obtains for this.

PIG IRON.—Some demand exists for this and there has been no change, $50 a ton still being quoted.

# TORONTO MARKETS

TORONTO, Nov. 6—Higher prices are still the order this week and many changes have been noted. The general tendency is for higher prices and reports indicate that prices on many commodities are lying dormant and ready to break with the least indication of further disruptions. Enamelware, copper, sheet iron and galvanized wares show advances that will range approximately from 4 to 10 per cent. Some styles of wrought butts show a further advance.

Stevens' rifles, broad axes, bench axes and carpenters' axes also show a higher figure. Three-In-One oil is higher, while fuel and gas oil is ½ a cent higher. Stove pipe and stove pipe elbows and Kasement Skrene Dores also show new prices. Bristles out of the ferrule advance 12½ per cent. and iron bars and steel have strengthened considerably. Axes not only have advanced, but makers are adopting the system of classifying the different weights and each difference shows an extra over base price. Black and galvanized sheets are peculiarly situated in the fact that stocks are practically exhausted and it is expected a considerable time will be required for mills to catch up with orders.

## *Axes Advance $1.00 to $2.00 on Some Lines*

**Toronto.**

AXES.—Notice is being sent out by axe manufacturers to disregard the printed prices in their catalogues applying to axes, and are sending out a new list to take its place. They state all Canadian manufacturers are adopting the standard extra list the same as used in the United States, with the exception that the American firms do not allow any discount on extras, whereas the Canadian manufacturer gives the usual discount off the extras when added to the list. The present advances are approximately $1.00 per dozen on boys' and hunters' axes, $1.50 on single bit and $2.00 on double bit over recent prices, also the extras for weights as before mentioned, which run, for example: a 3½ to 4 will cost more than a 3¼ to 3¾, a 3¾ to 4½ will cost more than a 3½ to 4, and heavier in proportion.

## *Wrought Butts Again Advance*

**Toronto.**

WROUGHT BUTTS show a further advance, No. 840 now quoting at 7½ per cent. advance on the list, while No. 800 is quoted at 12½ per cent. advance on list prices.

## *Stevens Rifles Take Another Jump*

**Toronto.**

STEVENS RIFLES show another advance, which is as follows: Little Scout, 14½, $6.00 each; Crackshot, 26, $7.25; Marksman, 12, $9.00; Favorite, 17, $10.75; Favorite, 27, $11.75; Visible, 70, $17.75.

## *Stove Pipes and Stove Pipe Elbows Show Increase*

**Toronto.**

STOVE PIPES AND ELBOWS show new prices, which are as follows: Heavy stove pipe, 6 inch, $18.45 per 100; 7 inch, $19.80 per 100; light 6 inch, $16.75 per 100; 7 inch, $17.75 per 100; elbows, light, 6 inch, $2.20 per dozen; 7 inch, $2.35 per dozen; heavy, 6 inch, $2.95; 7 inch, $3.35; galvanized 7 inch, $5.25.

## *Brooms Still Show Strong Tendency*

**Toronto.**

BROOMS.—Every indication of last week's advance in brooms appears that the price will not lower for some time to come, in fact, indications are that in the near future there will be another raise.

## *Bristles 4½ Inches and Longer, Up 12½ Per Cent.*

**Toronto.**

BRISTLES show an advance. Practically all bristles 4½ inches and longer, out of the ferrule, show an advance of approximately 12½ per cent. This affects practically all the better kalsomine brushes and all painters' brushes, with every indication of spreading in the near future to the shorter length brushes. Bristles are rapidly getting very scarce almost any length.

## *3 in 1 Oil Shows Higher Figure*

**Toronto**

3 IN ONE OIL has advanced and is now quoting at small size, $1.20 per dozen; large $2.45, and the handy can at $2.45 per dozen.

## *Sheets and Plates, Stocks Exhausted*

**Toronto.**

SHEETS AND PLATES.—It is impossible to forecast just what the future will show on this commodity. Some claim they will have relief almost immediately, while others seem to think that the situation will not be relieved for some time, and claim that any kind of a coal strike must bear heavily upon the iron and steel industries, and the industries have even felt the strike in advance, through coal being diverted to stocking up particularly essential industries. However, the present stocks are almost exhausted. This has a tendency to keep the price very firm and also causes a very wide difference in prices as each jobber charges according to their stocks, and if they are forced to procure in small lots, they likewise have to charge accordingly. The following quotations are as nearly correct as possible, owing to the above stated reasons:

**BLACK SHEETS—**

| | | |
|---|---|---|
| 14 gauge | 5 45 | 5 65 |
| 16 gauge | 5 60 | 5 75 |
| 18-20 gauge | 5 15 | 6 30 |
| 22-24 gauge | 6 20 | 6 35 |
| 26 gauge | 6 30 | 6 40 |
| 28 gauge | 6 45 | 6 50 |
| 3-16 inch plate | 4 90 | 6 25 |
| ¼-inch boiler plate | 4 50 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS.**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | 8 90 | 9 50 | 8 00 | 9 25 |
| U.S. 28 | 8 30 | 9 90 | 7 60 | 8 55 |
| U.S. 26 | 7 90 | 8 50 | 7 30 | 8 20 |
| 22 and 24 | 7 70 | 7 90 | 7 15 | 8 00 |
| 18 and 20 | 7 50 | 7 70 | 7 00 | 7 80 |
| 16 | 7 25 | 7 50 | 6 85 | 7 60 |
| 12 and 14 | 7 05 | 7 25 | 6 70 | 7 35 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Manila Rope May Advance*

**Toronto.**

MANILA ROPE. — Although the American prices showed an advance on manila rope of the better grade last week, Canadian firms show no change

---

### NEW AXE CLASSIFICATION DIFFERENT. WEIGHTS ARE DIVIDED INTO CLASSES AS FOLLOWS

**STANDARD AXE LIST**

**List Extras for Weights Heavier Than Base.**

**BASE GROUP (Base Weights)**

**All 2½ lbs. or 2¾ lbs., or 3 lbs. or 3¼ lbs. or 3½ lbs. or assorted to the dozen. No axe over 4 lbs.**

| | | | | |
|---|---|---|---|---|
| 2½ to 3 | 2¾ to 3 | 2¾ to 3¾ | 3 to 3½ | 3¼ to 3½ |
| 2½ to 3¼ | 2¾ to 3¼ | 2¾ to 4 | 3 to 3¾ | 3¼ to 3¾ |
| 2½ to 3½ | 2¾ to 3½ | 3 to 3¼ | 3 to 4 | |

**GROUP 2—(25 cents per dozen list higher than for Base Weights)**

**All 3¾ lbs., or 4 lbs. or assorted to the dozen. No axe over 4½ lbs.**

| | | | | | |
|---|---|---|---|---|---|
| 3 to 4¼ | 3¼ to 4 | 3¼ to 4½ | 3½ to 4 | 3½ to 4½ | 3¾ to 4¼ |
| 3 to 4½ | 3¼ to 4¼ | 3½ to 3¾ | 3½ to 4¼ | 3¾ to 4 | |

**GROUP 3—(50 cents per dozen list higher than for Base Weights)**

**All 4¼ lbs., or 4½ lbs. or assorted to the dozen. No axe over 5 lbs.**

| | | | | | |
|---|---|---|---|---|---|
| 3½ to 4¾ | 3¾ to 4½ | 3¾ to 5 | 4 to 4½ | 4 to 5 | 4¼ to 4¾ |
| 6¼ to 7¼ | 6½ to 6¾ | 6½ to 7¼ | 6¾ to 7 | | |

**GROUP 4—(75 cents per dozen list higher than for Base Weights)**

**All 4¾ lbs., or 5 lbs. or assorted to the dozen. No axe over 6 lbs.**

| | | | | | |
|---|---|---|---|---|---|
| 4 to 5¼ | 4 to 6 | 4¼ to 5½ | 4½ to 4¾ | 4½ to 5½ | 4¾ to 5 |
| 4 to 5½ | 4¼ to 5 | 4¼ to 5¾ | 4½ to 5 | 4½ to 5¾ | 4¾ to 5¼ |
| 4 to 5¾ | 4¼ to 5¼ | 4¼ to 6 | 4½ to 5¼ | 4½ to 6 | |

**GROUP 5—($1.00 per dozen list higher than for Base Weights)**

**All 5¼ lbs., or 5½ lbs. or assorted to the dozen. No axe over 6 lbs.**

| | | | | |
|---|---|---|---|---|
| 4¾ to 5½ | 4¾ to 6 | 5 to 5½ | 5 to 6 | 5¼ to 5¾ |
| 4¾ to 5¾ | 5 to 5¼ | 5 to 5¾ | 5¼ to 5½ | |

**GROUP 6—($1.25 per dozen list higher than for Base Weights)**

**All 5¾ lbs., or 6 lbs. or assorted to the dozen. No axe over 6½ lbs.**

| | | | | |
|---|---|---|---|---|
| 5¼ to 6 | 5¼ to 6½ | 5½ to 6 | 5½ to 6½ | 5¾ to 6¼ |
| 5¼ to 6¼ | 5½ to 5¾ | 5½ to 6¼ | 5¾ to 6 | |

**GROUP 7—($1.75 per dozen list higher than for Base Weights)**

**All 6¼ lbs., or 6½ lbs. or assorted to the dozen. No axe over 7 lbs.**

| | | | | |
|---|---|---|---|---|
| 5¾ to 6½ | 5¾ to 7 | 6 to 6½ | 6 to 7 | 6¼ to 6¾ |
| 5¾ to 6¾ | 6 to 6¼ | 6 to 6¾ | 6¼ to 6½ | |

**GROUP 8—($2.25 per dozen list higher than for Base Weights)**

**All 6¾ lbs., or 7 lbs. or assorted to the size. No axe over 7½ lbs.**

| | | | | | |
|---|---|---|---|---|---|
| 6¼ to 7 | 6¼ to 7½ | 6½ to 7 | 6½ to 7½ | 6¾ to 7¼ | |
| 3½ to 5 | 3¾ to 4¾ | 4 to 4¼ | 4 to 4¾ | 4¼ to 4½ | |

**GROUP 9—($2.75 per dozen list higher than for Base Weights)**

**All 7¼ lbs., or 7½ lbs. or assorted to the dozen. No axe over 8 lbs.**

| | | | | | | |
|---|---|---|---|---|---|---|
| 6¾ to 7½ | 6¾ to 7¾ | 6¾ to 8 | 7 to 7¼ | 7 to 7½ | 7 to 7¾ | 7 to 8 |

**GROUP 10—($3.25 per dozen list higher than for Base Weights)**

**All 7¾ lbs. or 8 lbs.**

in price. The change, though, has caused much uncertainty amongst the different jobbers and merchants, as prices generally showed a decline and seemed to be working towards that end. However, the situation seems to be changing and an advance would cause little surprise on the best grades of manila rope, according to present indications.

## *Boiler Tubes Are Holding Firm*

**Toronto.**

BOILER TUBES have shown no change, although there is a big demand and they are very scarce. No immediate improvement is expected, especially since the coal strike has taken place. A higher tendency is noticed and few would be surprised at a new and higher price. Present quotations are:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *New Prices on Builders' Paper*

**Toronto.**

BUILDING PAPER is said to be so scarce that there is a famine prevailing. This is no doubt due to scarcity of waste paper and other materials used in their manufacture. Prices quoted are: Dry No. 2, 66 cents per roll; Tarred, No. 2, 84 cents per roll; Surprise, 73 cents per roll.

## *Sheet Iron and Galvanized Ware Up 4 to 10 Per Cent.*

**Toronto.**

SHEET IRON AND GALVANIZED WARE advance. This commodity is affected by so many different factors that it is not surprising that the advance has taken place. The same conditions also apply regarding manufacturers advancing some of these lines to conform with legitimate profit and comparative price, as in copper and enamelware. It is expected the advance will be from 4 to 10 per cent., according to the article and conditions.

## *Copper and Enamelware Advance 4 to 10 Per Cent.*

**Toronto.**

COPPER AND ENAMELWARE have advanced. Prices are now being revised. This advance, it is stated, was not affected so much by the coal strike, but the fact that a big reduction was quoted in the spring, applying to almost the entire line of these wares. The manufacturers have found out that this discount was too general, and while it was very fair for some lines, it was almost below cost on others. They claim the new discount will balance or adjust this and put comparative goods on a more even basis.

## *New Prices on Kasement Screen Doors*

**Toronto**

KASEMENT SCREEN DOORS. — The new price given for casement screen doors, No. 2oak stain, varnished, is as follows: 2 ft. 8 in., $34.80; 2 ft. 10 in., $35.40; 3 ft. x 7 ft., $36.60 per dozen. f.o.b. Burlington.

## *Fuel and Gas Oils Advance ½-Cent Per Gal.*

**Toronto.**

FUEL AND GAS OILS advance ½ cent per gallon. This is no doubt a direct result of the coal strike, and is one of the many lines which the strike affects. Fuel oil has been showing an increased volume of business, owing, it is stated, to many private homes installing auxiliary burners, as well as the increased number of firms installing oil heating plants. The strike will have a tendency to increase consumption in this commodity.

## *Scrap Materials Show Weakness*

**Toronto.**

SCRAP MATERIALS showed a strong tendency to advance near the first of the week, but lately have reversed and practically all lines show a tendency towards weakness and a probable decline. European buyers did not come into the markets as was expected, and as it is drawing so near the end of the year very little more of this class of business is expected, at least, in any quantities, till the beginning of the new year. The coal strike coming so soon after the recent steel strike has also had a material effect to keep this commodity quiet. Prices so far remain unchanged, and are as follows:

| Dealers' Buying Prices— | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 12 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red Brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 18 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 07 |
| Overseas, lumbermen's rubber boots | .... | 0 05 |
| Bicycle tires | .... | 0 1½ |
| Automobile tires | .... | 0 03 |

## *Corrugated Sheets Unchanged, But Firmer*

**Toronto.**

CORRUGATED SHEETS. — Prices hold firm, with a good demand. It is impossible to say how long this will hold. Some manufacturers state they will not raise their prices till their present stocks are exhausted and they are forced to buy more stock at higher figures. This may mean that new prices might be expected any time, as most stocks are practically depleted. Present quotations are as follows:

| Corrugated Sheets— | Per 100 Square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Lead and Zinc Products Firm; Price Unchanged*

**Toronto.**

LEAD AND ZINC products are still unchanged, although the market holds firm with a good demand. No one seems to be predicting future prices, more on account of the fluctuations generally of the metals that are used in the manufacture, than on present unsettled conditions. Although the coal strike, if prolonged, cannot help but cause variations, as there is no doubt that it affects more manufacturers than the steel strike, which tied up business bad enough. Quotations are as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 8 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 36½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Iron Bars and Steel Advance*

**Toronto.**

IRON BARS AND STEEL SHOW ADVANCE.—This was not unexpected, as this commodity has been showing a firm figure for some time past. The labor situation seems to be one factor. Manufacturers state it is remarkable the number of skilled and unskilled laborers who are idle and are living on their earnings, while the mills are being held back for the need of more men. The coal strike coming so soon after the steel strike has also had some influence on the market of this commodity, in fact, it has been felt for some time previous, on account of the supplies of coal that were being stored by some in order to keep their production as near normal as possible. Quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Copper Unchanged; Spelter and Lead Firm*

**Toronto.**

INGOT METALS.—There is a very strong position of ingots, and if it is possible to arrange finance with Eu-

rope higher prices will undoubtedly be paid, but so far nothing has happened but mere negotiations. Reports have it that Germany is falling considerably behind on account of strikes and general dissatisfaction, some European moneys are depreciating and will soon be at the point where they will not be considered at all.

COPPER.—Copper remains unchanged and prices quoting are from a basis of 25 to 26 cents per pound. The demand is fair and this price is fairly steady.

SPELTER.—This still remains unchanged although higher prices are looked for. The demand is brisk, in fact sales are rather delayed. The price remains firm and is quoting at 10 cents per pound. The report is that small stocks are in the majority of warehouses.

LEAD.—The stocks of lead are very small. The demand is brisk and the price is firm at 8¼ cents per pound.

ALUMINUM.—Aluminum is reported quiet with prices still holding at 34 cents per pound.

ANTIMONY.—Antimony is quiet, the demand having slackened temporarily. The price holds firm and is quoting at 11½ cents per pound.

TIN.—Tin remains unchanged. The demand is good but not heavy, the quotations now ruling are from 59 to 60 cents per pound.

# LONDON MARKETS

LONDON, Ont., Nov. 5—Business all through this district continues to be spelled with a capital "G" and hardware merchants are all very, very busy. Nails, stoves, glassware, cutlery, silverware and all seasonable lines are selling well.

Prices are very firm with a general scarcity reported in many lines of goods. Advances are shown in Three-In-One oil, painted wire bird cages, some lines of building paper, refrigerators for spring booking, brass hose couplings, brass lawn sprinklers, solid leather skate straps and glass.

Enamelware, galvanized ware, sheet iron and copper goods are advanced about ten per cent.

## *Enamelware Lines Advance 10 Per Cent.*

**London, Ont.**

WARES, COPPER GOODS.—Quotations on enamelware, galvanized ware, sheet iron and copper goods are being revised, and advances on many lines, which will approximate ten per cent., are being made.

## *New and Higher Quotations on Glass*

**London, Ont.**

GLASS.—New discounts are effective on glass, the new figure being 25 per cent. off list in place of the former quotations of 30 per cent.:

| | Single Diamond. Per case. | Double. Per case. |
|---|---|---|
| Under 25 in. | $14 93 | $17 18 |
| 26 to 34 in. | 15 60 | 18 64 |
| 35 to 40 in. | 16 35 | 19 80 |
| 41 to 50 in. | 17 63 | 22 50 |
| 51 to 60 in. | 18 45 | 23 10 |
| 61 to 70 in. | 19 88 | 24 53 |
| 71 to 80 in. | ..... | 26 55 |
| 81 to 84 in. | ..... | 34 09 |
| 85 to 90 in. | ..... | 36 64 |
| 91 to 94 in. | ..... | 37 35 |
| 95 to 100 in. | ..... | 43 91 |
| 101 to 105 in. | ..... | 49 01 |
| 106 to 110 in. | ..... | 54 83 |

## *Building Papers May Be Advanced Again*

**London, Ont.**

BUILDING PAPER.—New and higher quotations are effective on some lines of building papers. It is not unlikely that still further advances will be made shortly. The new prices are: Dry Fibre, D2, 66 cents roll; Stag Building Paper, 73 cents roll; Surprise Building Paper, 73 cents roll; Tarred Fibre, E2, 84 cents roll.

## *Refrigerators Higher For Spring Booking*

**London, Ont.**

REFRIGERATORS.—Higher quotations on refrigerators (Sanderson Harold make) are named for spring booking. The quotations are: Household, 40 per cent. off list; Grocers', 35 per cent. off list.

## *Higher Quotations On Three-in-One Oil*

**London, Ont.**

THREE IN ONE OIL.—New and higher prices have been named on this line. The new prices are: Small bottles, $1.20 per dozen; large bottles, $2.45; Handy cans, $2.45; Factory size bottles, $4.80.

## *Nail Prices Firm; Demand is Active*

**London, Ont.**

NAILS.—Supplies of nails locally are limited. The demand is active as a result of continued building. Prices are firm at $4.70 base for wire and $4.75 base for cut.

## *Brass Hose Couplings and Sprinklers Advance*

**London, Ont.**

BRASS HOSE COUPLINGS, RING LAWN SPRINKLERS.—Brass hose couplings for spring booking show an advance, the quotations being: ½ in., $2.35 per dozen; ⅝ in., $2.40; ¾ in., $2.45; 1 in., $3.75.

A new and higher price of $11.25 per dozen has also been named on brass ring lawn sprinklers.

## *Advance is Made in Painted Bird Cages*

**London, Ont.**

PAINTED WIRE BIRD CAGES.—Higher prices are now in effect on these lines, the quotations being as follows: No. 612, $18.90 per dozen; No. 613, $22.50 per dozen; No. 614, $24.50 per dozen.

## *Higher Quotations On Leather Skate Straps*

**London, Ont.**

LEATHER SKATE STRAPS.—Solid leather skate straps have been revised upwards and the new quotations are: 21 in., $1.45 per dozen pairs; 24 in., $1.75; 27 in., $2.00.

## *Stove Boards and Ash Sifters Selling*

**London, Ont.**

ASH SIFTERS, STOVE BOARDS.—There is a good demand for these lines. Prices show no change and are as follows: Ash sifters, wood sides, $3.00 per dozen; Banner, $3.20 each; Rocker No. 1, $4.75 each.

STOVE BOARDS.—Wood lined, 30 and 5 per cent; paper lined, 40 and 5 per cent.

OIL HEATERS are moving well. Prices are as follows: Perfection, No. 525, $7.00 each; Perfection, No. 530, $8.25 each; Perfection No. 630, $10.25 each, less 25 per cent.

## *Seasonable Demand For Weather Strip*

**London, Ont.**

WEATHER STRIP.—There is an active demand for weather strip. Prices are as follows: Frost King, $4.65 per dozen packages; Swan Hardwood, 75c per set.

WOOD AND FELT.—No. 60, 5 cents per foot; No. 61, 5 cents; No. 61½, 7 cents; No. 64, 10 cents, less 55 and 5 per cent.

## *White Lead in Oil Holding Unchanged*

**London, Ont.**

WHITE LEAD IN OIL.—No change in prices is shown. There is a fair seasonable sale. Quotations are as follows: Pure, tons, $16.35 per 100 lbs.; less tons, $16.70; Elephant, tons, $16.95 per 100 lbs.; less tons, $17.30.

## *Turpentine Prices Holding Unchanged*

**London, Ont.**

TURPENTINE.—Quotations on turpentine are holding without change, and are as follows: 1 bbl. lots, $2.45 per Imperial gallon; 2 to 4 bbl. lots, $2.44; 5 gal. lots, $2.55.

## *Linseed Oil Sales Are a Little Light*

**London, Ont.**

LINSEED OIL.—Sales of linseed oil

have been light. Quotations are as follows: Raw, 1 to 2 bbls., $2.62 gal.; 3 to 5 bbls., $2.61 gal.; 6 to 9 bbls., $2.59 gal; boiled, 1 to 2 bbls., $2.65 gal.; 3 to 5 bbls., $2.64 gal.; 6 to 9 bbls., $2.62 gal. Less bbls. add.

# WINNIPEG MARKETS

WINNIPEG, Nov. 5—Price changes during the past week show the usual amount of advances, as quotations on practically all lines are on the upward trend. This week's changes include screw drivers, automatic drills, soldering coppers, brass butts, Dover sad irons, sash cord, boyproof watches and expansive bits.

Business in all lines is reported about normal, while good demand is reported on cutlery and other Christmas goods.

Considerable shortage is reported on tin plate, Canada plate and galvanized sheets, as mills are sold up for the balance of the year, while the steel strike is also seriously affecting production.

## 10 *Per Cent. Advance in Screw Drivers*

**Winnipeg.**

SCREW DRIVERS, AUTOMATIC DRILLS.—Following advances made by North Bros., the manufacturers of "Yankee Tools," new prices are effective and show a general increase of approximately 10 per cent. above former quotations, making to-day's prices as follows:

Screw Drivers—No. 10 x 2 in., $7.60; 4 in., $10.00; 6 in., $12.40; 8 in., $14.60 dozen. No. 15 x 2 in., $8.40; 3 in., $8.80; 4 in., $9.20; 5 in., $9.60 dozen. No. 12 x 1⅛ in., $10.90 dozen.

Spiral Screw Drivers—No. 30, $35.00; No. 130, $40.00; No. 35, $26.00; No. 135, $31.00 dozen.

Automatic Drills—No. 41, $30.40; No. 44, $36.25 dozen.

## *Soldering Coppers Up 2 Cents a Pound*

**Winnipeg, Man.**

SOLDERING COPPERS.—Prices on copper, which has been advancing steadily for the past six weeks are again reflected in the price of soldering coppers, which show an increase of 2 cents per lb. base, and from present indications higher prices may be expected in the near future. To-day's ruling prices are given herewith: Soldering coppers, ¾ lb., 64c; 1 lb., 63c; 1½ lbs., 60c; 2 lbs., 59c; 2½ lbs., 58c; 3 lbs., 57c.

## *Brass Butts Show 5 to 10 Per Cent. Jump*

**Winnipeg, Man.**

BRASS BUTTS.—Prices on narrow, middle and broad brass butts have also shown steady advances during the last month, and this week's markets again show an increase of from 5 to 10 per cent., making to-day's selling prices to the trade as follows:

Narrow Brass Butts—1 in., 45c; 1¼ in., 65c; 1½ in., 73c; 1¾ in., 95c; 2 in., $1.12; 2¼ in., $1.57; 2½ in., $1.95 dozen pairs.

Middle Brass Butts—1 in., 53c; 1¼ in., 67c; 1½ in., 84c; 1¾ in., $1.06; 2 in., $1.30; 2¼ in., 1.80; 2½ in., $2 40 dozen pairs.

Broad Brass Butts—1 in., 56c; 1¼ in., 75c; 1½ in., 95c; 1¾ in., $1.18; 2 in., $1.45; 2¼ in., $2.10; 2½ in., $2.80 dozen pairs.

## *Dover Sad Irons Revised Upwards*

**Winnipeg, Man.**

DOVER SAD IRONS.—Dover sad iron prices are also revised to higher levels during the week, based on new prices issued by the manufacturers, due to increased manufacturing costs, and today's ruling prices on the two most popular lines are given as follows: Dover Sad Irons, No. 60, $30.00; No. 70, $39.60 per dozen.

## *Sash Cord is Up Five Cents a Pound*

**Winnipeg, Man.**

SASH CORD.—As the cotton market continues to advance prices on kindred lines follow, and is noted in this week's advance in sash cord, which moves up 5c per lb. over previous quotations, and is now selling on the following basis: Hercules Sash Cord, hanks or coils: No. 6, 81c; No. 7, 80c; No. 8, 79c; No. 9, 79c; No. 10, 79c lb.

## *Higher Quotations Named on Watches*

**Winnipeg, Man.**

WATCHES.—Following the recent advance in Ingersoll watches new prices are now effective covering Boyproof and Pocket Ben watches, which move up to $1.50 each.

## *Expansive Bits Are Also Higher*

**Winnipeg, Man.**

EXPANSIVE BITS.—Expansive bits also show an upward trend in price during the week, due to increased production costs, and are now selling at the following figures: Expansive Bits, No. 72, $19.80; No. 71, $28.60 per dozen. Extra cutters for same, No. 1, $5.50; No. 2, $5.80; No. 3, $5.80; No. 4, $6.60 per dozen.

## *Wrought Pipe May Advance Shortly*

**Winnipeg, Man.**

WROUGHT PIPE. — Prices on wrought iron pipe still hold firm at former quotations, although reports from manufacturers indicate that supplies of raw material are getting short and with the steel strike still effective, higher prices would not come as a surprise. To-day's ruling prices are confirmed as follows:

| Wrought Iron Pipe— | Black | Galv'd |
|---|---|---|
| ¼ in., 100 ft. | $4 91 | $7 20 |
| ⅜ in., 100 ft. | 5 00 | 7 34 |
| ½ in., 100 ft. | 6 66 | 8 37 |
| ¾ in., 100 ft. | 8 83 | 10 71 |
| 1 in., 100 ft. | 12 33 | 15 75 |
| 1¼ in., 100 ft. | 16 65 | 21 29 |
| 1½ in., 100 ft. | 19 94 | 25 43 |
| 2 in., 100 ft. | 26 82 | 34 25 |
| 2½ in., 100 ft. | 43 07 | 54 77 |
| 3 in., 100 ft. | 56 40 | 71 70 |
| 3½ in., 100 ft. | 73 86 | ..... |
| 4 in., 100 ft. | 87 25 | ..... |
| 4½ in., 100 ft. | 100 26 | ..... |
| 5 in., 100 ft. | 116 82 | ..... |
| 6 in., 100 ft. | 151 52 | ..... |

## *Linseed Oil Prices Are Holding Firm*

**Winnipeg, Man.**

LINSEED OIL.—Linseed oil prices continue firm on the local market and from present indications no immediate change is anticipated. The demand at present is reported very small, but a big volume of spring business is expected. To-day's prices are confirmed as follows: Raw linseed oil $2.75 gallon; boiled linseed oil, $2.78 gallon.

## *No Change Shown in Prices of Turpentine*

**Winnipeg, Man.**

TURPENTINE.—Turpentine prices continue firm on the local market at former quotations, with only a very limited demand as is usual at this season, and no change in prices is expected in the near future, as reports indicate that exports are at present taking any surplus supplies that are offered. To-day's prices are given herewith: Turpentine, barrel lots, $2.65 gallon; ½ bbls., $2.68 gallon; 5 gallon lots $2.70 gallon; 1 gallon lots, $2.70 gallon.

# PITTSBURGH MARKETS

PITTSBURGH, Nov. 5.—The iron and steel strike, now in its seventh week, has been receding at a decidedly more rapid rate in the past ten days than in earlier weeks. The most marked progress in resumption of operations has been in the Mahoning Valley, where for about three weeks there was no operation at all. The Carnegie Steel Company is now operating about four of its six blast furnaces in Youngstown, together with one of the two Bessemer converters and a few of the open-hearths. Seven finishing mills at the Ohio works are operating while practically the whole McDonald plant, nearby, is in operation. The Carnegie operation is the more remarkable from the fact that the company made no strong effort to resume operations, feeling that the distinctly home companies, particularly the Youngstown Sheet & Tube Company and Brier Hill Steel Company, should lead the way. These two companies, to-

gether with the Republic Iron & Steel Company, are now showing a fair operation, having among them about six blast furnaces operating, with corresponding steel and finishing departments. Reports from the Chicago district are of much better operation there, but information is lacking here as to details.

Western Pennsylvania is now running very nearly full, with the exception of Donora and Monessen, which are still greatly crippled. Tonnage outputs are very satisfactory. For instance, one large plant, whose output was curtailed at the height of the strike by one-third or more, has lately been producing at 80 per cent. of the average rate in 1918, this being equivalent to 85 or 90 per cent. of the rate just before the strike.

A detailed estimate, by districts, based upon such information as is available, indicates that steel production is now at about 63 per cent. of the rate obtaining just before the strike. While this indicates quite a curtailment remaining, it should be noted that the production is well in excess of any output attained prior to the year 1912, and in those earlier years the steel industry thought it was producing a very large tonnage.

### Bearing of Coal Strike

The iron and steel strike, however, has had to yield the centre of the stage to the coal strike, which is of importance both as to the curtailment in steel production it may cause, if prolonged, and as to the influence it will exert upon the subject of strikes in general.

The steel mills have some stocks of coal but these stocks are not large by comparison with consumption, it being a physical impossibility for a steel mill to stock sufficient coal to last it any considerable length of time, too much space and too much handling being involved. Some of the mills claim that they have stocks sufficient to last for four weeks, but the general average cannot possibly be as high.

The coal strike is different from all other strikes in that it is directly contary to law, the Government having decided that it is in violation of the Lever food, feed and fuel control act, passed as a war measure, and in force until the President issues his peace proclamation. The coal strike is in violation of the contract the miners' officials signed with the operators, but of course, that does not differentiate it from many other strikes that have occurred.

The extent of the coal walkout cannot be stated definitely at this time. There are conflicting claims. It may be assumed that the walkout is quite general if not almost universal at the union mines, but there is no walkout at all at non-union mines. Interest centres chiefly upon the rate at which men go back to work, as the operators as well as disinterested observers expect that they will go back. The injunction granted Oct. 31, at the instance of the Government, forbids the union officials to do anything in furtherance of the strike, though it does not apply to the miners themselves. Accordingly, the situation is the same as if the union officials had called the strike and then suddenly disappeared. The general belief is that the Government will use all its resources to prevent anything being done in furtherance of the strike, this applying to activity of union officials, the paying of strike benefits, and efforts of strikers to intimidate workers. Often the Government is slow to begin acting, but there is no question once the beginning is made.

One point in the change of conditions produced by the Federal Government taking its stand against the strike is in connection with the Connellsville region, which has always been non-union. Previously it had been thought very probable, in coal and coke circles, that in the event of a strike of the union mines the strikers would march upon the Connellsville mines and close many, if not all, of them. The moment the Federal Government announced its position this opinion was changed. Furthermore, Governor Sproul, of Pennsylvania, has made a plain statement that order will be maintained. It is regarded as established that the Connellsville region will operate, and this is very important in view of the fact that from an exclusively coke producing region it has in the past few years become a large shipper of coal. It may be estimated roughly that in normal times the region produces half a million tons of coal a week, which it converts into coke, and half a million tons of coal which it ships.

### Steel Prices

While basis prices for steel products are being held down by the United States Steel Corporation and large independents adhering to their former prices, the March 21 schedule, export prices have shown a sharp advancing tendency and some of the smaller independents, able to make early deliveries, have been charging advanced prices, this representing in substance a delivery premium. Merchant bars have thus been sold at $2.50, Pittsburgh, or $3 a ton premium, and sheets at $2 to $4 a ton premium.

## MARTIN-SENOUR CONVENTION

Continued from page 53

of surprises to enliven and sustain interest and afford amusement.

Then some were presented with crowns for work well done, others with "Orders of the Garter," necklets, etc., etc., while, of course, there were the Tip Toppers, who carried off the money prizes, and which were presented to the lucky winners by Manager Black at the big dinner. Three there were, who had earned a savory (?) reputation as "Big Moose" hunters, and these received formidable .303 (?) rifles as a slight token of the prowess they have manifested. The investiture of these worthies was impressive altogether.

The theatre party on Tuesday night at the Princess was also one of the enjoyable features.

On Wednesday at noon a solid bronze tablet was unveiled at the factory. This was erected within the main office, and bears the names of George Clarke, Alexander Anderson, Barnard Greaves, Lewis Luck, William Ore, Thos. Pritchard, James Rouse, Henry Short. "They gave their present for our future," was the appropriate inscription accompanying the names.

Most appropriate and timely was the bronze badge feature worn by the delegates this year, bearing on the obverse side, as it did, a splendid reproduction of the Prince of Wales, and on its reverse the names of the two companies. It afforded a historic memento of the Prince's visit and of a unique and successful convention.

Through the generosity of the management, each salesman and guest received an "Eversharp" pencil, one being placed at each plate and suggesting to the "knights of the grip" that they need never send in an excuse to the house for being unable to write an order.

### New Men and Delegates

Some new men were welcomed this year. Morton Pettit is one of the new first-year M-S men. He was connected for some time as store manager for the S. A. Crowell Co., Yarmouth N.S. F. E. Holland of Montreal, recently returned from overseas, and formerly with the Engineering Department of the C.P.R., is taking up special sales work on factory, marine and railway paints and specialties.

For the International Varnish Company, W. L. Campbell, a practical varnish man, will take up territorial sales work in the Maritimes; R. A. Kennedy, of Toronto, territorial work in Ontario, while S. Langlois will assume sales work in Quebec Province.

The convention personnel was as follows:

**Administration and Headquarters Staff, Montreal, Que.:** A. T. Black, General Manager; R. A. R. Weir, secretary-treasurer; R. J. Walker, credit manager; T. Houghton, sales and advertising manager; E. A. Grimes, assistant to general manager.

**Manufacturing and Service:** R. S. Daly, general superintendent; W. J. Smith, chief chemist and supt. paint plant; V. H. Mortimer, shipper; Jas. Rowe, superintendent varnish plant; L. A. Grenier, supt. printing and advertising depts.; S. C. Rosenthal, general office supervisor; J. V. Cormier, accountant; R. Godbout, service department; G. A. Archambault, cost dept.

**Ontario Sales Division:** J. H. Conover, Ontario branch manager; E. J. Cookson, C. D. Cookson, H. M. Borland, H. O. Farrow, W. F. Ferguson, G. R. Conover, M. A. Daly, branch service.

**Maritime Sales Division:** W. P. Walsh, Maritime branch manager; T. L. Sheppard, W. L. Magee, G. Morton Pettit, J. G. Crawford, special representative, Newfoundland.

**Quebec Sales Division:** G. Tessé, R. Bernier, J. Brault, J. E. Naud, F. E. Holland, Industrial Railway and Marine Sales Dept.

**The Martin-Senour Co., Limited, Vancouver and Winnipeg:** L. C. DeMorrall, Western manager; A. J. Webb, sales manager.

**The Martin-Senour Co., Limited, Chicago:** Z. E. Martin, W. H. Gerke.

**International Varnish Co., Ltd.:** A. T. Black, general manager; J. H. Conover, Ontario branch manager; R. J. Walker, secretary; R. B. Eaton, service department; W. H. Davy, trade sales dept.; P. Burns, superintendent varnish manufacturing; Wilfred Stewart, testing department; H. V. Johnston, E. Tindall, M. McDonald, K. A. Skinner, E. T. Grand, S. Langlois, S. Boulet, W. L. Campbell, R. A. Kennedy, N. Jessiman, special B.C. representative.

St. Pierre and Normand, hardware merchants at Three Rivers, Quebec, are erecting a new business block and will occupy larger premises in the spring.

# Begin Spring Selling Plans Now

## Record Paint Sales of 1919 Will be Surpassed by Those of 1920 Unless All Indications Fail—Now is the Time to Get Busy and Get Bigger Share of the Business That Will Offer

NOW is the time to begin stirring up good selling ideas for next spring's paint and varnish campaign. A great many dealers are executing their spring buying orders, so that it is quite in line to tuck away ways and means of rapidly turning it into cash when the time comes.

The past year has certainly allowed the live ones to make a good deal of hay while the sun shone. And from all indications the profit-dispensing rays of a propitious, sunshiny, paint-selling spasm are going to make hay-making good for those who are on their toes next year. Already we find dealers who are adding to their paint department and tucking in little paint-selling stunts to increase their trade.

A few dealers have put the long distance telescope to their eye and spotted property owners who will, or who ought to paint next year. Said dealers have jotted down these names on a mailing list and sent them to the advertising department of their manufacturer. Good business! It gives that advertising department a clear running start on the service that can be rendered to such early birds.

### To Sell More Paint

Said one enterprising dealer who recently took on a line of wall papers: "I'm going to make wall paper help me sell more paint. The two go together like ducks to water. I've just had a set of 8 in. x 24 in. boards painted up with my best enamel colors and varnish stains. When I'm showing wall papers, I have these boards handy and set the most suitable shades up against the paper. Enough said! Nine cases out of ten it's all over but writing down the order and delivering the goods. When you've got a customer in the decorating notion just throw in a few suggestions on the side like that and they eat out of your hand, as it were. These boards have already helped me out a good deal in paint sales this fall, and I'm going to use them all winter."

### Sold the Goods

"See that chair over there," he exclaimed, pointing to an ordinary kitchen chair shining with a fresh coat of dark oak varnish stain. "That old reprobate had about as much down and out appearance as you'd want when I brought it into the shop. I took it and sand-papered it off and put a coat of varnish stain on it early in the fall, then set it on the counter with a placard **'See what Slicken's Varnish Stain did to me.'** Well sir, that thing has set there like a soldier and sold a lot of varnish stains for me, and you can bet I am going to keep him working right through the winter and spring. Maybe I'll change his coat once in a while, but he'll bring the business."

The writer doesn't know how many of his readers are "wet or "dry," but there is every indication that the dry sentiment of this country is going to mean more business in legitimate staple lines of merchandise. Time after time it is repeated that cash business is better, credits are no longer seeking extension. Families who tied up their weekly wage in booze are now spending it on their homes and improving their conditions of living. Improved living conditions cannot extend themselves very far without including the use of paint.

### In Other Channels

Because there is every likelihood of this dry era being permanent gives reason for belief that the money that formerly went into Canada's drink bill, will hereafter be permanently turned adrift into the purchase of much more useful and vastly more economic products, paint included. Instead of spending it only on one color for painting the town red, it will go into buying creams, yellows, drabs, browns, blues, etc., and these colors will have more lasting value than the one-night hue of the hilarious jamboree.

Somebody with a wet sentiment may agree to differ. Alright! Let the majority talk. It is estimated by those who are in close touch with the retail merchants of Canada, that 95 per cent. of them are in favor of the "drys," largely from an economic standpoint. It promotes more business, more cash business, with far less credit risks than we formerly had.

### Other Indications

With the assurance of a dry 1920, the paint dealer can plan to get his share. And there are other indications. The fall and winter are the convention seasons of every conceivable organization. From every association and convention that has already been held and which has the remotest contact with paint comes the cry of "Get ready for a bumper season in 1920." It is heard both in Canada and the United States. The painting ideas seems to be in the air.

The retail paint and varnish dealer is the last connecting link between this big industry and the consuming public. It's up to him as to whether he will climb on the band wagon or not.

**Benjamin Moore & Co.,**
Limited
TORONTO

If you don't grab off your share by getting ready in ample time, then somebody else will. Even at this distance it looks at though 1920 will provide one tremendous, irresistible demand for paints and varnishes. This is said advisedly after a thorough digest of the optimistic expressions of opinion from all factors, big and little, in the trade. There's only one worry by those responsible for the larger distribution of paints and varnishes and that is where to obtain sufficient raw materials to supply this demand. Which makes it all the more necessary that the retailer should set his affairs aright so that he will be assured of sufficient stock to meet this anticipated demand.

**Big Fellows Are Busy**

Somebody says "I should worry, till the season comes." That's small talk, when one knows that the big fellows are actually putting in solid planning to place themselves where they won't be caught with their shoes off.

Somebody else wants more proof. More "clean up and paint up" campaigns are being planned in Canada than ever before. The "Save the Surface" campaign funds have been increased 50 per cent. over last year. When you find the trade tieing up more dollars to its faith in promotion work, your last dollar can be waged that they are expecting adequate returns. Another observer of conditions has stated that people have not yet recovered from the neglect they have given their property during the past four or five years. A lot of the painting that should have been done last year, was not done because of lack of painters. This means a lot left over and the season of 1920 is going to see that demand crop up stronger than ever.

The approaching Xmas season and the consequent rush for seasonable goods may overshadow certain other lines, but don't forget to provide a pigeon hole for paint selling ideas for next spring's business. And perhaps in the preparation for Xmas festivities you will find opportunities for paint sales. Some timely stunts might be put into action for this purpose. Paints and varnishes can be sold at any time of the year, if you dig deep enough for good ideas that will bring the painting conviction home to your trade all the year round.

*The five "Top Notchers" referred to in the previous issue of Hardware and Metal in the account of the convention of the Sherwin Williams Co. of Canada Limited. They are 5th from left—P. D. McCallum Grand Top Notcher, A. J. Boyd, of Alberta Division of "Big Four" Henry Hill, "Eastern Canada Div., a Top Notcher, F. A. Allison and J.A. Derouin "Big Four" Winners.*

*In last week's issue of* HARDWARE AND METAL *it was inadvertently stated that the gentlemen shown above were the four top notchers among the salesmen of the Canada Paint Company. The underline should have stated that they are four executive officers of the company. Reading from left to right they are, S. M. Ward, Trade Sales manager; W. J. Bland, Winnipeg manager; Royal Cluxton, manager, and W. H. Newton, Manufacturing Sales manager. A report of the convention appeared in last week's issue of* HARDWARE AND METAL.

# Western Outlook is Much Better

## Montreal Sheet Metal Importer Pleased With Conditions—More Housing Needed—Lake Cities Are Active

"AFTER a space of thirteen years I observed a great change in Winnipeg, and the industrial growth in that time has really been remarkable," said W. S. Leslie, president of A. C. Leslie & Co., Ltd., wholesale metals, Montreal, to HARDWARE AND METAL on his return from a trip to the West. "There is great expansion over a wide area and the factories are busy."

Asked as to whether there had been any return to actual building operations since the ending of the war, Mr. Leslie stated that plans are under way for the resumption of work that had been started but which has rested for some time past. Particularly is there a need for more housing, and with the popular demand that exists there for apartment house accommodation, Mr. Leslie believes that there will be an early return to work on this class of buildings. In addition to this, business blocks will be proceeded with, for which there will be a demand.

Mr. Leslie, asked as to the extent of metal stocks in the hands of manufacturers and the trade, expressed his belief that the material in the hands of users was limited. "Crop prospects in the early part of the season," he said, "made the buyer cautious, and he did not book heavily on this account. Stocks are therefore not large.

"Business men whom I met were optimistic and in good spirits. There were no evidences of unemployment; no complaint regarding conditions. The crop outlook improved very materially toward the latter part of the summer, affording a supply of green feed for the stock and enabling the farmers to take care of the cattle as it was feared they would not be able to do."

The lake cities of Port Arthur and Fort William looked good to Mr. Leslie, and there was considerable activity there. "Two of the big elevators there were being added to extensively. This would afford much increased accommodation for the grain coming from the West."

Speaking of the movement of grain, Mr. Leslie thought that the earlier shipping of grain had served to relieve what might have been congestion, and which is sometimes serious at this time of the year. Altogether, the optimism and speedy manner of doing things in the West, and particularly in metropolitan Winnipeg, impressed Mr. Leslie most favorably.

*W. S. LESLIE*

*President of A. C. Leslie & Co., Limited, Montreal.*

# Says That Every $100 Carried More Than 30 Days Costs Merchant Real Money

"FROM information at our disposal there is less credit business being done at the present time than ever before," said the Credit Manager of a large Toronto hardware firm in discussing business matters with HARDWARE AND METAL. "Merchants are realizing that every hundred dollars carried on their books for more than thirty days costs money."

This bit of advice was given when the question was asked if the retailers were asking for extended credits from the wholesaler so that they might, for instance, buy Victory Bonds. The answer was that there was no tendency either to ask and, possibly, much less to give credits because cash business was better and everybody was better able to pay than in years gone by. The credits given by the house in question were less in proportion to the volume of business than a year ago.

It was pointed out that there was little necessity for giving credit longer than thirty days nowadays. The farmer had the money; he did a cash business himself, and there no longer existed the necessity for giving six months' credit. On the whole, this manager neither recognized the necessity for extended credit nor upheld the theory as much of an assistance to greater business.

## BETTER OFF WITHOUT WHISKEY

Continued from page 47

begun to pick up again. Even in Pittsburgh, where most of the mills have remained in operation throughout the trouble, the butcher, the baker and the candlestick-maker, all have more or less felt the effect of the uncertainty of these times. Almost every tradesman with whom I talked told me he felt reasonably certain that without prohibition he would have been obliged to close his establishment to safeguard his goods in stock, and therefore would have suffered in a business way much more seriously than he has.

### Merchants Are Thankful

"It is easy to understand, therefore, why the dealers in clothing, furniture, boots and shoes, the butcher, the grocer, and others, are thankful for prohibition at this time.

"At Weirton, a man coming down the road with a wash boiler, stopped long enough to explain that he was on his way home to do his woman's washing. Certainly a peaceful occupation, as are the others mentioned. Naturally the labor leaders have had difficulty in interesting the men intent on starting a small chicken farm, on doing their wife's washing, etc.

"Were saloons wide open and whisky, gin and other strong drink sold over the bar and easy to obtain in the country places, it would be another story."

## WESTERNER SEES BIG BUSINESS AHEAD

Continued from page 56

Mr. DeMerrall stated that, as far as he knew they had been satisfactory. In the nature of the distribution made by his firm it was not possible to determine the condition of collections as readily as in some lines of business. "But the early buying was light owing to the unfavorable prospects from a weather standpoint. Later, when weather improved and crops were assured, buying was heavier and has continued heavier." There had been no complaint regarding collections.

It was pointed out that, while the average buyer had balked at paying the prices now obtaining for paint, he had grown accustomed to this change and was buying all the time with less reserve. As a rule it was finally considered economical to paint, more economical to protect the surface than to repair or build anew.

"Next year will see the biggest season yet," Mr. DeMerrall concluded.

According to press despatches, the Brantford Cordage Company has been obliged to close down its plant owing to a shortage of raw materials. These are held up, it is stated at New York owing to the longshoremen's strike.

# Refinishing Jobs

Much of the varnish sold by the dealer is used for refinishing purposes, and is bought by consumers who are not finishing experts. It is to such consumers that Berry Brothers' Varnishes, Stains and Enamels are especially adapted.

While "Berry" finishes have been for a great many years appreciated by the experienced painter because of their uniform quality, their easy working and excellent drying properties are additional buying inducements among house owners who are unskilled with the varnish brush and do their own refinishing.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Nov. 6.—It was expected that there would be an improvement in the linseed oil situation ere now, but priority of shipment seems to have been accorded wheat and other grains from the Canadian West. It will be fifteen days yet, it is stated, before seed delivery will have been improved to the extent which will enable the crushers to quote a price of anywhere near $2.00. In the meantime there has been a slight easing on spot oil.

Turpentine is steady and unchanged. White lead in oil is very firm and some are even wondering if an advance will come. Paints are still moving. Varnishes are decidedly firm. It has been a most active and profitable season for all, despite the unfavorable early outlook in some sections of the country.

### *May Be 15 Days Before Oil Freer*

**Montreal.**

LINSEED OIL.—There has been so little improvement in the actual spot situation on this commodity that it is scarcely noticeable. The situation seems to have resolved itself into a somewhat slow delivery of seed from the West, other grains receiving the preference in shipping circles. The farmers are loath, in many instances it would appear, to sell at present prices. "Some of them seem to expect that they will get $6 a bushel," said one crusher. And so, all around, there has been difficulty in getting needed supplies forward for crushing. Spot oil is a trifle lower, and prices for late November delivery are ranging from $2.10 to $2.35 per gallon.

| Raw— | Imp. | Gal. |
|---|---|---|
| Single barrels | 2 65 | 2 80 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| **Boiled—** | **Imp.** | **Gal.** |
| Single barrels | 2 67½ | 2 82½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *Steady Price and Slow Sale Turpentine*

**Montreal.**

TURPENTINE.—No change of price has been made effective on turpentine and there seems to be ample stock, but no great excess. The demand is light at this season of the year and the trade is buying with care, many purchasing only five gallon quantities.

| Turpentine— | Imp. | Gal. |
|---|---|---|
| Single barrels | 2 35 | 2 65 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Holds Unchanged; Sale Date May Extend*

**Montreal.**

PUTTY.—For this line there is a steadily seasonable demand, but orders are usually for limited quantities. The outlook suggests that there may be an extension of the date, Dec. 15, which orders will be accepted on the present basis. Supplies are sufficient for the trade needs.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *Paint Trade Good, Speaking Seasonably*

**Montreal.**

PAINTS, VARNISHES.—The paint trade has been seasonably active right down to the present time. The various manufacturers have been reviewing the year's returns, and not only have these been highly satisfactory, but the business lasted well into the later fall weeks, and is seasonably good at present. It looks as though Canada will yet have an "all-the-year-rounder" in prepared paints.

Varnish markets are very firm and any change that may be made is bound to be in the way of an advance.

### *A Very Firm Undertone Marks White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—There has been much firmness of undertone in recent weeks and this is by no means modified, as yet. In fact, with pig lead moving upward steadily, and with advances anticipated still, some are asking, "Will prices go higher?" There has been an excellent export demand for the product and domestic sales are also seasonably active. Five ton lots of standard grade are selling at $15.50 per 100 lbs., ton lots at $16, and smaller quantities at $16.35.

## TORONTO

TORONTO.—Linseed oil still continues firm for immediate delivery and the prices going are $2.62 for raw and $2.65 for boiled. The seed is beginning to come in to the crushers and it is expected they will have lots of seed to crush in a short time.

This undoubtedly will affect prices, which are quoting $2.45 for raw and $2.48 for boiled for very near delivery.

Turpentine prices on turps are soaring in the South and it is only a matter of a short period, it is said, till the prices here are advanced. The strike of the coal miners has had some effect on the market of turpentine, but not so much as the longshoremen's strike, which still continues.

Naturally, European markets are unable to get sufficient supplies, which they are badly in need of, owing to shipments being held up. This throws considerably more on the markets for home and Canadian consumption, and it is therefore easier to get supplies than otherwise. However, the Southern market is firming in spite of this, which indicates higher prices all around when conditions are relieved.

### *New Linseed Oil Shows Lower Figure*

**Toronto.**

LINSEED OIL.—Prices are firm for immediate delivery, as old stocks have been practically exhausted and are quoting at $2.62 for raw and $2.65 for boiled. However, these prices will not stay in force long, as the new seed is beginning to come in good volume and the new prices are already being quoted, which are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | .... | 2 45 |
| 3 to 5 barrels, gal. | .... | 2 45 |
| 10 barrels and over | .... | .... |
| | **Boiled** | |
| 1 to 2 barrels, gal. | .... | 2 48 |
| 3 to 5 barrels, gal. | .... | 2 47 |
| 10 barrels and over | .... | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

### *Turpentine Holds Very Firm*

**Toronto.**

TURPENTINE has been growing very firm, notwithstanding the fact that shipments are greatly held back from European markets on account of the longshoremen's strike. The present coal strike is not without its bad effects either, as it has also materially affected

# Do It Again, Canada

The reaction from war to peace has been sudden and strong. Our courage may be a bit spent, our enthusiasm for service a trifle on the wane.

It needs a little effort and some determination to rekindle the old fire, but it must be kindled if the Victory Loan is to be a success.

Canada calls upon you, therefore, for a renewal of your faith and a renewal of your effort.

And that can best be expressed if you do your utmost to inspire people to

## Buy Victory Bonds

P.S.—There is an old saying to the effect that "if you can't sing the words you can whistle the tune."

If you haven't any ready money, borrow some and

# Buy Victory Bonds

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

this commodity. Holders state that stocks are coming up a little, but not sufficient to supply the large demand. This makes it temporarily easier to procure. Present quotations are as follows:

| Turpentine— | Imp. gal. |
|---|---|
| 1 barrel (barrel included) | $2 45 |
| 2 to 5 barrels (barrel inclued) | 2 44 |
| 5 gallon lots | 2 55 |

## Glass Prices 5 Per Cent. Higher

Toronto.

GLASS AND PUTTY.—The glass market, which has shown such a strong tendency of late, has finally advanced 5 per cent. It has been hoped that the Belgium manufacturers would be able to supply some glass, but apparently any small quantities they were able to ship were specified by their Government it is thought, in order to keep in touch with their former buyers. However, the expected relief in the Canadian market from Belgium has not materialized. In fact, it has been stated that glass is being exported to Europe.

The reason for the present advance has been given that old price stocks are exhausted, and the necessity of importers to-day selling on the basis of the United States manufacturers' selling list prices of August, 1918. The new discount is 25 per cent. Putty is quoting as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

# Oversupply of Low Grade Manila Hemp May Bring Decline in Prices

A DISPATCH from New York has the following to say regarding the hemp situation:

"Further disturbances in the Mexican hemp market and increase in the large surplus supply of sisal on hand at various points in the United States have resulted in large sales, it is understood, at price not above 8½ cents per pound. According to one of the largest consumers in the country an almost unlimited supply of sisal is now available at from 8¼c to 8½c. This means the reduction in value which was forecast some time ago has now become actual and that the margin between the real value of accumulated stocks and the value as estimated by the banks which are understood to be carrying the warehouse supply is comparatively narrow.

**New York and Yucatan Prices**

An outstanding feature in the present situation is the maintenance of the technical price charged for Yucatan hemp in this country at a figure said to be around 10c. Consumers report, however, that the lower values already quoted can be obtained in Yucatan itself for so-called shipment hemp. On this basis it would seem that the nominal value in the United States is maintained for technical reasons even though the price of production has fallen off sharply as a result of the over-supply which has been accumulated for a long time past.

The question whether the reduced value of Yucatan sisal will result in a cut in the price of binder twine to the farmer during the coming season is a subject which is attracting the attention of agricultural interests, as the reduction has come in time to permit it to affect the selling value of twine if manufacturers are disposed to give the buyer the advantage of economical purchases of raw material. What will be the future price of the stored stock of Yucatan hemp in this country will, it is supposed, depend upon the continuance of the situation in Yucatan, which permits the sale of hemp there at a low figure as compared with the spot price in the United States.

**Price of Manila Hemp**

During the past few days there has been a marked increase in the price of high-grade Manila hemp. This has been partly due to the fact that the supply, which was for a long time carried in New York as spot hemp, has been entirely exhausted, a large part of it being worked up in binder twine and thus taken off the market. An increase in the demand for rope has found rope manufacturers short of raw material, and they have become buyers at advanced rates. What few stocks of spot hemp are now in this country are very strongly held.

Although there is a surplus supply of more than 500,000 bales in Manila and Cebu, recent investigation has shown that the holders are very strong, and that inasmuch as they believe firmly in higher prices they are not likely to throw their hemp on the market without satisfactory remuneration. The demand, however, is almost entirely for the higher grades of hemp, low grades continuing to be about as much a drug on the market as ever.

**Divergence of Price**

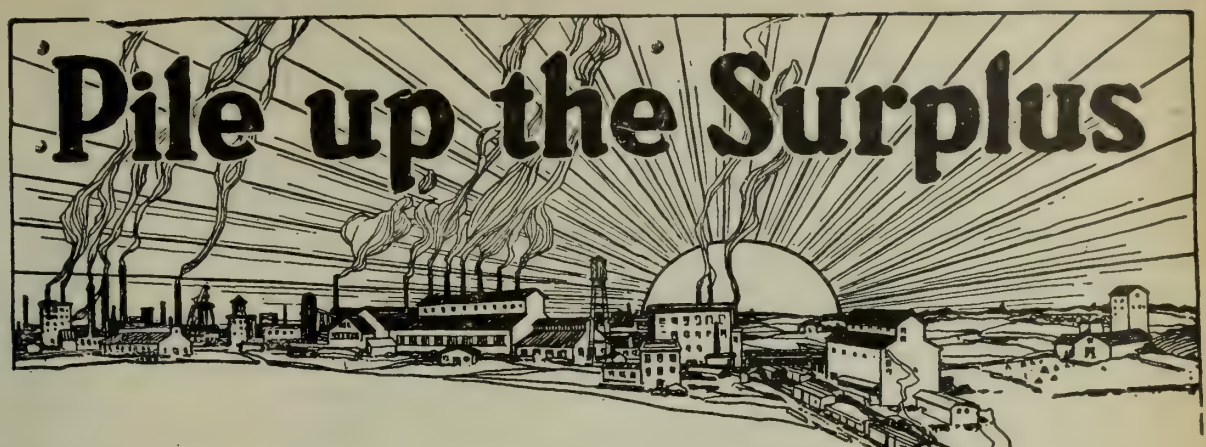
This has brought about a marked divergence between the prices of high grade and low grade material. With reference to the low grade Manila hemp, further reduction is expected because of the sympathetic effect of the lower prices of Mexican sisal, which is now competing with Manila in a considerable variety of uses. On these grounds dealers now predict sharp downward movements not only in Yucatan but also in low grade Manila as an event of the near future.

# Says That Prices of Brushes Are Likely to be Higher

## All Bristles Over 4½ Inches in Length Are Off the Market Indefinitely—Great Majority of Russian Hogs Have Been Killed for Food

THE T. S. Simms Co., Ltd., St. John, N.B., is planning to place at the disposal of the trade larger stocks, to take care of the Quebec and Montreal trade. In an interview with R. C Lewis, sales manager, who has been in Montreal for some little time making new arrangements, HARDWARE AND METAL was informed that stocks of brushes carried at the Montreal branch will be larger, and that an improved delivery service will be provided for Montreal city, two auto trucks now being in operation.

Mr. Lewis stated that the advertising plans of his company would be larger and that the dealer would be assisted by this increased publicity appropriation. He also announces that Henry Gratton will assume charge of the Montreal branch. Mr. Gratton has been connected with Brandram-Henderson, Limited, for some time.



In connection with the advances just made for brushes, which have amounted to 40 per cent. within the past few weeks, Mr. Lewis pointed out that, while these increases are very material ones, it is altogether likely that prices will go higher. It is simply a matter of world scarcity of bristles, and already long bristles—that is, those over 4½ inches in length, are cancelled until further notice, or at least until supplies are again available.

Continuing, Mr. Lewis stated that reports of the situation in Russia indicated that fully 75 per cent. of the bristle hogs of Russia were killed for food purposes, leaving China as the one big available source of supply. With brush buyers out, combing the markets of the world that have any stock, it is apparent that there will be nothing but a firming market ahead for some time to come. As an instance of the price of one raw material—badger—the product which formerly cost $16 per ton is now quoted at $57.

Brooms advanced this week 60c per dozen, all around. This advance was not unexpected and is the direct result of shortage of broom corn. The better grades are very scarce, Mr. Lewis states, and it is only because some stock of the better grade was bought ahead that brooms are still to be had of the better variety.

"Farmers find that they can get a better return from their land on which broom corn has been produced in the past," stated Mr. Lewis, "and while the demand for brooms is increasing, the available supply of raw material is decreasing."

Weather conditions have also served to reduce the quality of the corn.

# Keep Canada Humming

Canada was never lacking in war enterprise—war strategy—war efficiency. She always carried out successfully her plans of war.

Now—we must apply the same determination and energy to the plans of peace, for we now have new problems to solve.

We are faced with the great work of readjusting our country from a War to a Peace footing.

Our immediate duty is to provide the national working capital, without which it will be impossible to carry out the Plans of Peace.

Demobilization, bonuses to soldiers, civil re-establishment, credit loans to Britain for the purchase of Canadian surplus products, ensuring continued employment to our workers. All these call for national capital, and the Victory Bonds 1919 will provide that capital.

Therefore, the success of the Victory Loan is not something that concerns "the other fellow" only.

You have a part to play.

Your individual prosperity is at stake.

YOU will support the Victory Loan just as enthusiastically as your fellow-citizens.

Canada must have the money to carry out the Plans of Peace.

If things are to be kept "humming" you must

## LINSEED OIL

There are many districts in Canada which are easier of access through navigable waters than by rail. To the merchants in these localities our advice is to anticipate now their LINSEED OIL needs for the next few months.

Wish to remind the trade that their immediate requirements can be shipped at once from any of our three mills. We further solicit your winter requirements.

**BEST IN QUALITY—MOST RELIABLE**
**GUARANTEED ALWAYS**

***Be satisfied with nothing short of the best***

GET WHAT YOU WANT

# Everywhere on Everything

This phrase expresses the broad scope of Glidden business. With the addition of Glidden Endurance Paint to the Glidden line every paint and varnish need can be met with a Glidden product ***made for the purpose.***

Everywhere on Everything is the slogan that is carrying the Glidden Full Line Message to the paint and varnish consumers in your vicinity. By extensive advertising it has become an asset for every Glidden Dealer.

This is the time for you to link up your store with a concern that is ***Up and Doing*** every minute.

The latest addition to the Glidden line—Glidden Endurance Paint—is one ***that rounds out*** the Glidden proposition and makes it most attractive both from the "business getting" and "profit making" standpoints.

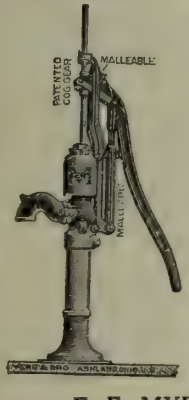
TRADE SIMMS SET IN RUBBER MARK



# Clinches the Painter's Trade

You can get—and keep—the custom of every painter within miles of your store, when you let them know that you stock Simms' Better Brushes—set-in-rubber by our own exclusive patented process.

Simms' Set-in-Rubber Paint and Varnish Brushes are guaranteed to hold their bristles firmly in the setting, no matter what usage they are subjected to. The harshest paint-remover, boiling water, crude oil—everything that usually destroys the ordinary brush—have no effect whatever on Simms' Paint and Varnish Brushes. Their setting is perfection. The bristles **never** come out.

Get a good supply in now. There is a good profit on every brush you sell. We will send price-list by return of mail.

# Have You Taken Down Your Sign?

A prominent merchant who has made a great success of all branches of his business has said that withdrawing advertising from a good trade paper is like taking down your sign. Advertising to the trade you serve is business insurance, but premiums must be kept up or the policy will lapse.

There never was a time when the trade was keener for business information. That is why the advertising pages of the Hardware and Metal are being followed so closely at the present time.

# They See The Can—
# Recall The Brand—
## *And You Record a Sale*

**Stephens** REGISTERED TRADE MARK has already impressed many minds favorably. An average display is all that's necessary to start a train of thought in the customer's mind that leads from your store to an unpainted home. Your cash register becomes the closing link in the series of events suggested by your display of **Stephens'** REGISTERED TRADE MARK Paints. This doesn't happen once—it happens many times. Are you making the most of such opportunities? Have you the right brand of paint? If not, your paint turnover is not all it might be.

*Suppose you write us about an agency. There's money in it.*

# The MANITOBA STEEL & IRON COMPANY.

WINNIPEG, MANITOBA LIMITED

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

The Eden

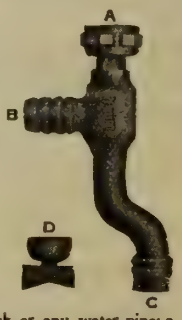
fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

The Eden IS THE MACHINE FOR THE LIVE DEALER

# GREAT WEST ELECTRIC COMPANY, LTD.

WINNIPEG



*Distributors of LACO TUNGSTEN and NITRO LAMPS*

TRADE PENBERTHY MARK

# Washing Machine Ejector
## for Household Use

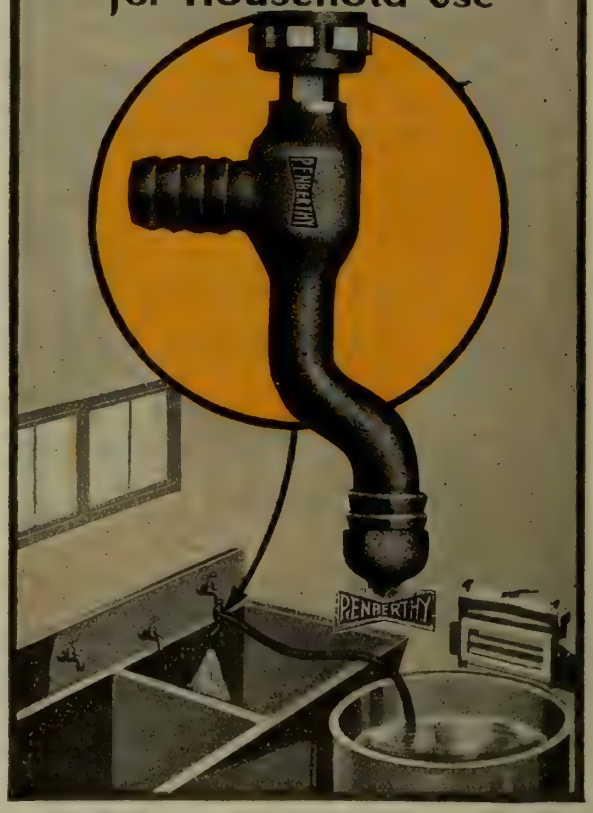
¶ Designed to transfer water or other liquids from sumps, washing machines, wash tubs, cellar pits or any place where there is an accumulation, *by means of ordinary water pressure.* No electrical, steam or other operative power required.

¶ It takes the maximum amount of water from the tub or sump, with the minimum amount of water operating the ejector. It is handy to have around the house, saving much back-straining and lifting.

**List Price - - $3.25**

TO OPERATE THE EJECTOR:

¶ The swivel "A" is screwed on to the penstock or any water pipe; a piece of hose running from the tub, pit, or receptacle, to be emptied is attached to extension B and another piece attached to extension C and allowed to run wherever it is desired to discharge the water, this can be 15 to 20 feet, or over, above the ejector, the height depending upon the water pressure. When discharging directly into the sink no hose is necessary on extension C.



**TO RUN CLEAN WATER INTO TUB OR OTHER RECEPTACLE AFTER DRAINING WITHOUT DISTURBING HOSE:**

¶ A bronze cap D is furnished with this ejector so that after any tub or receptacle has been emptied of dirty or used water, it can be refilled by simply screwing cap onto connection C of ejector, and then turning on water same as you would to empty tub. This cap prevents the water from going out of the bottom and forces it back through the hose, attached at B, leading to the receptacle to be filled or emptied. Do not use this Cap except to fill tub or receptacle.

**Please Note—We do not furnish the small length of hose mentioned above and where customers do not have this hose on hand, Dealers should make an additional charge when furnishing same with Ejector.**

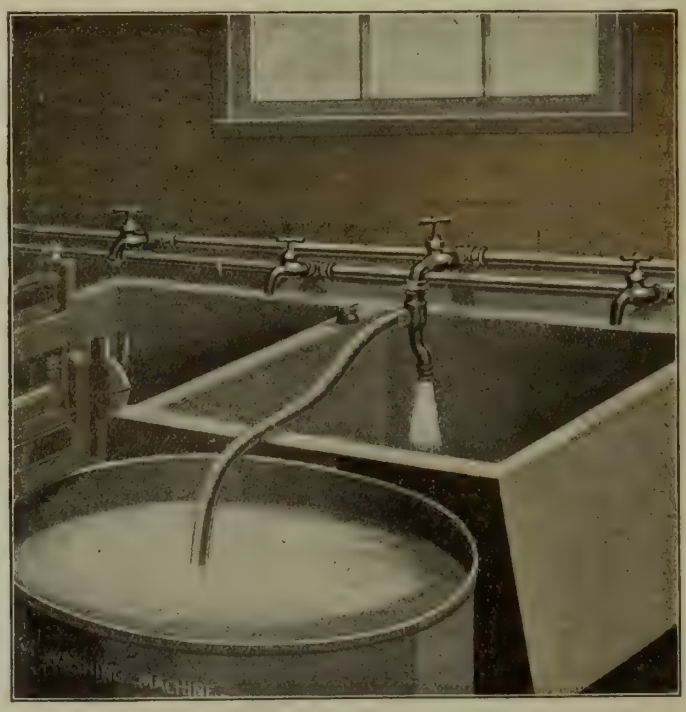
TRADE PENBERTHY MARK

# Washing Machine Ejector
## for Household Use

## The PENBERTHY Household Water Pressure Ejector

is a small, inexpensive device for transferring liquid to a higher level using city water pressure as power Will fit any faucet. It does away with the necessity of lifting heavy pails of dirty water drained from the tub—sloppy, dirty floors, made so when taking out or putting in plug or in lifting the pail to the sink, or through letting water drain through floor trap. It saves labor for the women folks; can be used for any number of purposes.

*All you do is to attach it to the faucet and turn on the water.*



*No loose parts—nothing to get out of order.*

Tested and Approved by the Good Housekeeping Institute Conducted by Good Housekeeping Magazine

TESTED AND ENDORSED BY THE TRIBUNE INSTITUTE The New York Tribune

*It does its work quickly and efficiently.*

*Strongly made and will last a lifetime.*

If faucet is smooth you can convert it into a threaded faucet in a few seconds by using the Penberthy adapter.

Actual Size of Penberthy Adapter

LIST PRICE - **65c**

Converts ⅜", ½", ⅝" and ¾" smooth faucet into standard threaded faucet in a few seconds.

## The PENBERTHY Household Water Pressure Ejector

is not a complicated machine; it is as simple in its arrangement as is the common hose nozzle. There are no moving parts, nothing to get out of order or adjustment, which, together with the fact that requires no attention and only water for power, makes it an ideal addition to any home. Is made of aluminum.

See opposite page for further description.

This is the Penberthy way. It means Ease and Comfort.

This is the old way. It means Hard Work and Drudgery.

# YOU HARDWARE MEN!

Here is a real household necessity that can be sold to every woman in your town if you are a live wire.

## MAKES WASH DAY EASY

No water to lift or carry. Simply fasten a Penberthy Washing Machine Ejector to the faucet and turn on the water. It will empty or fill the tub.

## DON'T OVERLOOK THIS FACT—

The dealer who gets in first is going to get the cream of the business in his locality, for Mrs. B— is going to tell her neighbors where to buy this "Life-Saver" and Mr. Lucky Dealer is going to hand them out fast.

## ORDER FROM YOUR JOBBER TODAY

We will furnish you with descriptive circulars of this ejector on request, for distribution among your customers.

"Save the surface and you save all" *Paint & Varnish*

# JAMIESON SALES MEANS LARGER PROFITS

***ASK*** the dealer who has been selling our line.

***"HE IS A SUCCESS"***

The veteran painter, tried and proved, the man who does paint well.

***"HE KNOWS"***

The chemist, who can analyze,—he smiles and says

***"ALL RIGHT"***

## *BECAUSE*

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

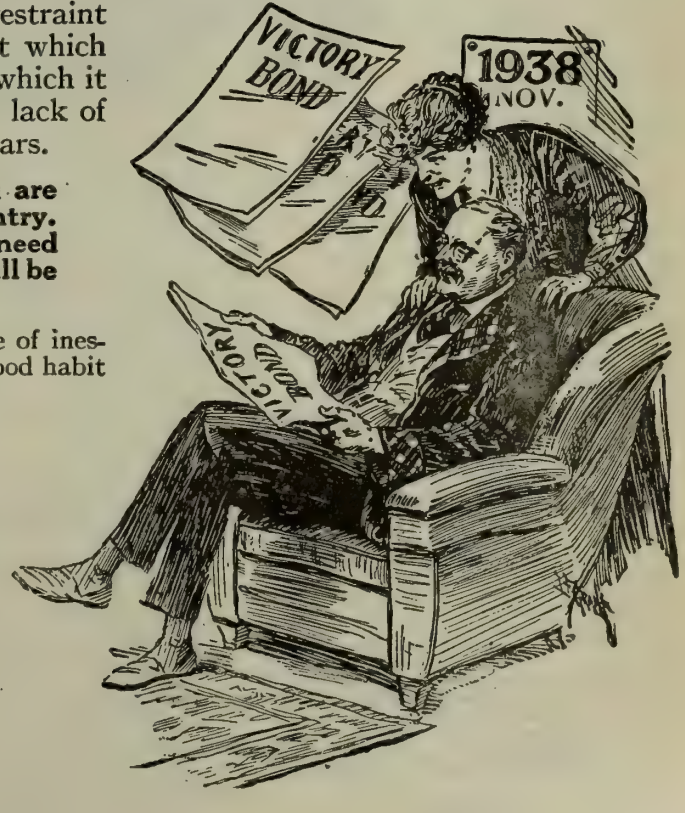
YOU are asked to save every cent not needed for your reasonable support and physical well being—this is thrift



# Bonds Are Not A Burden But A Blessing

THRIFT requires the exercise of restraint and self-denial—qualities without which you cannot achieve the success in life which it is your ambition to achieve, and for the lack of which you are likely to suffer in later years.

**The money you acquire by thrift you are asked to loan—not give—to your country. It will come back to you when you may need it far more than you do now, and you will be paid interest for its use.**

This war is a frightful thing, but it may prove of inestimable benefit to you, if it teaches you the good habit of thrift. Start the habit by investing in

# Lowe Brothers Paints

Lowe Brothers LIMITED

## View Points
## What Constitutes "Best Paint"

The Best Paint—

From the consumer's standpoint—that paint which covers most, looks best and wears the longest.

From your standpoint—that paint which draws custom and keeps it—a perpetual business-builder.

From the manufacturer's standpoint—that paint which best satisfies both dealer and customer.

There is profit for all in Lowe Brothers' "High Standard" Liquid Paints. Satisfaction is the profit the customer makes while the dealer profits in dollars and in continued patronage.

From all viewpoints Lowe Brothers' "High Standard" Liquid Paints assert their supremacy. We have the proof. Are you willing to be convinced? Write and ask to have our representative call.

"Save the surface and you save all" *Paint & Varnish*

Barrett

# Roofing Specialties

The Standard Brand of prepared roofing from Sydney to Vancouver. Popular priced and a ready seller everywhere.

EVERLASTIC ROOFING CEMENT
for resurfacing prepared roofings.

ELASTIGUM
is the plastic cement for a thousand uses.

EVERJET ELASTIC CARBON PAINT.
The best Black Carbon Paint on the Canadian market.

BARRETT ROOFING SPECIALTIES ARE ALL PUT UP IN ATTRACTIVE LITHOGRAPHED CANS WHICH WILL LEND DISTINCTION TO ANY DEPARTMENT OF YOUR STORE.

**EVERLASTIC** is our first grade "Rubber" roofing; its years of successful use throughout Canada have made it so well known that the name "Everlastic" has practically become standard.

**EVERLASTIC ROOFING CEMENT** is a black bituminous compound manufactured expressly for resurfacing prepared roofings of all kinds. It is about the consistency of thick molasses and is liquid under ordinary temperature conditions.

**ELASTIGUM** is an elastic, tenacious plastic cement, compounded on a heavy, bituminous base with weatherproof oils and fibre. It will expand and contract in conformity with the surface on which it is applied, whether the latter be metal, wood, glass or masonry.

**EVERJET ELASTIC CARBON PAINT** is a lustrous, black carbon paint which combines the qualities of low cost and extreme durability. It is a bituminous product and is elastic and adhesive; will not rub, peel or scale; will not become brittle and crack, is impervious to moisture, and can be used in any climate.

**Full details of all the BARRETT real business-getters will be sent you upon request.**

# An Exchange of Money that Pays---

When you buy Victory Bonds, you simply exchange one kind of money for another.

A dollar bill is Canada's promise to pay.

So are Victory Bonds.

But Victory Bonds pay INTEREST.

Consider the security behind Victory Bonds—

Canada and all that is contained therein.

Consider the good rate of interest—

Victory Bonds pay 5½%—nearly twice as much as Savings Banks.

Consider the saleability of Victory Bonds—

Their use as collateral for a loan.

Their prospective advancement in price.

Consider the purpose for which Canada requires the money—

Cleaning up our obligations to the army and maintaining the prosperity of the country.

Are not these reasons the best in the world for exchanging one kind of money for another?

Should not every Canadian put all his weight behind this Loan?

Should not he exchange all the money he has for Victory Bonds?—and all the money he can save for the next ten months to come?

# BUY VICTORY BONDS

## An Unusual Opportunity For Larger Christmas Business

WILL result from our nation-wide appeal to the consumer on Northern Electric Household Devices to *"Make it an Electrical Christmas."* Attractive, logical, local advertising in twenty-five of the leading daily papers, from Coast to Coast, will drive this idea home to the consumer. Watch for it!

Linked with this, our artistic folder *"Make it an Electrical Christmas,"* designed in four colours—red green, black and gold—breathing the very air and spirit of Yuletide—a magnet on your counter and a sure winner in the mail—will be at your disposal in liberal quantities.

Join us in the big drive for good, clean Christmas profits, by stocking up with Northern Electric household appliances,. ready to meet the created demand.

Let's get together and MAKE IT A REAL ELECTRICAL CHRISTMAS.

## Snap Shell Key Socket

*—new*
*—different*
*—better*

No. 69480
660 Watts
250 Volts

# Benjamin

# SNAP SHELL KEY SOCKET

*—a glance shows whether it's "on" or "off"*

An electric iron left "on" has often been the cause of a disastrous fire. This is unnecessary with the **Benjamin Snap Shell Key Socket,** for a glance shows whether current is "on" or "off."

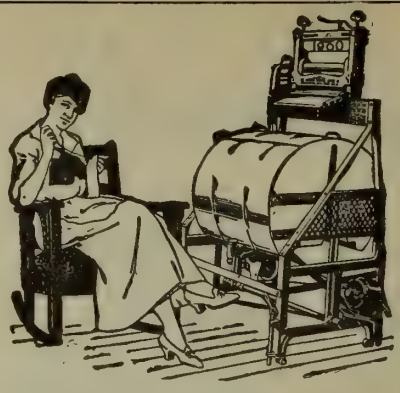
Another feature of this new Benjamin Socket is the ease of operation—can be turned "on" or "off" with one hand, while the ordinary key socket on a drop cord or swinging fixture requires the use of both hands.

**This is a splendid line to introduce right now in your town. Ask for further information from your jobber or write to us.**

**When Key is Up *"it's off"***

**When Key is Down *"it's on"***

**No more guess-work**



**Less Danger Greater Safety**

# Four Good Reasons Why You Should Sell "1900" WASHERS

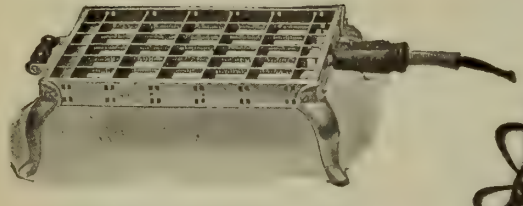
1.—You want profits—the "1900" line provides fair profit on each sale and, as these machines are exceptionally easy to sell, your year's business can be greatly augmented by stocking such a line.

2.—You want to gain a reputation for selling the "Best on the Market"—and the "Best on the Market" in Washing Machines means "1900."

3.—You want to be able to offer a complete line of Washers. The "1900" line is complete. It includes Electric Motor, Engine Power, Water Power and Hand Power Washers. When you are a "1900" dealer you need never say, "Sorry, Madame, but we do not sell that kind of Washer."

4.—You want the good-will of your customers. The woman who buys a "1900" Washer from you will never forget the "good turn" you did in suggesting it to her. Highly satisfied with her purchase, she will remain your customer and she'll tell her friends about her machine and the store she got it from.

**1900 CATARACT Electric Washer**



The housewife is daily confronted with the High Cost of Living, lack of domestic help and the "wear and tear" on apparel, caused by the local laundries. Women are finding the "1900" Cataract Electric Washer in particular a solution of the washing problem and the dealers who stock our line are rewarded by excellent sales and profits.

Our objective—an efficient, energetic representative in every locality.

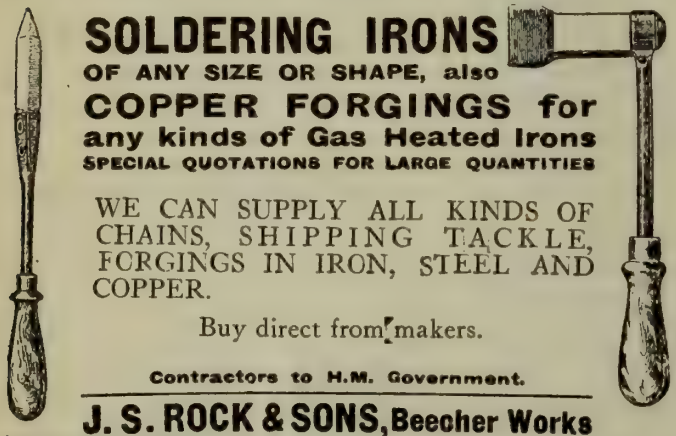
# Comfort Under a Horse Collar

What horse will do good work if it suffers with sore shoulders?

An ill-fitting collar that rubs or chafes soon has the most even-tempered horse worried and shirking its work.

VENTIPLEX PADS protect the shoulders—they give an even distribution of pressure on the shoulders even when an ill-fitting collar is used.

TRADE MARK **Ventiplex** PADS



are the most satisfactory pads on the market. Cool, comfortable, sanitary and easily kept clean, not hardening after being washed.

Dealers, realize the great money-making possibilities there are in recommending and selling these humane pads that do away with the torture of poorly-made and ill-fitting collars.

**Write us for prices and particulars.**

WINDSOR, ONT.

# The Cleanest Store in Town

Your reputation as the cleanest store is worth much to you.

People like to trade in clean stores where merchandise is kept spic-and-span.

Dust repels trade—get rid of dust. Dust *cannot* rise where Imperial Standard Floor Dressing is used.

Imperial Standard Floor Dressing is a wonderful cleaning, wood-preserving preparation which prevents dust from rising.

## STANDARD Floor Dressing

Cleans the surface of wood, linoleum and oil cloth thoroughly. One gallon is sufficient for 500-700 square feet of floor space, one application every three or four months will keep floors and shelving clean and prevent dust from rising. Display it on your counter, recommend it to your customers, demonstrate the results by the spotless cleanliness of your own store.

Sold in gallon and four-gallon cans, also half-barrels and barrels.

PUBLISHED EVERY SATURDAY SINCE 1888

NOVEMBER 15
1919

THE MACLEAN PUBLISHING COMPANY, LIMITED
PUBLICATION OFFICE: TORONTO, CANADA

FROST

BUSINESS BUILDING
FOR THE DEALER

Mutual confidence, mutual help, mutual encouragement—the company for the dealer and the dealer for the company—has been one of the factors which has made FROST FENCE FIRST. Further co-operation is our aim.

Another factor has been Frost Fence itself. Tight-Lock Fence is the logical fence. It is distinctive, self-selling, full of quality—a maker of satisfied customers and new customers. The quality of wire and galvanizing is our own. It is woven so that it *always* stretches straight. It looks better. Farmers prefer it.

*Get into the FROST organization*

Frost Steel and Wire Company Limited

Hamilton, Canada

# For Quick Turn-over

It is obvious to every live merchant that "turn-over" makes for success in retailing.

We can tell you **how** to increase **your** "turnover."

If you are not selling O-Cedar Products, stock them now. You will see a prompt increase in your sales-per-month.

If you now stock O-Cedar Products, but fail to let your customers **know** you have them—put O-Cedar Poilsh and O-Cedar Polish Mops in your window—display O-Cedar Cards in your store—and right away you will realize that to get ready sales for these articles you only have to direct people's attention to them.

That is because they are quality articles—well advertised.

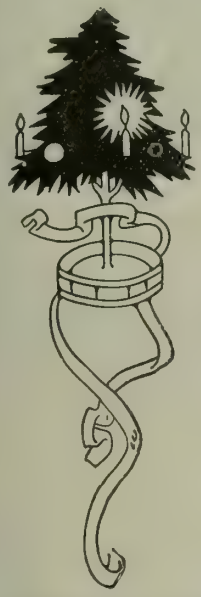
Through the Advertising, they are known — by reason of the quality they are appreciated and win repeat sales.

All that your customers need is a reminder that **you** sell them—to buy them at **your** store.

The **demand** is ever-present — awaiting but your slight effort to direct it **your** way.

CHANNELL CHEMICAL CO., LIMITED
TORONTO

# O-Cedar Polish



HARDWARE AND METAL, November 15, 1919. Volume XXXI., No. 46. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

# —five weeks to Christmas

## SORT UP YOUR CHRISTMAS STOCKS

Sensible Christmas buying is increasing every year with the result that the hardware dealer is sharing in the Christmas rush and must, therefore, lay his plans to meet the demand.

**"PYREX"**
*TRANSPARENT*
**OVEN WARE**

makes ideal Christmas gifts. It is sold in separate pieces or in the set as shown above—eleven pieces, which retail at $9 or $10 (nicely packed in a carton). "Pyrex" glass utensils stand the heat of baking, are attractive on the table—well known, sell readily. Sort up your stock of

**"HOTPOINT"**
*ELECTRIC*
**APPLIANCES**

We carry a most complete range, all styles and for every purpose. Electrical gifts are always much appreciated by the housewife, in fact, by anybody.

# "HEIRLOOM" PLATE

*Art and refinement are as delicately portrayed in "Heirloom Plate" as to give an appearance of worth far beyond the price asked. The very name expresses the long-wearing quality of this made-in-Canada line of Flatware and Hollow Ware.*

THE superb designs and finish of Heirloom Plate attract the notice of discerning customers. The richness of the appearance of Heirloom Plate is made possible by the high quality of the base metal and the careful workmanship of experienced craftsmen. You can build a better-class trade by selling this better-class Flatware and Hollow Ware.

Be sure to see the Devonshire Pattern Flatware—it is the big seller this year.

# No. 88

# Storm Proof Door Hanger

## Adjustable

This excellent door hanger is the same as our No. "77" Flexible except that it has two adjustments—vertical and lateral. The adjustments are simply and easily made.

Another good feature is that the door is carried closer to the rail than with other adjustable hangers.

We can supply a splendid model of this, and other hangers, for display; the parts are full size from stock.

The Hangers are packed one pair in a box, with bolts for attaching the Hangers to the door; also lag-screws and end-caps for the rail. Each box contains, also, a set of illustrated directions for attaching the Hangers and rail.

Packed one dozen pairs in a case. Weight, per dozen pairs, 113 pounds.

## National Manufacturing Co.

## Sterling, Illinois.

# Keep Your Merchandise Bright

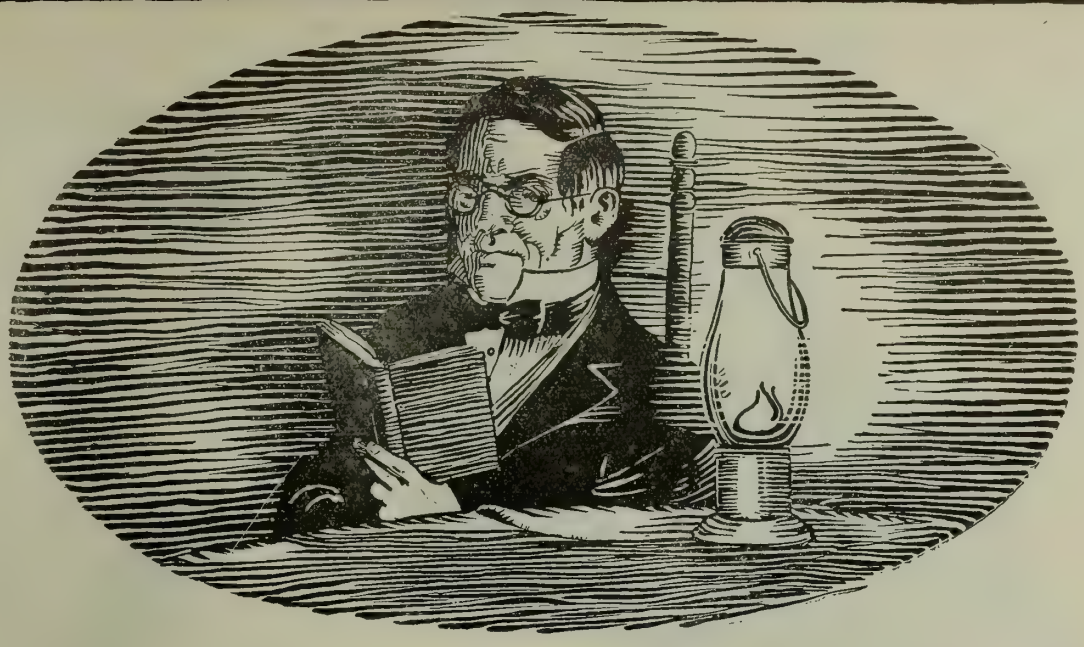
SOILED commodities never appeal to your customers—they want their goods bright and clean. Dusty merchandise looks shop-worn. Keep down dust and your stock will remain as clean as the day you unpacked it.

## STANDARD Floor Dressing

prevents dust from rising off the floors and sheiving. Dust cannot rise from floors treated with Imperial Standard Floor Dressing.

In addition, it is a wood-*preserving*, non-evaporating dressing for all wood, linoleum and oil-cloth surfaces, thoroughly cleansing in its action.

One gallon will treat 500 to 700 square feet of floor space — once dressed no further treatment is required for three or four months, save regular cleaning. Use it on your floors to clean them and save the spoiling of valuable merchandise.



Advise those responsible for the cleaning of apartment houses, churches, public buildings, etc., as well as neighboring merchants, of its qualities, and demonstrate its worth by your own store's cleanliness.

Sold in one and four-gallon cans, also half-barrels and barrels.

**Ask the Imperial Oil Man.**

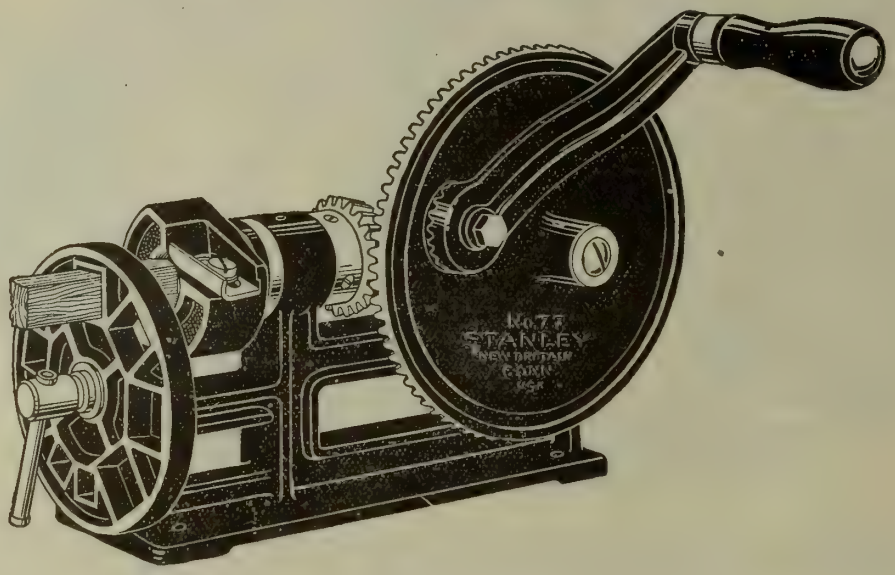
## IMPERIAL OIL LIMITED

BRANCHES IN ALL CITIES

# WHEN GRANDFATHER FIRST READ BY THE KEROSENE LAMP

ONE evening in 1826, Grandfather removed the candlestick and waxed taper from the table and lighted a new "contraption" which he called a kerosene lamp. But it was not until nearly thirty years later that mineral oil lamps, improved and perfected, began generally to displace the wax tapers and the lamps which produced light from animal oils.

Two years before the first kerosene lamp was lighted, nearly forty years before the discovery of petroleum in America, the workers at Plymouth began making rope—rope so good that when the demand came for drilling cables to open up the vast stores of petroleum beneath the earth's surface, Plymouth was ready, and for sixty years Plymouth Drilling Cables have played a very important part in the production of petroleum.



For every rope and cable use Plymouth delivers full value and more.

# PLYMOUTH ROPE

PLYMOUTH CORDAGE COMPANY
North Plymouth, Mass. Welland, Canada

No. 3

# Stanley Tools

## STANLEY
## DOWEL AND ROD TURNING MACHINE
### No. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them and furthermore of the same material as the wood being worked.

One cutter head complete for making dowels or rods 3/8 inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.

A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy.

# When You Sell Millers Falls Tools—

You are tying your tool business to a big advertising success and selling tools that are already sold to the customer before you show the goods. You are cashing in on a standard product that takes less effort to sell and stamps your store in the customer's mind as selling the higher quality standard goods.

For fifty years Millers Falls tools have maintained quality standards that have been recognized the world over and now that they are the largest advertised line they ought to be the backbone of every tool stock.

Our selling features will increase the tool sales in your whole department. Send for handbook "How to Sell Tools." Free to every dealer.

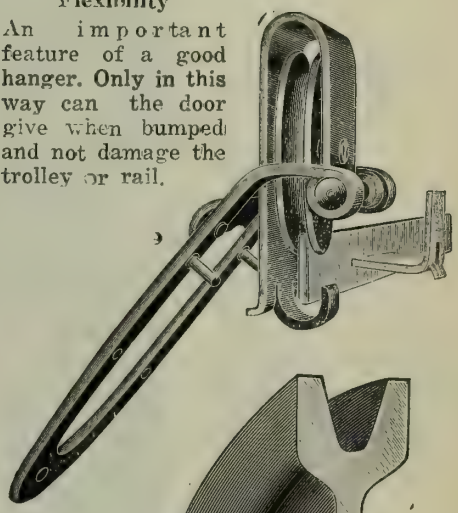
# "Reasons Why" of the National's Sales

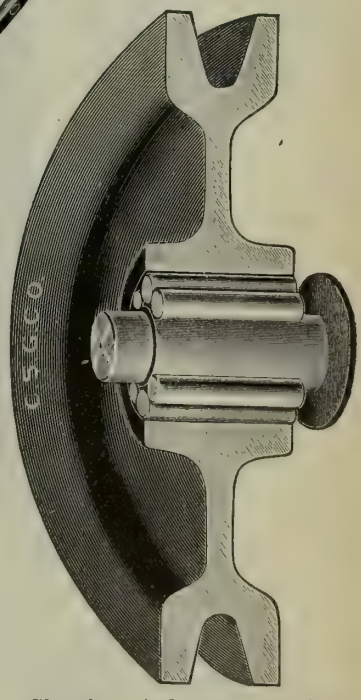
**Handsome Appearance**



**Braced Rail**

1¼ x 3/16 inches. Made in lengths of 4, 6, 8, and 10 feet. Weight per 100 ft.—100 lbs.

**Flexibility**

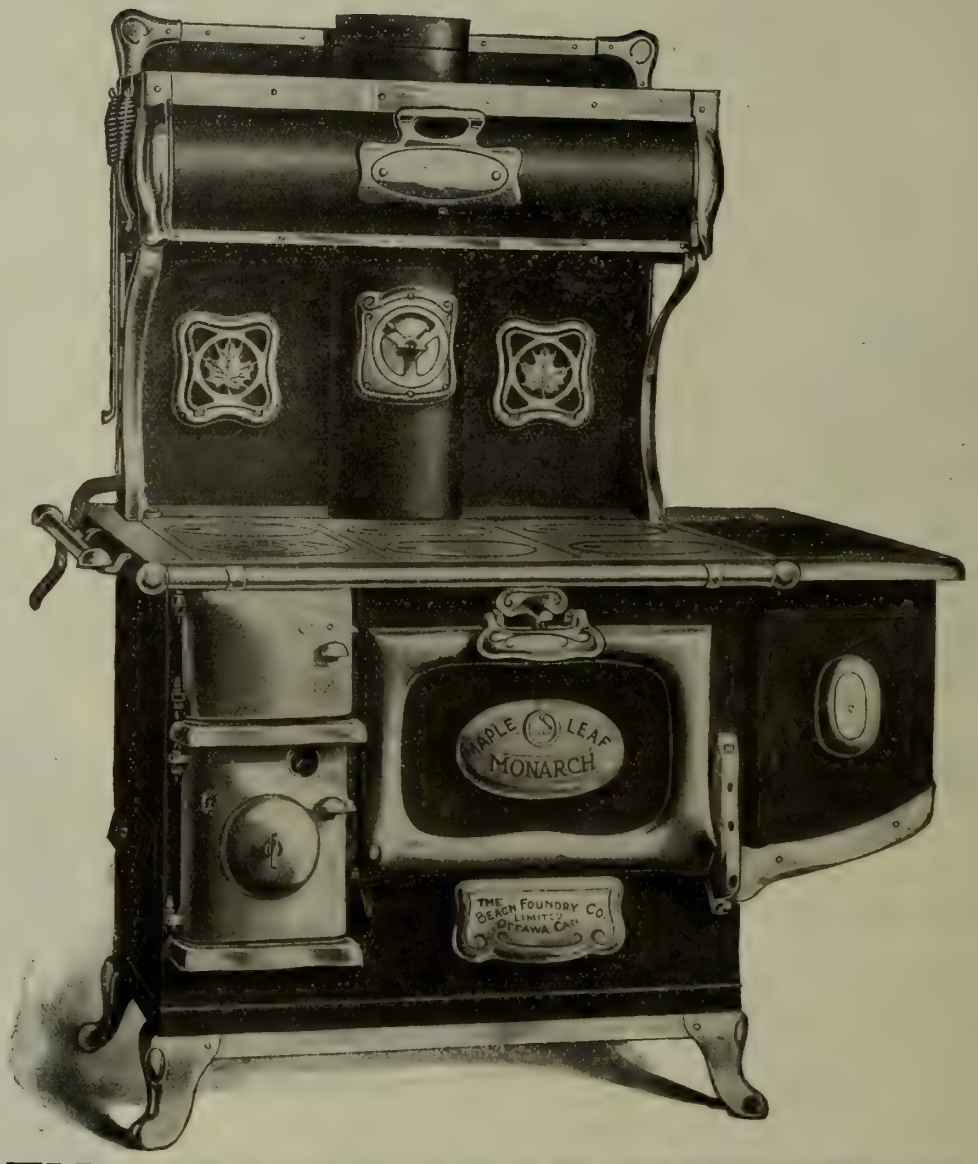


An important feature of a good hanger. Only in this way can the door give when bumped and not damage the trolley or rail.

## It Sells Easily and It's Profitable

Our products are designed after investigation of both the dealers' and consumers' requirements. Such an article is the "National" Flexible Door Hanger and Braced Rail. You can sell the National because consumers know its excellent features. They know that it cannot jump the track; that it is easily attached and very efficient in use.

These satisfied customers build a constantly growing and permanent trade. When Jones has National Hangers on his doors he is sure to "sell" Smith and Brown, his neighbors, for you. Packed one pair in a box with all bolts. Weight, per dozen pairs, 88 pounds.



**Showing Axle and Bearings**

Anti-friction steel roller bearings. Ease running; a minimum of wear.

**SOLD WHOLESALE BY**

# CAVERHILL, LEARMONT & CO., MONTREAL

# What Your Fellow Merchant Thinks of Neōlin Soles

THOMAS SCARFE
Fine Shoe Repairing

Halifax, N.S., February 26th, 1919
54 Cobourg Road,

Messrs. Goodyear Tire & Rubber Co.,
of Canada, Limited, Toronto, Ont.

Dear Sirs:—

During the past two or three years I have been watching with interest the development of Neōlin Soles. I have also used some fibre soles, the makers of which claimed that they were as good as Neōlin. I personally decided to make comparative test.

I prefer to stitch Neōlin over fibre soles or leather, as I can take tight tension and close stitch. It is an easy sole to cut in trimming, and the edge will set perfectly.

As to public demand, I have been satisfied beyond all doubt that Neōlin is the sole the public will accept in preference to any other. I, therefore, found it to my interest to stock and offer Neōlin to the public, realizing that I will give them value, which means a permanent and satisfied customer.

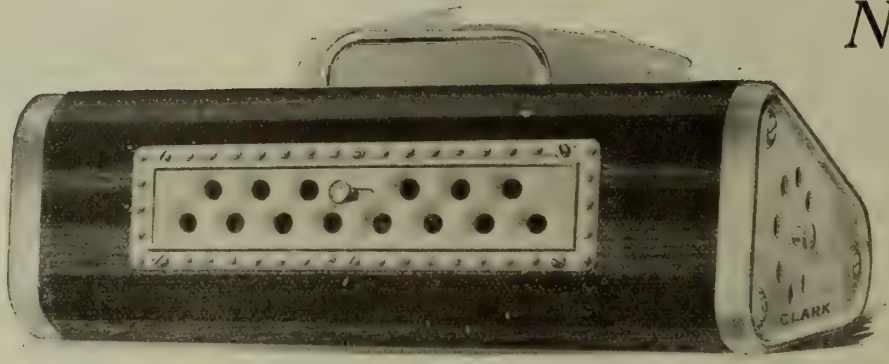
I trust that this bit of information may be of interest to you.

Yours very truly,

THOS. SCARFE (Signed)

## *Many Types of Shoes are Built with Neōlin Soles*

Suppose you had only one leather-soled number on your shelves. How much of your demand for leather-soled shoes would you satisfy with such a stock? Yet some merchants think they can judge the sales value of Neōlin Soles after stocking them in only one last. Of course they fail to realize their due profit from the demand which exists for Neōlin Soles.



**The Goodyear Tire & Rubber Co. of Canada, Ltd.**
TORONTO, ONTARIO

# Neōlin Soles

*Every Car at Your Door a Prospect*

# Clark Indestructible

## *Fill a General Need*

**The Famous No. 7-D**

This is a very popular heater, widely used. The No. 7D suits any sort of conveyance. Note the slanting top. This efficient heater is 14 inches long, covered with dark green Brussels Carpet.

No. 7D is the ideal appointment for any vehicle in Canadian winter weather.

**Ends Doctors' Hardships**

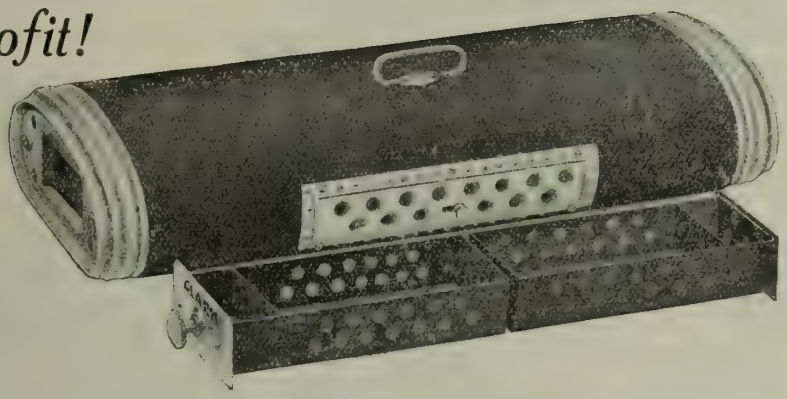
**Makes Open Cars Luxurious**

Clark Heaters with carbon-brick fuel fill economically a general need, making complete the winter enjoyment of our Canadian air—"the air with champagne in it."

Aside from pleasure and luxury, Clark Heaters bring real comfort to the hardy men who brave extreme winter weather in many pursuits—the doctor, rural mail carrier, etc.

A popular, profitable article to stock with a self-evident demand.

**Your Jobber Will be Glad to Fill Your Order**



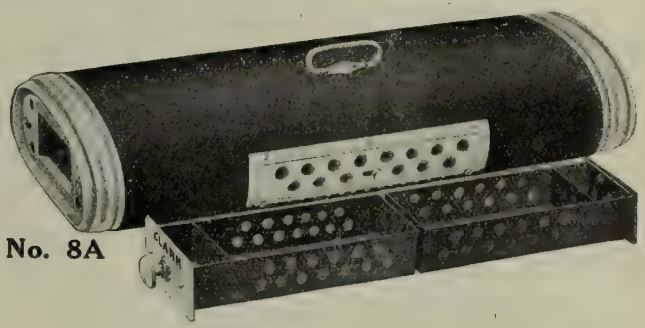
# Chicago Flexible Shaft Company

**Roosevelt Road and Central Avenue** **Chicago, Illinois**

*A Christmas Gift That is Warmly Appreciated*

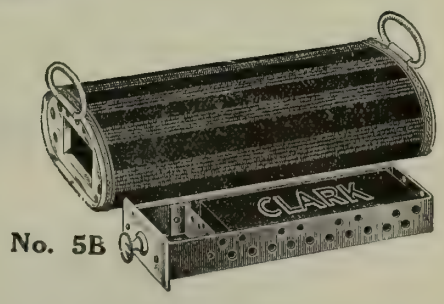
# Steel Heaters

*Here is Your Winter Profit!*



**No. 8 XX The Duchess**

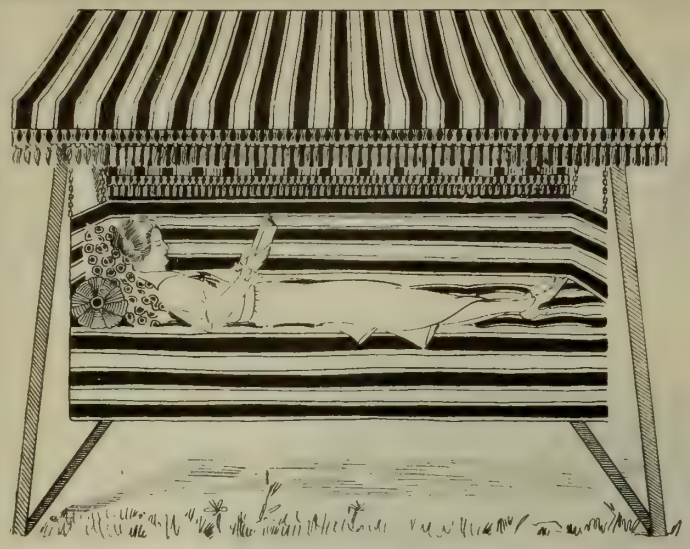
This handsome heater makes winter motoring a delightful, luxurious pastime. The Duchess is a handsome appointment for the most elegant car—covered in rich velvet plush in blue, green or maroon. Outside parts are handsomely finished in quadruple nickel plate. Two fuel drawers for a double fuel charge in severe weather.



**Ideal for Closed Cars**

**No. 8A**

Is a graceful type, 20 in. long. Covered in finest plush carpet, and ends beautifully nickelled. This has two fuel drawers for double fuel charge, if wanted.



**No. 5B**

Is popular for cabs, small cars, milk and rural mail carts, delivery wagons, etc. Oval, 12 in. long.

## Chicago Flexible Shaft Company

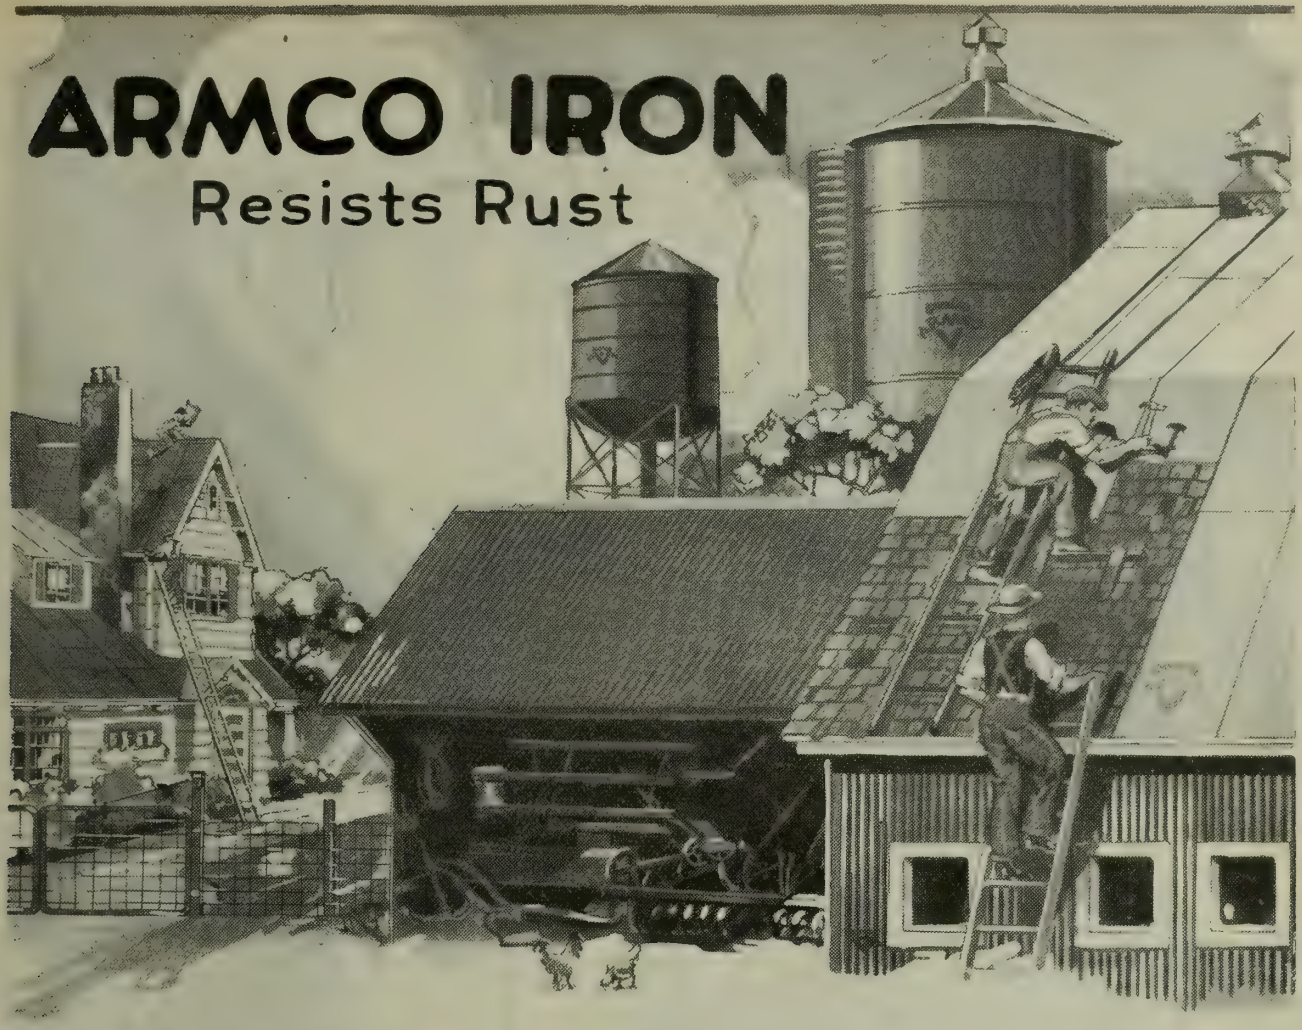
**Roosevelt Road and Central Avenue** **Chicago, Illinois**

# Sales of Galt Hammocks

## *Show 150% Increase over 1918*

The exclusive, pleasing designs in Galt Hammocks make them very attractive to your customers and easy to sell. They fairly breathe suggestions of the luxury, ease and comfort of vacation days.

The Galt Couch Hammock is a popular seller. Let our salesman show you this attractive line and convince you that they sell, and bring good profit, at prices your competitors can't approach.



## Large Profits to Dealers

If you were not in on these last season be prepared for next. The sales have increased 150%, and dealers that handle this profitable line received good profit. Galt Hammocks will pay you.

**Galt, Ontario**

# ARMCO IRON
## Resists Rust

# Build with Armco Iron—Repair with It—
# Use it for all Sheet-Metal purposes on your Farm

If the roof of your barn needs repairing, repair it so that it won't have to be repaired again for many years. *Make it a galvanized Armco Iron Roof.*

Also make the siding of Armco Iron. And all the other metal parts of your barn. And your silos and grain bins. And the fences of your cattle enclosures. And everything that your live stock feed or drink out of.

For Armco Iron resists rust. It is so pure and even that it takes and holds a galvanizing coat better than any other metal. The galvanizing adheres closely and does not crack or peel off, because it is securely fused with the base metal. Armco Iron tanks, litter carriers, and hog-waterers help to make the living conditions of your cattle, horses, and hogs more sanitary.

Armco Iron is also extensively used in the manufacture of rust-resisting wire fence. Made by Page Steel & Wire Co., Pittsburgh, Pa.

Armco (American Ingot) Iron is exceptionally durable, because it is exceptionally pure and even. And because it is exceptionally durable, it is most economical in the long run for every kind of metal farm use. For durability and economy have always gone together, and always will.

Look into the matter of Armco Iron Products for your farm. Do it to-day, using coupon below for the purpose.

## The American Rolling Mill Company
### Box 265, Middletown, Ohio

AMERICAN ARMCO INGOT IRON

*Reg. U.S Pat Off.*

The trade-mark ARMCO carries the assurance that products bearing that mark are manufactured by The American Rolling Mill Company with the skill, intelligence, and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for them. The trade-mark ARMCO is registered in the U.S. Patent Office.

**The American Rolling Mill Co.,**
**Dept. 265 Middletown, Ohio.**

# Eight Reasons Why the VICTOR is America's Most Popular Game Trap

1 THE Oneida Community has long since passed the experimental stage in trap design. With seventy years' experience behind them, these manufacturers possess the "Know How" so necessary to successful game trap design. They have trap manufacturing and animal catching experience—seventy years of it.

2 For years these manufacturers have persistently worked to put game traps on an attractive basis for both jobber and retailer. To-day Victor Traps stand at the head of the list in rapid turnover and consumer satisfaction. And these two factors mean *greater profit* all around.

3 The latest innovation in Victor Traps is the Victor No. 1 Giant—a giant in jaw-height, strength and durability. Unlike ordinary traps of this design, every part of the new Giant is built *in proportion* to the wider jaws. This new trap immediately sets a new standard in trap construction. It possesses all of the regular Victor features plus a heavier chain, improved swivel, faster spring, heavier pan and wider dog.

4 The spring of every Victor Trap has seventy years' experience of scientific spring making built into it. It is the result of nearly three-fourths of a century's research and development conducted in the factories of the oldest game trap manufacturers in the world. Remember—the Victor has passed the experimental stage.

5 Examine the patented "Humped Cross" of the Victor Trap. Note that there are no troughs or partly enclosed spaces to collect drifting dirt, sand or sticks when the trap is set in water. *Freeze-proof*—with nothing to interfere with quick and certain trap action.

6 Examine the pan of the Victor. It is made of thick metal securely riveted so that it cannot come off when attacked by rust at the rivet head.

7 Note that the jaws of all the smaller size Victor Traps are made of specially rolled beveled steel—the greatest trap improvement of recent years. The Victor Trap was equipped with these jaws *years* before other manufacturers embodied this improvement in their traps. Victor *always* leads in improvements.

8 Year in and year out the Oneida Community maintains a corps of professional trappers who trap in every section of the country, and whose recommendations on trap designs are closely followed at the factory. They are "Trappers making traps for trappers"—a distinctive phase in itself and one which is largely responsible for the fact that *trappers insist upon Victors.*

*Get behind the Victor Trap---the standard by which all other traps are compared.*

# *The Value of the Business Press to Business Men*

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

*"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.*

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

*"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."*

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

# Announcing—

WILLIAMS' "Vulcan" Forged-Cutter Tool Holders give unequaled service to those who prefer the solid, forged-type of cutting tool. Each Holder, by the mere insertion of small High Speed Forged-Cutters, is adapted to the heaviest service on Lathe, Planer, etc.

The economy and convenience of this line, when installed as standard shop equipment, is at once apparent, as all blacksmith work, to say nothing of the very considerable investment necessitated by heavy, solid forged-tools of costly High Speed Steel, is eliminated.

Absolutely simple in construction, yet possessing all the advantages of the solid tool without its expense.

Cutters, drop-forged from the finest grade of High Speed Steel, in stock in a great variety of sizes and types, finished and hardened ready for use.

## Are the EASIEST FITTING and STRONGEST Screen Doors Made

The illustration at the right shows three men (weight 496 pounds) swinging on a stock "Kasement" frame, the same door when proven with a square immediately afterwards, showed no signs of sagging. "Kasement" doors are rapidly winning favor with the trade and the public----the people want "Kasements." Get your order in early.

# "ACME" SHEARS AND SCISSORS ARE STANDARD

## For Low-Priced Cutlery

**Canadian Buyers Can Increase Their Shears and Scissors Sales by Adding Our Numbers to Their Stock.**

We are the leading and largest Scissor makers in the world, producing about 35,000 pairs daily.

"ACME" BRANDS, famous for their strength and durability, and with their specially hardened cutting edges, are being maintained to the high standards of quality and finish we have established.

Realizing the importance of prompt service to orders, we are now in a position, on account of improved manufacturing facilities, to give all Canadian orders special service.

Our Canadian representative at Toronto will be pleased to show our samples to you, or have his traveller call on you.

We would esteem it a favor to demonstrate through a trial order the excellent goods we furnish and their fast selling ability.

# Every Horse Owner Needs These Pads

Tapatco Stapling Device for attaching hooks gives a firm hold long after the fabric itself has become weakened by use.

## That's Why the Sales Are Steady and Profitable

Merchants like to handle lines that are in demand—they naturally prefer lines that sell freely all the year through. They have found such a line in Tapatco Horse Collar Pads—and one that never fails to give satisfaction.

By a little extra effort it is possible for a merchant to increase his sales of this profitable line. By telling customers how important it is to provide such a pad for all horses he can convert more people to its steady use. He can easily point out the loss a farmer suffers when horses are laid off because of sore shoulders—he can offer Tapatco Pads as a sure means of avoiding galls, bruises and chafing. An examination of the Pad by the customer usually completes the sale.

Feature Tapatco Pads in this way—and you will find it possible to double your sales of this profitable line.

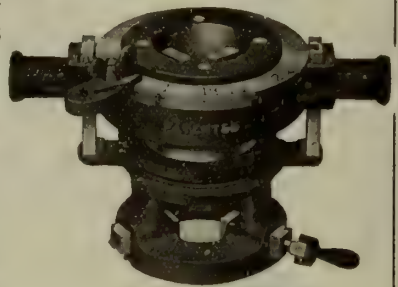
# Constant Sales Increase



6 Beaverette to ¾ inch.

This efficient little die stock has been about 10 years on the market with constantly increasing sales.

The only tool that threads ¼, ⅜, ½ and ¾ without changing dies or bushings. Two sets of dies are operated by one handle.

Beaver 25 and 26 1 to 2" are alike except that 26 has ratchet attachment. They operate on the Beaver receding die principle—the further you thread the easier the labor. A man of ordinary strength can cut a 2-inch thread with one hand. Together these tools cut ¼ to 2-inch pipe without change of dies or bushings.

No. 25 Plain 1 to 2 inch.

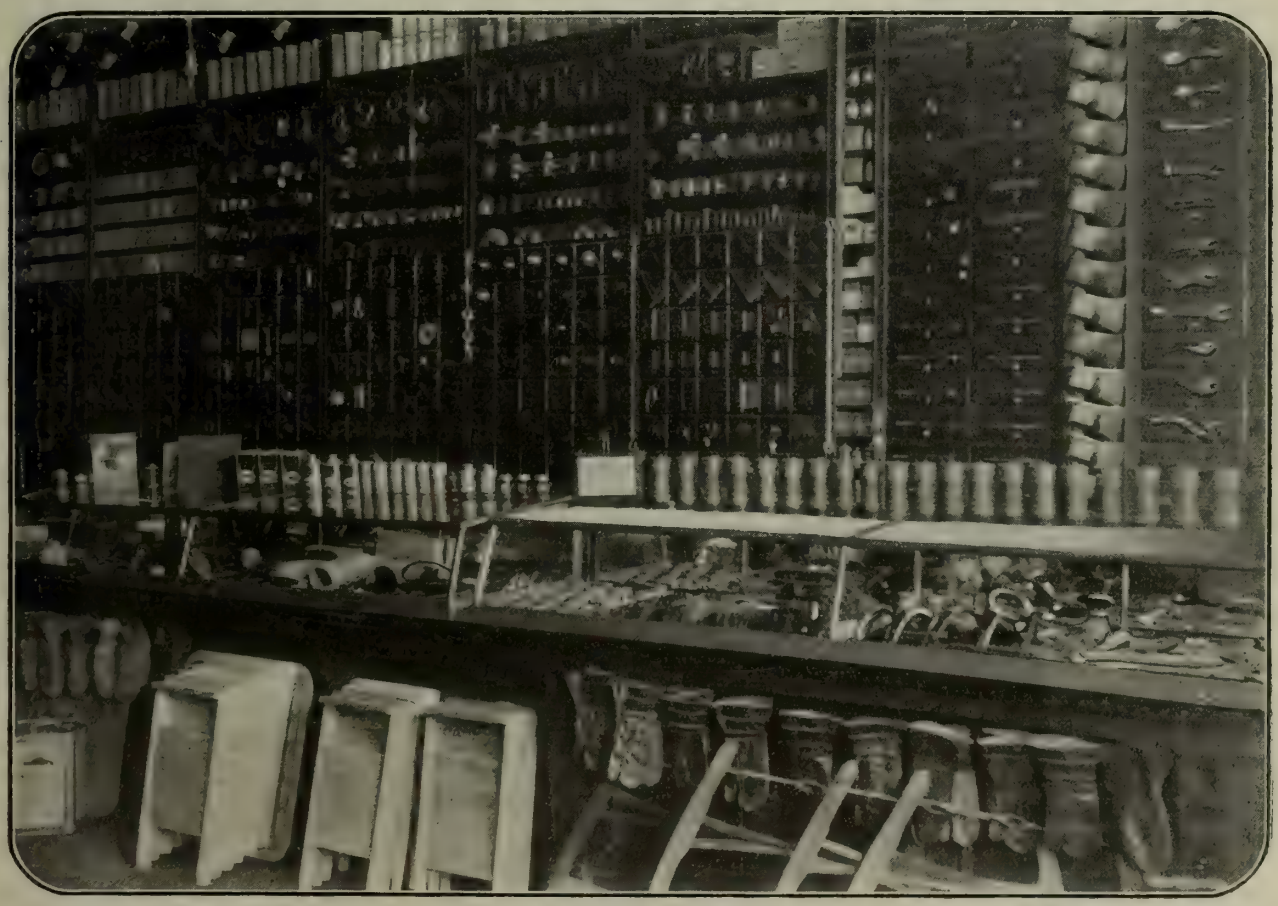
# Gives Auto Accessories Place of Honor

## Keeping Them Right Up at the Front Has Resulted in Rapid Increase in Turnover, Says George A. Hawkins, of Exeter, Ont. — Window Displays Are One of the Best Ads a Merchant Has

Based on an interview by C. E. PARSONS, of Hardware and Metal, with George A. Hawkins, of Exeter, Ont.

AUTO accessories have the place of honor in the hardware store of George A. Hawkins at Exeter, Ont., being located right up at the very front, just inside the door. As may be seen from the accompanying illustration, he keeps two show cases filled with them and he goes after the accessory business further by arranging window displays every few weeks.



"This is the first season that we have been handling accessories on anything like an extensive scale," said Mr. Hawkins to HARDWARE AND METAL. "We started in a very small way as we wanted to make sure before we went ahead. Right from the first we have had a steadily increasing call for accessories, and we are planning to considerably enlarge our present department as we find car owners continually asking for things which we have not yet in stock. We are developing a nice business in accessories, and I am expecting it to develop into one of our best departments."

### Sells Batteries, Too

As will be seen from the illustration, Mr. Hawkins keeps electric batteries out where prospective buyers can see them. This has resulted, he says, in a steadily growing trade.

"We started with only a few," he said, "and now we sell more than a thousand every year, and each season the sales show a larger total."

Mr. Hawkins relies almost entirely upon his store and window displays for

*This show case display of auto accessories right up at the front of the store of George A. Hawkins of Exeter, Ont., is proving the foundation of what Mr. Hawkins says is going to develop into one of the best and most profitable departments in his store. Note also the display of axes, batteries and other goods.*

*This display of tin and graniteware is responsible for the stock being turned over eight times a year Mr. Hawkins says. His stove sales have been excellent and he attributes this in a large measure to his display.*

business, and he says both are producing most satisfactory results.

"Good window displays to my mind are one of the best ads. any merchant has," said Mr. Hawkins. "We try to keep our windows seasonable and attractive. There is no doubt at all about the results they produce in the way of increased sales, and we find that people are keenly interested in them."

**Display Important**

Store displays, he says, is equally important. People like to do their buying in a store where they can look at a quantity of new merchandise. Mr. Hawkins aims to keep something new out before his buying public all the time. The merchandise is frequently changed around and at all times it is kept looking at its best.

As may be seen from the illustration, Mr. Hawkins has attractive and seasonable display of stoves. These are conspicuously arranged where everyone who comes in can see them. They are also arranged with a view of convenience of inspection. Mr. Hawkins says that very often women come in to look over the stoves, and they like to go from one to the other and investigate all the points that each has.

**Want Them Finished**

"The big call," said Mr. Hawkins, "is for a good stove, well and attractively finished. Price is seldom the consideration. Most people realize that they are not buying stoves every day, and a dollar or two is neither here nor there, provided the stove is what they think they want. Women usually bring their husbands in before making a final decision. The women often come in and get all the information they can about the stoves and decide pretty well in their own minds what they are going to buy. They usually, however, like to let the men have a look at the stove before the deal is closed."

Mr. Hawkins frequently takes an old stove in a deal for a new one, and figures on making at least as much, and often more out of it.

**Does Cash Busines**

He does as nearly as possible a cash business, and says he finds the farmers generally are anxious to buy in that way. Exeter is the centre of one of the finest farming districts in Huron county, and the farmers are prosperous and good buyers. The town has a population of 1,600, and Mr. Hawkins says it is a common sight on Saturday evenings, especially through the summer months, for the streets to be so lined with farmers' automobiles that it is practically impossible to get through. Fully fifty per cent. of the farmers in the district own their own cars, and Mr. Hawkins is after their business in auto accessories as well as other lines. He says the telephone is a big producer of business and that orders are frequently received over the 'phone from points many miles out in the country. These 'phone orders are given prompt attention, as Mr. Hawkins says that he finds that buyers appreciate prompt delivery and that it brings them back to the store for their next purchases.

**Turns Over Steadily**

Mr. Hawkins finds graniteware a steady and rapid seller, and says his sales in these lines show a steady growth. He attributes this to the fact that he always carries a complete stock and tries to display it as effectively as possible. The illustration shows the plan he follows for displaying these goods. It might be added that careful attention is given to keeping the stock in good shape, neatly arranged, dusted and so on. Mr. Hawkins says that this pays well, and he attributes to his general policy the fact that the stock turns eight times a year.

This season he added aluminum goods to his stock, and says that it has proven a good seller and has a distinct value from a display standpoint.

**Case of Shaving Goods**

Right in the centre of the store is a little display case that has paid for itself a good many times over. It contains razors, soaps, strops, shaving brushes and hones.

"The plan," said Mr. Hawkins, "is to sell the man who shaves everything he will require. It is working out well. It might be expected that the druggists who frequently cut prices on shaving

# The Christmas Window Contest

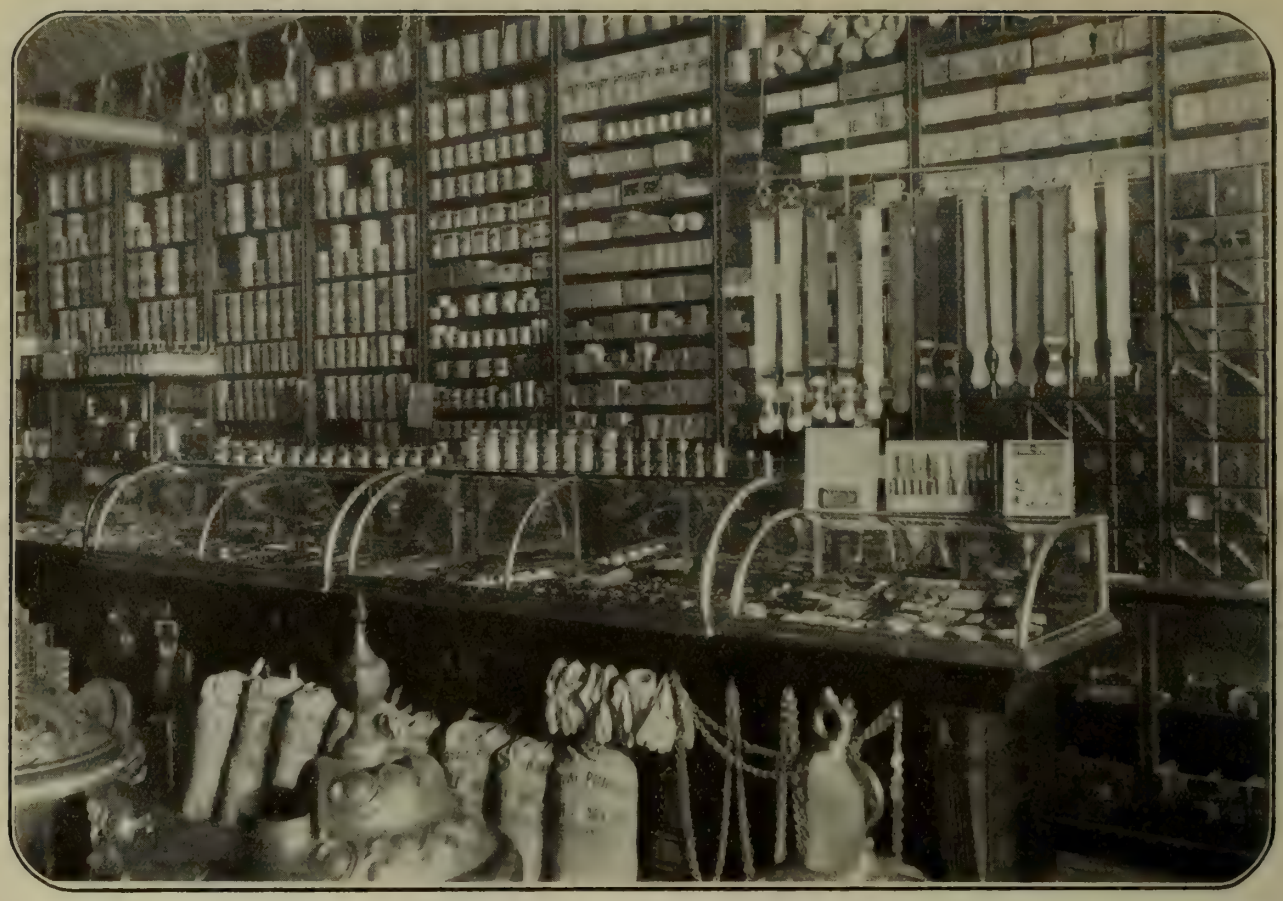
HARDWARE AND METAL will again offer eight prizes for the best Christmas window displays arranged by hardware merchants or their clerks.

The only condition in connection with this contest is that the windows must be dressed with merchandise for the Christmas trade. The contest is wide open and the winners will be those who in the opinion of the judges have put the greatest "pull" into their displays.

A window may look pretty and be absolutely lacking as far as results are concerned. People will simply look at this kind of a window, admire it and pass on. There are other windows, though, that bring them into the store because they carry a real message or buying suggestion. Arrange your window with this idea in view and then send in a photo of it and you have an opportunity of winning an excellent cash prize.

**EIGHT CASH PRIZES**

**Are Offered As Follows:**



| (Places Under 5000) | | (Places of 5000 and Over) | |
|---|---|---|---|
| **First Prize** | **$10.00** | **First Prize** | **$10.00** |
| **Second Prize** | **5.00** | **Second Price** | **5.00** |
| **Third Prize** | **3.00** | **Third Prize** | **3.00** |
| **Fourth Prize** | **2.00** | **Fourth Prize** | **2.00** |

This means an absolutely fair and equal chance for the hardware man in the small town or the big city. The field is wide open to the window dresser with ideas.

The contest closes on Thursday, January 1. Photos received after that date will not be entered unless there is proof that they have been delayed in transit.

All matter must be addressed to "The Editor, HARDWARE AND METAL," 143-153 University Ave., Toronto, and marked "For Christmas Window Contest."

**Get Busy and Win a Cash Prize!**

*The case on the right is fifilled with everything required by the man who shaves and by selling him everything he needs Mr. Hawkins gets a steady repeat business for soap, blades, etc. The displays of bath-room fixtures have greatly increased turnover in these lines.*

soap and cream might get this business, but we do not find it so. Men come in repeatedly for fresh supplies of soap, blades, etc., and we are doing an excellent business as a result of that little display case."

Close by is another case that has proven that it has a real interest for buyers. It contains bathroom fixtures, and by keeping them right out where people can see them Mr. Hawkins says he has greatly increased his turnover in these lines.

**Stock Food Sales**

Another proof of the value of display is found in the sales of stock food. As may be seen from the illustration this line is kept out on the floor in front of the counter where it is readily seen.

"We find the sales show a steady growth," said Mr. Hawkins. "As much as possible we encourage the farmers to whom we sell most of this goods to buy in the larger quantities. Our sales have grown from a small turnover up to more than ten tons a year."

As stated above, Mr. Hawkins works as nearly as possible on a cash basis. He started at first by offering a discount of five per cent. This has since been changed to two per cent., and Mr. Hawkins says the plan is working out most satisfactorily in every way.

Paint sales this year have been among the best Mr. Hawkins has ever experienced. While he handles two lines, he says he really only tries to push one, and finds that he gets the best results in that way. The paint department is located at the side and at the end. Particular care is given to keeping the stock clean and nicely arranged, and at seasonable times Mr. Hawkins sends out literature to prospects all over his territory. He states that women are big buyers of paints and that they seem to be appreciating more than ever before its value in the home. The farmers of the vicinity, he says, are also good buyers of paint and keep their homes, buildings, autos and machinery painted regularly.

**Location Important**

"I believe that location is an important factor in getting business," said Mr. Hawkins. "Before moving to my present location which is as near the centre of the town as it is possible to get, I had a store down at one end. While business was good it was not nearly as good as it is in the new store. I get a great many customers now because they see my window displays and know about my store. I am where everyone who comes into town can see me and I find that it pays well in increased business.

## COMMERCIAL TRAVELLERS' ASSOCIATION OF CANADA NOMINATE REPRESENTATIVE

The general meeting of the Commercial Travellers' Association of Canada was held in St. George's Hall, Toronto, on Saturday last. C. J. Tuthill, president, was in the chair, and in his opening remarks congratulated the members on the continued prosperity of the association, the year closing having been, he said, the most prosperous in its history, notwithstanding that the association had contributed over $75,000 during the five years of war to the various funds called for by the Government and had also invested $400,000 on Victory bonds, making the assets of the permanent reserve over one and a half million dollars invested in gilt-edged securities.

The following nominations were made for the Board of Management for the incoming year:

Toronto Board—C. J. Tuthill, president; Walter Moore, first vice-president; J. H. Dodgson, second vice-president, and E. Fielding, treasurer.

Directors for Toronto Board—C. A. E. Colwell, Jas. G. Cane, John Cormack, John W. Charles, John Curtis, F. W. S. Davis, John Everett, R. G. Hector, M. Matthews, B. E. Miller, C. E. Prime, J. Angus Taylor, Geo. L. Willmot, Geo. G. York and F. J. Zammers.

For the Hamilton Board the following nominations were received of which nine are to be elected: C. C. Smye, first vice-president, and Geo. A. Matheson, second vice-president; directors for Hamilton Board—E. J. Fenwick, David

# Sees Big Business in Accessories

## Greatest Season Yet in Prospect for 1920—If Orders Placed Early Delivery Will be Possible—Unprecedented Conditions May be Anticipated

IF accessory dealers are able to secure what they require to meet the trade needs of 1920 they will be very fortunate. This is a plain fact borne out by the actual conditions surrounding manufacturers to-day.

In an interview with John A. Frazer, sales manager of Lewis Bros., Ltd., Montreal, HARDWARE AND METAL was informed that the outlook is one of great encouragement as far as actual business possibilities are concerned. When it comes to anticipating the procuring of stock, however, the situation commands close and special attention. In fact a condition prevails which has never existed before, and it will be well, indeed, if deliveries are maintained on as favorable a basis as that obtaining to-day, and which is, in many cases, considered far from pleasing or satisfactory.

Mr. Frazer had just returned from Chicago, where he attended the big convention of accessory manufacturers from all parts of the American Union. Here he met managers and presidents of the big manufacturing companies, and was thus able to discern and learn at first hand what conditions obtaining there, are.

### Still Away Behind

"None of the manufacturers of accessories," said Mr. Frazer, "have had time or been able to get a stock of raw material ahead since the armistice was signed. And just as they were beginning to get rid of the heaviest season's business in history, the steel strike came on. The newspapers tell us that some of the mills are running to 60 per cent. of their capacity. This may be true of some very small mills whose output is not a drop in the bucket, but the larger mills are not turning out 20 per cent. of their enormous output. Besides a very heavy European demand for steel of all kinds there is a building boom expanding all over the United States and Canada which makes matters worse. The steel mills have enough orders to last them for more than a year, and their deliveries to the manufacturer, of course, are going to be very, very slow.

### Increases Instead of Declines

"Added to this there are two more factors that must be taken into consideration.

"A great many jobbers anticipated a decline in price and have withheld buying. Now, when they are convinced that there are going to be no reductions in prices, and when they realize, furthermore, that there will be advances, they have jumped in and are buying feverishly. Disregarding the price tendencies, they are fighting for the best delivery that is possible.

"Then there is the matter of the coal strike. This affects the market conditions. If the steel mills are short of coal they cannot turn out the raw material for manufacturers. Providing the manufacturers have no coal, even though they may have steel, they cannot turn out their products."

Altogether, Mr. Frazer stated, that as far as his firm was concerned they were not anticipating the future probabilities of being able to get deliveries. They were placing orders for early shipment and much stock was already being received, while it is possible to procure it. And in conclusion: "A merchant who does not specify his spring requirements with some reputable house on whom he can rely to make delivery of the goods, and to protect him on prices, is very short-sighted."

# Big Problem of Steel Firms is How to Handle Huge Unfilled Tonnage

THE "Iron Trade Review," of Cleveland, has the following comment to make this week regarding the outlook in the trade:

"With the coal strike officially terminated and the steel strike in its last stage of dissolution, the factor of labor unrest has assumed secondary importance from iron and steel manufacturers. The chief problem at this time is how to handle the large tonnage of unfilled orders on which deliveries are past due and to accommodate the insistent demands of consumer for further material. Little progress has been made in reducing deferred obligations which have been piling up by reason of the loss of production during the past seven weeks; in fact specifications are still pouring in upon the producers in a volume that offsets the increasing output. It is clear large tonnages of undelivered 1919 orders must be carried over by the mills into 1920. One independent interest is credited with an order book of 150,000 tons in bars alone.

### Don't Want New Orders

"In view of this condition, producers are almost a unit in declining or discouraging the placing by buyers of new contracts for the first quarter. Nevertheless there is much pressure on the part of consumers largely to obtain an assured place on mill books. Pig iron prices are keeping up their steady advance as the demand exceeds the supply. A level of $32 for Northern foundry iron now is well established in the valleys at Cleveland, Buffalo, and other Northern points. In the East and in Virginia, No. 2X ranges from $33.25 to $35 furnace. Alabama makers are up to $30 for the base grade. Basic iron, which has been lagging behind other grades, has been sold in fair tonnages at from $27.25 to $27.70 valley. In the East, basic has taken an upward spurt of $6 a ton, and about 35,000 tons have been sold at $33 furnace. Smaller sales have been made at $29 furnace. Bessemer has been sold up to $29.50 valley.

### Rail Market Active

"The rail market continues to show much activity as the roads are looking forward to restored private control. At Chicago, Western lines are closing on orders for 1920 delivery totaling 150,000 to 200,000 tons. The New York Central system is about to come out for a large tonnage in the East, where the Erie Railroad is figuring on 20,000 to 30,000 tons, and the Pennsylvania lines east continue to negotiate for 200,000 tons. Belgium has placed 20,000 tons of open-hearth rails with the Steel Corporation for first quarter at a reported $5 advance. Car repairs for domestic roads placed at Chicago call for about 35,000 tons of steel. The Union Tank Car Co. has placed 4,000 tank cars."

### HERE'S A CHANCE FOR BUSINESS

A correspondent writing to HARDWARE AND METAL from Turtleford, Saskatchewan, says:

"There is no proper hardware store in Turtleford, but all the four general stores carry hardware lines and do large and important business. Carloads of wire, nails, and tools of all sorts are sold to dwellers in the far and fertile North, while the wives of farmers and ranchers find always a good assortment of wares to meet their ever-increasing demand. Builders' hardware is demanded quite briskly in this busy and growing town, and especially at times like the present when large and important public buildings are erected. The Canadian Bank of Commerce is erecting a building in Turtleford estimated to cost from $14,000 to $15 000. Galvanized water tanks are one of the hardware items in great demand here as water is hauled to each family from a spring out of town. The well water is alkaline.

Edwards & Rose, Lindsay, Ont.—Will you inform us who manufactures Dish Washers and Driers in Canada?

The above mentioned are not made in Canada. The following are some of the Canadian jobbers: McClary Manufacturing Co., 177 King Street West; The Gurney Foundry Co., Ltd., 500 King St. West; The Wrought Iron Range Co., 149 King St. West (all of Toronto).—Editor.

# Canada's Splendid Achievement

NOT only has Ontario passed her Victory Loan objective by a comfortable margin, but the province bids fair to add a hundred million dollars to the $225,000,000 which was the goal originally set by the committee. On Thursday, Ontario had won her honor flag; the $225,000,000 objective had been safely passed and $232,699,750 subscribed. This amount exceeds by $34,000,000 the amount subscribed up to the same time last year.

During the first three days of the week, Ontario subscribed over $50,000,000, and with a whirlwind finish which usually characterizes the closing days of the campaign the $100,000,000 asked for by the chairman, Mr. G. H. Wood, ought easily to be forthcoming. Ontario's financial strength cannot be more aptly illustrated than by a comparison of her subscriptions with the rest of the Dominion.

**Well Over Half**

Though returns on Thursday were not quite complete from all sections of the Dominion, it was evident that Ontario led the rest of Canada by some $59,015,612. Ontario has subscribed considerably over 50 per cent. of the entire subscriptions in Canada.

That the loan will be another decided success is now an assured fact. It seems a practical certainty that last year's response totalling $610,000,000 will, at least, be equalled.

**Dominion Returns**

On Thursday, the Dominion had subscribed, according to incomplete returns, $406,383,888. Only $200,000,000 more remains to be subscribed, and from the vast reserves of wealth which seem to be stored up in Canada, with an exact appreciation of the needs of the country for this money to discharge her war debts, with due regard for a sound and paying investment, it is pretty safe guessing that another record of financial achievement will be made in this Dominion. Some thirty-two units have reached their combined objective and 276 industrial establishments have won the Prince of Wales Honor Flag.

On the whole, Canada may again congratulate herself that she had done a good three weeks' work. No safer course in financing the great projects of this country could be devised than in borrowing the required amounts from her own people.

# Pointers on Making Profits Out of Seeds

A WESTERN Ontario hardware merchant wrote as follows to HARDWARE AND METAL this week: "Do you know of any firm which handles bulk seeds? This appeals to me as being rather a good line and I should like to know what some of my fellow hardwaremen think of it.

Secretary W. F. Macpherson of the Ontario Retail Hardware Association, to whom the matter was referred, writes as follows:

"I have your enquiry regarding sale of bulk seeds in hardware stores. I may say that I have been in the seed game for many years, as the hardware stores here handle the bulk garden seeds exclusively, as well as the bulk of the field seeds and grains, although the grocers always sell a few bags of clover and timothy.

If there is any line of goods where quality is paramount, it is in the seed business, and great care should also be observed in the matter of quantities purchased, as it does not pay to carry over much surplus stock on account of the loss in germination. These remarks apply more particularly to garden seeds —for instance parsnip seed is of no value the second year—other lines will grow after two, three or more years, but always with a loss in germinating power.

Seed catalogues and Government blue books give a lot of information along these lines. There is a good profit ordinarily in bulk garden seed—if weighed carefully. Certain expensive varieties it does not pay to carry in bulk, as the demand is largely for 10 or 15 cents' worth—so we always sell these lines in package as supplied on commission by the seed houses.

Field seed and grains are always sold on a close margin and should be sold on a spot cash basis to make it pay to handle. The requirements according to locality varies greatly, and advance knowledge should be acquired before placing orders. After a year's experience a dealer should make a success out of these lines in connection with a hardware business on account of being so constantly and closely in touch with gardeners both amateur and market, as well as farmers.

## CHANCE FOR TRADE IN AUSTRALIA

C. Hartlett, acting Trade Commissioner at Melbourne, Australia, advises as follows regarding tenders for material required by the Victorian Government Railway Department, Melbourne.

These tender forms are open to the inspection of interested Canadian manufacturers at the Department of Trade and Commerce, Ottawa (refer file No. 20603)

Tenders in conformity with the specifications are to be addressed to the secretary, Victorian Government Railways, Melbourne, Australia.

Particulars of the requirements are briefly outlined thus: —

No. 32600—Close: Jan. 21, 1920—11,152 gross iron and brass wood screws.

No. 32744—Close: Jan. 21, 1920—30 miles insulated copper wire.

No. 32746—Close: Jan. 14, 1920—5,600 pounds waste wool.

No. 32747—Close: Jan. 7, 1920—6 tons sulphate of copper for electrical purposes.

No. 32751—Close: Jan. 7, 1920—4,000 dozen fog signals.

## NEW AUSTRALIAN TARIFF RESOLUTIONS DEFERRED

Mr. C. Hartlett, Acting Trade Commissioner, Melbourne, writes as follows under date October 7, respecting the prospective tariff resolutions:

Contrary to general expectations, the new Australian tariff resolutions have not yet been presented to Parliament.

The situation at the time of writing is that the Prime Minister has decided to dissolve Parliament and go before the country early in December next, when a referendum will also be taken on the proposals to enlarge the existing powers of the Commonwealth constitution to deal with combines and profiteering, which will be made the principal plank in his platform.

It is therefore understood that action in regard to tariff matters will be deferred until the new Parliament meets early next year, although it is possible that the Prime Minister may decide to table the tariff during the present session.

# Sees Record Stove Trade for 1920

## Building of so Many New Homes Greatly Stimulates Business, Says Sales Manager—Farmers Are Big Buyers of Stoves and Usually Have Plenty of Money to Buy the Very Best

THAT the trade is freer of imported goods than in previous years, and that next year will possibly be perhaps the biggest year in history for the retailer in the sale of stoves, was the opinion expressed by Mr. C. E. Jones, Sales Manager of the Ontario branch of the Gurney Foundry Company of Toronto, to HARDWARE AND METAL. For the present, the Company is not suffering to any extent from the steel strike in the United States. Their stocks of raw material are well up; ultimately, however, if the strike continues, production must be affected. To some extent, they feel the delays in shipping, due to strikes of one kind and another, that go back even as far as the strike of the miner. If the miner does not produce, labor is affected right down to the man who puts the final touches on the high-grade stove.

### Shipments Held Up

"The United States steel strike is affecting us in this way," said Mr. Jones, "We have had cars of steel already to ship, but there they stay. We are alright so long as our material is in stock, but, sooner or later, this must overtake us. I am not sure of the exact figures, but I should judge that only one quarter of the people normally engaged in the production of raw material are now so engaged.

"Perhaps the trade is freer of imported goods than in former years," continued Mr. Jones, "and the Canadian prices, in comparison with the American prices, are better. Possibly, the Americans are feeling the strike in this respect more than we are; but, from our standpoint, this condition is encouraging and healthy and almost corrects the exchange which is now much more reasonable than it was some time ago."

### Building Helps Trade

Looking to the future from the standpoint of the retailer, as well as from their own standpoint, Mr. Jones predicted that new year would, possibly, be the best in their history.

"The building operations are already giving every indication of big trade, and already the sales show the result of these building operations," said Mr. Jones. "During the past year, speculative building in many towns and cities throughout the province was quiet; but there were abundant indications that there would be a distinct revival of this during the coming year in many towns in Ontario.

Mr. Jones could not say that the steel strike across the border was having any tendency, so far as he was able to judge, to promote the sale of gas or wood stoves at the expense of the coal stoves. In all lines, there was a natural increase in sales.

### Three Classes of Buyers

According to the Sales Manager, the farmer is still a little unappreciative of high prices and the higher cost of production, so far as stoves are concerned. There were, he said, three distinct classes of buyers amongst the farmers. First, there was the well-to-do farmer, who would have the best of everything, be it an automobile or a stove. Second, there was the medium class which made a happy compromise with his pocketbook and his comfort; and third, there was the labor class amongst the farmers which did not seem able to buy the best stoves shown on the market, nor had the inclination to do so.

For the present, business is good, says Mr. Jones. The weather is somewhat unfavorable to the trade, but with colder weather within a month or so, he believed that it would re-act to the advantage of the retailer.

*Everyone just now is interested in the problem of keeping warm through the winter and splendid sales of stoves are being made. Keep your stock out where the people can see it and keep it looking nice. Show cards will help emphasize various points that will be of interest to prospective buyers.*

# Judge Cuts Profit to 30 Per Cent. and Frowns on Monopoly

AN interesting decision was given at Sorel, Quebec, by Mr. Justice Bruneau, in a case involving alleged excessive charges for electrical installation. In his judgment rendered in the Superior Court he severely criticized a commercial coalition which he said had evidently been formed by certain tradesmen for the purpose of raising prices unreasonably, and in a manner opposed to the public good. In the instance decided one hundred per cent. profit was admittedly charged alike for goods supplied and work executed. The court cut down the profit to thirty per cent.

### No Price Agreed Upon

Napoleon Latraverse engaged J. Octavien Peloquin to make certain electric lighting installations in his hotel. No price was agreed upon, and when the work was concluded Peloquin sent in a bill for $325.82. Latraverse considered the charge was exaggerated and he engaged three qualified men to make an estimate of a fair value of the work. They concluded that $185.08 would be reasonable payment and Latraverse thereupon offered to pay Peloquin $200 in full settlement of his account. The offer was refused and Peloquin took action in the Superior Court to recover $325.82 from Latraverse.

### Examines Account

Mr. Justice Bruneau, in deciding the issue, made a detailed examination of the account, which was made up of a charge of $209.52 for materials supplied and $116.30 for labor. Defendant, His Lordship said, admitted that these sums included profits of one hundred per cent. under both heads, and the evidence revealed that the time charged for was exaggerated as well as the price. The work was executed in 1918, during which year the Judge said plaintiff had done business amounting to $20,000.

### Unfair Monopoly

The price he had charged in this instance was, according to the proof, the current rate at Sorel, which, it was said, had been fixed according to a convention between three electrical contractors in Sorel. This convention, Justice Bruneau said, constituted a monopoly. It was an act which annulled all competition, increased the price of certain things and enabled the parties to the agreement to enrich themselves at the expense of the public. While merchants were allowed to organize for the protection of their common interests, it was conditionally upon the public interests not being unjustly affected by unreasonable profits.

### Contrary to Liberty

"An understanding such as that which intervened between the plaintiff and the other electrical contractors of Sorel," said Justice Bruneau, "is contrary to liberty of commerce, work and industry, as tending to give them prices higher than what free competition would give."

The court could not be held to follow the understanding in deciding the present case and the Judge said, it was in vain that plaintiff urged that the prices as charged were the same that had been up to the present time accepted and paid by the public of Sorel.

### Allows 30 Per Cent.

In the circumstances established by the evidence, the Judge said that plaintiff ought to have been satisfied with the offer of $200 which defendant made to him in full payment for the work done and materials supplied. Judge Bruneau concluded by placing the value of the plaintiff's work at $152.01, to which the court would add thirty per cent., which the Judge considered was a fair profit. This made a total of $197.61, and at thirty per cent. profit would give the plaintiff an income of $6,000 for the work he had done in 1918.

The court held that defendant's offer offer of $200 was fair and reasonable, and judgment was given accordingly, with costs against plaintiff.

# Few Cases of Hardship so Far Reported Among Canadian Manufacturers

## Most Firms Have Enough Coal to Carry on With for Some Weeks—Rationing Systems Will Probably be Adopted if it is Found Necessary

THE immediate return of 425,000 bituminous coal strikers to work, following the Federal order of Judge Anderson that stringent measures would be applied to enforce the mandate of the Supreme Court, may not immediately overcome the shortage of coal that has resulted from this walk-out of the nation's miners. Some weeks, even months, may elapse before the effects of this tremendous strike may tackle down to the coal bin of the small manufacturer in Canada. The loss to the world's supply of coal cannot be made up for some time, if, indeed, it is ever made up, unless the same passion for production seize hold upon men and women who to-day see an impossible Utopia in short days and weeks of work bringing about better wages and lower cost of living.

So far as the Canadian manufacturer is concerned, there are very few cases of hardship resulting from the strike, according to H. B. Brown, assistant manager of the Transportation Branch of the C.M.A. Inquiries at his office elicited the information that there had been fewer than a half a dozen requests for information from any manufacturers in the country regarding the coal shortage and how they might secure the quantities which were either immediately or in the future, needful.

Mr. Brown stated that he did not believe that any of these manufacturers were hard pressed for coal at the present time, but that they were looking to the future in the event of the strike continuing for an indefinite period. So far as he could judge from the close touch in which he endeavors to keep with the Canadian manufacturers, Mr. Brown felt that most of them were well supplied for four or five months. He could not tell, however, whether some of them were applying directly to the fuel administrator, either in Toronto or Ottawa, in which case he might not hear of any difficulties with which they were being faced in regard to coal supply.

### Sending Out Circular

This branch of the Manufacturers' Association is about to send out a circular letter to Canadian manufacturers informing them what steps are necessary for them to take to ward off actual hardship, should it overtake them. In this circular, attention is called to the action that has been taken by the Government of the United States in seizing all coal supplies on wheels and providing for the distribution of it according to a priority list. In this priority list, railways come first. Then follows public utilities, in which are included hotels, hospitals, etc. Food manufacturers are third on the list, and newspapers and manufacturers of newsprint come last on the list.

It is necessary for the manufacturer who is in immediate need of coal to show why he needs it, what supplies he has on hand and what his immediate requirements are. If the coal administrator, either at Toronto or Ottawa, after receiving this information, is satisfied that he should have some coal, some coal he will probably get: at least, every effort will be made to get it to him.

---

The M. & S. Company, Limited, capital $50,000, head office Montreal, plans to manufacture and deal in tools, automobiles, electrical equipment and iron and steel equipment generally.

Union Petroleum Company, Limited, head office Toronto, capital $40,000, plans to manufacture and deal in oils, paints, varnishes and lubricants.

The Canadian Rockland Tire and Rubber Corporation, Limited, head office Toronto, capital $300,000, plans to manufacture and deal in rubber products.

Pathe Freres Phonograph Sales Co., Limited, capital $40,000, head office Toronto, plans to deal in phonographs and musical instruments.

# Says Board of Commerce Efforts Unsettle the Public and Disturb Business

THAT the efforts of the Board of Commerce to find a solution of the high cost of living are not only failing of their purpose, but are unsettling the public mind and disturbing the manufacturing and industrial world, is the opinion of Mr. Henry Watters, treasurer of the Dominion Board of the Retail Merchants' Association of Canada. In an issued statement, Mr. Watters strongly resents any imputation that retail merchants are "profiteering"; and as a proof of it he calls attention to the fact that competition amongst the retailers is so keen that big profits are impossible, and that a survey of Canadian retailers will show that exceedingly few of them belong to the millionaire class.

Not only is the board failing to obtain the desired result, says Mr. Watters, but "we are further of the opinion that instead of ascertaining the real cause of the increased cost of living, the agitation has unsettled the public mind and disturbed the manufacturing, as well as the producing and distributing industries."

The treasurer follows with some ten suggestions to the board, which, in brief, are as follows:

First, that consideration should first be given to basic principles of manufacture, production and distribution and costs involved in same.

Second, that increase in profits, if any, may be ascertained.

Third, increase in wages, freight and other charges.

Fourth, foreign demand for articles.

Fifth, effect of war profits and income war tax on cost of raw material and manufactured articles.

Sixth, increase in orders and profits by jobbers and wholesalers, on what lines, and bearing in mind increased cost of production.

**Necessary Overhead**

Seventh, necessary overhead charges to properly conduct retail trade.

Eighth, submission to the board of all forms of contract fixing prices by manufacturer to wholesale, retail and buying public.

Ninth, that yearly turnover of every class of merchandise should be the basis of computation of financial returns, not an investigation into one special article.

Tenth, that all possible assistance will be given by the association to the board in their investigation.

Added to this is a statement by Mr. E. M. Trowern, secretary of the Dominion Executive of the Retail Merchants, in which he states that the retailers no longer want to be branded as thieves and scoundrels. He contended that there was no use in continuing to fool the public with regard to the high cost of living; prices would only come down in the natural order. Ninety per cent. of the people, he held, do not know what they were talking about when they ask for arbitrary reduction of prices.

## TO SUPPLY QUEBEC FARMERS WITH TRACTORS

Quebec.—Following the example of Ontario and the Western Provinces, Quebec is to make an extensive use of tractors on the farms, first to make up for the scarcity of horses and the high cost of feed for them, and second, to enable the culture of a wider acreage. The Department of Agriculture of the Province of Quebec has just closed an agreement with an American manufacturing corporation for a number of tractors, to be sold to the farmers at cost price.

The department for the past few months has been engaged in experimenting with a number of tractors, and has closed a deal for a particular tractor which has proved to be efficient in all the requirements necessary for the Quebec farmers. It is said that the Government may also supply oil for the tractors, so as to reduce to a minimum the cost of this new innovation to the farmer.

A number of experts will be engaged to give the farmers advice as to the care and use of their tractors, while schools of instruction for imparting similar information will be conducted throughout the province.

*Keeping merchandise out where people can see it all the time is one of the surest ways of increasing sales. From now on any number of people will be on the lookout for articles suitable for Christmas presents and displays like that shown in the illustration will help them in making their selection.*

# EDITORIAL COMMENT

## *EDITORIAL BRIEFS*

GET busy now and win a cash prize in HARDWARE AND METAL'S Christmas window display contest.

* * *

EVERY man who is selling goods needs three kinds of faith—first, faith in himself; second, faith in his store, and third, faith in the product he is selling.

* * *

DON'T underestimate the importance of customers because you see so many of them all day long. Remember, every dollar you get comes from the great shopping public.

## *WILL MEAN PROSPERITY*

THE outstanding event of the week in the financial world has been the arrival of the long-expected time when a policy of contraction and anti-inflation could be inaugurated. What has happened is a result of the action of the Federal Reserve Board of the United States in raising rates of rediscount and of the Bank of England in advancing its rates. The policy thus inaugurated will be followed by other countries because England and the United States are the only two nations in the world to-day in a position to control financial conditions, and especially the rates of return for money. The fact that they are in this position makes the policy they have decided upon of world-wide significance no matter what any other nations may do. During the years of the war and the year that has elapsed since the signing of the Armistice tremendous inflation has occurred throughout the world. Much of this resulted from the activity caused by providing the Governments with what they needed. It was usually a question of getting what was needed and getting it quickly regardless of the price. This produced conditions such as merchants have never before experienced. There is little doubt that the action just taken will mean a new era, and the broad significance of the change portends more or less contraction of credit and hence of purchasing power. The contraction or limitation of prices of commodities necessarily follows. Business has been good but there is little doubt that it will be better because any number of people have been holding off buying except for immediate needs because they felt that sooner or later the conditions that have been prevailing would be checked. The time has arrived and to say that it will be welcomed by business men is to state a fact.

## *EXPECT RECORD DEVELOPMENT*

THOSE who are in close touch with the situation are predicting that 1920 will see the greatest demand for autos and auto equipment that has ever been known. The only limit to production seems to be possible delays in securing materials, and labor troubles. So great is the business in sight that the manufacturers are spending more than $50,000,000 in new plants and machinery and are placing huge orders for materials. So much for automobiles. In addition there is the tractor business. This is one of the huskiest babies in the commercial world to-day. It gives promise in a very short time of ranking with the automobile because it is making good and filling a real want. Many hardware merchants are selling both autos and tractors. Many others are selling auto accessories and are keeping an eye on the tractor purchases in their districts with a view to supplying the needs of the owners. Every new automobile that is sold and every new tractor that goes out means the sale of accessories and supplies. The auto business has grown to be something enormous, and it is still growing. The tractor trade is developing with almost mushroom-like rapidity. Both offer splendid chances to the hardware merchant for profitable business.

## *MERCHANTS HELPING THEMSELVES*

NO less than 1,600 local tribunals have been established in England with a view of investigating all cases of alleged profiteering. W. McCurdy, M.P., secretary of the Central Committee, recently made some interesting comments on the general situation. "One of the causes of profiteering," he said, "is the fact that the public seems to have lost all sense of what is a reasonable price. To meet this situation, which is really, perhaps, one of the most important phases of the work, the Investigation of Prices Committee is giving the people general information so as to enable them to know what are fair prices. This will help not only the people but the retailers, and I am glad to be able to say that in several of the most important retail trades there is now a movement to assist the Government in every possible way by organizing plans under which the trades themselves will take steps to reduce

prices to the public and eliminate all profiteering. The grocers, for instance, are planning to draw up price lists for all articles which are uncontrolled and they expect to be able to make substantial reductions."

### *BUSINESS MEN FIGHT BOLSHEVISM*

IT is gratifying to know that the business men of the United States have as a body joined in the fight to rid the country of Bolshevism. Quick, decisive action which resulted in the arrest of several hundred of the most active Reds was one of the first results of the business men's co-operation with the authorities. It is only a matter of a short time when a great many of those who were placed behind the bars will be deported. This work of cleaning up the country is one in which Canada is vitally interested and has also done good work, as the collapse of the Winnipeg walkout shows. It sometimes takes a long time to get the business men away from their stores or factories long enough to act, but once they are aroused to the seriousness of a condition they are usually not long in remedying it. With the clean-up in progress across the line it is likely that the end is in sight of the unprecedented strikes and troubles that have been occurring, and the sooner these things are settled the sooner business will go

### *HITTING ON ALL SIX CYLINDERS*

DID you ever, on a warm July day, notice a perspiring individual with a monkey wrench, his head buried under the cowl of his car, tinkering with his spark plugs?

Have you ever ridden in a car that hacked and coughed its course along the roadway, to die, of course, in the most difficult situation?

If you have, you will realize the need of having all the cylinders working. You may pull along for a while in a coughing, one-lunged kind of business, just as you can with a one-lunged car, but sooner or later both are going to die. Get your business hitting on all six cylinders, sound credits, courteous service, efficient administration, effective window displays, prompt deliveries, and pulling advertising.

Keep the old business humming on all six cylinders during the coming season.

### *THE RETAILER AS AN ADVERTISING FACTOR*

SOMEBODY has said that "the world is full of people who want things, and things who want people," and the only trouble is that half the world does not know their own wants or how best to supply them. It is here that the merchant comes in. If people knew exactly what they wanted they could just as well get it from some impersonal sort of bureau; that they don't is the argument and the opportunity for the retail merchant. He is there to tell people of things that they would need if they knew about them. He is there to show them new possibilities of old and well-known things. He is there to show them why this thing is better than that, and to encourage sales by a well-founded appreciation of the product. That is advertising, of course, and the retail merchant is the finest advertising medium in the world, because he has the friendship and respect of his customers, and, therefore, his selling arguments are free from the subtle antagonism with which men approach almost any argument destined to sell them something.

### *A CREED WORTH KEEPING*

DISPLAYED in many parts of the great Marshall Field store, and used as an integral part of much of the printed matter that goes out to prospective customers, there appears the following creed:

> "To do the right thing, at the right time, in the right way; to do some things better than they were ever done before; to eliminate errors; to know both sides of the question; to be courteous; to be an example; to love work; to anticipate requirements; to develop resources; to recognize no impediments; to master circumstances; to act from reason rather than from rule; to be satisfied with nothing short of perfection."

It isn't an easy creed to live up to, few things that bring large results are easy, and no one would doubt the results that would follow the honest adoption of such a policy.

### *LOOKING FROM THE OUTSIDE IN*

HAVE you ever made it a practice to try and get the viewpoint of the fellow who looks from the other side of your store window Sitting there behind your counter it may look neat enough to you in the half-light. You may overlook the odds and ends that clutter up the floor, the disarranged shelf displays, the untidy store arrangement, the slipshod window, and the almost paintless window frame. It's all familiar ground to you. You know that your goods are of the best and that business is good. That is all quite plain from where you sit, but what of the fellow on the other side of the glass? What will he think? Will be not probably go to a poorer store, though better kept, farther along the street?

There may not be much in this idea, and then again there may. But anyway, it would be worth while to take an afternoon off and go and have a look at the other fellow's store, and then come back and have a glimpse at your own from the unfamiliar ground outside the glass.

# EVENTS IN THE TRADE

## Business Changes

Abbey, Saskatchewan — Cuthbertson and Thompson, hardware, are succeeded by Frank Newby.

Grimbsy, Ont.—Baldwin and Moxley have purchased the hardware business of Theal Bros.

G. Stirrett & Son. hardware, Toronto, is succeeded by M. Z. Stirrett, under the old style.

## New Firms

Bedard Freres, hardware, has been registered at Montreal by J. Edmond Bedard and Andre J. Bedard.

The Barry Supply Co., Ltd., hardware agencies, St. John, N.B., has been granted letters patent.

## Obituary

The death occurred at Pembroke, Ont., of Walter Beatty, sash and door manufacturer.

## Personals

Paul Kelpin has joined the selling staff of H. L. Perry Co., Ltd., Winnipeg, and will cover Manitoba.

## Trade Notes

The Automatic Door Step Co. has been registered at Toronto.

Pratt Steel Ltd., St. John, N.B., has been granted letters patent.

J. C. Feeley has opened a tin shop at 54 Winnett Street, Brantford, Ont.

The Sterns Tire and Tube Co., of Canada, Ltd., Toronto, has assigned.

T. C. Gaudry & Co., dealers in paints, etc., has been registered at Quebec, Que.

D. H. Lancaster (Royal Rousillon Ltd., Macamic, Que.), has obtained a charter and plans to manufacture sash and doors.

The Warner-Patterson, Perry Company has been organized at Chicago to take over the interests of the Warner-Patterson Company, manufacturers of shaving brushes.

The Canadian General Electric Co., of Toronto, has purchased the factory at Stratford, Ont., formerly occupied by the Mooney Biscuit Co., and will equip it as a branch plant.

A. J. Slatter, formerly of Toronto, has taken over the tinsmithing department of the Uxbridge Hardware Co., Limited, which recently purchased the entire business of the Jones Hardware Co.

J. C. Wanless & Co., hardware and plumbing, Chatham, Ont., contemplate erecting a new store, three storeys and basement, 26x140, in the spring.

The by-law which was referred to in a previous issue of HARDWARE AND METAL regarding the Firestone Tire & Rubber Co. locating their Canadian branch plant at Hamilton, Ont., was carried by the ratepayers. Work on new buildings will be commenced at once and it is expected that 3,000 to 4,000 hands will be employed. This industry has brought another and the Jenckes Spinning Co. of Pawtucket, R.I., will locate a plant to employ 1,000 men.

Work is just starting at Brantford, Ont., on a new factory to cost $135,000 for the Robbins & Myers Motor Co.

## Montreal News

W. T. Yendall, of the Richards-Wilcox Canadian Co., London, was in Montreal this week.

S. Jarvis, of Abel-Morall, Limited, London, E.C., Eng., was a Montreal visitor.

James Kinsman, of North Bros. Mfg. Co., Ltd., Philadelphia, was in Montreal this week.

H. S. Radford, of the Toronto Lock Mfg. Co., Ltd., called on the Montreal trade.

Mr. Smart, of the Smart-Turner Machine Co., Ltd., Hamilton, was a visitor to Montreal this week.

Walter H. Cottingham, president of the Sherwin-Williams Company of Canada, Ltd., was in Montreal this week.

W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Ltd., spent part of this week at the Winnipeg office.

L. P. M. Dechene has accepted a position on the travelling staff of the Canada Paint Company and will cover the Lake St. John and Chicoutimi districts.

R. F. Daly, of the Manufacturing Department of the Martin-Senour Company returned from a visit to Toronto.

R. M. Watson, manager of the Dominion Cartridge Company, Montreal, met with an unfortunate accident. While assisting with a patriotic entertainment in Westmount, Mr. Watson had the misfortune to have his left hand pierced with a "22" calibre cartridge. The wound is healing nicely.

Wm. H. Donnelly, of the J. T. Slocomb Co., machinists' tools, Providence, R.I., was in Montreal this week.

H. B. Place, sales manager of the Oswego Tool Co., Oswego, N.Y., called last week on their Montreal representatives, Richardson and Bureau.

C. F. Kendall, paint and color works manager of McArthur, Irwin, Ltd., has been spending a week or two in the Maritime Provinces.

The annual convention of the sales force of A. Ramsay & Son, Co., is being held this week at the Windsor Hotel. A

## Incorporations

The Hoover Suction Sweeper Company of Canada, Limited, capital $1,000,000, head office Hamilton, Ont., plans to manufacture and deal in suction sweepers.

Dominion Gas Saver, Limited, head office Sherbrooke, Quebec, capital $40,000, plans to manufacture and deal in gas stove equipment.

Porrits & Spencer (Canada) Limited, capital $1,000,000, head office Hamilton, Ont., plans to manufacture and deal in flax, hemp and jute products.

## Expects Little Change In Prices of Stoves

Discussing with HARDWARE AND METAL the outlook in the stove trade, Col. W. M. Gartshore, of the McClary Mfg., Co., London, Ont., stated that business has been excellent, especially in the West. Unless there are developments due to scarcity of raw matrials or labor disturbances, he does not look for any change in prices.

The McClary Mfg. Co. will commence the erection of a $100,000 addition to its foundry in the course of a few days. Work is now in progress on a five-storey warehouse that will cost $50,000.

Col. Gartshore states that there has been a good demand for merchandise for export, but the firm has not been able to fill anything like what is looked for because all home demands are being met first. He is looking for splendid business in 1920.

### A CORRECTION

In the report of the death of Solon L. Doolittle, which appeared in a previous issue of HARDWARE AND METAL, an error occurred in stating that he was proprietor of the St. Marys Wood Specialty Co. This is a limited company, which, for the past ten years has been financed and managed by N. M. Currie, who will carry on the business in the future as in the past. The only change which took place was the appointment of a new director on the board.

### ACCESSORIES DEALERS ORGANIZE

Organization meetings of the Ontario Retail Merchants in auto and garage accessories have recently been held in many towns and cities of the province. Branches have been formed in London, St. Thomas, Woodstock, Ingersoll, Norwich, Lambeth, Dorchester, East Middlesex, Chatham, Wallaceburg and Strathroy. It is the hope of the Ontario Branch of the Dominion Retail Merchants' Association to have the entire province organized by the end of the year.

It has been decided by the Fort William and Prince Arthur Twin Cities Association to affiliate as a branch of the Ontario Dealers at their next meeting.

### CURLERS ELECT OFFICERS

The Inter Department Curling League of Wood-Vallance, Ltd., Winnipeg, is away to a good start. The following officers have been elected for the ensuing year: Hon. president, Major J. C. Gillespie; president, Gordon Hoskins; vice-president, F. W. McGuire; sec.-treas., J. H. Waugh; executive committee: R. W. Humphrey, James Wardrope, Dave Miller. J. Morrison. Twelve rinks are entered in the competition.

Some day W.-V.'s bowling team are going to win three in a row. At least Manager Bill Madill says so.

### GALT, ONT., TO HAVE WEEKLY HALF-HOLIDAY EXCEPT IN DECEMBER

By an almost unanimous vote Galt Retail Merchants' Association granted the petition for a weekly half holiday on Wednesday afternoon during 11 months of the year. In the past clerks have enjoyed a half-holiday only during the three summer months, but recently an agitation was started to have the holiday continued in all months but December. By the decision of the Merchants' Association stores will close every Wednesday, commencing in January, at 12.30 p.m.

### ARTHUR BALFOUR VISITS TORONTO

Arthur Balfour, one of the world's greatest manufacturers of tool steel, was in Toronto this week, looking after the interests of the Canadian branch, which is located here. Mr. Balfour started in the steel business in Sheffield when only 14 years of age. Four years later he came to America and got a job with the New York Car Wheel Works at Buffalo. At the age of 21 years he was manager of the plant, but two years later he had been made manager of the Arthur Balfour, Ltd., of Sheffield, one of the largest steel manufacturing industries in the world.

Mr. Balfour has served on several Royal Commissions appointed by the British Government, the most recent one being on that of Mr. Justice Sankey's Coal Commission, appointed to investigate profits in connection with that industry.

# Jobber Flatly Refuses to Have Anything to do With German-Made Goods

THE following letters show the attitude of at least one hardware firm in regard to German goods. This letter was received a few days ago by a Toronto firm:

Gentlemen:—

We have many inquiries for such German goods as we handled previous to the war.

It is our desire to help our friends to get as many goods as possible and as quickly as possible, and to treat all alike. To do this, we must ask your kind co-operation and assistance. You will understand that we have not sufficient travelers, nor samples, to see all our friends within a short time.

We have ordered staple articles in accordance with former sales and statistics—no similar goods are made in Canada.

There are no stocks ready at the factories and goods will have to be made. The German market is short of raw materials and others are rare and high priced.

Prices will be considerably above the pre-war figures, but still the goods will be good value.

Should you be interested, we would be pleased if you would go over our invoices, etc., of 1913 and 1914 and favor us with specifications of whatever lines you require.

Thanking you in advance, we remain,

Yours truly,

**The Reply**

The Toronto firm's reply was as follows:

Gentlemen:—

We have your circular letter, and, while it is our desire that our reply should be courteous, we nave no wish that you should misunderstand our feelings in regard to putting German-made goods in our stock again.

We may also say that we are both astonished and grieved to learn that you are having many inquiries for such German goods as you handled previous to the war. This certainly has not been our experience, nor is it our intention in any way to help our customers to forget the terrible world tragedy and the brutal, murderous manner in which Germany carried it out, by offering for sale to them goods made in the country and by the people who did everything in their power to force, by war, their opinion on the entire world.

The time may come when we will feel differently on the subject of handling German-made goods, and if it does, we know of no other source of supply we would sooner look for than yourselves.

One thing you may rest assured of is that neither yourselves nor any other representative of German-made goods will ever have to thank us for assisting in any way to break down the feeling of disgust towards anything coming out of Germany. Yours truly,

# Tire Dealers Ask That Goods be Marketed Only Through Legitimate Channels

## Toronto Men Want Manufacturers to Refrain From Selling Tires to Commercial Accounts—Would Also Market Seconds as Such

A MEETING of the manufacturers of and dealers in automobile tires was held in Toronto on Wednesday at which important matters to the manufacturers and dealers as well as the purchasers were discussed.

Several requests were made by the dealers of the manufacturers. They were asked to eliminate all 5 and 10 car contracts; to market their goods only through the legitimate dealers; to refrain from selling tires to commercial accounts, that is, to a drug merchant, who, because he handles rubber goods, might get tires for himself or a friend, or, to a shoe merchant, or any other similar commercial account where a lower price might be secured than that which the dealer gets; to have all seconds marketed as such, so that they cannot enter into competition with firsts; to have the closest scrutiny over equipment contracts and to prevent sales direct to the consumer.

The manufacturers expressed themselves as willing to entertain these requests of the dealers, but stated that they would have to refer the matter to the Tire Manufacturers' committee for their report. This report, it is expected, will be forthcoming at an early date, and the matters thus under dispute finally and satisfactorily settled.

### TO COVER EASTERN TOWNSHIPS

L. P. Beaulne, who, for the past six years, has represented the Sheet Metal Products Company in the Eastern Townships of Quebec, has joined the sales staff of Brandram-Henderson, Limited, and will cover the same territory.

The Frontier Oil and Gas, Limited, capital $300,000, head office Fort Erie, Ont., plan to prospect for and deal in petroleum and petroleum products.

# Commerce Board Hears Charges Re Alleged Combine for Tungsten Wire Used in Making Electric Lights

THE Board of Commerce in session at Ottawa has commenced an investigation into charges that a combination exists in Canada in connection with the sale of tungsten wire. At the present time the hearing stands adjourned pending the appearance before the Board of Senator Nicholls.

When the probe started, A. W. Anglin, representing the Canadian Laco-Phillips Company of Montreal, alleged that the Canadian General Electric Company was one of a combination of companies operating in many countries; that when a patent was secured in one country the patent rights for the territory in which they were operating were handed to each of the companies in the district, understanding that the several territories would not be invaded by any of the other concerns; and that in this way competition was prevented in Canada to the detriment of the general public, and asked the Board of Commerce to have the Canadian General Electric Company declared a combine, to have Senator F. Nicholls, of the General Electric, produce documents refering to the obtaining of patent rights on drawn tungsten wire in 1892-3.

### Objects Strongly

I. F. Hellmuth, K.C., for the Canadian General Electric, strenuously objected. He contended there was nothing illegal in the American General Electric containing the patent rights in America and the Canadian General Electric obtaining the Canadian patent rights. Naturally in the circumstances, he said, they would agree not to invade each other's territory.

The board ruled against Mr. Anglin, but agreed that it was only fair that Senator Nicholls should be called. The hearing was adjourned until such time as Senator Nicholls will be able to be present.

### Effect Monopolies

Mr. Anglin, in reply to a question by Judge Robson regarding the relevancy of the documents in question, stated that in many lines an endeavor had been made to effect—and in some cases there had been effected—monopolies in Canada. His suggestion was that this agreement would go to show, not a combination limited to Canada, but a much wider and more objectionable thing—a combine extended over many countries. If there was a combine such as he suggested, he held he was within his rights in asking that the documents be produced. He referred to a case which had been tried in the United States against the American General Electric Company, when one of the things charged was similar to that which he was bringing before the board.

### Says Case Different

Mr. Hellmuth considered the American case very different, and had no application. Suppose, he instanced, a man got out a patent in France, he would sell the rights to a man in America, to one in Germany, and he will make sure that these men do not sell out of their own territory.

Mr. O'Connor thought this was a monopoly by agreement, rather than by patent.

Mr. Hellmuth did not agree. It was a monopoly by patent.

### Cannot Get Lamps

Bancroft Salter, purchasing agent for the Ontario Hydro-Electric Power Commission, giving evidence regarding the purchase of lamps, stated that after competitive conditions obtained, his firm purchased from the Laco-Phillips Company because they gave satisfaction, but now they could not get lamps up to the specifications. The Dutch supply had ceased, and there were very few now available. The price of tungsten lamps before the Laco-Phillips lamp was put on the market was 55 to 60 cents. After the Dutch lamp came on the market the price dropped to 32 to 47 cents.

# Sounds Warning in Regard to Turpentine and Rosin Scarcity

## Reports From South Say That Those Who Do Not Secure Supplies at Once Are Likely to Regret It

DISCUSSING the outlook for both turpentine and rosin supplies the Savannah Weekly Naval Stores Review says:

"The American consumers of turpentine and rosins who do not avail themselves of the opportunities of the next thirty days to secure stocks of both of those commodities are apt to regret it. If there is any fact that is patent, it is that the demand now showing itself, and which must come as a result of the depleted stocks throughout the world, will bring the dealers into the markets with an avidity for supplies that will force values up to the highest level yet seen this season and, in the opinion of good judges, force them even higher than they have yet been. A bull movement can almost be confidently predicted after the month of November, if not earlier, and with fresh offerings reduced as they will then be the consumers who have failed to avail themselves of the current depression and the opportunities offering just now to get stocks will realize that the golden chance was allowed to slip through their hands. This applies with equal force as to both turpentine and rosins.

### Receipts Are Small

After the month of November, as all consumers should remember, the receipts of turpentine from the woods are very small. For the months of January, February and March they are almost negligible. The stock of turpentine in the United States is being reduced, small though it is. It is to-day approximately 110,000 casks below what it was a year ago. Two of the old cargoes shipped by the Antwerp Naval Stores Company before the war, would almost clean up all of the turpentine at the ports.

### The Danger Flag

Such a condition certainly hangs the danger flag in front of the face of every consumer of turpentine in this country. As to rosins, the stocks of them are also decreasing. The spurt in receipts at the ports is regarded as temporary, due to an early movement of the scrap crop in part, and to the unusual weather, midsummer in fall as one dealer put it. Naturally the producers are putting forth extra efforts to make stuff and there seems to be no doubt that on many farms the negro dippers have been pulling down the scrape as they went their rounds in order to increase the stuff to be shipped in. Evidences of the scrape in rosin receipts are said to have been noticeable for the past ten days. As a result of this, if the information is correct, as there seems good reason to believe, the receipts later when the full force of the scrape should be felt, are apt to be reduced below the average percentage of increase for the season.

### Demands Are Heavy

With the demand coming in as it is now, and as it promises to be from every quarter, there is but one safe conclusion to draw, that the demand will be considerably in excess of the fresh supplies, that the drafts on the already decreased reserves will begin to be distinctly noticeable, and that values will advance. When the upward movement comes, after the next few weeks, it may come with the same suddenness that has marked some of the other upward movements of this season, going much higher before the consumers have had a chance to get their breath. It behooves them all to study the situation as to supplies and demand, remembering what they have already seen this season, and to be governed by the dictates of sound business judgment and not by a feeling of bitterness against

# To Manufacture Cutlery on a Large Scale

## Remington Arms Union Metallic Cartridge Company, Inc., Plans to Place Goods on the Market Early Next Year, Says Announcement of Vice-President

THE Remington Arms Union Metallic Cartridge Company, Inc., of Bridgeport, Conn., Canadian branch, Windsor, Ont., is busy with plans for the manufacture of cutlery on a large scale and expects to have goods on the market early in 1920. It is understood that all kinds of cutlery will be made from pocket knives to razors. In connection with the new project, the company has secured the services of Carl W. Tillmanns, who was superintendent of the Valley Forge Cutlery Co. at Newark, N.J., for the past three years, and Albert H. Willey, formerly sales manager of H. Boker & Co., of New York.

The official announcement regarding the company's plans is contained in the following letter sent to jobbers:

**Letter to All Jobbers**

"Gentlemen:

"For more than a year we have been developing plans, and for some time have been equipping and creating an organization for the manufacture of cutlery, but naturaly preferred deferring advising our jobbing friends of this contemplated addition to the Remington line until the time was opportune to announce our ability to take care of orders. Unfortunately it is impossible to prevent more or less information concerning such new and large enterprises from becoming public property, and having learned of more or less gossip among the trade, we take this opportunity to give you accurate information rather than have it reach you in a garbled state.

"A very careful investigation of the cutlery industry as it exists at present has been made not only in this country but abroad, and our survey of the general situation influenced us in our decision to engage in the manufacture of cutlery.

"Equipment, tools and dies for the economical production of a highly specialized product will be entirely new and of the most modern type that the engineering resources of our organization can develop.

"We take pleasure in announcing that Messrs. C. W. Tillmanns and A. H. Willey, both of whom have long and thorough experience and a wide knowledge of cutlery, will play important parts in the designing, production and marketing of our new product, and that it is our intention to adhere to the previous well-known policy of this company in selling our entire product through the jobbing trade.

"The Remington line of cutlery will not be ready for the market until some time during 1920, and we shall announce later when our production shall have reached a point to enable us to solicit your business on the new product.

"Yours very truly,

"The Remington Arms Union Metallic Cartridge Co., Inc.,

"(Signed) C. L. Reierson,

"Vice-president."

# 1920 May See Greatest Demand for Automobiles and Equipment World Has Ever Known

## Whole Situation Centres Around Production and Settling of Labor Problems—Big Auto Show Planned for Montreal in January

Arrangements are well under way for the holding of the Montreal Automobile show from January 17 to 24. Plans for the gathering as well as matter pertaining to the general outlook of the auto business were discussed at a meeting of the members of the Montreal Automobile Association. Ray W. Sherman of New York was present and spoke of conditions. Importance attaches to the proposed show because of the intensive methods that wil prevail in the future regarding the distribution of motor cars.

While no fewer than 1,600,000 cars, it is claimed, will have been produced by the close of 1919 the tendency for next year and the output will depend a great deal upon the trend of labor and material. It is fully expected that there will be a return to more normal state as far as labor is concerned, and also with regard to material production. If the unrest can be settled and production increased, next year should see the greatest output of automobiles and equipments the world has ever known.

In the course of his remarks, Mr. Sherman pointed out the necessity and desirability of having strong grouped organizations working more effectively to the various ends desired, by members of the trade. There were many things which could be furthered by them such as the building of good roads, which will increase the sales of automobiles when these roads are available, and also help transportation generally, profiting the farmer in a particular sense, as a buyer.

J. Chandley Smith, Shelburne, N.S.—Please inform me where I may purchase a lock cutter for cutting locks in wooden hoops?

These may be procured from Mack and Co., Rochester, N.Y.—Editor.

Child's Hardware, Matheson, Ont.—Where can we procure supplies for the Manhattan lamp?

Rochester Lamp Co., 120 Church St.; Gowans, Kent and Co., Ltd., 16 Front Street E., both of Toronto.—Editor.

### CANADA TACK AND NAIL CO., LIMITED

The Canada Tack and Nail Co., Limited, Hamilton and Morrisburg, Ont., has just issued a catalogue listing staple lines of hardware tacks and shoe findings. The catalogue contains twenty-five pages and is profusely and attractively illustrated. Readers of HARDWARE AND METAL, who desire copies, may obtain same upon request.

### COMMERCIAL TRAVELLERS' ASSOCIATION

Continued from page 42

Fraser, R. T. Hunter, M. P. Malone, D. C. McKeon, C. P. Rason, John Stoneman, P. A. Sommerville and H. G. Wright.

The following boards were all elected by acclamation: Kitchener Board, W. J. Moody and F. S. Urstadt; Kingston Board, W. H. Graham and J. E. Singleton; Guelph Board, Adam Taylor, vice-president, and T. H. Gommell, director; Brantford Board, J. H. Hamilton, D. J. Waterous; Montreal Board, W. Williamson; Winnipeg Board, A. C. Merrett, vice-president, and A. E. Rowland, director; Vancouver Board, F. W. Sterling, Robt. Stewart; Ottawa Board, J. H. Laurie; Brockville Board, F. L. De Wolfe; Peterboro' Board, W. J. Hopwood.

The scrutineers of the ballot are H. C. Clearihue, John H. Kenney and Walter Madill.

The result of the ballot will be declared at the annual meeting in St. George's Hall, Saturday, December 27th.

Northern Oilfields, Limited, capital $1,000,000, head office Toronto, plans to prospect for oil and gas.

# THE CLERKS DEPARTMENT

## He Made Thinking Pay Big Dividends

### Henry L. Doherty, Once a Newsboy, Lifted Himself to the Presidency of a Corporation Capitalized at $150,000,000 —Straight Thinking Success Secret, He Says About Getting on in Business

"YOU will do some begging to get your car service back again" was what Henry L. Doherty told the citizens of Toledo on Monday of this week after he had ordered every street car on the civic system removed. This action was taken as a result of a battle that is on between the city and the company.

Doherty, it might be inferred from the above, is somewhat of an autocrat. On the contrary his friends say he is not, but that his aim is to give the public good service at a reasonable price.

The Toledo affair is only one in which Doherty has figured. The story of this multi-millionaire who began life as a newsboy is told in "Success" by O. O. McIntyre as follows:

**Clear Thinking**

Clear thinking always pays dividends! This is the home-made axiom upon which Henry L. Doherty has lifted himself to the presidency of a $150,000,000 corporation. And by the same token he became the largest independent producer of refinable oil in the world, the owner of two hundred public utilities scattered over twenty-three states, and a scientist and inventor knows the world over.

Henry L. Doherty is a shining example of what the clever-thinking American youth can accomplish without a college education or a parental pull. He literally hoisted himself from poverty to affluence by a simple process of clear thinking. How he accomplished this amazing transformation forms one of the most interesting epochs in the history of America's golden opportunities.

**Started as a Newsboy**

At ten years of age, Mr. Doherty was a newsboy in the streets of Columbus, Ohio, where he was born. His father died, and the newsboy became the head of the family. Even in this tender period he began to see the value of clear thinking.

He was making more money than most newsboys in town; but as he grew a bit older he saw drab prospects ahead, and so, at a great sacrifice, he went to work in a gas plant at about half his newsboy salary.

He had decided his career long before he made the change. He wanted to do things with steam and electricity—these two great forces had always interested him. His vision was large. In the glare of the blazing retort at night, his face smeared and hands blackened by coal and grease, he had his dreams. He pictured supplying power to great cities. He pictured directing street cars that would carry people to and from their daily toil. And his fellow-workers—older than the serious-minded boy—prodded him for his preoccupation when he was not shoveling coal in the furnaces.

He could not go to school and be a breadwinner, but he knew what he could not succeed without education. Many boys would have considered the outlook as hopeless. It would appear that young Doherty must always remain a worker in the ranks.

**From the Word to the Thing**

But he was proving then that thinking pays dividends. He began to study the gas catalogues that were discarded in the office of the gas plant. He went from the word to the thing. He mastered English. He read Thackeray and Dickens, and, incongruous as it may seem, one whole summer he carried a volume of Shakespeare with him to work.

From the gas catalogues he acquired his technical education. The fact that this education was thorough is proved by the fact that his scientific inventions have been honored with endorsements by scientific societies both here and in Europe.

Step by step he mounted the ladder. A chronology of his achievements show his development:

At twenty, he was a gas engineer.

At twenty-five, he was managing a public-utility plant.

At twenty-seven, he was manager of a syndicate of such properties.

At thirty-four, he was head of a concern of his own.

At forty, he was head of the Cities Service Company.

At forty-seven, he controlled two hundred public utilities, was the largest independent producer of refinable oil in the world and a recognized scientist and inventor.

**Have Never Seen Him Angry**

To-day Mr. Doherty is forty-eight years old, and believes that he has just reached the turning point to bigger things. He believes that in proportion to a man's vision, just so in proportion will be his success—provided always that the man backs up his vision by clear, straight thinking. Nothing, Mr. Doherty believes, is impossible for the young man who is willing to fight his way from the bottom to the top and is able to recognize the important turning points as they arise.

Ability to make correct decisions kept him on the upward trail; but, at times, he had to discard high collars and stiff shirts for overalls and a pick. Too many young men, Mr. Doherty believes, want to take a short cut to success—and he does not believe that there is a short cut.

Another attribute to which he believes he owes much of his success is his good humor. His associates have said that they have never seen him angry.

**Lives in the Business Section**

When working in the Columbus gas-plant, Mr. Doherty developed a taste for fine music. When other boys went to the melodramatic thrillers, he attended musical concerts. To-day music is his recreation. In his home on the lower tip of Manhattan Island—incidentally, he is the only man of large affairs who lives in the financial section of New York—he has a huge pipe-organ.

All his business life he has gone like a shot for the thing that was hard, important and vital. Cracking hard nuts has proved a fascinating game.

Mr. Doherty is not a system man. He believes more in method—and above all he believes in thinking straight and clear. From his talks with his employees—and there are more than forty thousand of them—the following phrases have been culled:

Given the will to learn, life and industry are better than wealth.

By force of will make your work yield pleasure to you.

Good humor is absolutely essential to good health.

The man who is opinionated or ill-tempered or prejudiced does not try to think straight, but seeks only evidence to bear out his already formed opinions.

Get a man to believe in you, get the public to think a certain way, and you have unloosed a dynamo of power.

Never give orders—give instructions.

The greatest dividend in human life is happiness.

I do not believe that brains count so much as inspiration and the determination to do things.

Mr. Doherty is a mogul for work—hard work. To him it is the joy of life. He relishes it as one relishes a hobby. It gives him health and good appetite, he declares.

---

**IT'S ALL IN THE STATE OF MIND**

(The following verses were given to the editor of "Trench and Camp" by a lieutenant-colonel of the British army, who said he caused a copy to be placed in the hands of every soldier under his command.)

If you think you are beaten, you are,
If you think you dare not, you don't,
If you think you'd like to win, but you think you can't,
It's almost a "cinch" you won't.
If you think you'll lose, you're lost,
For out in the world you find
Success begins with a fellow's will—
It's all in the state of mind.

Full many a race is lost
Ere even a step is run,
And many a coward fails
Ere even his work's begun.
Think big, and your deeds will grow,
Think small, and you'll fall behind,
Think that you can, and you will,
It's all in the state of mind.

If you think you're outclassed, you are,
You've got to think high to rise,
You've got to be sure of yourself before
You can ever win a prize.
Life's battles don't always go
To the stronger or faster man,
But soon or late the man who wins
Is the fellow who thinks he can.

---

### SOUNDS WARNING

Continued from page 72

high prices that are beyond control.

**Transient Conditions**

Consumers are apt to be misled by the present depression of prices. This is purely the result of passing condition, of which the dealers have availed themselves, particularly the cessation for the time being of steamship connections with the north, and the longshoremen's strike upsetting the foreign movement out of New York. These are transient, not permanent, reasons that can be used to force the market down for a time.

# Urges More Co-operation

## St. John, N.B. Man Believes Merchants and Their Clerks Have Much in Common and Can Work Together to Their Mutual Interests

P. H. BUTLER, of St. John, N.B., publisher of "The Clerk," the official organ of the St. John Hardware Clerks' Association, writes to HARDWARE AND METAL as follows:

"The retail merchant, the jobber and the manufacturer, all are firm believers in associations. We have only to read the accounts of their meetings, conventions and lectures to see what a great help the associations are to them all, personally and collectively.

If the employees of these merchants could have an organization like their employers have, with the same objects in view (all working together for their mutual benefit), it must bring up the standard of efficiency in employees.

The merchant has at his command everything to make him a good merchant. The clerk has to receive his knowledge and training from the mistakes he makes, and what reading matter the employer cares to pass on to him. Often the merchant is so busy that he forgets it is as important that the clerk should know all there is to know about his stock as it is for the merchant to know. This was brought to notice very prominently when hearing an address by the well known business expert, Mr. Stockdale. He said that manufacturers' representative would spend days explaining the selling points of his line of goods to a buyer, but after the goods were bought they were placed on the shelves and the salesman had to find out for himself all the information necessary to talk intelligently about them to the customers. This is where an association of clerks can be a great help, both to the clerk and the merchant.

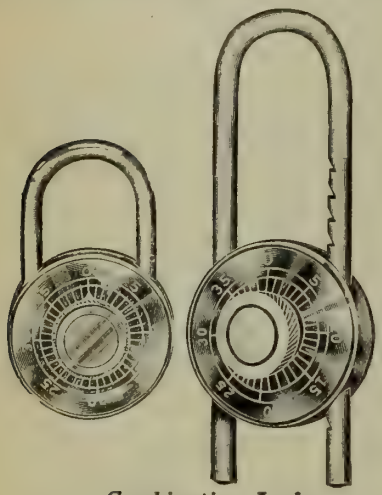
The manufacturers could have their representative address a meeting of clerks where he could talk up the goods he had sold the employers, questions could be asked, and a great deal of information could be gained that would be impossible otherwise. Take for instance a paint company's representative, he could come down in the spring, address a meeting of the clerks, give advice, give examples of methods used by merchants in other cities and create an interest in paint that would have a good effect on the men who were selling it.

Then there is the local end of it. Addresses could be given from time to time by the leading merchants. This would enable the merchant to make clear his wishes, views, and give a chance for the hearers to ask questions and receive information that the merchant might otherwise overlook. From experience it has been found that the average clerk is just as anxious to get on in the world as the merchant is to have a good paying business.

When we get down to fine points, the interests of the merchant and the interests of the clerk are pretty much the same, one cannot get along without the other. A contented bunch of clerks, all loyal to their employers, and doing all they can to make their pay bigger by selling all they can to enable their boss to give them more pay is what we all would like to see. It should be remembered that if we've got a hill to climb it isn't going to be climbed unless we climb it together. Unquestionably one of the biggest and best ideas of this day and age of new movements is the association movement. It is the big thing in creating co-operation and good feeling, together with efficiency. Practically all wide-awake organizations of the country are doing something to promote the welfare of mankind and to create and develop happier living conditions.

With these thoughts in mind, the St. John Hardware Clerks' Association was formed, free from ulterior motives—because the interests of the employer and employee are mutual; also, free from affiliations—because of the fact that while the value of muscle may be standardized, it is impossible to standardize the value of brains. They are having the good will of all the St. John merchants, and if all the associations that are being formed all over Canada amongst clerks draw up a clear and intelligent account of their aims and objects and present them to their employers at the time of forming their association, the employer would be a big supporter of the movement. Show the merchant that the clerk is alive to the needs of the day as much as he is, that there is as much need for the clerks to have an association as there is for him to have one. His association is to make him a better merchant, the clerk's is to make them better clerks. If every clerk does his best for the boss, the boss ought to do his best for the clerk.

Chapin in St. Louis "Republic."

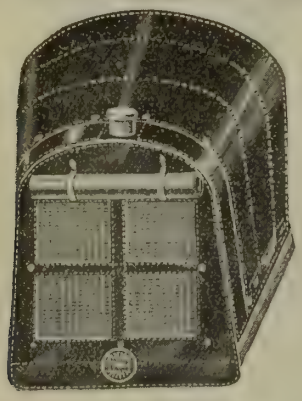


*Her eight-hourday*

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### COMBINATION LOCK



The Steen Combination Lock which is being put on the market by the Canada Cycle and Motor Co., Ltd., Weston, Ont., is a bicycle lock for which the following claims are made. That it operates on the same principle as the combination of a safe and is therefore safer than the ordinary style of lock, and has the further advantage that no key is required. The lock is well finished and is guaranteed for a year.

*Combination Lock*

### RADIATOR COVER

The Atlas radiator and combination radiator and hood covers manufactured by the Atlas Specialty Mfg. Co.,, 18 East Twenty-fourth Street, Chicago, are constructed, it is stated, with one-piece detachable curtain which may be used to cover either upper or lower half, right or left side of radiator front. The manufacturers claim the cover is especially desirable on cars where there is a lack of space between headlight brace and radiator as the curtain is detachable. While driving during extremely cold weather the lower half may be covered. Carburetor and manifold may be protected by adjusting the curtain to cover side on which they are located. The cover is attached to the car by means of metal clips. The hood cover is well reinforced at all places subject to excessive wear, and is fastened to the radiator by means of glove buttons, and is tailor finished. It is stated that it is weatherproof and will not crack.

*Radiator Cover*

### PRESSURE REGULATOR

The automatic safety pressure regulator manufactured by the Automatic Safety Tire Valve Corporation, 1765 Broadway, New York, insures tires, it is claimed, against prematurely going to the junk man. The manufacturers claim that it is designed to do away with all guesswork in the matter of inflation. They state that fifty to seventy-five per cent. of all tire troubles are due to improper inflation and that proper inflation means a real saving. The regulator consists of an adjustable spring mounted valve. This is screwed onto the existing valve without changing the latter in any way. The air supply is connected to the top of the device and when the pressure inside the tire reaches the point set on the adjusting collar the regulator whistles and all surplus air is emitted through a hole in the side. The regulating collar is notched so that it cannot accidentally slip out of adjustment.

*Regulator*

### KAN-U-KATCH

Kan-U-Katch, a new game for boys and girls, is being up on the market by Ferdinand Strauss, Inc., 7 West 22nd St., New York. The manufacturers claim it is the brightest and cleverest game invented in many years, and that it can be played either in or out of doors. Also that it leaves no path of destruction behind it; amuses the children and gives them healthful exercise without soiled or torn clothes or bruises. It may be played by as many as desired. The device consists of a wire receiver fitted with a shooting attachment in the handle. A hollow featherweight ball is shot, not thrown, from a receiver by means of a trigger which releases a steel spring.

*Kan-U-Katch*

### TIES AND HALTERS

Brown Company, Essex, Ont., is offering to the trade a line of ties and halters under the name of Brown brand. Details regarding the new line will be furnished upon request.

### BLUE CROSS STOCK REMEDIES

The Anton Mickelson Co., Ltd., of Winnipeg, has completed arrangements for the marketing of an extensive group of farm and stock remedies, all of which go to comprise what is to be known as The Blue Cross line. The line contains twenty different articles, which are most in demand as farm and stock remedies. The Blue Cross line will be marketed through the Western hardware trade in cartons as an improvement over the previous method of selling such goods in bags. Each carton will bear a distinctive label indicating its relation to the complete Blue Cross line.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

THERE still continues a decided upward tendency in most lines of hardware this week and many important changes have taken place. The continued industrial disturbances are causing serious shortages in some lines, but jobbers as a body are generally trying to steady prices by selling at the official quotation, but claim it is necessary to charge a premium where they have to buy indirectly and at a higher figure.

Dominion ammunition shows a decided advance which averages about 20 per cent. Step-ladders show a new and higher price of 3 cents per foot; steel at the mills advanced $3.00 per ton and this affects sheets. Chicago spring butts and floor hinges, etc., are 10 per cent. higher. Valves and cocks are also marked up.

New prices are now circulating for spring delivery of bluestone and are quoting at 11¼ cents per pound. Churns have followed other lines of woodenware and an advanced price of 6 per cent. is noted. Red Star roofing also shows an advance. New prices are now available for sheet iron and galvanized ware, copper and enamelware, etc., which we reported to have advanced last week. Barb wire is 25 cents per spool higher than former prices. Cattle leaders, vises, coil door springs and coke tin plates are quoting at much higher figures, while auger bit prices have been withdrawn.

# MONTREAL MARKETS

MONTREAL, Nov. 13—There are a large number of important changes this week and nearly every one is of an advancing character. Dominion ammunition records an advance all around of 20 per cent., and is immediately effective. This applies to shells and rifle and sporting ammunition and new lists are being prepared. Cattle leaders are marked higher. Vises are up. Three-In-One oil is also advanced. Coil door springs, door checks, spring and ordinary hinges and some of the common butts are revised upward. Bench axes are much higher in price. Auger bit discounts are withdrawn and the advances made are of material consequence, some of them being around 25 per cent. Centre and expansive bits are marked up. Coke tinplates are marked higher and Canada plates are also on a new high price basis. Fuel oil has advanced to 9¼c. Galvanized sheets are marked higher. Spelter is higher and the lead market is firm, with an advance probable in the immediate future. Sheet zinc is very firm and may go higher. The nail and bar markets are very firm and advances are being talked of in some quarters.

Altogether, the question is one of shortages these days. All elements, retailers, jobbers and manufacturers are deeply concerned over the outlook for supplies for the immediate and distant future. Business conditions, aside from this, are remarkably active.

### *Ammunition Advances Twenty Per Cent.*

Montreal.

AMMUNITION. — An advance of twenty per cent. is made effective this week for ammunition of Dominion manufacture. This increase applies to shells and to metallics, both sporting and rifle, and is the result of increased material and labor costs. New lists are being prepared and these will probably be made to apply to all of Canada.

### *Bottle Oil Higher; Springs and Casters*

Montreal.

OIL, SPRINGS, CASTERS. — Advances are made for Three-In-One oil. New prices are as follows: Small, per doz., $1.20; large, $2.45; factory, $4.80, and handy cans, $2.45. The new resale prices on these are, respectively, 15, 30, 60 and 30c each.

Torrey door springs are marked up and are selling at $3.75 per dozen.

Various makes and grades of furniture casters are marked higher, the advance approximating 10 per cent.

### *Cattle Leaders and Vises Move Upward*

Montreal

CATTLE LEADERS, VISES.—An increase has been made effective for cattle leaders. The No. 33 are now $1.65 per dozen and the No. 32, $1.45. Diamond vises are marked up to $6.25 each, the previous price being $5.

### *Centre and Expansive Bits Marked Higher*

Montreal.

CENTRE BITS, EXPANSIVE BITS. —New high prices are announced for centre bits. The increase is about 20 per cent. For ½ in. to 1 in. the new price is $3.30 per doz.; 1⅛ in., $4.40; 1¼ in., $5.25; 1⅜ in., $6.15; 1½ in., $7; 1¾, $9.20, and 2 in., $10.80.

Clark's expansive bits are marked higher, No. 1 now being quoted at $20.40, and No. 2 at $29.40.

Steer's Patent No. 1 are priced at $46.50 per dozen, and No. 2 at $37.20.

### *Butts Are Higher; Door Springs; Checks*

Montreal.

BUTTS, CHECKS, HINGES. — Advanced prices are in effect for various butts. No. 800 are now on a plus 12½ per cent. basis; No. 838, net list; 804, 5 per cent. discount, and No. 840, 7½ per cent. plus. Heavy strap, heavy tee, light strap and tee are also changed to 5 per cent. discount from the list.

Yale and Towne door checks are marked up 10 per cent. Bommer hinges,

10 per cent., and Chicago spring butts, 5 per cent.

## *Bench Axes Advance; Auger Bits Higher*

**Montreal.**

AXES, AUGER BITS.—Bench axes follow in the wake of regular chopping axes, already reported, and the former are advanced as follows: No. 2, per doz., $20; No. 3, $22.50; No. 4, $24.50, and No. 5, $27.

Discounts on auger bits are withdrawn, and the new prices record a very material advance over previous prices.

## *Coke Tinplates Up; Canada Plate Firm*

**Montreal.**

TIN AND CANADA PLATES. — Prices are higher on cokes. The advances here is $1 per box. Canada plates are very firm, too, although there has, as yet, been no revision. This may come at any time.

## *New Wares Lists Out; Stoves Very Firm*

**Montreal.**

WARES AND STOVES.—As was reported last week, prices advanced on various wares. New discounts are to be found in the current quotation pages of enamelled ware, nickel plated copper wares, copper-bottom goods, galvanized and retinned and plain stamped and pieced tinware. The markets are firm.

Stoves are still a big seller and the market undertone is very firm. Tendencies are still of an advancing nature and declines are out of the question as a probability.

## *Fuel Oil is up to 9¼c; Gasoline; Coal Oil Held*

**Montreal.**

OILS, GASOLINE.—The market is steady for both coal oil and gasoline, no quotable changes being made. Motor grade gasoline is 33c per gallon and coal oil is quoted at 22-25c per gallon, according to quality.

Fuel oil is in fair demand and the price has been advanced from 8½-9¼c. This is in quite heavy demand in the larger plants that are equipped to make use of it.

## *Twines Are Firmer And Rope is Held*

**Montreal.**

ROPE AND CORDAGE.—Prices have materially advanced on various twines and it is difficult to keep tab on the fluctuating, but ever upward tendencies. Seine twines are particularly dear, the base prices now ruling at over 80c, wholesale. This is influenced by unfavorable weather conditions, it is said.

The rope market remains unchanged, with small orders the feature, and prices are unchanged as follows: Pure manila, base, 31c; Beaver and British manila, 27c, and sisal, 23½c.

## *Nails Are Firming; Some Say May Advance*

**Montreal.**

NAILS AND WIRE.—Tendencies are of an advancing nature and the market is very firm. Prices, as yet, are held at the $4.75 basis for both steel wire and cut varieties. There is a steadily heavy movement of various sizes to the trade.

The basis for wire is without change, the base price of $5 per cwt. remaining firm.

## *Galvanized Sheets in But Prices Higher*

**Montreal.**

SHEETS AND PLATES. — Prices have gone higher on galvanized sheets. This is due to the bareness of supply, what stocks there are being much reduced and a keen bidding for supplies has been in progress. A quantity of English sheets were received this week and these are being readily bought up. Revised prices are to be noted herewith.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 65 |
| 12 gauge | 5 95 | 6 60 |
| 14 gauge | 6 00 | 6 75 |
| 16 gauge | 6 10 | .... |
| 18-20 gauge | 6 55 | 6 60 |
| 22-24 gauge | 6 60 | 6 65 |
| 26 gauge | 6 70 | 6 75 |

| English Standard— | | |
| 28 gauge | .... | 9 50 |
| 26 gauge | .... | 9 25 |
| 24 gauge | .... | 8 65 |
| 22 gauge | .... | 8 30 |
| 18 and 20 gauge | .... | 8 10 |

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *A Decided Firmness Marks Bar Market*

**Montreal.**

IRON AND STEEL.—The outlook is for a firming of the market. Just whether this will come at once is not defined, but the undertone is strong and advances, if they come, will not come altogether as a surprise.

IRON AND STEEL

| | |
|---|---|
| Star finish machinery steel | 3 30 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |
| Sleigh shoe steel | 3 75 |
| Tire steel | 3 95 |
| Toe calk steel, per 100 lbs. | 4 65 |
| Band steel | 3 75 |
| Harrow tooth steel | 3 90 |
| Mining tool steel, per lb. | 0 22 |
| Black Diamond too steel, per lb. | 0 22 |
| Black Diamond cast steel, lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *Steady Sales Made of Lead Products*

**Montreal.**

LEAD PRODUCTS.—The market conditions are firm. Advances are within the range of possibility, and particularly if pig lead advances again, and as some anticipate it will. The movement is quite steady, most buyers purchasing only as they require, however.

Zinc sheets are very firm and an advance is not unlikely.

| | |
|---|---|
| Lead pipe | 0 12½ |
| Lead waste | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | |
| Lead traps and bends | 15% |
| Lead wool, lb. | 0 13 |
| Lead sheets, 3 to 3½ lbs., sq., ft., lb. | 0 12½ |
| Lead sheets, 4 to 8 lbs., sq. ft. | 0 09½ |
| Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra. | |
| Solder, guaranteed, lb. | 0 37½ |
| Solder, strictly, lb. | 0 33 |
| Strictly, commercial, lb. | 0 32 |
| Solder, wiping, lb. | 0 30 |
| Solder wire (8 gauge)— | |
| 40160 | 0 36 |
| 45-55 | 0 38¾ |
| 50-50 | 0 41¼ |
| Zinc sheets, casks | 0 17 |
| Do., broken lots | 0 18 |

## *Better Undertone On Old Materials*

**Montreal.**

OLD MATERIAL.—While there is still room for improvement, the old metal market may be reported as a healthier one. Cast iron has been moving more extensively and is firmer, but without quotable change. The immediate future is anticipated to be better, as far as actual movement is concerned.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | .... | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |
| Bicycle tires | .... | 0 03½ |
| Automobile tires | 0 03¾ | 0 04 |
| Yellow brass | 0 10 | 0 11 |
| Red brass | 0 15 | 0 16 |
| Light brass | 0 07½ | 0 08½ |
| Scrap zinc | 0 05½ | 0 06 |
| Light copper | 0 15 | 0 15¼ |
| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | 15 00 | 16 00 |
| Malleable scrap (ton) | 15 00 | 16 00 |
| Pipe scrap, ton | .... | 8 00 |
| Stove plate, ton | 20 00 | 21 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | 23 00 | 24 00 |

## *Spelter is Firmer; Lead, Tin Unchanged*

**Montreal.**

INGOT METALS.—The features of the week are few. Spelter is firmer, and lead continues firm, also. Prices on the various other ingots are unchanged,

COPPER.—Not much sale for this, the market being quiet and price held unchanged at 25c.

TIN.—Still fluctuating in price at London, advances some days and declines on others. The quotation remains at 58c.

LEAD.—This is still strong and is held at 8¼c per lb. Some look for an advance of price in the immediate future.

SPELTER.—Prices are higher again on this and the quotation this week is 10¼c per lb.

ANTIMONY.—Quite without feature of any kind, the price remaining at 10½c.

ALUMINUM.—Remains at 34c per lb., with a fair, seasonable business being transacted.

PIG IRON.—Some weakness has been reported from the States, and which some find it difficult to interpret. Local market is unchanged at $50 per ton for small lots.

# TORONTO MARKETS

TORONTO, Nov. 13—A decided upward tendency in numerous lines of hardware is noted this week and many changes have taken place. The coal strike, although not so severe as was anticipated, did not help the previous situation any and during the season there were few centres or distributing points that did not have a strike of some of the trades. In order to attain cheaper prices it is necessary for labor and production to go hand in hand. Owing to so many disturbances this has not been the case, hence producers are forced to raise their prices to meet the extra costs of marketing their product and it has been noted that an advance in one commodity affects the cost of some relative and thus the advance all along the line. Present indications point to a general shortage in many of these lines for next year's delivery.

Dominion ammunition shows an important advance of 20 per cent.; stepladders are higher and are quoting at three cents per foot above former prices; steel at the mills has advanced $3.00 per ton, which also affects sheets; Chicago spring butts, floor hinges advance 10 per cent. Valves and cocks are also higher. Red Star roofing and tin plates are also higher.

## 20 *Per Cent. Jump on Dominion Ammunition*

**Toronto.**

DOMINION AMMUNITION shows a considerably higher price this week, which approximates 20 per cent. This advance is no doubt due to the considerable number of strikes both in Canada and the United States. It is also claimed that general labor conditions have not been a small factor in bringing this to a head, as a number of manufacturers state there is a very great shortage of labor. The new prices on Dominion ammunition are as follows: Rim Fire BB caps, 10 per cent.; C.B. Caps, 22 short, 22 long, black or Lesmok, 5 per cent.; 22 short, smokeless, 15 per cent.; 22 long, smokeless, 5 per cent.; 22 long rifle, black and smokeless advance 10 2½ per cent. on the list; all other rim fire cartridges advance 10 per cent. on list. Central fire cartridges, pistol sizes, advance 62½ per cent. on the list. Central fire sporting advance 90 per cent. on list; shot cartridges same as ball; brass shot shells, disc, 15 per cent.; primers advance 62½ per cent.; empty paper shells advance 15 per cent.; loaded shells, Crown, 32½ per cent.; Sovereign, Regal and Canuck 20 per cent.; blanks, rim and central fire, add 50 per cent. on the list; bullets, add 67½ per cent. on the list.

## *Valves and Cocks, Etc., Show a Higher Price*

**Toronto.**

VALVES, COCKS, etc., show an advance. The market on this commodity has been firming for some time, and in some cases the demand has been greater than the supply. The fact that European buyers are not in the market yet has surprised many, but it is thought this is due directly to the great difference in our exchange, and when this is adjusted there will be a large demand and prices are expected to soar much higher. Prices are as per our current quotation page.

## *New Prices on Copper and Enamelware*

**Toronto.**

COPPER AND ENAMELWARE advance. The new discounts are now ready and are being sent out, as stated by HARDWARE AND METAL last week. These discounts, although an advance on present prices, are more of a revision an account of the discount allowed in the spring being too general. Manufacturers claim there was an unreasonable difference between some articles in the same line of goods, in some instances, and the new discounts will adjust and put all lines on a more even basis. Some of the new discounts are as follows: Scotch grey ware 50 and 5 per cent.; Colonial, Imperial, Pearl and Premier, 20 per cent.; Diamond, 10 per cent.; White ware, 45 per cent.; Sheet Iron ware, 20 per cent. advance; Frying pans, 30 per cent.; Steel spiders, net list; Fire shovels, list plus 20 per cent. Steel sinks, galvanized and painted, plus 15 per cent.

## *3c Per Foot Higher Are Step and Extension Ladders*

**Toronto.**

STEP AND EXTENSION LADDERS show an advance and may be accounted for, it has been said, by the scarcity of lumber. It has been said that the quantities of lumber cut are away below the average of other years, and the situation does not seem to be clearing very speedily. It is well known that as each year rolls by lumber men are having more difficulty inducing men to leave the cities and large towns, in order to go to the woods and work on the same scale of wages, in fact larger wages are offering, and frequently premiums are offered to some of the most capable men, in order to induce them. The new quotations are as follows:

| Step Ladders— | Per foot |
|---|---|
| Perfect, 6 to 16 ft. only | $0 37 |
| Hercules, 4 to 10 ft. | 0 39 |
| Hercules, 12 to 14 ft. | 0 44 |
| Faultless, 4 to 10 ft. only | 0 35 |
| Ontario, 4 to 10 ft. only | 0 32 |
| Shelf Lock, 4 to 8 ft. only | 0 27 |
| Gardener, No. 1 | 0 24 |
| Do., No. 2, bolted | 0 27 |
| Dominion, No. 3 | 0 28 |
| Do., No. 4, bolted | 0 31 |
| Single and Fruit Picking— | |
| 10 ft. to 16 ft. | 25c ft. |
| 18 ft. to 20 ft. | 28c ft. |
| F.o.b. Toronto, Hamilton, London. | |
| Roped and Straight Extension Ladders— | |
| 20 to 32 ft. | $0 39 |
| 36 to 40 ft. | 0 32 |
| 44 ft. | 0 35 |
| Over 44 ft. | 0 45 |

F.o.b. Toronto, London, Montreal, Stratford.

Fire ladders up to 32 feet are twice the price of ordinary extensions. Over 32 ft. are supplied with supporting legs at three times the price.

## *Chicago Spring Butts Higher by* 10 *Per Cent.*

**Toronto.**

CHICAGO SPRING BUTTS show advance of 10 per cent. This is in accordance with other builders' hardware new prices, which has been greatly affected by the recent steel strikes in various centres of Canada and the United States.

## *Red Star Roofing Shows Advance*

**Toronto.**

ROOFING—Red Star 2 and 3 ply, show a higher price this week and are quoted at 2 ply, $1.75 per roll, and 3 ply at $2.05.

## *Cotton Rope and Twine Still Hold Firm*

**Toronto.**

COTTON ROPE AND TWINE have as yet not shown any further advance over the one reported a few weeks ago. Cotton has been very active on the different market, and if prices continue to advance anything like their recent figures there is little doubt but a change may be looked for. Owing to the season of the year may also have some influence in keeping the price down, as the real busy season for cotton rope is practically over for this season, and therefore, the demand is not so brisk, and as all prices hinge on supply and demand, it is thought this has a direct tendency in steadying the present quotations.

## *Oakum Unchanged; Prices Remain Firm*

**Toronto.**

OAKUM is holding firm. At one time a reduction would not have surprised some, but the market is said to be a fairly strong one now on account of conditions, especially in the cotton market, which has made such numerous advances of late. As it stands now, however, there is a good demand for oakum and prices are expected to remain unchanged for some time to come.

## *Manila Rope Still Unchanged*

**Toronto.**

MANILA ROPE. — Some American firms show further advances in manila rope this week, and manila fibre is reported at an advanced price. This has not affected the Canadian market yet, and it is not definitely known just what

the future will bring. No one predicts immediate higher prices, and lower prices are not looked for at present, although it has been the recent tendency to weaken. Pure manila is quoting firm at 31 cents per pound, base.

## *Corrugated Sheets Firm and Scarce*

**Toronto**

CORRUGATED SHEETS.—The same conditions practically cover corrugated sheets that prevail in the flat sheets, and jobbers are trying to keep the prices as steady as possible; no change is immediately looked for. The following are quotations now going:

| Corrugated Sheets— | Per 100 square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Iron Bars and Steel Advance $3 Per Ton*

**Toronto.**

IRON BARS AND STEEL show a general advance at the mills of $3.00 per ton. Most jobbers are quoting the former base as yet, and may continue till the end of the week, according to their stocks and future deliveries. It has been stated that most jobbers as a body are trying to steady the market, and as $4.25 is the official base price for instance, on common bar steel, the artificial market may require a temporary advance till conditions become more normal. However, if the mills permanently advance their product owing to conditions it will be necessary for jobbers to buy on a higher market and naturally their price will likewise advance. The prices quoting at present are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | 4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Sheets and Plates Scarce, Black Advances*

**Toronto.**

SHEETS AND PLATES.—Black sheets are reported to have reached a higher figure, which is not surprising, owing to the large number of stocks that are entirely exhausted, and it is claimed that it is almost impossible to stock this and galvanized sheets as shipments are used up before there is a chance to stock in warehouses, and very little has a chance to trickle through to the stockrooms. There seems no available stocks to offer at the mills and most sheets coming through are odd batches which have been lying around the mills. Some manufacturers expected to be able to put a certain quantity on the market to relieve the situation, but so far it is said the stocks that are coming are only the means of a hand-to-mouth trade. The following are the quotations going at present.

| BLACK SHEETS— | | |
|---|---|---|
| 14 gauge | 5 45 | 6 00 |
| 16 gauge | 5 60 | 6 50 |
| 18-20 gauge | 5 15 | 6 55 |
| 22-24 gauge | 6 20 | 6 60 |
| 26 gauge | 6 30 | 6 65 |
| 28 gauge | 6 45 | 6 75 |
| 3-16 inch plate | 4 90 | 5 25 |
| ¼-inch boiler plate | 4 50 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

| GALVANIZED SHEETS. | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | 8 90 | 9 50 | 8 00 | 9 25 |
| U.S. 28 | 8 30 | 9 90 | 7 60 | 8 55 |
| U.S. 26 | 7 90 | 8 50 | 7 30 | 8 20 |
| 22 and 24 | 7 70 | 7 90 | 7 15 | 8 00 |
| 18 and 20 | 7 50 | 7 70 | 7 00 | 7 80 |
| 16 | 7 25 | 7 50 | 6 85 | 7 60 |
| 12 and 14 | 7 05 | 7 25 | 6 70 | 7 35 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Lead and Zinc Show No Change*

**Toronto.**

LEAD AND ZINC.—Although tin has fluctuated some, the prices on these commodities have remained steady. The demand has been very good and a fair volume of business is offering. Although the labor unrest has been showing some signs of improvement, the general effect is still being felt and prices, it is claimed, are more likely to advance, if continued disruptions continue to take place. The following are some of the prices quoting:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 8 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

| | | |
|---|---|---|
| Solder, guaranteed, lb. | 0 35½ | 0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Scrap Materials Are Very Quiet*

**Toronto.**

SCRAP MATERIALS are very quiet and a very uncertain feeling prevails. No one cares to sell, or yet do they wish to buy. It is expected European buyers are out of the market for this year, at least, for any quantities. The coal strike coming so soon after the steel strike has also had a quieting effect on scrap material of all kinds, and very little is going into the United States. Manufacturers have not as yet come into the market for round lots of old scrap, and this would indicate that they have had ample supplies on hand to take care of their requirements. Prices are as follows:

| DEALERS' BUYING PRICES | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 12 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 18 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 07 |
| Overseas, lumbermen's rubber boots | .... | 0 05 |
| Bicycle tires | .... | 0 01½ |
| Automobile tires | .... | 0 02 |

## *Boiler Tubes Continue Scarce*

**Toronto.**

BOILER TUBES continue to be scarce. The shortage of skelp is being felt, also labor conditions. Mostly a jobbing business is being done, and manufacturers have no encouragement for immediate future deliveries. It is stated that any tubes that do come to hand are quickly absorbed and the demand does not seem to be weakening. The prices remain firm and are as follows:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Tin Spelter and Lead Firmer*

**Toronto.**

INGOT METALS.—There continues to be a very strong position in the ingot market. All eyes are still on the European situation, and are watching for the financial side, especially as there is such a wide difference in the relative value of different moneys.

COPPER remains unchanged and the prices quoting at present are 25 cents per pound. The price is reasonably steady with a fair demand offering.

TIN shows somewhat stronger this week. The demand still continues and jobbers find it difficult to supply the trade offering. The quotations that are now going are 60½ to 61½ cents per pound.

SPELTER.—As predicted last week spelter is showing a higher price and is holding quite firm. The demand continues brisk, and owing to some there is a shortage reported and sales are rather delayed. The price now quoting is 10½ cents per pound.

LEAD.—The stocks of lead continue small. A slightly higher price is noted which is holding firm. The demand continues very good. The quotation is 8½ cents per pound.

ALUMINUM continues to be rather quiet, with small stocks on hand. The price quoting remains at 34 cents per pound.

ANTIMONY.—There is not much movement in antimony at present, the demand having temporarily stopped. The price quoted is 11½ cents per pound.

# LONDON MARKETS

LONDON, Ont., Nov. 13—Higher prices are still in order this week. Industries have been held back and production curtailed so much that the demand in most cases now exceeds the supply. Among the many advances noted are stove boards, quoting at 20/5% off list, shaft splices $4.50 dozen, stove lining, shelf brackets and steel butts. Snow shovels are moving, also ash sifters, lanterns and globes. Cow chains are active, as well as Stewart horse-clippers. White lead in oil remains at a firm price and a good volume of trade is reported. Putty shows a very seasonable demand and it has been noted that the better grades show an excellent demand regardless of the difference in price.

Generally speaking, business continues unusually good here. All hardware stores are very busy and most of them could sell much more than they can get delivery for. Collections are very good.

## *Furnace and Snow Shovels Active*

**London, Ont.**

SNOW SHOVELS are reported quite active. To-day's selling prices are as follows: Prince or No. 20 at $7.88 per dozen; Queen or No. 30 at $8.75; King or No. 40 at $10.50; Moose or No. 50, $13.13 per dozen.

FURNACE SCOOPS AND LONG HANDLE, $8.75 per dozen.

## *Lanterns and Globes Firm and Unchanged*

**London, Ont.**

LANTERNS AND GLOBES are beginning to move with an increasing demand from day to day, and although the price is firm, no change has as yet been noted. Lanterns, long and short globes, are quoting at $12.50 per dozen. Lantern globes, long and short pattern, are as listed below: 1 dozen to the case, $1.10 per dozen; 3 dozen to the case, $1.05 per dozen; 6 dozen to the case, $1.00 per dozen.

## *Stewart Horse Clippers Show No Change*

**London, Ont.**

STEWART HORSE CLIPPERS remain unchanged with a fair demand offering. They are still selling at $12.00 each.

## *Cow Chains Are In Good Demand*

**London, Ont.**

COW CHAINS are beginning to move more briskly on account of the cold weather being near at hand. The discount quoting is 20% off the list.

## *Active Demand For Ash Sifters*

**London, Ont.**

ASH SIFTERS are reported to be selling in good quantities, and the seasonable demand is very brisk. The wood sides are selling at $3.00 per dozen; Banner at $3.15 each, and Rocker at $4.75 each.

## *Stove Boards Now Selling 20/% Off List*

**London, Ont.**

STOVE BOARDS.—The market for this line shows a very seasonable demand and they are moving in good quantities. The higher price comes under the recent advance listed in wares, and the present new discount is 20 and 5 per cent. off the list.

## *Shaft Splices Up To $4.50 Per Dozen*

**London, Ont.**

SHAFT ENDS have shown a new price this week with a fair demand noted. The new price is $4.50 per dozen.

## *Stove Lining in Packages Higher*

**London, Ont.**

ASBESTOS STOVE LINING in packages has moved to a higher level, and is now quoted at No. 3 at $2.00 dozen packages; No. 6 at $3.00 dozen packages.

## *Higher Prices Named For Shelf Brackets*

**London, Ont.**

SHELF BRACKETS advance. This is in accordance with advances made on the many lines of steel goods. The demand for this line is brisk and a fair quantity are moving. Following is the new net list:

No. 140 x 3 x 4 in., 90c pair; 4 x 5 in., $1.20; 5 x 7 in., $1.80; 6 x 8 in., $2.25; 7 x 9 in., $2.70; 8 x 10 in., $3.15; 10 x 12 in., $4.50; 12 x 14 in., $6.75; 16 x 18 in., $15.00.

## *Strap and Tee Hinges New Net Prices*

**London, Ont.**

STRAP AND TEE HINGES show an advance. This list is in compliance with HARDWARE AND METAL'S notification that prices were withdrawn, and the following is the new list:

| Strap. | HEAVY. | Tee. | Doz. Pair |
|---|---|---|---|
| 4-inch | $3 00 | 4-inch | $2 55 |
| 5-inch | 3 70 | 5-inch | 3 20 |
| 6-inch | 4 00 | 6-inch | 3 60 |
| 8-inch | 5 40 | 8-inch | 4 10 |
| 10-inch | 9 60 | 10-inch | 7 30 |
| 12-inch | 11 90 | 12-inch | 11 60 |
| 14-inch | 13 60 | 14-inch | 11 80 |
| Strap. | LIGHT. | Tee. | |
| 3-inch | $1 00 | 3-inch | $1 00 |
| 4-inch | 1 20 | 4-inch | 1 10 |
| 5-inch | 1 40 | 5-inch | 1 30 |
| 6-inch | 1 70 | 6-inch | 1 50 |

## *New Net Prices Tee and Strap Corrugated Hinges*

**London, Ont.**

CORRUGATED STRAP AND TEE HINGES.—The new net prices on these are as quoted below:

| Strap, No. 935— | | Tee, No. 937— | |
|---|---|---|---|
| 4-inch | $1 63 | 4-inch | $2 00 |
| 5-inch | 2 25 | 5-inch | 2 75 |
| 6-inch | 2 90 | 6-inch | 3 40 |
| 8-inch | 4 65 | 8-inch | 3 65 |
| 10-inch | 7 10 | 10-inch | 8 45 |

## *Advance Shown On Steel Butts*

**London, Ont.**

STEEL BUTTS.—A higher advance is noted in steel butts, and quotations are as follows: 804, discount 5 per cent.; 800, add to list 12½ per cent.; 840, add to the list 7½ per cent; 810 and 814, add to list 25 per cent.; 842, net list.

## *Manila Rope Quiet; Unchanged*

**London, Ont.**

ROPE MANILA AND SISAL, also cotton, remain unchanged. Owing to the lateness of the season the demand has not been brisk, although very seasonable. Manila rope has been reported to have advanced in the United States, although no advance has been reported here as yet. Some of the prices quoting are: Pure manila, 31 cents per pound base; British manila, 27 cents; New Zealand hemp, 27 cents; sisal, 23½ cents.

## *Nail Supply Limited; Prices Remain Firm*

**London, Ont.**

NAILS.—An extra good demand is at present noted for nails. The supply, it is stated, is rather limited, and naturally a very firm price prevails. The strikes which have been so prevalent no doubt are being felt by all mills, not only in the production end, but from a sales point, as quantities of Canadian nails have been shipped into the United States this season. Wire nails are quoting at $4.70 base.

## *Window Glass Still Continues Scarce*

**London, Ont.**

WINDOW GLASS remains firm at the new price previously quoted. Owing to the boom in the building line this year, the demand is very brisk. It is not definitely known if Belgium will be able to compete in the near future or not. It has been reported wages in their plants have been raised 20 to 30 per cent. This being the case, it more than likely affects the glass price. Quotations are: single diamond and double diamond, 25 per cent. off the list; cut lights, 10 per cent.

## *Putty Unchanged; Good Demand Noted*

**London, Ont.**

PUTTY.—A good seasonable demand is noted for putty, which still continues firm with no price changes noted. Following are the quotations:

Standard, 100-lb. drums, $6.80 per 100 lbs.; do., 25 lb. drums, $7.05. Pure, 100-lb. drums, $9.30 per 100 lbs.; do., 25-lb. drums, $9.55.

## *White Lead in Oil Unchanged; Price Firm*

**London, Ont.**

WHITE LEAD IN OIL.—The demand continues very favorable, and prices remain firm and no higher prices are noticed for the present. Pure is quoting at ton lots, $16.35; less than tons, $16.70; Elephant, tons, $16.95 per 100 lbs; less than tons at $17.30.

## *No Change on Turpentine*

**London, Ont.**

TURPENTINE continues in very good demand, and as some have stated, are fortunate to be able to get it so readily. Owing to labor conditions and other factors, turpentine stocks are much below the regular. European countries are very short of supplies, but owing to the longshoremen's strike, money market, and other disruptions, much of the supplies intended for them have been diverted to some of our markets, and even then, at times there is a noticeable shortness. The present quotations are as follows:

1-barrel lots, $2.45 imperial gallon; 2 to 4 barrel lots, $2.44; 5-gal. lots, $2.55.

## *New Linseed Oil Prices Are High*

**London, Ont.**

LINSEED OIL.—New prices are now being quoted. It is not known generally just how this price will be in the near future. The Western crops did not yield their regular amount this year, and at present no change is expected for a few months, at least until the Argentine crops are heard from. Quotations are as follows:

| | Raw. | Boiled. |
|---|---|---|
| 1 to 2 barrels, gal. | $2 45 | $2 48 |
| 3 to 5 barrels, gal. | 2 44 | 2 47 |
| 6 to 9 barrels, gal. | 2 42 | 2 45 |

Less barrels, add 10 cents gallon.

# WINNIPEG MARKETS

WINNIPEG, Nov. 13—Price changes during the week again show prices in all lines still advancing and no prospect of any declines for some time. Among the lines affected this week appear enamelware, tinware, sheet iron ware, galvanized ware, stove and pipe, elbows, Japanned ware, churns, brass butts and barb wire. The majority of the above lines represent an increase of 10 per cent., while barb wire shows a straight advance of 25c per spool.

Present indications point to a general shortage in many of the hardware lines for next year's delivery, owing to the strikes which have materially reduced the output, so that dealers would be well advised to place their requirements early, so as to insure sufficient time to make deliveries.

Business in practically all lines continues brisk, particularly in Christmas goods, skates, hockey sticks, sleighs, etc.

## *Wares Show 5 to 20 Per Cent. Advance*

**Winnipeg.**

GALVANIZED TIN, COPPER AND SHEET IRON WARES.—This week's price changes in enamelware, tinware, galvanized ware, sheet iron ware, etc., show an increase of from 5 to 20 per cent., according to the lines affected, and bring prices back to about the former high levels. Manufacturers report that the increases are directly due to increased labor as well as the present shortage of raw materials. To-day's ruling discounts on the various lines are as follows:

Enamelware—Scotch Grey, 46—12½%; Pearl or Imperial, 15—7½%; Canada, Diamond, list, plus 7½%; White, 30—15%; White, decorated, list, plus 42½%.

Japanned ware, list, plus 32%; japanned ware, white, list, plus 42%.

Stamped ware, plain, 30—20—2½%; do., retinned, 20—20—7½%.

Pieced ware, list, plus 43%; do., with copper bottoms, list, plus 62½%.

Sheet iron and steel ware, list, plus 32%.

Acme fry pans, 22½% off list.

Stove shovels, list, plus 31%.

Galvanized ware, list, plus 40%.

Heavy Galvanized pails, list, plus 31%; do., light, list, plus 42%.

Light galvanized tubs, list, plus 42½%; do., heavy, list, plus 31%.

Stove boards, paper lined, 15—10—10%; do., wood lined, 15%.

Stove-pipe elbows, heavy, list, plus 32½%; do., light, 6 in., $2.40 doz. net; 7 in., $2.55 doz. net.

Coal hods, japanned, list, plus 46½%; galganized, list, plus 61%.

## *Brass Butts Advance 15 to 20 Per Cent.*

**Winnipeg.**

BRASS BUTTS.—Following a further advance by the manufacturers, new prices have been named on brass butts and show an increase of from 15 to 20 per cent. over former quotations, due particularly to wage increases. To-day's prices are given as follows:

| Brass Butts— | Narrow | Middle | Broad |
|---|---|---|---|
| 1 inch., doz. pair | $0 48 | $0 57 | $0 60 |
| 1¼ inch., doz. pair | 0 69 | 0 72 | 0 81 |
| 1½ inch., doz. pair | 0 78 | 0 90 | 1 02 |
| 1¾ inch., doz. pair | 1 02 | 1 14 | 1 26 |
| 2 inch., doz. pair | 1 20 | 1 30 | 1 56 |
| 2¼ inch., doz. pair | 1 68 | 1 95 | 2 25 |
| 2½ inch., doz. pair | 2 10 | 2 55 | 3 00 |

## *Churns Increase Approximately 6%*

**Winnipeg.**

CHURNS.—Following advances in other lines of woodenware which have been steadily moving up, new prices are now effective on churns. New prices show an increase of approximately 6 per cent. over former quotations. New discounts now in effect are 15 and 5 per cent., making net prices on the various sizes as follows:

Churns, Favorite or Daisy, No. 0, $7.25; No. 1, $7.25; No. 2, $8.05; No. 3, $8.90; No. 4, $10.50; No. 5, $12.90 each.

## *New Prices Shown For Bluestone*

**Winnipeg.**

BLUESTONE.—Prices on bluestone have been established for spring, and bookings will be accepted at 11¼c lb., f.o.b. Winnipeg.

## *Barb Wire Up 25 Cents Per Spool*

**Winnipeg.**

BARB WIRE.—Prices have advanced during the week 25c per spool on all lines, based on new prices now prevailing at the mills, which have been in effect for some time past. Stocks of barb wire are reported low compared to former years, and no doubt next spring will see a big shortage in this commodity. To-day's ruling prices are as follows:

Lyman, 4 point, f.o.b. Winnipeg, $5.25 spool.
Gliddin, 2 point, f.o.b. Winnipeg, $5.05 spool
Baker, 2 point, f.o.b. Winnipeg, $4.95 spool.

## *New Axe Prices Are Quoting*

**Winnipeg.**

AXES of all kinds advance during the past week, the increase being approximately $1 dozen on unhandled axes, and $1.50 dozen on handled axes. New prices going into effect at once.

## *Linseed Oil Prices Continue Unchanged*

**Winnipeg.**

LINSEED OIL prices continue firm on the local market, and from present indications no change is anticipated, while a heavy demand is expected to take care of the spring business. To-day's prices are confirmed as follows:

Raw linseed oil, barrel lots, $2.75 gal.
Boiled linseed oil, barrel lots, $2.78 gal.

## *Turpentine Prices Remain Unchanged*

**Winnipeg.**

TURPENTINE.—Prices show no change during the week, the market holding very firm with no immediate prospects of a change. Stocks are reported normal with only a limited demand. To-day's prices are confirmed as follows: Barrel lots, $2.65; half barrel lots, $2.68 gal.; 5 gallon lots, $2.70 gal.; 1 gallon lots, $2.70 gal.; plus the usual extras for containers.

# PITTSBURGH MARKETS

PITTSBURGH, Nov. 13.—The coal strike inaugurated Saturday, Nov. 1, found nearly all the steel mills with stocks of coal equal to from two to four weeks of consumption, and the Government distributing authorities determined to avoid, if at all possible, any idleness of steel mills on account of the coal strike since that might lend encouragement to the iron and steel strike. No immediate occasion was found for furnishing coal to steel mills. The railroads seemed to be moderately well supplied, so that some of the commandeered coal, involving all that was in transit, was available for distribution, and this has been given to public utilities, as having the first claim. The Connellsville region was not affected, its coal production, apart from that converted into coke in the region, amounting to several hundred tons a week. The strike did not affect other non-union regions either, and a few small union mines remained in operation, while after the first day of strike there were occasional instances of union miners returning to work.

At the end of last week, the seventh of the steel strike, production of steel was at the rate of nearly 70 per cent. of the rate just before the strike. Production during October averaged 60 per cent. or a shade less. At the height of the strike, the third or fourth day, production was down to about 50 per cent. of the pre-strike rate. As the strike is now waning rapidly it is important to remember that before the strike production was at considerably less than capacity. From the middle of May there had been a continued increase in production, but just before the strike production was still only between 80 and 85 per cent. of rated capacity. This restriction in output was due in part at least to scarcity of labor, though the manufacturers also held labor inefficiency responsible.

Up to date the restriction in steel production by the strike has amounted to about three weeks of production at the rate before the strike, hence at the lowest estimate the entire restriction is going to exceed a month's production. The great problem with steel manufacturers now is not the strike, which is disappearing with sufficient rapidity, but production after the strike, as in many mills working organizations have been greatly impaired in efficiency and it is likely to be a long time before everything is working smoothly again. During the strike the customers of steel mills are very sympathetic and accommodating, but after the strike they are likely to become more or less peremptory in their demands, probably having the viewpoint that with the strike over they ought to be getting better service than ever.

The Wheeling district is still closed practically tight, but operations are increasing at a fairly good rate in the Mahoning Valley. All the blast furnaces in the valley were closed, but now about one-third as many are operating as before the strike and steel production in the valley is up to 20 or 25 per cent. Three of the four large steel interests at Youngstown are now shipping some steel, while the fourth does not seem to be shipping any, although it is making some pig iron and steel ingots.

Values of pig iron have stiffened sharply. In some districts there is regular trading, showing almost constantly advancing market prices. In the Pittsburgh Valley district there is relatively little trading and market prices are not strictly defined. The producers, in the main, are indisposed to sell, and all or most of them are holding back, evidently with the idea that as price advances are unpopular it is better to let somebody else put the market up, and then simply come in and sell at the market price. Buyers willingly pay sharp advances over the March 21 schedule for such small prompt lots as they must have, and while prompt iron does not usually make the market, if advanced prices for prompt become well established it may be found easy, later on, to sell for first quarter or first half at those prices.

Foundry iron was $26.75, valley, by the March 21 schedule. A fortnight ago it sold at $28.75 for first quarter, but lately there are no sales for next year. Prompt lots have brought up to $33, valley. Malleable was sold at $30, valley, to a customer, who wanted foundry, which the seller could not furnish, and the $30 price on the malleable was regarded as representing a concession. Basic, which was $25.75 by the March 21 schedule and has been in light demand lately, has sold at $29 for prompt. Prompt lots of Bessemer have sold successively at $28.50, $29 and $29.50, the March 21 price having been $27.95. As closely as the market can be quoted it stands as follows: Bessemer $28.50 to $29.50; basic, $28 to $29; malleable, $30 to $31; foundry, $30 to $33, all f.o.b. valley furnaces, freight to Pittsburgh being $1.40.

Furnaces claim their costs readily justify these price advances, but consumers are not convinced. However, it seems clear that the advance is not all to be attributed to the iron and steel strike, perhaps not even the major part of the advancing tendency. Pig iron was advancing somewhat before the strike, and the strike has not affected the merchant furnace production of pig iron nearly as much as it has the operation of steel mills with their blast furnaces. One factor in the pig iron market undoubtedly is that last spring and summer consumers were striving to reduce their stocks, and carried the process too far, as is usual in such cases. Furnaces blew out until production was below consumption, and then came the strike. That the strike is not in itself responsible for all of the present shortage in pig iron is shown by production reports, to the effect that production of pig iron by merchant furnaces was 90 per cent. as heavy in October as in August. The strike curtailment, however, was more than 10 per cent., being probably fully 25 per cent., production having been increased up to the time of the strike, September 22.

—Hanny in St. Joseph News-Press.

**The only kind of striking needed just now.**

# The Need for Paint Never Grows Less

## On the Contrary It Has Steadily Increased With Advancing Prices of Lumber and Other Materials—Big Business to be Had Among the Farmers—Farmer's Wife is Also a Good Customer

THE need for paint never grows less. On the contrary, with the steady advance of building and other materials its need has increased. The man who postpones the painting of his property now finds that he has been penny wise and pound foolish, because every material is constantly undergoing the process of deterioration or elimination. His woodwork will decay unless protected, metals will rust and corrode and brick and cement surfaces will disintegrate.

These facts offer talking points for the dealer that cannot be denied, and the merchant who goes after business aggressively and makes the most of his arguments, can cash in on profits the year round.

### In Class By Itself

No other material has played so important a part in conservation as paint. On the other hand, its use, while general, is comparatively small to what it should be for the manifold benefits that result. Neglect is partially responsible for this, as well as a limited knowledge on the part of the public as to what paint really does.

The knowledge that paint should be used when property becomes shabby is general, and painting is usually for improved appearance rather than preservation. The important function of paint is to protect. In doing so, it also carries with it the ability to beautify through diversity of color.

This seems especially true in many rural districts, although it is just as true of many urban districts.

Business to-day is best where the farmer is. He has quit saying "it won't work" and has been transformed from a pessimist into an optimist.

His buying power has increased, and he offers a rich market now, and will indefinitely.

The paint man who lives in a farming community must get after the farmer business. The farmer in his prosperous days is a user of paint, but unless the merchant keeps right after the trade many farmers seem inclined to go to the mail order houses for it. It is an undisputed fact, though, that a good home merchant can get the business if he will go after it.

### Rural Directory

Every merchant should have a rural mail route directory, and, in carrying on his campaign for fall business, send personal letters to the farmers in his trade territory. He should also carry advertising space in the local newspapers which has the largest circulation among the farmers.

Advertise house and barn paint. Tell the farmer about paint especially adopted to use on his outbuildings, his farm implements, his wagons, his automobile, etc.

The farmer's wife, it will be found, will be a customer of the dealer who bids for her patronage. Tell her of the brighter home idea.

### Give Them Information

Tell them all about the paints you sell, what they will do and how best to apply them. Your help will be appreciated.

### How It Works Out

What is there in the idea that painting is an expense? Of course it costs more to paint now than formerly, but it likewise costs more to repair or replace. There always has been a wide margin between the cost of repairs and the cost of painting. Paint is and always will be cheaper than repairs, which in a majority of cases are made necessary by lack of paint. It is not possible to approximate what this difference is with any degree of accuracy, but it represents a substantial margin in favor of paint.

### Would Be Saved

If moisture finds its way into wood, causing the porch, roof, sills, or other parts to decay and need replacement, the proper and timely use of paint would have prevented this expense, and it is easily demonstrated which course would represent the smallest cost. And finally, the surface repaired or replaced has to be painted. Why not paint first, rather than both repair and paint later?

### Lose Sight of This

The mind is so continually blinded by the erroneous idea that paint is only a beautifier, that it almost wholly loses sight of its preservative properties. A wooden surface that is kept painted so that moisture cannot penetrate will resist decay, and at the same time will always be attractive to the eye.

### A Colossal Sum

The yearly property depreciation of this country represents a colossal sum. Paint could and would save a large portion of this if those responsible realized the wonderful preservative and protective properties of paint.

The individual who deposits his savings in a bank critically investigates its soundness. In fifteen years he expects to receive his accumulations plus interest. Often

### THE NEED FOR PAINT NEVER GROWS LESS

Continued from page 84

these savings are invested in a home. Paint is seldom used. In fifteen years the cost of this neglect represents a depreciation of $500. The loss is just as real as if the bank had returned his original savings, minus $500.

**Learn the Value**

Through years of educative advertising and advertising propaganda, people have been taught the value of insurance as a protection when the fire demon comes, and which levies destruction in a very few hours. Decay is simply another form of destruction which works with less rapidity, but just as effectively in time. In a medical sense we might appropriately designate this as "wood consumption," and the only effective remedy as paint.

**Judge by Appearances**

Property value is judged by appearance to some extent. When a real estate dealer offers a property for sale which shows unmistakable signs of neglect, one of the first things he does is to paint it. At an expenditure of $100, or perhaps less, he increases its sale value all the way from $500 to $1,000. This very forcibly illustrates the value of paint, simply from the standpoint of appearance—and no one ever thinks of what duty it performs otherwise.

**Paint Did It**

Drive into the country and note some particularly attractive and inviting looking farm house, with barns and other farm buildings in the background. Ten to one the house was in a perfect state of preservation, and bespoke its owner's thrift and upkeep through a well-painted appearance. And the farm buildings were not only in perfect repair, but painted as well.

**Indicate Prosperity**

This illustration, which draws nothing from the imagination, is characteristic to every rural community, and is a most positive indication of prosperity. Paint plays the important role in that it takes a scene, generally lacking in attractiveness, and makes it predominate in its natural setting.

Similar illustrations may be cited of suburban homes, less conspicuous perhaps, because of smaller surroundings, where one may see the commendable example of carefully painted buildings, porches, porch or lawn furniture, and even screens—all most inviting and homelike.

## Advertising Will Increase Turnover of Brushes

### Buying Public is Interested in Brushes of One Kind or Another All the Year Round and Sales Can be Increased by Timely Messages Telling About Your Stock

THERE is no tonic like advertising for increasing sales, and this holds just as true of brushes as of any other line of merchandise. If you want to increase your turnover in brushes, just arrange an advertisement and back it up with a nice window and store display of brushes and see the results. Suggestions for arranging your copy may be found in the illustration accompanying this article. Copy of this kind has produced most satisfactory results for the Mills Hardware Co., Ltd., of Hamilton. An advertisement along this line inserted every few weeks enables the firm to show a steady increase in its volume of brush sales. It will do the same for any other merchant.

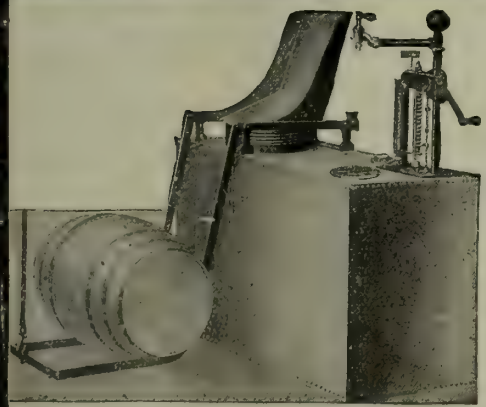
The great buying public, women especially, is interested in one line or another of brushes all the year round, and an occasional "drive" on this trade will show results and bring in some nice profits. In arranging an advertisement it is good policy to use illustrations. They have a real "pull" from a sales standpoint, and this is one of the basic principles adopted with such success by the mail-order houses. People like to see a picture of what is offered and they want to know the price. Don't forget the price and don't be afraid to show it in good, plain figures.

# Making the Most of the Xmas Gift Habit

TAKING advantage of the season of the year—when gifts are in order, many dealers increase their sales appreciably. What present could be more acceptable by the men-folk than a real, honest-to-goodness shaving brush. One that can be depended on week after week.

## BOECKH'S RUBBER SET SHAVING BRUSHES

absolutely fill the bill.



An assortment displayed in your window or on your show cases, suitably ticketed, will sell themselves. Try it—go hot-footed after the Xmas trade; why let the other fellow get it all?

Boeckh Brushes have a powerful sales argument: "the bristles can't come out."

# Says Linseed Oil Market Liable to Rapid Changes and Instability

SPECULATION, strikes, and the general unrest throughout labor circles are three causes which Mr. T. M. Ransom, of the Canada Linseed Oil Mills, Toronto, gives for the uncertainty of the whole linseed oil market. On the Argentine, Duluth and Winnipeg markets, speculation is rife and the desire of certain interests to get from under a possible loss immediately affects the markets and alters prices. Mr. Ransom admitted quite frankly that he could make no safe prediction with regard to future prices.

"If we had some commodity that was more stationary in price," said Mr. Ransom to HARDWARE AND METAL, "we could give some general idea how the thing is going, but the way the flax market has been we cannot tell how it will go."

**Above the Normal**

The opinion was expressed by Mr. Ransom that prices of May seed, for instance, were higher than they should ordinarily be. To further illustrate his point regarding the instability of the market, Mr. Ransom recalled quotations on May seed on November 8. On November 7 they closed at 442 and opened on the 8th at 441. During the day quotations fluctuated to 447, back to 441, advanced to 442, and toward the close of the day were 435.

So far as the selling price of their product was concerned, Mr. Ransom said it was just as liable to fluctuate.

"The selling price is just as liable to change," he said. "We have to quote on every individual inquiry just on the market as it is at that time. The margin of profit is so small, so far as the crusher is concerned, that we cannot afford to take any chances. Some time ago I expressed the opinion to some of my customers that they would make no mistake in ordering half their requirements, seeing how the market was, and taking a chance on the balance. Since then, the market has firmed up, but it was only a chance. It is just like a man going up to shoot at a target blindfolded; he might hit the bull's eye and he might not—the chance is, he will not."

**Shipments Delayed**

On account of the strike some time ago, shipments from the West were uncertain and often delayed; but, of late, they have been regular, and Mr. Ransom says they are now having no difficulty in getting all the seed they want from the Northwestern Canadian markets. The demand for oil, he said, was keeping up remarkably well. Jobbers tell him that they do not know where all the orders are coming from, they are coming in so freely.

"We cannot make the oil fast enough to fill the orders we are getting," said Mr. Ransom. "We are as busy as we can be. We have a large quantity of oil booked for future deliveries for both the manufacturers and the jobbers."

**Quickly Recovered**

Illustrating the effect of strikes on the prices, Mr. Ransom referred to the strike of the dock men in England. Thinking there could be no deliveries, prices went down; but as soon as the strike was over and shipments from the Argentine assured, the prices of Argentine stock advanced and the other markets followed suit.

Mr. Ransom would make no prediction with regard to future prices. So far as he was concerned, the whole matter seems to be in the lap of the gods. So long as speculation is rife and labor unrest prevalent, the condition of the flax market—and the condition of all markets—will be liable to rapid changes and instability.

# Belgium Will Only Have 10,000,000 Feet of Glass for Exportation

## Destruction of Furnaces by Germans and Big Demands at Home is Affecting the Trade—Prices Five to Six Times Above Pre-War Quotations

GODFREY LANGLOIS, Agent General of the Province of Quebec in Brussels, writes regarding the condition of the glass industry in Belgium:

It ought to be of interest to Canadian traders to know in what state of affairs the war has left the glass market in Belgium.

Canada pre-war was ranking third with Holland among the best customers of Belgium for glass—Great Britain and Japan being the largest consumers. Canada imported in:

| | Kilos of glass. |
|---|---|
| 1911 | 19,401,000 |
| 1912 | 18 892.000 |
| 1913 | 15,633,498 |

Thirty furnaces (fours) were then working and 95 per cent. of their production was available for exportation

At the present time, seventeen furnaces (fours) only are in working order after much hardship, with a production of 25 million feet.

As a consequence of German destruction in this country, Belgium's consumption is much higher than before the war; it is estimated that 10,000,000 feet only will be available for exportation.

On the other hand, for the same reasons, France, who previously manufactured her own glass, and whose demand is enormous, will for this year at least import a great part of the glass available.

The Belgian Government has put an end to the license policy by an order-in-council of the 17th of September last.

The prices of glass have become from five to six times higher than those obtaining before the war on account of higher wages and the rise of raw material as well as expensive transportation.

Here are the prices quoted for Canada by the "Association des Maitres de Verreries," f.o.b. Antwerp:

| | 4th Simple | | 3rd Simple. | |
|---|---|---|---|---|
| | Per pk. of 100 | Per pk. of 50 | Per pk. of 100 | Per pk. of 50 |
| Up to 25" .... | $51 00 | $27 00 | $55 00 | $29 00 |
| 26-40" .... | 66 00 | 34 50 | 72 50 | 38 00 |
| 41-50" .... | 73 00 | 38 50 | 80 00 | 41 75 |
| 51-60" .... | 76 00 | 40 50 | 83 50 | 44 50 |
| 61-70" .... | 79 00 | 42 50 | 87 00 | 46 50 |
| 71-80" .... | 84 00 | 45 50 | 92 00 | 49 00 |
| 81-85" .... | 89 00 | 48 00 | 97 50 | 51 50 |
| 86-90" .... | 94 00 | 50 50 | 103 00 | 55 00 |

Payment, cash on delivery without discount.

Following the the glass manufactories which are working at the present time with the number of furnaces (fours) they are able to put in working order:

Ste. Ame des Verreries de Jemappes, Jemappes, 1 furnace.

Verreries de Binche, Binche, 1 furnace.

Ste. Ame des Verreries de Mariemont, Haine St.-Pierre, 1 furnace.

Verrerie Goffe & Fils, Lodelinsart, 1 furnace.

Verrerie Desgain Freres, Lodelinsart, 1 furnace.

Verrerie du Long Bois (Mr. Chausteur), Gilly, 1 furnace.

Verrerie D. Jonet, Charleroi, Nord, 1 furnace.

Verrerie Henri Lambert & Co., Rue Pige, au Croly, Charleroi, 1 furnace.

Verreries de Jumet, Jumet, 1 furnace.

Verreries des Hamendes (L. Lambert), Jumet, 1 furnace.

Verreries Belges, Jumet, 1 furnace.

Verreries des Piges (A. Missone), Dampremy, 1 furnace.

Verreries Gobbe, Hocquemillers, Lodelinsart, 1 furnace.

Verrerie de la Marine, Jumet, 1 furnace.

Verreries de la Paix, Lodelinsart, 1 furnace.

Bennert & Bivort & Courcelles Reunies, Jumet, 2 furnaces.

**WELSH TIN PLATE HIGHER**

Welsh tin plate has again risen, being now quoted at £2 4s. 6d. to £2 5s. 0d. Prices otherwise have not moved this week in iron and steel products.

# Varnish Troubles

When varnish goes wrong the dealer who sold it usually gets a share of the blame from the buyer, although this is usually unjust.

Dealers who carry Berry Brothers' Varnishes, Enamels and Stains do not have varnish troubles. The uniform dependability of all "Berry" products makes their sale safe and easy, and the great demand for them is always growing greater.

No. 62

Liquid Granite FLOOR VARNISH Luxeberry WHITE ENAMEL

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Nov. 13.—The movement of flaxseed to the mills has not yet improved materially, but there is improvement to an extent. The price basis has improved and single barrel lots are procurable at $2.29½ per gallon. There is not as much promise now, however, of lower prices prevailing as there was a while ago, although the $2 mark, some assert, will be reached.

Turpentine is ruling with little or no change, and a steady trade is done in small quantities.

Booked orders are increasing for insecticides, and these are going to be in big demand. This market is very firm.

Putty is steady and a big seller, while white lead in oil and paint are sellers to an extent, movement being good for this late season of the year.

### *Spot Linseed Oil Selling For Less*

**Montreal.**

LINSEED OIL.—There is some actual improvement in the matter of supply, and while slight, jobbers are quoting down this week at $2.27 for raw, and $2.29½ for boiled. Of course lower prices are to be had for oil taken after the turn of the year, although $2.14 has been mentioned as the figure for March, 1920, delivery. There is considerable feeling that prices are not going to toboggan as it was thought they would, later. At any rate, the present situation is one of continued limited supplies and small quantity orders are those most welcomed.

| Raw— | Imp. Gal. |
|---|---|
| Single barrels | 2 27 |
| 5 to 9 barrels | .... |
| 10 to 25 barrels | .... |
| **Boiled—** | **Imp. Gal.** |
| Single barrels | 2 29½ |
| 5 to 9 barrels | .... |
| 10 to 25 barrels | .... |

NOTE. Owing to fluctuating seed markets jobbers generally are not quoting. The basis is decidedly nominal.

### *Turpentine at $2.35 is a Slow Seller*

**Montreal.**

TURPENTINE.—A price of $2.35 is being quoted in some circles on single barrel lots. Supplies are adequate to take care of a somewhat limited amount of business, and the trade is buying what it needs in a day-to-day manner.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 35 | 2 45 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Selling Much Putty and Price Basis Steady*

**Montreal.**

PUTTY.—Prices on putty are holding without change. The fall glazing season is about to open, and supplies are being asked for to a much greater extent than formerly. There is plenty of stock for immediate requirements, although the difficulty of getting ample supplies of linseed oil has not assisted matters.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

**Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.**

**Glaziers' putty—$1.60 per 100 lbs. advance on above prices.**

### *Movement Continued For White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—The movement of this commodity, despite the lateness of the season, has continued quite heavy. Due to the firm market for pig lead, the undertone of lead in oil has been a firm one, but, as yet, there has been no change, and for the immediate present none is indicated. Five ton lots are selling on the basis of $15.50 per 100 lbs.; ton lots at $16, and smaller quantities at $16.35.

### *Bookings Are Now to Hand For Insecticides*

**Montreal.**

INSECTICIDES.—Bookings for insecticides for the season of 1920 are coming to hand much better than they did a year ago. This is due, in part, to the fact that dealers have reduced their stocks to the minimum and are anticipating the wisdom of laying in supplies early for next year. The tendencies are firm, but no advances are anticipated at this time, say the manufacturers.

### *Activity Still For Prepared Paints*

**Montreal.**

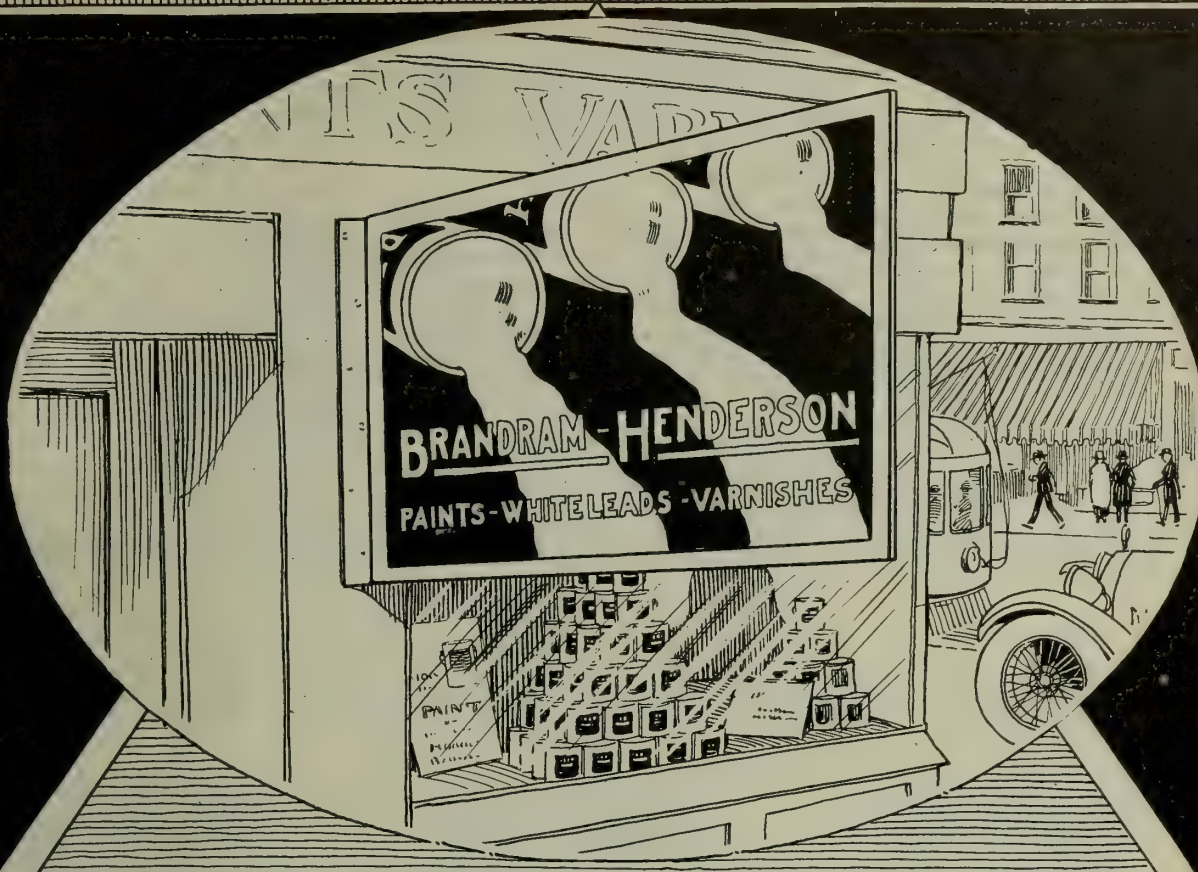
PREPARED PAINTS.—The busy season is over, but when the advanced season is considered, much paint is still going forward. In fact the time is fast approaching, it would seem, when dealers will stress the importance of using paints and specialties all through the year. Prices remain steadily unchanged

## TORONTO

TORONTO linseed oil is reported to be firming, and higher prices are looked for. The Western crops have not been up to the standard yield and there was a great scarcity of old seed before the new crop started to come in to the crushers. This week's price shows an advance over our quotations of last week of about 7 cents per gallon, while some are quoting much higher. A considerable advance would not surprise many.

It is stated that February prices exceed present quotations, which looks as if spring oil were going to be considerably over the $2 mark. Argentine and other imported seed is not expected in any quantity this season as European buyers have been very active, and it is believed most of their export crop will be shipped to European ports.

The new price which is quoting at present is $2.52 for raw and $2.55 for boiled, and is considered a very reasonable figure compared to the scarcity of seed and the strength of the seed market.



Turpentine has shown no change this week, and it is said that although European demand will not be so great this year, or perhaps for some time to come, that the Japanese have been coming into the market for considerable quantities, and this, it is believed, will more than offset the depreciation owing to the European demand, and will have a strong tendency towards keeping turpentine at a high figure.

### *Turpentine Firm; Remains Unchanged*

**Toronto.**

TURPENTINE.—Turpentine remains very firm and some changes have been noted on the Southern market, although they have as yet not affected this market. The European demand is not expected to be anything near the old figure, however it is stated the Japanese are coming in for large quantities and it is believed this will more than offset the previous demand which formerly came from Europe. Quotations are as follows:

| Turpentine— | Imp. gal. | |
|---|---|---|
| 1 barrel (barrel included) | .... | $2 45 |

# The sign that tells!

This sign has actually operated as a business-builder for every store that has displayed it—by reason of all that it stands for in quality of paint and in advertising co-operation by the makers of B-H Paint.

Let us tell you about the attractive B-H agency proposition.

"Save the surface and you save all" *Paint & Varnish*

**BRANDRAM-HENDERSON** LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

| | | |
|---|---|---|
| 2 to 5 barrels (barrel included) | .... | 2 44 |
| 5 gallon lots | .... | 2 55 |

## *New Linseed Oil Advances 7 Cents*

**Toronto.**

LINSEED OIL.—The new lower prices previously quoted on oil does not seem to be here to stay or go lower as was expected. This week an advance is noted and there is every indication of higher prices prevailing. The Western crop has fallen down considerably as far as volume is concerned and with previous shortages in last year's supply will have a tendency to strengthen, and probably advance the present price. The following is the quotation:

| Linseed Oil— | | Raw |
|---|---|---|
| 1 to 2 barrels, gal. | .... | 2 52 |
| 3 to 5 barrels, gal. | .... | 2 51 |
| 10 barrels and over | .... | 2 49 |
| | | Boiled |
| 1 to 2 barrels, gal. | .... | 2 55 |
| 3 to 5 barrels, gal. | .... | 2 54 |
| 10 barrels and over | .... | 2 52 |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

## *Glass and Putty Prices Remain Firm*

**Toronto.**

GLASS AND PUTTY.—Glass is still a very scarce article, both plate and sheet. The manufacturers state there will be no immediate relief. The money market has as yet not been adjusted and it is not generally known just how the European situation will pan out. The Belgian manufacturers, it is stated, have had to raise their laborers' wages 20 to 30 per cent. There are small quantities coming to Canada from Belgium, but the volume is not large enough, it is said, to materially affect the present market. Putty is quoted as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

## *White Lead in Oil Firm; Unchanged*

**Toronto.**

WHITE LEAD IN OIL.—A good demand is reported for white lead, the market as yet showing no change. The present quotations are $16.35 per 100 pounds and $18.50 for B. B. genuine.

## *A Good Demand is Reported For Paint*

**Toronto.**

PAINT.—Manufacturers state they are well satisfied with the business offering; some state this is the best season they have had for some time, and think this will continue as the consumer is becoming more educated to the proper use of paint. At one time the idea was prevalent among consumers that a painter was required, in order to attain satisfactory results,. This commodity has been so extensively advertised, as well as improved, that it is becoming more staple every day, and there are very few householders who are not continuously in the market.

# Montreal Court Explains Term F.O.B.

AN important ruling was made in Montreal last week which is of much interest to the trade. This refers to the commercial expression "f.o.b." and makes a ruling as to the significance of this term.

The seller at his expense under this term "Free on board" means that the seller at his own expense places the goods on the car or vessel which is to carry them from the point specified and that the buyer takes the risk onwards; at the same time the goods must, at destination, be in conformity with the conditions of sale or they may legally be rejected.

The matter developed out of an action of a Montreal and Quebec City firm. Masson Sons, Ltd., of Montreal, sued E. Coulombe, of Quebec, for the sum of $1,460, being the value of a carload of tomatoes shipped to Quebec to the order of the defendant. The shipment is f.o.b. Montreal, and when the tomatoes reached Quebec defendant complained they were not in the condition he stipulated in his orders. He advised the plaintiff by telegram accordingly, but they persisted that he was responsible to them for the price agreed upon. Defendant, knowing that tomatoes would be a complete loss if shipped back to Montreal, sold them at once in Quebec for the best price he could obtain, deducted 5 per cent. of his commission on the sales, and forwarded the balance, $868.07 to plaintiff, who however refused to accept the cheque and sued the defendant for the price agreed upon when the order was given by defendant, namely, $1,460.

Plaintiffs based their claim on the fact that the tomatoes were in good condition when they delivered them "f.o.b. Montreal," and that from this point defendant was liable. On his side the defendant submitted that the "good condition" mentioned in his order referred to the state the tomatoes were to be in at Quebec.

There was no delay in transportation, and the main question for adjudication turned on what interpretation was to be given, in the circumstances, to the expression, "f.o.b. Montreal."

### The Court's Ruling

Mr. Justice Panneton said there was a divergence of opinion on the meaning to be given to the commercial expression, "f.o.b." In England, the weight of jurisprudence was to the effect that the object sold was at the risk of the purchaser from the moment it reached the point of delivery "free on board." A decision was reported, however, which gave to these letters a limited sense—that was to say, the vendor put the merchandise sold at the place indicated "free of all such costs as cartage, wharfage," etc., and it was the latter sense that had been adopted by the jurisprudence of the courts in the United States. In the case of the Dominion Lumber Company vs. Auger, confirmed by the Court of Appeal, the following definition was given to the letters, f.o.b.; "They mean that the seller, at his own expense, shall place the goods on the car or vessel which is to carry them on account of the buyer, at whose risk they are from that time."

"It is necessary," said Judge Panneton, "to distinguish delivery from acceptation of the thing sold. The carrier is the agent of the purchaser, but his mandate is limited to the transportation of the goods. The question to decide is whether it was the thing sold which was delivered at Montreal. According to the proof, the tomatoes were to be of first quality (No. 1), and in good condition. They were neither the one nor the other. If. in the case of the sale of goods by correspondence, as in this instance (the order was given over the telephone), the rule was adopted that inspection had to be made at the place of delivery when that place was not the destination, it would be necessary that the buyer, who resides in another city or country, should have an agent to make an inspection of the merchandise at the place where the goods were placed on the car or vessel. This would be impracticable.

### Understanding Not Vague

"When a merchant in Montreal sells goods to a merchant in Quebec he knows and understands very well that the buyer can only know the condition of the goods when they have reached their destination. If the vendor has correctly delivered the thing sold, the buyer becomes the proprietor immediately. If he delivers something else—for instance if he has sold goods of first quality and delivers goods of second quality, there is no delivery of the things sold. The buyer can refuse them only when they arrive at their destination.

In this case the court concluded that the attitude of the defendant was correct, and that, although the tomatoes were sold f.o.b. Montreal, the defendant could not refuse them until they reached Quebec, and that his refusal was proper under the contract, inasmuch as the tomatoes were not in the good condition that the contract specified. For this reason the judgment of first instance was reversed, and it was held that the defendant's offier of $868.07 was sufficient in the circumstance.

There was a silght variation of the order as to costs, part of which were against defendant because he did not pay into court the amount he admitted he had in hand in payment for the tomatoes.

# BABBITT KNOWLEDGE

The manufacturing knowledge at the back of

# HARRIS HEAVY PRESSURE

is born of first hand experience. The facilities for securing the finest materials, the faculty of alloying them, and the skill necessary are Canada Metal Co.'s secrets, the full value of which is appreciated by all users in the excellent service given.

**For these reasons hardwaremen can recommend**

## Harris Heavy Pressure

**On All General Machinery Bearings.**

## MARBLE'S Reliable Rifle Sights

**MARBLE'S FLEXIBLE REAR SIGHT**

Stem is not rigid, held by strong spring in base. Does not break when struck. Spring permits sight to give and instantly brings it back to correct shooting position. Two discs furnished. List price, $3.30.

**MARBLE'S IMPROVED FRONT SIGHT**

Makes accurate shots possible at any range without stopping to adjust rear sight. Ideal sight for snap shooting. Choice of ivory or gold bead. 1/16, 3/32 or ⅛ inch. List price, $1.00.

**SHEARD FRONT SIGHT**

Gold bead. Shows up well in dark timber—will not blur. Shows same color on all objects. List price, $1.65.

**It reaches the Buyers** **It's a Business-Getter**

**Rates and Information on Request**

---

## Big Demand For Your Fall Trade

Now is the time to sort out your stock and make arrangements to have a full range of models and sizes of the various.

## Automobile SKATES

The Skate with Aluminum Tops

ready for the big demand which has already commenced.

We use the same special high-grade steel as is used in points of greatest strain in the best motor cars.

Our special carbonizing process renders the blades hard as glass on the outside and enables them to take and hold a very keen edge, while on the other hand they have a tough core which prevents brittleness.

This line means bigger and better business for you. Write for particulars.

# They're Asking for Glidden Paint

They know Glidden Green Label Varnishes from experience. As soon as the Glidden Company announced the addition of Glidden Endurance Paint to its line of products, they wanted that same good quality in paint and *now they're asking for Glidden Paint.*

It's the same with housewives. They were familiar with Jap-a-lac. The way this well known Household Finish performs about the house is known to them all. *Now they, too, are asking for Glidden Paint.*

Glidden advertising is introducing this new Glidden product and the quality can be depended upon to bring repeat business.

Are you prepared to get the profit on these initial orders as well as the repeats that are sure to come? If not, act now! Write for complete data, prices, etc.

**The Glidden Company, Limited, Toronto, Ontario**

*Branch office at Montreal, Quebec*
